Farmer Seed & Nursery Co.
Faribault, Minn.

For full description and special offer of these apples see page 126.
To Our Friends and Customers:

It is with pleasure that we present herewith again our new annual catalog and invite its careful perusal.

For the past twenty-four years we have been in the business of supplying as well as growing Reliable Improved Varieties of Seeds and Trees. That our endeavors to give our customers the very best quality always, have been appreciated, our constantly growing circle of satisfied patrons is the best proof. By procuring our carefully bred Northern Seed and Tree stock, you get the benefit of our many years of practical experience as seed growers and scientific farmers.

Living in the country and farming our own land, which is situated in a section specially favored as to climate, enables us not only to give a constant personal supervision to the growing of our seed and nursery stock and thus insuring the highest quality obtainable but we can also afford to sell fresh seeds and healthy plants and trees, first hand at the very lowest prices and we guarantee satisfaction.

With every year the demand increases for the highest grades of field seeds, and the seeds which we recommend, our Farmer Brand grades of clover and grasses and the Pedigree Varieties of grain, corn and other field seeds are by very best obtainable, especially for the northwest, as they are grown here, are therefore acclimated and are most certain to produce the highest results. As to Garden and Flower Seeds, we keep pace with every betterment in those lines and many valuable, new varieties will again be found in our catalog. Those of our seeds which we do not grow ourselves are raised under our supervision from selected seed stock, which is carefully tested in our own trial grounds, and we believe our stock of Flower and Vegetable Seeds are the finest the world possesses.

Owing to the rapid increase of our Nursery Department more space has been devoted to it in our catalog and a much larger acreage planted with it on our farms than heretofore; our aim is to grow only stock which has proven to be hardy and adapted for the Northwest and we shall do our utmost only on thriving and healthy plants and trees which will give the best satisfaction everywhere.

With the assurance that your orders and inquiries shall receive courteous and efficient attention, and thanking you for previous patronage, we respectfully solicit your orders for the coming season.

FARMER SEED & NURSERY CO.,

WM. KUEKER, Manager.

General Directions to Customers.

The attention of our customers is respectfully called to the following directions, which will, if followed, be an aid to the purchaser as well as ourselves.

CAUTION—Please be careful not to direct your correspondence to the Faribault Seed Co., but to the FARMER SEED AND NURSERY CO., as we are not responsible for any misaddressed letters which we cannot fill because the sender has failed to sign his name, or the P. O. Box has not been used. When writing us, please enclose a sheet and envelope whenever you can, filling out the blank and signing your name and you will have no cause to censure us.

TERMS—With every order you send us please enclose a remittance for the full amount, as we do not fill orders unless the cash is sent with them.

HOW TO SEND MONEY—Money can be safely sent either by POSTOFFICE MONEY ORDER, BANK DRAFT, EXPRESS MONEY ORDER, or in a REGISTERED LETTER. We are responsible for all money sent in this way. Do not send money by letter without registering it, as it is not safe and if lost we cannot be responsible for it. Silver coins should be sewed in cloth to prevent tearing them. Do not send POSTAGE STAMPS in amounts over $100. We do not accept Canadian or other foreign postage stamps.

ORDER EARLY—We earnestly request all customers to place their orders early, as it will assist us greatly in getting everything out promptly.

QUICK SHIPMENT—is our motto. We have the facilities, and our experience and improved methods of packing and shipping enable us to fill orders almost immediately upon receipt; customers are promptly notified when goods are shipped so that none are lost. As potatoes, onion sets and nursery stock cannot be sent during the extremely cold weather, orders for them are acknowledged and the goods shipped as soon as the weather moderates, and customers are then notified of shipment.

FORWARDING—We deliver, postage paid, to any postoffice in the United States, Vegetable and Flower Seeds at the prepaid prices quoted in catalog. Potatoes, Implements and other bulky and heavy goods, are shipped by freight or express at purchaser's expense. If seeds which are quoted without postage are ordered to be sent by mail, 10 cents per pound and 15 cents per quart should be added to the given prices, otherwise if a check is sent for them in full to cover their cost, they will be sent postpaid. Nursery Stock, where no prepaid prices are given, will be sent by express or freight, the customer to pay the charges. Seeds, Plants and Bulbs are now taken by the Express Companies at a reduction of twenty per cent from the regular rates for merchandise.

If customers will please state how TO SEND TO US, we will use our best judgment in sending the order the quickest and cheapest way, and think that, with our experience gained by shipping so many thousands of orders every year, we do not fear that we can make mistakes.

PACKING—No charge is made for boxes or packing, nor for delivery to our Freight Depots or Express Offices.

FOR PREMIUMS SEE PAGES 46 AND 126.
NEW RADISH—Saxa.  

The Great New Radish from Germany.  

A sure money maker for the Market Gardener. Probably it will seem to many gardeners, that an improvement on Turnip rooted Radishes is scarcely possible, and yet he will without doubt change this opinion, if once he has seen and tasted the new "Saxa Radish."  

The "Saxa" is sure to fulfill the highest claims that can be made on a first-class Radish. The color is a dazzling fiery scarlet, the form purely globular, the head exceedingly fine and with quite small leaves, and the root is the thinnest possible. For the market-gardener it is the most lucrative Radish, for it surpasses in forcing qualities the Ne Plus Ultra, the bulb beginning to develop when the first pair of leaves scarcely raises itself above the seed-leaves. In less than three weeks from the day of sowing the "Saxa Radish" is ready for the table, the flesh being firm, crisp and juicy and remaining so for a long time without getting spongy. For open-ground culture it is equally to be recommended, because it will develop to the same perfection as when forced. We regret that we can supply only in packets this year, but expect to have larger quantities of seed for next season. Try a packet this spring and you will want to buy it by the pound hereafter. 

Packet 15c.

Danish Late Brunswick.

FARMER SEED & NURSERY CO., FARIBAULT MINNESOTA

VEGETABLE SEED NOVELTIES AND SPECIALTIES.

Under this heading our customers will find new varieties worthy of trial, and others of recent introduction of such value as to give them special mention on these pages. We also list a number of varieties here of which we make a specialty, growing them on an extensive scale.

FOUR EXCELLENT NEW CABBAGES.

EARLY COPENHAGEN MARKET—Another season has greatly added to the fame of this superb new Cabbage which originated in Denmark. From whence some of our very best varieties have come. It has created quite a sensation among cabbage growers and is considered unequalled for market. Undoubtedly it is without a rival the finest large round-headed early Cabbage in cultivation. The type is thoroughly fixed, the leaves maturing all at the same time, this being a great consideration to Market Gardeners. The heads average about 10 pounds each in weight, are very solid, with small core, and of fine quality. It matures as early as Charleston Wakefield, and will give a much heavier yield per acre than that popular variety. The plant is short-stemmed, the heads being produced almost on the ground level. The leaves are light green, rather small, saucer-shaped, and always tightly folded. The plants, therefore, can be set closer than is usual with varieties of similar size. Early, hard-heading, compact, uniform ripening, good quality, splendid appearance, surely these points are worthy of consideration. We can recommend this splendid new cabbage without reservation to the most critical planters. It will prove a great money maker for the market gardener. Our seed comes direct from the originator of this variety. Pkt. 10c, ½ oz. 30c, oz. 50c, ¼ lb. $1.75, lb. $6.00. postpaid.

DANISH LATE BRUNSWICK—This is a very fine main crop variety and a grand long keeper. Heads are of uniform shape, flat, large, heavy firm and solid, and of a very superior flavor. The plants are very compact, with few outside leaves, permitting close planting. Withstands drought and frost to a remarkable degree and is equal to the best in heavy yielding. It is a fine cabbage for making "kraut." The seed which we offer is strictly Danish grown and absolutely first class in every respect. Pkt. 10c, oz. 25c, ¼ lb. 65c, lb. $2.25. postpaid.

RED CABBAGE, NEW DANISH STONEHEAD—This new red cabbage is considered one of the best strains ever introduced. The plants are strong and compact in growth, producing dark red, round, solid heads of large size, equally as hard and handsome in appearance as our famous Danish Ball Head. The red color extends to the center of each head, making it a valuable sort for the market or pickling. Best Danish grown seed from originators took. Pkt. 10c, ½ oz. 30c, oz. 50c, ¼ lb. $1.75.

SAVOY CABBAGE, EARLIEST OF ALL—The earliest of all the Savoy Cabbages. Forms medium sized, very solid heads of conical shape, with blunt point; leaves finely crimped. Superior in flavor to the smooth leaved cabbages; its delicious flavor is like that of Brussels Sprouts. Without question the earliest and finest Savoy of equal value to the market gardener and private garden. Pkt. 10c, oz. 30c, ¼ lb. $1.00. postpaid.

CUCUMBER—White Wonder.

The fruits of this new variety are very large, smooth, of even size and beautiful, clear snow-white color, with bluish in appearance. In quality unsurpassed, a very prolific sort. Fine for exhibition purposes and home use. Pkt. 10c, oz. 20c, ¼ lb. 60c. postpaid.
NOVELTIES AND SPECIALTIES. Cont’d.

WATER MELON—Delight.
A very unusual melon of European origin — unusual in quality as well as in size, it being of luscious sweetness but diminutive size. The ripe melons average about five pounds each in weight, they are nearly round in shape, with very dark green, tough rind. The rich carmine, crystalline flesh is always solid and of exceptionally sweet flavor, juicy and refreshing. The seeds are of gray color, very small, about the size of an apple seed and the fruits contain but few seeds. The strong vines mature their fruits quite early and continue to bear throughout the season. The “Delight” Melon certainly is a melon Grower’s Association is ordering this variety in this territory. Packet 10c, 3 for 25c, postpaid.

WATER MELON Extra Early Russian.
We obtained the stock seed of this variety from a customer of ours living near a Russian Colony in South Dakota, where these melons are highly esteemed and bring top prices in the local markets. The melons are of medium size, oblong; skin dark green, mottled yellow. Flesh is red, very free from fiber and deliciously sweet. The seeds are red. It is the most prolific of any water melon we have ever raised, ripens very early and remains in bearing until frost. For our northern states the Extra Early Russian can be highly recommended, especially for the home garden and near-by markets. Give it a trial. Packet 10c, ounce 15c, ½ pound 35c, pound $1.00, postpaid.

MANGEL Giant Sludstrup.
Sludstrup is considered the best and heaviest yielding of all mangels, and holds the field a red.threshold for dry land. This mangel has been awarded a first-class certificate severals times by the Danish Government, the highest honor in Denmark, where mangels are as important as corn is here. Sludstrup is a long reddish-yellow, oval root, growing more than half above the ground. Easily harvested, and by actual test far excels any other variety. Both the weight and feeding value of yield. Our supply is from the best Danish growers. Oz. 10c, ½ lb. 20c, lb. 60c, postpaid. — Not pre-paid. 1 lb. 50c, 5 lbs. $2.00.

RUTABAGA—Bangholm.
Has been awarded a first-class certificate several times by the Danish Government as the best yielding rutabaga. An excellent variety both in shape and quality. The roots are of large size, slightly downward shaped, with small neck, few or no side roots and yields well. The skin is yellow with purple top. The flesh is yellow, sweet and solid. Of excellent table quality, extreme earlyness. A dependable keeper. One of the best sorts for stock feeding. Pkt. 5c, oz. 10c, ½ lb. 20c, lb. 60c, postpaid.

LETTUCE—Golden Curled.
“Delight” Water Melon.
A very fine early curled lettuce bright yellow leaves which are much frilled and finely cut. Very attractive and extremely tender, remaining in excellent condition a long time, even the larger outer leaves are tender and crisp. Quality extra good. Splendid outdoor for the home garden, also good for forcing. Packet 10c, oz. 20c, ¼ lb. 60c, lb. $2.00, postpaid.

MUSK MELON—Robinson’s Delicious Rockyford Cantaloupe.
This unsurpassed strain of the Edel Gem type is the result of several years selection by one of the most progressive farmers of Rockyford, Colo. Its shape is ideal, very slightly oval, no ribs and it is heavily netted over the entire melon. The bloom button is small and bright yellow. The flesh is thin and tender, rich in flavor, sweet, slightly sweetening color. The flesh is rich in flavor, sweet, slightly sweetening color, with a golden brown base. The seeds are small, white, and very superior quality. The fruit is attractive and makes it worth cultivating. Every seed is preserved in a selection melon and hand-seeded. It will be sold only in sealed 100 seeds of not less than one pound. We recommend this seed for the use of the Grower’s Association or the market gardener. Pkt. 1 lb. bag $1.85, 5 lb. bag $7.50, postpaid.

MUSK MELON—Winter King.
This melon is a long keeping variety, as the name indicates. Put into a cool place it will keep long into the winter without losing its delicious flavor. Just think of having a fine melon to eat with your Christmas dinner! But this is what you may do by planting the “Winter King” melon. The fruits are of medium size, the thick flesh is red, very firm, absolutely stringless, of exquisite aromatic flavor, and great sweetness. This novelty should have a place in every gardener’s list. It is well worth a trial. Packet 10c, 3 for 25c, postpaid.

Bull-Nose Rockyford Cantaloupe.
NOVELTIES AND SPECIALTIES. Continued.

THREE SPLENDID NEW PEAS.

PIONEER — A first-early Pea which has won great popularity for its many fine qualities. The plant is unusually robust in habit, and carries a heavy crop of long, pointed pods of dark green, which are well filled with rich-flavored Peas. So numerous are the pods that the plants present a most striking appearance while growing. Superior to American Wonder and Nott's Excelsior. We regard this as one of the best varieties in the dwarf section of the early class. Height about 2 feet. Packet 10c, ½ pint 25c, quart 75c, postpaid.—Not prepaid, quart 60c, ½ peck $1.25, peck $4.25.

LAXTONIAN — This is the largest podded early dwarf Pea in existence, requiring no supports. It is a new extra early dwarf wrinkled Pea of the popular Gradus type — one may say this variety is the first of a new class of garden Peas — Giant Podded Early Dwarfs. Pods are as large as Telephone, well filled with 8 to 10 large Peas of delicious flavor. It is a true Marrowfat Pea, having the richness and unsurpassed quality of the best late Marrowfat varieties. The vines are vigorous, growing about 18 inches high, producing heavy crops. Do not fail to plant Laxtonian Peas in your garden this year. Packet 10c, ½ pint 20c, quart 65c, postpaid.—Not prepaid, quart 55c, ½ peck $1.75, peck $3.25.

PRINCE EDWARD or PRODIGIOUS — One of the finest main crop varieties in existence. In our trial grounds it proved to be one of the best. The vine is of strong growth, branching habit and Hardy constitution, very prolific, producing big pods which are full of large Peas right up to the end. Color dark green and flavor unsurpassed, very rich and sweet. The pods are produced in great profusion, mostly in pairs. Every market gardener and private planter will be delighted with this splendid new sort. It is medium in season and a heavy yielder of finest quality Peas. Height 4½ to 5 feet. A splendid sort for the market. Packet 10c, ½ pint 20c, quart 85c, postpaid.—Not prepaid, quart 35c, ½ peck $1.25, peck $2.25.

BEAN—New Delicious Wax.

The earliest Wax Bean in cultivation, coming into edible condition in advance of any other wax pod variety. The quality is well described by its name. It is simply "delicious" from first to last. The pods are 6 to 8 inches long, of striking appearance, very heavy, crisp and tender, entirely stringless. The plant is robust in growth, quite hardy, permitting early planting, and unusually prolific. For the market and home garden no better bean could be wished for. Packet 10c, ½ pint 20c, quart 60c, postpaid.—Not prepaid, quart 45c, ½ peck $1.50, peck $2.75.

NEW POLE LIMA BEAN—Carpinteria.

This is considered the most perfect Pole Lima Bean. The beans have a greenish tint, a sure indication of good quality, and this green tint is retained longer in this variety than any other. Carpinteria is as prolific as any White Lima. The vines are very strong, vigorous in growth, with many large runners or branches on which are produced an immense quantity of pods, filled with three to four, usually four, large broad beans. These beans are much thicker than those of any other Pole Lima bean. Packet 10c, ½ pint 20c, quart 55c, postpaid.—Not prepaid, quart 40c, ½ peck $1.50, peck $2.50.

SWEET CORN—Golden Cream.

A very early yellow Country Gentleman Sweet Corn. The kernels are long and pointed, the cob is very slender, and the whole ear about as long as Golden Bantam. The flavor is remarkable; in fact, very much the same as Golden Bantam. The habit of growth is rather dwarf and the stalks bear two to four ears. The stalks are brownish red and the silk is also brown at the tips. It is among our earliest varieties, and the color at eating stage is a rich cream, cooling to a light golden yellow. The quality is extra fine and the flavor delicious. Packet 5c, ½ pint 15c, quart 45c, postpaid.—Not prepaid, quart 35c, ½ peck $1.00, peck $1.75.

RHUBARB—Red Fleshy Delicacy.

A splendid novelty, originated in Germany; 80 percent of the plants raised from this seed come true and have round, dark red leaf-stems with bright crimson flesh. On account of its delicate texture, as well as the beautiful bright crimson color of the flesh and of the sauce made of it, this new Rhubarb sells much better, and is much higher price than the old sorts. Rhubarb is easily raised from seed. Pkt. 15c.

The crop from seeds purchased of you the past spring was excellent, everything turned out satisfactory. The Nursery Stock was also fine and made a very good growth.

DES PLAINES ILL. SEPT. 13, 1913. WM. MAAS, Market Gardener.
NOVELTIES & SPECIALTIES. Cont’d.

RADISH—White Delicious.

A very fine new Wax Potted Bush Bean that proved to be the surest cropper out of some twenty-five varieties of Wax Beans we had on our trial grounds. The plant is of remarkable vigor and productivity, free from blight and rust, and seems to be much more hardy than any other bean. The pods are of a rich golden yellow color, and deep into the soil, they are perfectly stringless at all stages of development, are exceedingly brittle, crisp and tender, and of exceptionally fine flavor. One of the best beans for shipping as a snap bean and of the greatest value as a market variety. Can also be highly recommended for the home garden. Sure Crop Stringless Wax is the bean "par excellence" for dry sections. Packet 10c, ½ pint 20c, qt. 50c. postpaid. — Qt. 35c, ½ peck $1.15, pk. $2.00, not prepaid.

TOMATO

Faribault Dwarf Champion.

A Dwarf Champion with fruits twice the size of the old variety and of delicious flavor unequaled in any other kind. The old Dwarf Champion or Tree Tomato is a great favorite with the private gardener on account of its compact and upright growth enabling close planting which is usually done in small gardens, but it has 2 fruits—the small size and the poor quality of the fruits. In our new tomato, however, we have these defects remedied, as the fruits of the Faribault Champion are of the largest size, about the same as those of the Ponderosa and produces very few, almost seedless and of rich, sweet flavor, surpassing all others. The plants grow two feet high; are strong, erect and bushy and carry well their heavy burden of very large fruits. The fruits have firm flesh with very few seed cells and are rich purple-crimson in color. Pkt. 10c, ½ oz. 35c, oz. 60c, ½ lb. $2.00, not prepaid.

MUSK MELON—Minnesota Melting Sugar.

The sweetest, richest flavored of all green-fleshed musk melons. Fruits are of just the right size for market, oval in form, distinctly ribbed and heavily netted. The flesh is very firm, of attractive green color, exceptionally sweet, juicy and tender, with a rich aromatic flavor and entirely free from stringiness. The melons are of all uniform size, and everyone is of the same high quality. Vines are of vigorous, healthy growth, yielding an abundant crop quite early in season. This splendid Minnesota melon can be highly recommended to all our market gardener customers who grow for profit, as well as to everyone who wishes to grow the best flavored melons. Pkt. 10c, oz. 20c, ½ lb. 60c, lb. $2.00, p/pd.

SWEET CORN—Golden Bantam.

The earliest and sweetest yellow grained variety. Positively the best flavored and sweetest of all early varieties of sweet corn. An extra early sort of extreme hardness, allowing very early planting. The stalks grow about 4 feet high and bear 3 to 5 ears, 5 to 7 inches in length, which are completely filled with eight rows of golden yellow grains, extending to the rounded tip. This is without exception the richest flavored of all sweet corn and should be in every garden. Especially adapted for planting in the North West, on account of its hardness and ability to withstand unfavorable weather. May be planted late in the summer for early fall use. It is highly profitable for the gardener. Pkt. 5c, ½ pint 10c, quart 35c. postpaid. — Qt. remainder $1.20, bushel $4.00, not prepaid.

ASPARAGUS Chicory.

Considered a great delicacy in European countries and is deserving of more extensive planting here. Grows easily and competes very well. The young tender sprouts offer an agreeable equivalent for asparagus and are prepared in the same manner as the latter. Should have a place in every vegetable garden. Pkt. 10c, oz. 25c, p/pd.
FLOWER SEED NOVELTIES.

NEW CARDINAL CLIMBER.

The most beautiful and distinct Annual Climber ever introduced. The plant is a wonderfully rapid and rank grower, attaining a height of 20 to 30 feet, branching freely and making a fine screen or dense shade. Foliage is remarkably beautiful, magnificent palmate or deeply cut leaves, resembling a fine form of Japanese Maple and giving a tropical effect. An early and abundant bloomer, being literally covered with crimson flowers of intense fiery Cardinal red, producing a veritable blaze of color from July until frost. The flowers measure 1/2 to 3 inches across and their bright glowing red color forms a pleasing and attractive contrast to the deep green foliage. One must see this glorious plant in full bloom to appreciate its grandeur and great beauty. Does best in a sunny situation and good soil, succeeds anywhere here in the Northwest. Start the seed in boxes or pots and transplant to the open ground after danger of frost is past, or may be sown where plants are to remain. For covering porches, verandas, trellises, fences, etc. no better plant exists. Our stock of seed comes direct from the originator. Pkt. 20c.

ZINNIA—Double Cactus Flowered.

Another new departure in the ever popular Zinnias. The flowers are of splendid cactus-form, quite double, with finely shaped petals. The rich orange colored flowers adorn in great numbers the dwarf, compact growing bushes, and are produced throughout the season from June until heavy frost. For groups, borders and for solid beds these Zinnias will be found very effective and imposing. They make splendid cut-flowers and bouquets. Easily raised from seed. Pkt. 20c.

ALYSSUM—Lila a Queen.

A very beautiful and distinct new variety of the well known dwarf annual Alyssum. The large upright growing panicles are covered with flowers of a soft and pure lilac color. When in full bloom the plants make a wonderfully fine showing. One of the easiest annuals to grow from seed, will succeed anywhere. Pkt. 15c.

THE SUMMER FIR.

This new ornamental foliage plant introduced from China is an annual of easiest culture, and owing to its fast growth reaches its full size in a very short time, after sowing. It forms grand pyramidal bushes of four to five feet height. As solitary plants it looks like a nicely grown out Christmas Tree. As a pot plant it is very pretty, and may also be successfully grown in groups and borders. Color of the finely pinnated foliage is a rich dark green. Pkt. 15c.

AUSTRALIAN GOLDEN DAISY. New Double Flowering. Dimorphoteca.

A rare and extremely showy annual of easy culture and beautiful flowers. The plants grow 18 to 20 inches high and are very profuse in flowering. Its large, showy, double and semi-double flowers are rich and varied in color, ranging from white to dark yellow, and salmon-rose to orange. Well adapted for groups or borders; it produces its pretty flowers very early and will continue to flower during the entire summer. Pkt. 20c.

VISCARIA—Azure Blue.

Attractive new variety of the popular hardy annual Viscaria. The plants form nice, round bushes, 12 to 18 inches high and develop their pretty flowers incessantly during the whole season in great masses. Flowers are of a clear light azure-blue, which shade is always greatly admired; they are quite large, 1 1/2 to 2 inches in diameter. Well adapted for cut-flowers, lasting a long time in water. The plant is of easiest culture. Pkt. 15c.

NEW GIANT SNAPDRAGON—“Purple King”.

A splendid and sensational novelty. The flowers are fully four times the size of the common Snapdragon or Antirrhinum. The large flower stalks are thickly studded with immense flowers of a glowing deep purple color. Of very great decorative value and of easiest culture, will grow in almost any kind of soil without care. The plants form large size bushes and produce their gorgeous flowers throughout the summer. For beds and borders they are a constant source of pleasure, being in bloom all the time. Pkt. 20c.

NEW PANSIES

“The Princess”.

The distinguishing feature of these are their strikingly erect habit. The stalks are firm and strong and withstand the inclemency of the weather to a remarkable degree. The plants are very hardy, withstand drought well and do not suffer by rainstorms, on account of their husky, erect habit. The handsome pansies are produced very freely and are of the Giant Cassier and Frezzi and double types. They show an extensive range of color, yellow predominating. These handsome new Pansies will be found of great value. Pkt. 20c.

FOR NOVELTIES IN FLOWER PLANTS SEE PAGE 123.
HIGHEST YIELDING FARM SEEDS.

The New Marquis Wheat.

The New Hard Canadian Wheat of Wonderful Productiveness.

This great new wheat we offered last season for the first time; its fame was so well known that we were unable to meet the tremendous demand, which came from all wheat growing sections. We put in a large acreage of Marquis Wheat at our own farms here and expect to be able to fill all orders this spring.

The Marquis Wheat is without doubt the biggest yielding hard Spring Wheat in existence. It is a week earlier, produces 10 bushels more per acre and has a higher milling quality than any other hard Spring Wheat in cultivation at the present time.

The Marquis Wheat created quite a sensation in the Northwest, winning the world’s championship as the best and heaviest yielding wheat, several years in succession.

The Marquis Wheat won the $1000.00 Prize at the Land Show two years ago against the whole world, and again captured the world’s championship at the Dry Farming Congress held at Lethbridge, the following fall.

The Marquis Wheat has given unprecedented yields in Canada, where it originated. At the Brandon Experimental Station in Manitoba the yield on a four acre field was 320 bushels. At the Experimental Farm at Indian Head, Sask., the recorded yield was 402 bushels per acre, outyielding all other varieties and the quality and weight of the grain being very much superior.—Mr. S. Wheeler, the man who won the $1000.00 prize on Marquis Wheat reported the yield to be 80 bu., 70 bu., and 65 bu. per acre, on different pieces of land.—Mr. E. B. Cay, a farmer at Beatty, Sask., declares the Marquis Wheat is the biggest yielder and showed a sample lot weighing 66 lbs. to the measured bushel.—On our own farms, the past year, the Marquis Wheat far outyielded the Hard Fife and Blue Stem, ripening much earlier and more even, and this in spite of the dry spell we had in this territory at that time.

The Marquis Wheat is the best variety of hard Spring Wheat, and was originated by the late Dr. Saunders of the Dominion Experimental Farms, Ottawa, Ont., by breeding together the Red Fife with a very early Indian Wheat, the Red Calcutta; after a careful selection for a number of years to fix the type, it was sent to the different Canadian Experiment Farms where it quickly made a name for itself on account of its earliness—by which the Marquis is 10 days earlier than our Fife varieties, and its enormous yield—for it produces at least 3 bushels more than the Red Fife. Both are bold except for a few short straw at the top of the head. The Marquis does not grow quite as tall, which is considered an advantage, especially if the wheat is grown on rich ground where most wheats are inclined to grow too long in straw and lodge. In the threshed grain there is quite a difference, “the Marquis being larger, shorter and bunter—taller and deeper in eraze” and of a deeper amber color. The seed of Marquis Wheat which we offer was grown from the very finest and true seed obtained direct from one of the largest growers of the Marquis in Canada. We have a very large stock of the choicest seed to be had, grown on our own farms. This being well acclimated here, it is to be preferred to imported seed.

Price: 3 lbs. 60c postpaid.—Not prepaid, peck 60c; bu. $1.00; 5 bu. $9.50; 10 bu. $18.00.—Write for special prices on larger lots.

New White Danish Oats.

This splendid new variety is recommended by the Danish Government as the best and heaviest yielding oats. We imported our original seed stock direct from Denmark and are this season offering this splendid variety for the first time. Our stock is Minnesota grown and thoroughly acclimated. The White Danish Oats outclass all our other varieties in yield, having yielded an average of 65 bushels per acre on our farms near Faribault, and with this special cultivation, the yield being the average from a large field. The grain is very large, pure white, plump and extra heavy, weighing 46 pounds to the measured bushel. The straw is medium in length, and strong, withstanding the inclemencies of the weather to the highest degree. The heads are much above the average, lowered down with the large, heavy kernels, which have a thin hull. The plant is strong, vigorous growth, with large, extended root system, and remarkable for its great storing capacity. In all out-growing sections the New White Danish will prove to be of greatest value, not only in the way of heavy production but in point of quality. We can very highly recommend this variety to our friends and customers and all who have been entirely satisfied. Our seed stock is limited, order early.

Price: 3 lbs. 60c postpaid.—Not prepaid, peck 60c; bu. $1.25; 5 bu. $6.20; 10 bu. $12.00, seeds included.

For complete list of Best Northern Grown Farm Seeds see pages 21 to 38.

New White Danish Oats in Stacks at F. S. & N. Co.’s Seed Farms at Faribault, Minn.
ALFALFA.

THE MOST PRODUCTIVE AND NUTRITIOUS CROP
THE FARMER CAN GROW.

No other plant has created such widespread interest in recent years among the farmers of the Northwest than has Alfalfa. While only a few years ago it was thought Alfalfa could not be grown here in our climate, most farmers now have at least a few acres of it, and it has been demonstrated beyond a shadow of a doubt, that this plant is adapted to all sections of our great Northwest. It does well in nearly every locality and on all soils excepting low, wet land and underlaid with hardpan. Its hardiness and longevity, when once established, is unrivaled among forage plants.

There are now several different varieties of Alfalfa in general cultivation and it has been proven by extensive tests that only hardy inoculated varieties will thrive in our cold climate. Foremost among these is the Grimm Alfalfa, which is essentially a Minnesota product, having been cultivated, accumulated and bred up to meet our climatic conditions by the late Mr. Grimm, who brought the original seed from Germany.

The accompanying illustration was reproduced from an actual photograph showing roots of the Grimm Alfalfa dug at our farms on November 6th, 1913. These plants were exactly six months old, and had been used in May of the same year. Note the splendid root development and branching characteristic of the same, which indicates the true Grimm Alfalfa, also note the heavy, well-developed crowns, denoting the great stocky habit of the plant, which in turn assures big yields of fodder. The largest of the four roots measured exactly 30 inches.

We have grown this Grimm Alfalfa here on our farms for many years and have found it most productive and nutritious.

ALFALFA ROOTS.

This is an absolutely sure method of growing alfalfa and inoculating the soil with the alfalfa bacteria. Successful plantings of Alfalfa Roots have been reported by Prof. Hansen at Brookings, South Dakota and by Prof. Waldron of the Dickinson Soil-Experiment Station, North Dakota. Both authorities state that the transplanting is a dinned success.

By planting the roots a full stand is assured and a crop of alfalfa is secured. The absence of bacteria in the soil will not affect the Alfalfa roots, as the bacteria cling to the roots and inoculate the soil with at the time of transplanting. We have found strong one year old roots which should be set out in rows 50 feet apart and about 1 foot apart in the rows. After the land has been thoroughly prepared by deep plowing and successive harrowing, the roots may be placed in by setting them into a narrow and plowing toward them. Be sure to have the crowns of the plants well covered, about 6 inches is right. About 200 plants are required per acre. If set out as stated above. On smaller plots the transplanting may be done with a spade.

We supply best quality Grimm Alfalfa Roots, put up in bundles of 100, at the following low prices and packed and carefully wrapped for insurance of delivery.

Price: 100 roots $1.00; $5.00 for $4.75; 1000 for $9.00 prepaid. Write for special prices on larger lots.

I wish to thank you for the Alfalfa and Clover Seeds sent me. Had them tested by the Experiment Station and they proved very satisfactory in every respect.

FRED HEINRICH,  Appaloosa, Idaho.

When you wish to inoculate your alfalfa with Grimm Alfalfa, send in the following form:

Alfalfa, 50 lbs.  $9.00

SHOWING ROOTS OF GRIMM ALFALFA, TAKEN UP FROM OUR FARM EXACTLY 6 MONTHS AFTER DATE OF SOWING. THE LONGEST ROOT MEASURED 30 INCHES.

ALFALFA SEED.

We have for many years supplied our customers with the best grades of Alfalfa seed. We were the first seedsmen in the Northwest cultivating Alfalfa successfully and urged our farmer customers to plant Alfalfa more generally as we were convinced that this crop could be grown just as advantageously here in Kansas, Nebraska and other western states. However, we wish to call your special attention to the fact that only selected Northern Grown Seed should be sown here to insure the best results. We can furnish you with the best seed at the best quality and refer you to page 16 of this catalog for full description and price of the different varieties.

Received Grimm Alfalfa Seed from you, and got a very nice stand, the best that has been seen here. Expect to order some more of you.

REICHGELS R. J.,  Marion, Ill.  Jan. 21, 1913.

The Mulford Nitro-Germ.

TO SUCCESSFULLY GROW
Alfalfa, Clovers, Cow Peas, Field and Garden Peas, Beans and all Other Legumes,
To Increase the Yield and to Improve the Soil Use
THE MULFORD NITRO-GERM.

Scientifically Prepared and Tested—Small Cost—Large Returns.

Easy to Use—No Labor Expense.

Consists of pure, tested cultures of active, vigorous nitrogen-fixing bacteria, for inoculating seeds of legumes or soil. Legumes offer the best known means of maintaining soil fertility and rejuvenating over-cropped and worn-out fields.

The U S. Department of Agriculture and many State Agricultural Experiment Stations recommend inoculation of legumes with nitrogen-fixing bacteria to induce a prompt "catch" and increase the yield.

The Mulford Nitro-Germ is prepared and tested by experts, in the biological laboratory of H. E. Mulford Co., with the same degree of care as Mulford Antitoxins, Serums, Vaccines, etc., which are standard all over the world.

Be sure to always specify the particular legume for which The Mulford Nitro-Germ is desired, otherwise we will not know how to fill your order.

We can supply Nitro-Germ for the following crops:

Alfalfa, (Lucerne), Crimson Clover, White Clover, Red Clover, Alsike Clover, Cow Peas, Canada Field Peas, Garden Peas, Sweet Peas, etc., Carrots, Oranges, Lima Beans, Soy Beans, Spring Vetch, Winter Vetch.

PRICES: The Mulford Nitro-Germ is supplied for the varieties of legumes indicated above, at the following prices: (Not returnable)

Garden Size (about 1/4 acre) $2.00; Five Acres $9.00.

Why buy expensive commercial nitrates when you can grow legume crops and thus increase the yield and at the same time replace the nitrates, enrich and renovate the soil by Nature's own method.

Write today for free booklet giving valuable information regarding the nitrogen-fixing bacteria and describing the preparation and use of THE MULFORD NITRO-GERM.
GRASS AND CLOVER SEEDS.

TERMS used for different grades of Seeds we offer.

Clover and Grass Seeds of the highest quality obtainable have always been our most important specialty, and for years we have taken the lead amongst all the different seed dealers in this line. Our seeds are thoroughly tested and guaranteed under our "Farmer Brand" label, as illustrated along side, which we have also adopted as our trade mark.

"FARMER BRAND"—To protect our customers, as well as ourselves, we shall offer our "Farmer Brand" Seeds, the highest quality of seeds obtainable, only in sealed sacks in quantities of 1/2 bu., 1 bu., 2 bu., and 10 lb. No broken quantities will be furnished, nor will we guarantee any seed as genuine after our sealed seal has once been broken. With our "Farmer Brand" Seed sacks will be furnished free of charge.

The other terms, and their meanings, used for the different grades or qualities of Clover or Timothy Seed, as well as some other seeds, are as follows:

"FAiry"—Free from obnoxious foul seeds and of high vitality, but not as good and perfect in every respect as our "Farmer Brand".

"CHOICE"—Healthy and fairly clean seed, of good vitality and color, but not as plump and perfect as our "Farmer Brand".

NOTICE—We are well equipped for cleaning and testing seeds and all seeds are so treated as to meet fully with the requirements of our new Minnesota Pure Seed Law. You are fully protected when you buy your seeds from the Farmer Seed & Nursery Company.

In looking backward we cannot fail to comprehend that a most wonderful progress has been made in agriculture during the last 25 years. Through a systematic way of farming, and by the introduction of different root crops, the farm is made to produce nearly as much as in former years. The product of the farm could, however, be still more increased if more attention were given to the selection of the proper varieties of Grass and Clover Seeds for establishing pastures and meadows. A great many of the older varieties of grass seeds possess- ing superlative merits, which were cultivated years and years ago by our ancestors in the old country, are now considered too many otherwise practical and wide awake farmers and dairymen. The kinds of seed commonly sown by dairymen, as Clover, Blue Grass and Red Top. Although these are all good varieties, and do well on soil to which they are naturally adapted, yet they are not always the best for a particular soil or to be sown with a particular mixture of other varieties, which are often necessary. It is evident that there is such a large variety of the most valuable grasses for pastures and meadows, it is almost unexplainable to the professional men that not more attention is given to so important a matter. It is quite evident that in order to produce the best results, regardless of the conditions of the soil, and the weather, more and better grasses than Timothy, Red Top, and other varieties are required for establishing healthy pastures and meadows. The more and better grasses we grow the more cattle we can feed and the larger the income will be. Of all the crops harvested, the grass crop is the one that varies the most, and the income from the use of pastures of this variety is greater than that of any other variety. The grass is the plant a man can grow as his own, and no other way can soil fertility and soil moisture be so easily maintained as by sowing the proper kinds of Grass and Clover Seeds. The large number of legume and forage plants, no matter how valuable, will never replace a well established and reliable pasture and meadow, for, after a good stand is once secured, they will be a continuous and labor-saving crop for many years, and provide for your cattle while you sleep.

In establishing pastures and meadows a most important factor to be considered is that nearly every one of the different kinds of grass and clover plants subsist on different soil elements. Some soils may be lacking entirely of a certain element to supply the required nourishment for a particular kind of grass, which is well prepared for a short time be subduded by weeds. If, however, a larger variety of grass seeds best adapted to your soil and for the intended purpose be sown, then you will not only lack the weed element, but the effort will also be rewarded by obtaining a continuous luxuriant pasture and the most perfect meadow for many years to come.

We have for years devoted a large part of our catalog to the description of the various kinds of Grasses and Clovers, and have also carried on extensive experiments on our own farms to ascertain the varieties best adapted to the different kinds of soil and for the various purposes. Having studied grasses and grass seeds from actual experience, we are in a position to know something of the habits and nature of the different kinds. On this, and the following pages, we have given a full description of the most important Pasture and Meadow Grasses. Everyone can select therefrom, according to the requirements, such varieties as are best adapted for his soil and purpose. We have also put Clover-Grass Mixtures for permanent pastures and meadows, well considering the growing, maturity and age of the grass and clover for the various grasses to the different kinds of soil and for various purposes, thus enabling our customers to make the right selection.

1. BROMUS INERMIS

Austrian Brome Grass.

Hungarian Brome Grass—Aussie Brome Grass

Of all the grasses ever introduced none have proven so valuable and of such great importance as those of the Brome Series. The experimental stations of Colorado, Minnesota, Montana, North Dakota, South Dakota, and the different grass stations of the Agricultural Department, Washington, D. C., have conducted extensive experiments, and all speak of it in the highest terms.

Bromus Inermis is a vigorous, hardy perennial, with strong, creeping root-stocks, smooth, upright, leafy shoots, 3 to 6 feet high, and loose, open panicles, or "seed heads," 8 to 10 inches long. It withstands extremes of heat, drought and cold better than any other of our cultivated grasses, and in a few years forms a very tough, soil, soon crowding out other grasses, clovers and weeds. It has been fully proven that Bromus Inermis will not only succeed and grow under conditions that prove fatal to Timothy, Clover, Orchard Grass or Alfalfa, but it will also make most astonishing yields.

All kinds of stock eat it with relish, and the chemical analysis made, shows that it is rich in flesh-forming ingredients, even much more so than Timothy. As this grass starts to grow very early in the spring before any of the grasses upon the native prairies show any signs of life, and remains green and succulent far into November, it will supply the long-felt want of early spring and late fall pasturage.

The yield of hay from Bromus Inermis varies from 2 to 10 tons per acre according to climate conditions, method of seeding and fertility of soil. The quality of the hay is excellent, fully equaling that of Timothy in palatability and nutritive qualities. In order to obtain the best product, the grass should be cut at the time of full bloom. One important feature in the advantages of Bromus Inermis from other barley grasses is that it does not deteriorate rapidly after the flowering period, and, even if cut when the seeds are ripe, the hay will have lost but little of its nutritive qualities, owing to the fact that after the seed-bearing stalks are cut, the plant does not die, but continues to grow, and has a prodigious energy and saving quality.

CULTURE.—Fall plowed land is best adapted for spring sowing, as this holds the moisture of the soil and prevents the evaporation of the first fall rains; summer plowing is the next best method. If sown in the winter, make sure that the soil is thoroughly plowed and cultivated, to bring the land to a plowable condition before sowing. As a rule, we guarantee any seed to be sold, but when sown in late winter, the young grasses will soon subdue the weeds which are apt to grow on any soil, no matter how low, and bring out the consistence or hardy, can be sown at most any time from early spring to late fall in most any locality.

Price: "Farmer Brand" Grade, 3 lbs. $1.00, postpaid.—Not prepaid, 3 lbs. 75c, bu. (14 lbs.) $2.50, bags $1.50. 5 lbs. $2.15, 100 lbs. $14.00 bags included.

Bromus Inermis,
2. TIMOTHY.—Phleum Pratense.

Timothy is so well known that it needs hardly any description, for there is scarcely another variety of our natural grasses that is so generally cultivated as this. It is best adapted for pastures, rich and strong loamy soils, where it grows to perfection, and yields large crops of hay. If cut in due season, which is at flowering time, it makes a very good and nutritious hay, which is greatly relished by all kinds of stock, especially horses. For pasture it cannot be so well recommended, as most every farmer well knows, for its growth is not thrifty enough, and close pasturing is very injurious to it. Like all grasses, it is harder for either clover or meadow if sown with other kinds, and only then will it bring the best returns. For this reason we have added it to most of our Clover-Grass Mixtures wherever circumstances allow.

Besides, we claim, and our customers have experienced it every year, that our Minnesota Grown Timothy Seed possesses more vigor and vitality, and produces a much thriftier growth, larger crops and better hay than Timothy grown in a milder latitude. The large dairy and stock farmers in the Middle and Eastern States have recognized this long ago, and send us their orders as early as possible, very often in fall already, whilst they may not sow the seed until spring.

Prices of our Minn. grown Timothy Seed of the 3 different grades we offer are as follows:

Our "FARMER BRAND" Timothy—the cleanest and highest grade of Seed obtainable. 3 lbs. 65c, postpaid. Not prepaId: Peck $1.25, ½ bu. $2.00, bu. $3.85, sack of ½ bu. $5.00, 100 lbs. $8.00, sacks included. This brand we send out in sealed sacks only.

Timothy Seed, "FANCY": Peck $1.00, bu. $3.35, 100 lbs. $7.00.

Timothy Seed, "CHOICE": Peck 80c, bu. $2.90, 100 lbs. $6.00.

Grain sacks are 25c each, extra, with Fancy and Choice grades of Timothy Seed.

PRICES: Owing to the prices of Timothy varying a great deal, and sometimes changing with the market, it is not possible for us to give prices, for these we must leave to our jobbers at the times of order, or to customers who have been raised together, and both being of the same opinion, they cannot be separated, so that we have to sell it at a reduced price. The mixture contains about one-fourth of Timothy Clover and the balance Timothy, and is as near that proportion as we can tell, which is just the proper quantity of each to produce good results. It should be sown at the rate of 10 pounds per acre.

Price, lb. 30c, postpaid. Not prepaId, lb. 20c. 10 lbs. $1.50, 25 lbs. $3.00, 100 lbs. $12.00; grain sacks 22c.

The Timothy and Alsyke Clover Mixture I bought of you last year succeeded above all my expectations, for the ground was soon covered with a dense green mat. Every kind of stock was noted for its peculiarly good growth.

G. RAMM, ANNANDALE, MINN.

3. TIMOTHY AND ALSYKE CLOVER MIXTURE.

This is a better combination for either pasture or meadow than Medium Red Clover and Timothy, as these blossom and ripe at the same time. Alsyke Clover can be sown to good advantage on moist soil where Red Clover would soon perish, and will make a much finer hay than this, and being free from fuzz and dust, it will not cause horses to cough.

The Timothy and Alsyke Clover Seed that we offer, has been raised together, and both being of the same opinion, they cannot be separated, so that we have to sell it at a reduced price. The mixture contains about one-fourth of Alsyke Clover and the balance Timothy, and is as near that proportion as we can tell, which is just the proper quantity of each to produce good results. It should be sown at the rate of 10 pounds per acre.

Price, lb. 30c, postpaid. Not prepaId, lb. 20c. 10 lbs. $1.50, 25 lbs. $3.00, 100 lbs. $12.00; grain sacks 22c.

The Timothy and Alsyke Clover Mixture I bought of you last year succeeded above all my expectations, for the ground was soon covered with a dense green mat. Every kind of stock was noted for its peculiarly good growth.

G. RAMM, ANNANDALE, MINN.

4a. ITALIAN RYE GRASS. Loliwn Italicum.

This is one of the Grasses not well known, but very valuable, and deserving more attention. It grows on almost any soil but thrives best on rich, moist land. On ground best adapted for it, and especially if irrigated, immense crops can be produced, as it can be cut 4 or 5 times, and yields as high as 7 or 8 tons of dry hay per acre. It is well adapted for pastures, on account of its early growth in spring and its quick and successive aftergrowth when closely cropped. For this reason we found it very valuable to sow as a catch crop in clover fields where the clover had died or winter-killed. When mixed with Crimson Clover and sown on these bare spots in spring, a full crop can be obtained from these fields. It grows 2 to 3 feet high, with a abundance of tillage, and is much liked by cattle and stock generally. When sown by itself or alone, about 20 pounds of seed per acre is sufficient.

Price, Superior Grade: lb. 20c, bu. (11 lbs.) $1.00, 100 lbs. $9.75, not prepaId.

Price, Choice Grade: lb. 15c, bu. $1.25, 100 lbs. $5.50.

4b. ENGLISH RYE GRASS. Perennial Rye Grass—Lolium Perenne.

This has become well known in this country, is very largely sown, and has proven itself very valuable. It seems to be especially adapted for pastures, will endure close cropping, and is of strong and quick successive aftergrowth. English Rye Grass produces an abundance of foliage, which remains bright and green throughout the season, and for this reason is also much used for Lawn Grass Mixtures. It is also well adapted for permanent meadows, and yields large quantities of nutritious hay, which is well liked by all kinds of stock. This grass grows well on almost any soil, but prefers medium rich or moist land, such as will produce a good crop of corn, and gives the highest yields on such land. It grows 2 to 3 feet high, when sown by itself a bout 20 to 22 pounds of seed per acre is sufficient.

Price, Superior Grade: lb. 20c, bu. (11 lbs.) $1.45, 100 lbs. $9.25, not prepaId.

Price, Choice Grade: lb. 15c, bu. $1.15, 100 lbs. $5.00.

5. WESTERN RYE GRASS. Agropyrum Tenerum.

Also known as SLENDER WHEAT GRASS.

This is the famous bunch grass of Canada and is peculiarly well adapted to the prairie soils of our northwestern states. It affords excellent pasturage and provides large quantities of hay, but it favored for hay, should be cut early, as it is relished better by stock. It thrives on all soils, but is peculiarly adapted to prairie soils. It gives good returns on land quite strongly impregnated with alkali and fits so that grass may be grown successfully. Resists drought and cold to a remarkable degree. When sown alone as is the common practice, the seed should be put in from 1 to 3 inches deep according to soil and season. It is a poor cover. With Bromus Inermis, 7½ pounds of each.

Price, Superior Grade: lb. 20c, bu. (11 lbs.) $2.25, 100 lbs. $15.00, not prepaId.

Price, Fancy Grade: lb. 15c, bu. $1.95, 100 lbs. $13.25.
**RED TOP.**

Agrisalis Vulgaris.

This is a very hardy grass naturally in most every state and predominates on low and marshy ground, where it produces a very luxuriant growth. Red Top is a very hardy perennial grass, growing from less than a foot to 5 feet in height under varying conditions of soil and climate. In sloughs and moist locations it grows the tallest. The stem is erect, smooth, and round, and the panicle is oblong and spreading, which, though it varies considerably in color, is generally characterized by the purple tint which seems to deepen with increasing exposure to the wind and sun. A hardy grass, the roots are more or less creeping and rather nodular near the surface rather than from the base. It will inhabit acid or neutral soils and will do well under the most varying conditions of soil and climate.
15. Meadow Fescue—Festuca Pratensis.

We regard this as one of the most valuable Grasses, for it adapts itself to different conditions of soil and climate, thriving luxuriantly in all parts of the United States and Canada, and is also highly valued and largely cultivated in Western Europe. It produces a great amount of early and late feed of good quality and yields heavily from 2 to 4 tons of hay per acre which is of fine quality and very triflous. As a pasture Grass it is particularly valuable, for it is a most persistent grower, being one of the earliest in spring and latest in fall, and never freezes out or winter kills. It grows well on wet and dry bottoms, hillsides and tops, gravelly and loamy soils, and clays, and having many fibrous roots running down 8 to 15 inches, resists drought wonderfully. It grows about three feet high, stands our winter well, but never grows in tufts or branches, and flowers in June. About 18 to 22 pounds of seed should be sown per acre. Price. lb. postpaid 30c; not prepaid, lb. 20c, bu. (14 lbs.) 2420

This variety prefers to grow on light, sandy soil, and dry uplands or hillsides. It is deep rooted, and not affected by extreme drought. Sheep are not particularly fond of it, and in mixtures for permanent pastures on dry uplands, particularly if used for sheep grazing, it should be included, as it is highly relished by them, being one of the sweetest grasses and very nutritious. On account of its fine foliage and compact growth it is very desirable for lawn purposes, making a splendid close turf. It is a hardy perennial, 1 to 2 feet high, flowering in June and July. Lb. 20c, bu. (14 lbs.) $3.00, 100 lbs. $20.00. Peund postpaid by mail 35c.

17. Hard Fescue—Festuca Duriascula.

It is one of the smaller fescues and of great value on account of its hardiness and drought resisting qualities, therefore being well adapted for dry hillsides and uplands, and as a stock Grass, it is grown in mixtures for permanent pastures on dry uplands, and during the last ten years it has been largely used in coastal and northern districts. The growth is a hardy perennial, 1 to 2 feet high, flowering in June. Lb. 20c, bu. (14 lbs.) $3.00, 100 lbs. $20.00. Peund postpaid by mail 35c.

For meadows or pastures on dry, hard or sandy soils this variety is very valuable. It endures droughts. The roots go into the ground very deep, and the Grass remains fresh and green while other varieties are apparently dried up. It is very hardy, a true perennial, growing about 1 to 3 feet high. This Grass should be included in all pasture mixtures for permanent meadows and pastures for dry and light soils. Lb. postpaid 40c, bu. (14 lbs.) $4.00, 100 lbs. $25. Lb. postpaid by mail 40c.

For the Southern States, particularly, this grass is best adapted, and of great value. It is the chief reliance there for pasture and hay, furnishing rich, green pastures during nine months of the year. On good land it will cut two to four tons of nice hay per acre. It thrives wherever corn and cotton can be grown. In the South it is much planted as a lawn Grass, and nothing will stand the sun better. 4 lb. 35c, 10. 710 post paid.

For either hay or a permanent pasture a most valuable Grass, which can be successfully grown in all parts of the country. It will not winter-kill, but will live and endure our cold Northern Minnesota winters, and can also be grown in parts of the country where it is sometimes very hot and dry. This variety starts very early in spring, and is a very valuable pasture Grass on this account. It is seldom sown by itself, but many prefer Grass mixtures, where it gives the best results. Succeeds best in deep, rich, sandy soils, and even on heavy clay and heavy soils. It also grows 3 to 5 feet high, and flowering in May and June. It is a splendid Grass for the Southern States. Price, Superior Grade: Lb. 20c, bu. (14 lbs.) $3.00, 100 lbs. $20.00. Peund postpaid 35c.

The only one of our native plants furnishing food for wild fowls, ducks, geese, etc., which has been made an article of commerce. The seed can be sown on the borders of lakes, ponds and small streams to great advantage, attracting large flocks of these wild birds from September on. It purifies the water and affords refuge for the small fry from the larger fish. In the South it produces two good hay crops in one season, and all cattle are very fond of it. Sow in water having a mud bottom. Lb. 20c, 10 lbs. $1.85. Lb. postpaid 28c.

For the Southern States this Grass is of particular value, and is greatly relished by all kinds of stock. It is a perennial; the roots penetrate the ground in every direction, and generally each joint sends up a stem three to six feet high. It should be sown alone, on well prepared ground, at the rate of twenty-five pounds per acre. Lb. 26c, bu. (of 25 lbs.) $3.65, 100 lbs. $12.50. Peund postpaid 36c.

A fine grass which is especially well adapted for permanent pastures. It is one of the very first to start growth in the spring, and is of remarkably quick and strong aftergrowth, either when closely cropped or after mowing. Meadow Foxtail is especially adapted for sowing in low or wet places, in marshes or sloughs, and occasional overflooding this grass does no harm to it. It thrives in dry ground and marshes subjected to occasional overflowing, and this grass should be sown instead of Timothy, together with Red Top, Tall Fescue, Floating Meadow and Water Grass and the large quantities of fine hay thereby can be obtained from such otherwise worthless ground. It closely resembles Timothy, but the head is smaller and soft; besides, it is more leafy in character and harder, starts much earlier in the spring, is in blossom and ripe three to four weeks before Timothy is ready to be thinned up again quickly when pastured or mown.

Many are under the impression that this valuable grass is the same thing as a wild species commonly known as "Foxtail" or "Squirreltail," and are afraid to sow it. If this description is read carefully, however, it will be found that there is no similarity and that it bears no relation whatever to this wild Foxtail.

Lb. 40c; bu. (14 lbs.) $3.35; 100 lbs. $35.00. Lb. postpaid, 40c.

This variety is also known as "Velvet Grass" and "Yorkshire Fog Grass." Although most valuable under certain circumstances, this grass is but little known. It prefers a moist and loose soil, and, on account of its deep and strong root formation, it produces a very luxuriant growth even on peaty and boggy swamps where it is almost impossible to secure other grasses. This grass should therefore be included in all grass mixtures for sloughs or sloughy marshes, in particular for pea bogs that are too rich for summer or fall and produce no vegetation at all. This grass grows two to three feet high, matures early, flowering in June, and has a soft and handsome appearance. Lb. 25c; bu. (14 lbs.) $2.50; 100 lbs. $15.00. Lb. postpaid, 35c.

A very valuable grass for improving low and wet meadows, marshes, or sloughs, succeeding best on moist and wet land which is often flooded. It is not well adapted for sowing alone, but does better if sown together with other varieties adapted for low ground, when a large quantity of fine hay can be secured. It is not a tall grass, growing about four to five feet high. Lb. 60c; bu. (14 lbs.) $8.00; 100 lbs. $40.00. Lb. postpaid, 60c.

A variety which prefers low and wet soils, therefore of great value for land which has been overflowed or under water, where other grasses do not succeed, as they drown out. Although it grows coarse and robust, the hay, which is produced in large quantities, is very similar and well liked by all kinds of stock. It is a perennial, 1 to 2 feet high. Lb. 25c; bu. (14 lbs.) $3.35; 100 lbs. $23.00. Lb. postpaid, 35c.

28. Reed Canary Grass—Phalaris Arundinacea.

This is a tall, leafy perennial, two to four feet or more high, with smooth sheaths and branches panicles four to eight inches long. It is common on low, wet grounds and is widely distributed from New England southward to Tennessee, and extending across the continent to California and Washington, and is also a native grass in Europe. Drought or cold will affect it but little, and it does well in the shade. Reed Canary Grass thrives in the red and yellow soils, as well as on low, marshy ground or sloughs, where it will furnish a large amount of hay, but it will also grow fairly well in dry ground. It is sown on low lands, it will soon establish itself and drive out the wild or worthless varieties. Lb. 55c; bu. (14 lbs.) $6.75; 100 lbs. $45.00. Lb. postpaid, 65c.

29. Fowl Meadow Grass—Poa Serotina.

A native grass found in the eastern half of the Northern States, and highly approved for permanent pastures and meadows. It prefers low and moist lands, and succeeds well in wet meadows, or low places along streams liable to occasional overflow. It is a perennial, 18 to 24 inches high, flowers in July and August. Lb. 40c; bu. (14 lbs.) $6.48; l. 45c; l. postpaid, 50c.

30. Tall Fescue Grass—Festuca Elatior.

This valuable grass is found throughout Europe and also in this country, where it is highly valuable for permanent meadows. Though coarse and robust in habit, it makes a very good quality of hay which is very nutritious and is greedily eaten by all stock. Being also very productive, yielding larger quantities of hay than most other grasses, it also produces much more in all mixtures for permanent meadows on moist and strong soils. It is also a good pasture grass, and in Virginia it is the only grass that is being much utilized in swampy places. As this grass is naturally adapted for low lands, where the soil is moist and strong, and is not affected by overflooding, it is one of the best grasses to sow in marshes or sloughs, which are often subject to water. It is perennial, growing from 3 to 5 feet high. Lb. 35c; bu. (14 lbs.) $4.60; 100 lbs. $75.00. Lb. postpaid, 50c.

This variety is a hardy perennial of dwarf growing habit, and being very deep rooted, of quick successive growth when closely cropped, is especially valuable as a pasture grass. It starts early and holds out until late in the fall. It prefers deep, rich and moist soil but is one of the best grasses as it grows in almost any location and makes a fine, velvety and luxuriant growth. Lb. 35c; bu. (14 lbs.) $5.60; 100 lbs. $35.00. Lb. postpaid, 50c.
32. MINNESOTA GROWN MEDIUM RED OR JUNE CLOVER.

The Medium Red Clover may justly be styled "the corner stone of agriculture" in the North Western, Central and Eastern States. Either alone or in a mixture with other grasses for hay or pasture it generally constitutes from one-eighth to one-third of the total area of cultivated land on most successful farms throughout this area, and is an important crop far beyond these boundaries. For centuries it has constituted one of the most important factors in maintaining a uniform system of farm management for the country for the Old World. It has been sown in Great Britain and Europe and is now used extensively in the different parts of the United States.

Red Clover is utilized both as a hay and as a pasture crop and on the latter account it figures largely in the feeding of livestock. It is superior to any other clover for this purpose as it is a highly nutritious and evenly digestible feed for hay or pasture. It withstands the severest colds and is more resistant to blights than many other grasses. It can be sown at any time from April to September and can be used for hay or pasture. It is also a good source of manure, being very rich in nitrogen. It is an excellent cover crop and makes the soil more fertile. It has been used extensively in Russia, and is now becoming popular in the United States.

FARMER SEED & NURSERY CO., FARIBAULT, MINNESOTA.

Please Note—Prices on Clover are subject to fluctuations of the market, and we therefore reserve the right to fill orders at prices quoted on the different varieties only as long as the market permits us to do so. Should the market be higher when we receive your order, then we shall send seed at the full value of the money remitted. Buyers of large quantities should write for samples and for definite and lowest prices before buying, which will quote by return mail, then there is sure to be no misunderstanding.

33. MAMMOTH CLOVER—Trifolium Pratense Perenne.

Also known as Pea Vine Clover or Cow Grass, this is well known for its enormous yields and for reclaiming exhausted land. It is extremely hardy and will flourish on soil which is too low and heavy for the Common Red Clover. Some of the best varieties of Mammoth Clover are wanted in our Minnesota nursery, and we have every reason to believe that the seeds described below will give the best results, because it is a hardy perennial and hardly ever freezes out. On account of being so permanent it can be sown to good advantage in fall, even here in the Northwest, and should always be included in Permanent Pasture Mixtures. It produces a large amount of hay, and is also excellent for green manure. It can be sown at any time from April to September and can be used for hay or pasture. It is also a good source of manure, being very rich in nitrogen. It is an excellent cover crop and makes the soil more fertile. It has been used extensively in Russia, and is now becoming popular in the United States.

34. CRIMSON CLOVER.

This is also called Giant Incarnate and German Mammoth Clover. Although it is only an annual, it answers the same purpose as the considerably higher priced Medium Red Clover in many respects. It is the nature of a winter grain, can, however, also be sown in spring as well as in fall. Furthermore the sections springing up in the fall are a boon while in the eastern states it is generally sown in fall. It is remarkable for its rapid growth, and is the only Clover that yields the first crop the first year. One of the most important features is its great value as a fertilizer. It should be sown at the same time as all spring grain for the purpose of reclaiming worn-out soil and keeping up improved land to its fertility. If sown in spring with grain, as a fertilizer, it should be turned under the same fall on account of being only an annual. On common Clover land it would do but little, it is proper for a denser heavy growth. This Clover, like other leguminous plants, gathers nitrogen from the air and stores it in the plant and roots; which becomes available food for succeeding crops. The nitrogen for the succeeding crops is so valuable that less than $30, being equal to that found in twenty tons of stable manure, and can be obtained at such a comparatively small cost. On account of its peculiar quick-growing habit and its heavy dense growth right from the first, it makes a tremendous amount of clover and is also a good green manure. It is also very valuable for hay, being very nutritious. It succeeds admirably on sandy soil, but also produces a good crop on heavier soil. All situations seem to suit it, excepting low and infertile land.

FARMER SEED & NURSERY CO., FARIBAULT, MINNESOTA.

We have been using your Seed for the last ten years. Have always had the best success and can not make a garden without them. —M. MADISON. Every, Ind.

My order for trees arrived here in finest condition and everything is satisfactory. I paid you $10.00 the same kind about this time last year for $40.00. —GEO. E. WRIGHT, Gildford, Mont.

Crimson Clover.
RELIABLE MINNESOTA GROWN CLOVER SEED.

PRICES ON CLOVER SEED ARE SUBJECT TO THE FLUCTUATIONS OF THE MARKET.

35. WHITE CLOVER—Trifolium Repens.

This is of particular value in mixtures for permanent pastures and lawns, and will grow on almost any kind of soil, even on wet and moist ground, but not on such as overflow for any length of time. Being a deep-rooted plant, it will also prevent the ground from being washed away by heavy rains. The seed is very fine, and if sown by itself, about five pounds are sufficient per acre; it should however, never be sown alone, unless it be for raising seed, for it grows with other grass seeds, especially with Blue Grass, to obtain permanent pastures.

(35 a) Fancy, not prepaid. Lb. 45c, peck $5.50, ½ bushel $12.50, bu. $24.50, 100 lbs. $40.00, sacks 22c each extra.—Pound, postpaid, 35c.

(35 b) Choice, peck $5.75, ½ bushel $11.25, bu. $22.00, 100 lbs. $36.00, grain sacks 22c each extra.

37. ALSYKE or SWEDISH CLOVER—Trifolium Hybridum.

The advantages which the Alsyke Clover has over Red Clover and other varieties is its hardiness and true perennial character. It adapts itself to a great variety of soils, growing on the edge of a stream, in swamps or on low land and also flourishing on dry and stony hills, stiff clay and upland soils, this being capable of resisting the extremes of drought and wet weather. It is well liked by all stock, either green in the pasture or when cured for hay. Horses, cows and sheep prefer it to Red Clover, as it makes finer and better hay than this. It is the choice for stock, and well liked by bees. This clover grows 15 to 20 inches high, the heads are round and flax. It can be sown to Timothy to good advantage, as both mature at the same time, which is a very important feature for the production of hay. Wherever the Red Clover fails for certain reasons, Alsyke should be sown on account of its hardy nature.

“Farmer Brand”: Lb. 45c, postpaid. Not prepaid, Lb. 35c, peck $4.35, ½ bu. $8.50, bu. $16.25, 2½ bu. $40.00, 100 lbs. $27.00, sacks included.

(37 a) "Fancy": Not prepaid, Lb. 35c, peck $4.25, bu. $15.25, 100 lbs. $25.00, grain sacks 22c each extra.

(37 b) "Choice": Peck $3.75, ½ bushel $7.00, 100 lbs. $22.50, grain sacks 22c each extra.

For our Alsyke and Timothy Mixture, see page 10. This is a very low-priced mixture, which should be sown wherever it is too wet for Medium Red Clover.

38. BOKHARA, SWEET or BEE CLOVER—Mellilotus Albus.

The True White Flowering Bokhara Clover.

This Clover is especially adapted for bee pastures; a clover flower is flat up to in at least half an acre to an acre, for it is greatly relished by them, and the honey is as nice and clear as crystal. It grows on poor and sandy soil and also on land that is as solid as rock; its strong roots will penetrate any kind of soil. The value of the Bokhara Clover as a fertilizer was unknown at all until recently; several experiment stations published articles on it. Within the last few years the demand for this clover has been increasing tremendously. It is planted mainly for fertilizer, however in many sections it is being grown for fodder and the reason is that in feeding value it is equal to Red Clover. It has been proven by many experiments, that Bokhara Clover will fertilize the soil with bacteria for the successful growing of Alfalfa. It is a great fertilizer and will in a short period make sandy soils fertile. Now 10c to 15c per acre.

As a fertilizer Sweet Clover ranks the highest of leguminous crops. It has the ability of gathering nitrogen from the air and enriches the soil with it. All other clovers have slender, fibrous roots which are slow to grow, but Sweet Clover develops clusters of fleshy roots which will carry many feet into the ground and decay when 2 years old, leaving their nitrogen contents in condition for immediate use, and the soil in the highest state of fertility.

Price: Lb. 30c, peck $5.90, bu. (60 lbs.) $14.65, 100 lbs. $24.00, not prepaid, bags 22c each extra.—Lb. postpaid 40c.

38 b. "ELLY" or SWEET CLOVER—Mellilotus Officinalis.

Is very similar to the White Flowering sort and is also a biennial, but blooms earlier. For inoculating the soil for alfalfa culture as well as for fertilizing purposes in this kind of variety is preferred by many. For bee pasture it is much used to supplement the White Flowering variety. As it blooms about two weeks earlier the season is prolonged. The plant is of dense growth and when once fairly started, will flower out all summer.

Price: Lb. 20c, peck $2.25, bu. $7.50, 100 lbs. $12.50, not prepaid, bags 22c extra.—Lb. 30c, ppd.

39. KIDNEY VETCH.

Anthyllis Vulneraria.

A variety of Clover little known in this country. The seed is of about the same shape and size as Red Clover, but the kernels are green on one end. It thrives on heavy ground. It furnishes good pasturage as well as hay, and is not affected by severe drought. Several years ago, when grown by the Experiment Station at Garden City, Kan., it withstood severe drought exceedingly well. Sown in July or August, like Crimson Clover, it will give a large yield of early next spring or can be plowed under green. It is a great fertilizer and will in a short period make unproductive soils fertile. About 10 to 15 pounds of seed are required for one acre.

Price: Lb. 30c, peck $4.00, bu. $15.25, 100 lbs. $25.00, not prepaid.—Pound postpaid, 40c.

40. SAIFNOIR or ESPARCETTE CLOVER.

Onobrachis Sativa.

An excellent, but comparatively little known variety, of specialty value. It is growing in light, dry, or poor soil, and is very deep-rooted, and therefore withstands drought. On account of its high feeding value it is a very good fodder plant. This variety is also known under the name of "Saint Clover"; it is one of the most valuable for sandy or freely drained soils and in barren regions, deficient in rainfall. It makes excellent feed for cows, increasing the flow and quality of milk. Will make two good cuttings a season. Escarliette is usually sown with oats or barley, at the rate of 25 to 40 pounds per acre.

Price: Lb. 15c, 25 lbs. (for one acre) $2.75, bu. (50 lbs) $5.25, 100 lbs. $10.00, not prepaid.—Pound postpaid, 25c.

41. YELLOW TREFOIL.

Medicago Lupulina.

This variety is valuable for a sheep pasture on very light, dry or poor ground, and can be sown either alone or with other grasses. It grows very rapidly and is very productive. It is of considerable value for fertilizing purposes to plow under green; will make light, loose soils productive.

Price: Lb. 20c, peck $2.25, bu. (60 lbs.) $7.75, 100 lbs. $12.50, not prepaid.—Pound postpaid, 30c.

I have purchased Clover Seed from you several times and the seed received was always of the best quality. The Clover I sowed last spring was a last high last fall. I am convinced that your seeds are the best. WM. PAETZINCK. Holt, Minn.

The Alfalfa is doing fine. I kept it twice last year, and it was 8 inches high before it froze up this fall. The Bar of Corn purchased from you, raised 740 ears from the one ear.

J. A. JOHNSON, Midway, Wis.

WRITE FOR OUR SPECIAL IMPLEMENT CATALOG & PREMIUM LIST—FREE.
ALFALFA OR LUZERNE.

Of all the different kinds of Clover, Alfalfa is the hardest and most productive. During long protracted droughts it will flourish and yield abundantly when all other vegetation dies. Its roots descend to great depths wherever the soil is loose and permeable, often averaging 15 to 20 feet. It has been recorded that Alfalfa sends its roots to a depth of 30 to 60 feet, and it is believed that under especially favorable circumstances they may even go deeper. It grows well on any soil underrated by a loose and permeable subsoil.

Alfalfa hay, when well cured, is of the greatest feeding value, and is greatly relished by all kinds of stock. It is very rich in protein, that is, in the albuminoids and similar nitrogenous compounds, which, when fed to cattle, are transformed into protein in the body. It is the best substitute for wheat, bran and cotton seed meal, usually purchased by the farmer, to help make a balanced ration with Timothy hay and corn fodder, and since it can be grown on the farm, there is a great saving in the cost of producing pork and mutton. Alfalfa hay can be fed profitably to all kinds of live stock, and is especially valuable for young and growing stock, cattle, horses, hogs, and sheep. To make the best hay it should be cut when the flowers begin to appear, for if cut when in full bloom, or even later, the stems become woody and hard. When grown on the most suitable soils, Alfalfa yields, with ordinary care and cultivation, from one to two tons of rich, nutritious hay every four to six weeks per acre, and can be cut, according to location and circumstances from three to eight times a season.

As a milk producer, Alfalfa has no equal, and no dairy farmer should be without a field of it; for it can either be pastured or fed green from the field. One acre of Alfalfa will furnish forage for 15 to 25 hogs per season, growing pigs to run in a field of Alfalfa. It is also the greatest soil renovator, and is highly valuable as a cover crop in the rows under well prepared soil at the rate of 15 to 20 pounds per acre. There is no cheaper or better way of producing pork than to allow Alfalfa to twine the same year the seed is sown and harvest ½ tons of hay per acre.

It should not be overlooked that our "FARMER BRAND" seed is the highest quality obtainable. And that it always has a purity test of at least 90 per cent and oftentimes tests close to 100 per cent. Write us for definite test and samples which we cheerfully send upon request.

Field of Grimm Alfalfa, Showing Our Warehouse in the Background.

42. GRIMM ALFALFA.

This is the hardiest of the Alfalfa family and is a strain of the Medicago Sativa, introduced by Mr. Wendelin Grimm of Carver county, Minnesota, from Germany, over thirty-five years ago. As this strain has been grown here in the Northwest climate of Minnesota for such a length of time, it is thoroughly acclimated and hardy so that it can be safely grown everywhere. In comparative tests, which the U. S. Department of Agriculture carried on for a great many years, the Grimm Alfalfa withstood the cold and rigorous climate of North Dakota beyond all expectations, for only two plants out of seventy winter killed, while of all the other varieties, planted at the same time, only a few of the plants survived.

The U. S. Department of Agriculture describes the Grimm Alfalfa as follows in Bulletin No. 306: "To the casual observer Grimm Alfalfa looks very much like all other Alfalas; but on close examination, it is found to be considerably more diverse than most kinds, showing individuals of upright and decumbent growth next to one another and showing a greater diversity in flower color than prevails in common Alfalfa. All Alfalas has a certain range of flower color, but the Grimm has more than most cultivated sorts. The origin of this diversity can probably be traced to crossing in middle Europe between cultivated fields of true Alfalfa (Medicago Sativa) and neighborizing isolated wild plants of the yellow-flowered sickle lucern (Medicago Falcata.) These two species intercross with considerable freedom. The percentage of crossing that has taken place is necessarily very small because of the scarcity of plants of the wild parent. It is more or less evident in practically all European Alfalas, but especially in that which is imported from Germany, Austria and Roumania. The Pronisno and Potolski Alfalas of France also show this kind of diversity to a large extent.

Price for Grimm Alfalfa: "Farmer Brand," lb. postpaid 30c.—Not prepaid, lb. 40c.—peck $3.75, ½ bu. $6.85, 1 bu. $13.25, 2½ bu. $22.50, 100 lbs. $22.00, sacks included.

46. MONTANA ALFALFA.

This is especially recommended by our Agricultural Department as being hardy and reliable. Montana, grown seed is usually of extra fine quality, large and plump. Our seed is obtained from the best Alfalfa section.

Price for Montana Alfalfa: lb. postpaid 30c.—Not prepaid, lb. 40c.—peck $3.35, ½ bu. $6.25, 1 bu. $12.00, 100 lbs. $20.00, sacks included.

Fancy Grade: Not prepaid, lb. $2.85, bu. $10.50, 100 lbs. $18.00, sacks 22c each extra.

47. WESTERN ALFALFA.

We can supply very fine quality western grown alfalfa seed from the best alfalfa sections of Nebraska and Kansas. The past season was a very favorable one for the production of excellent quality seed in these sections, and price is low.

Fancy Grade: lb. postpaid 30c.—Not prepaid, lb. 40c.—peck $2.50, ½ bu. $9.80, 1 bu. $18.00, sacks 22c each extra.

Choice Grade: Not prepaid, lb. $2.25, bu. $8.00, 100 lbs. $13.00, sacks 22c each extra.

43. ALFALFA—Medicago Sativa.

This is thoroughly acclimated, hardy, northern grown seed, having been grown either here in Minnesota, Wisconsin, or in North and South Dakota. That such Alfalfa must be hardy is self evident. Furthermore, it must also be free from dodder, plantain, and other noxious weed seeds found in Alfalfa grown in a milder climate. We sell move of this hardy strain than of all the other Alfalas, and recommend it particularly for the Northwest.

"Farmer Brand" lb. postpaid 40c.—Not prepaid, lb. 30c., pk. $3.75, ½ bu. $6.85, bu. $13.25, 2½ bu. $22.50, 100 lbs. $22.00, sacks included.

A Fancy, not prepaid, lb. 30c., peck $3.35, ½ bu. $6.25, bu. $12.25, 100 lbs. $20.00, grain sacks 22c each extra.

See page for further information on Alfalfa.

44. DRY LAND ALFALFA.

This is a strain of the Medicago Sativa that has been mainly grown in the arid and semi-arid sections of Nebraska, Montana, North and South Dakota, and has been produced for years in regions with limited rainfall and without irrigation. It is thoroughly naturalized and acclimated for such localities, where it is sure to produce better results than other kinds.

lb. postpaid 40c.—Not prepaid, lb. 30c., peck $3.75, ½ bu. $6.25, bu. $12.25, 100 lbs. $20.00, 100 lbs. $24.00, sacks included.

45. TURKESTAN ALFALFA.

This was introduced by our Agricultural Department. It was grown on the high table lands of Asia, and is especially adapted to the sudden changes of temperature that prevail there—intense heat in midday and very often frost at night, even in midsummer. Its cultivation has been quite successful in the arid regions of the West under conditions where common Alfalfa fails. lb. postpaid 30c.—Not prepaid, lb. 25c., peck $3.25, ½ bu. $11.50, 100 lbs. $18.50.

46 a Fancy Grade: Not prepaid, lb. $2.85, bu. $10.50, 100 lbs. $18.00, sacks 22c each extra.

46 a WESTERN ALFALFA. We can supply very fine quality western grown alfalfa seed from the best alfalfa sections of Nebraska and Kansas. The past season was a very favorable one for the production of excellent quality seed in these sections, and price is low.
WHY OUR CLOVER-GRASS MIXTURES ARE BEST ADAPTED FOR PERMANENT PASTURES AND MEADOWS AND HOW THESE CAN BE BEST OBTAINED.

It is a well established fact that a judiciously selected mixture of several varieties of Grass and Clover Seeds will produce a much larger yield—generally again as much—per acre than can be obtained with only one or two kinds sown alone. This has again been demonstrated the past season, during severe droughts in many sections. In sowing a large variety you are not running the risk of not securing a stand at all, as you would by sowing only one or two kinds, for in a larger variety there must be at least several kinds of grasses adapted to your soil, while if you sow only one kind this may not be at all suitable and no results will be obtained. A pasture containing a variety of grasses and clover is again as prepotent and earlier than it but one kind of grass is used, and can also be pastured through the season, as most grasses used in our Clover-Grass Mixtures are deep rooted and extremely drought-resisting. Several varieties sown together for a meadow, or for hay, cover the ground very closely and a larger yield of hay of much better quality can always be obtained than by sowing only one or two kinds of grass seed. What we have said above in regard to grasses being deep-rooted and drought-resisting, also applies to grasses we use in our special mixtures for permanent meadows. In a great many parts of the country only one or two kinds of grasses are known and mostly sown, and these are Timothy and Clover. While Timothy is a splendid grass, and Clover the foundation of all successful farming, both are not permanent, and not well adapted for pasturing if sown alone, as they are easily affected by drought and frost, thereby making it necessary to reseed every year or two, — a rather expensive method. In our carefully selected Clover-Grass Mixtures several varieties of natural grasses are sown together, and these will cover the ground very closely and make three spears of grass grow where formerly there grew but one green. Besides, these Clover-Grass Mixtures will stand various climatic and soil conditions better, will last longer or be permanent, and will yield at least double the quantity of hay that is secured from ordinary fields sown to Timothy and Clover.

HOW TO SOW THE SEED.—For sowing our Clover-Grass Mixtures the ground should be well prepared, the same as for grain. Fall plowed land is always preferable, because this holds the moisture better than ground plowed in spring. After the ground has been well prepared the grass seeds are sown either by hand or with our own large drudge seeders. As grass seed is very fine, it should not be covered too deep, one stroke with the harrow being sufficient to cover the seed. The ground should be formed down by means of rolling or planking, to bring the seed in direct contact with the soil and to induce immediate sprouting. The surest and best way to obtain a stand is to sow the seed alone, but if preferred, grain can be used for nurse crop, which, however, should not be sown heavier than about one-half of the usual quantity per acre. If sown alone our Clover-Grass Mixtures produce a full crop of hay or a most luxuriant pasture the first year.

Haying Scene on Farmer Seed & Nursery Company's Farms.

### A. — CLOVER-GRASS MIXTURES FOR PERMANENT MEADOWS.

The question of what grasses to use in a meadow or hay mixture is, for all those who have had no experience with the different varieties of natural grasses, hard to answer. There are so many valuable grasses and so many different kinds of soil, that it is a difficult matter for a great many to make a proper selection for the purpose required.

For a meadow we combine those grasses and clovers which blossom and mature at about the same time. Grasses of a bunchy growing habit should be intermingled with those of a spreading nature, so as to fill the spaces and make a compact and even growth of herbage. We also use such kinds as will make a rapid growth after each cutting. As Clover, sown together with Grass Seeds will increase not only the quantity but also the quality of the hay, we have added Clover to all the Clover-Grass Mixtures intended for such soils that are adapted for growing Clover. All kinds of farm stock enjoy a varied ration, and the hay will be relished more and prove more nutritious and milk-producing when the meadow consists of several sorts instead of a single kind.

### B. - CLOVER-GRASS MIXTURES FOR PERMANENT PASTURES.

For a pasture mixture the chief requisite is that the grasses be early, medium and late, and do not mature all at the same time, so as to furnish continuous grazing throughout the entire season. Tufted grasses must be used only in small proportion for pastures and their places must be taken by the turf formers with their interlacing mat of underground runners.

#### B. No. 1
- For high and dry ground, light soils:

#### B. No. 2
- For high and dry ground, heavy or clay soils:
  - Meadow Fescue
  - Orchard Grass
  - English Rye Grass
  - Tall Meadow Oat
  - Blue Grass
  - Italian Rye Grass
  - Red Fescue
  - Timothy
  - White Clover
  - Alysee and Red Clover

  **Sow per acre:**
  - 25 to 30 lbs: $4.00

#### B. No. 3
- For moist ground and rich soils:
  - Meadow Foxtail
  - Blue Grass
  - Fowl Meadow
  - Meadow Fescue
  - Orchard Grass
  - English and Italian Rye Grass
  - Timothy
  - Red Top
  - Alysee and Red Clover
  - White Clover

  **Sow per acre:**
  - 25 lbs: $4.00

#### B. No. 4
- Specially adapted for wood pastures: also adapted for orchards and shady places:
  - Wood Meadow
  - Orchard Grass
  - Blue Grass
  - Tall Meadow Oat
  - Meadow Foxtail
  - White and Alysee Clover
  - Timothy

  **For Top Seeding, Sow per acre:**
  - 10 to 15 lbs: $4.50

#### B. No. 5
- For low bottom lands, sloughs or marshes: also for top-seeding to improve a pasture on low ground. During the summer and early in fall such ground is generally dry enough to allow working it with a team, when it should either be plowed or thoroughly disked and then harrowed. After the grass mixture as described below is sown, the ground should be harrowed again to cover the seed.
  - Meadow Foxtail
  - Floating Meadow
  - Meadow Soft Grass
  - Creeping Bent Grass
  - Meadow Fescue and Red Top
  - Alysee Clover

  **Sow per acre:**
  - 25 lbs: $4.00

#### B. No. 6
- Specially selected for sheep pasture on light, sandy soils or dry uplands and hillsides:
  - Sheep's Fescue
  - Crested Dogstail
  - Timothy
  - Orchard Grass
  - Meadow Fescue
  - Red Clover
  - White Clover and Red Top

  **Sow per acre:**
  - 25 lbs: $4.50

### C. - CLOVER-GRASS MIXTURES FOR PARTICULAR PURPOSES.

#### C. No. 1
- We call this our Standard Clover-Grass Mixture. It can be sown anywhere on ground which will produce a crop of corn or small grains. It can be mown early and will produce a good, heavy crop of hay, and the quick and successive aftergrowth will furnish good pasture until late in the fall. For a good many years, and in all parts of the country this, our C. No. 1 Clover-Grass Mixture, has given the best results with our brother farmers, so that we can earnestly recommend it and it should be more largely sown. Please remember that our prices on all grass mixtures are based on best quality seeds.

  **Sow per acre:**
  - 25 lbs: $4.50

#### C. No. 2
- We have selected this Clover-Grass Mixture with a view to suit the conditions in the Western and extreme Northwestern states, and for similar conditions elsewhere, also for sections of the country where Timothy or Clover are uncertain and do not succeed well when sown alone. We include these however, as we have found that while they are uncertain when sown alone, they are more apt to succeed when sown with other varieties, and should they fail, the other grasses take their place, thus avoiding an entire failure. This Clover-Grass Mixture is adapted for sowing on land that will produce a crop of wheat, oats, etc., and is selected with a view to produce a crop of hay, and pasture afterwards or it can be used for pasture entirely.

  **Sow per acre:**
  - 25 lbs: $4.50
C. CLOVER GRASS MIXTURES FOR PARTICULAR PURPOSES, Cont’d.

C. No. 3. Quite often we hear from farmers that it is impossible to get a stand of tame grass started in their locality. First thing that failed was tried before. Now, with the large variety of natural grasses we have, which are adapted to the most widely different conditions of soil and climate, it is easy to obtain a stand of grass that will suit the land. We would advise those who have failed before, and where the conditions of soil and climate are unusually severe, to sow the following Clover-Grass Mixtures, the results will be satisfactory:

Meadow Fescue, $1.50
Bromus Inermis, 25 lbs. $1.50
Sow's Fescue
Italian Rye Grass, 50 lbs. 8.75
Blue Grass & Rye, $1.50
Top.
White Clover.

Sow per Acre.

Orchard Grass, 25 lbs. $1.50
Tall Meadow Oat, 25 lbs. $1.50
Hard Fescue, 25 lbs. $1.50
Sow's Fescue
Italian Rye Grass, 50 lbs. 8.75
Blue Grass & Rye, 25 lbs. 1.50
Top.
White Clover.

Sow per Acre. 1.50

C. No. 4. DAIRY FARMERS’ ORCHARD CLOVER-GRASS MIXTURE.—We have selected only the earliest, hardest, best and quickest growing varieties for this Clover-Grass Mixture. Dairy farmers who sow hay very early and have a pasture for the rest of the season, or intend to make two crops of hay the same summer, and this especially selected Clover-Grass Mixture is admirably suited for this purpose. It is adapted for ordinary or medium soils which will produce a good crop of corn or wheat, and can be sown anywhere.

Orchard Grass.
Tall Meadow Oat.
Fescue.
Italian Rye Grass.
Meadow Foxtail.
Sorption.
Red Clover.
Alsike Clover & Timothy.

Sow per Acre. 1.50

C. No. 5. This is our Special Alfalfa, or Lucerne Clover-Grass Mixture, and consists mainly of Alfalfa, Bromus Inermis, Orchard Grass, and such varieties of grasses that will not stand drought, but will also flourish on poor soils and give large yields in the driest season. We sell large quantities of this special mixture to our customers in Kansas, Nebraska, and Oklahoma, from the best satisfaction. Sow 20 lbs. per acre. 20 lbs. $4.50, 50 lbs. $8.75, 100 lbs. $17.00.

C. No. 6. SPECIAL RENOVATING CLOVER-GRASS MIXTURE, or QUICK RETURN MIXTURE.—We selected and made this up for raising clover in pastures which have been much killed or otherwise injured, raising clover, and a full crop from such fields can thereby be secured.

Orchard Grass.
Italian Rye Grass.
English Rye Grass.
Tall Meadow Oat.
Timothy.
Mammoth Clover.

Sow per Acre. 1.50

SPECIAL CLOVER GRASS MIXTURES FOR HOG PASTURES.

It is a well known fact that hogs can be raised more profitably on Grass and Clover than on Corn only, because the former contains all the necessary bone-building elements in which Corn is almost entirely lacking. Aside from this, Corn alone is not a condiment for young pigs and generally interferes with their health. After hogs are well developed, they might be finished off on Corn alone, but from a sanitary as well as from an economical standpoint this is not the best method. Any land which will grow a good crop of Corn and small Grain will naturally also produce a fine crop of Grass and Clover, and a good hog pasture can be provided with considerably less labor and expense than Corn. If a good pasture is once established, the hogs will not only keep healthy and strong but will gain weight easily and quickly.

Being greatly interested in hog raising ourselves, we have always aimed to provide a good luxuriant and as durable pasture for them, so as to make this enterprise as profitable as possible. As we have all the different varieties of Grass and Clover Seeds at our disposal, we have managed to establish Clover Grass Mixtures that will not only provide an abundant pasture for the hogs in about six weeks time from the day of sowing the seed, but which will also produce permanent hog pastures, such as will last for at least five or six years if not closely cropped in the fall. Our Pasture Mixtures are suited to all parts of the country.

We advocate to sow our Hog Pasture Clover Grass Mixtures, together with Barley or Rye in the spring as soon as the ground is in good condition to be worked. Fall plowed land is always preferable, as this holds the moisture during the winter and keeps the grass rooted well over the ground the hogs can be let into it. Barley is well liked by hogs and they will eat it quite eagerly, thus giving the grasses a chance to develop. When the Barley is pastured down then there will be a good stand of grass and clover established which will furnish luxuriant pasture throughout the season.

A. Hog Pasture Clover-Grass-Mixture for Quick Results and a Full Winter Stand.

This Clover-Grass mixture is composed mostly of quick growing Grasses and Clovers, and is put up for the purpose to produce a quick and luxuriant growth in the shortest time possible. Will be ready to use the first year and will last for several years, will help to fatten the hogs quickly and keep them in good health. This splendid mixture has stood the test for many years and should be sown by every hog raiser. This mixture consists mainly of the following varieties: Italian Rye Grass, Orchard Grass, Tall Meadow Oat, Crimson Clover, Mammoth Clover, Timothy.

Sow per Acre. 1.50

B. Clover-Grass Mixture for a Permanent Hog Pasture.

For an early pasture and for securing a complete stand the first year this Clover-Grass-Mixture is as valuable as the former. In order to produce more permanent results however, we found it necessary to use a larger variety of hardy Grass and Clover Seed, such as will stand close cropping and push forward constantly a new growth. It is natural that it requires a heavier seed of Grass and Clovers with a strong root formation to supply inextinguished pasturage.

This "B" Clover-Grass-Mixture consists largely of the following varieties: Crimson Clover, Mammoth Clover, Alsike Clover, White Clover, Italian Rye Grass, English Rye Grass, Orchard Grass, Bromus Inermis, Grooming Rye Grass, and Timothy. Sow 15 lbs. per acre. Price 20 lbs. $3.60, 50 lbs. $8.25, 100 lbs. $16.00.

C. Special Alfalfa Hog Pasture Mixture.

It is a proven fact that Alfalfa is of greatest feeding value for hogs, on account of containing the largest percentage of protein, which is the greatest bone and muscle builder. A well developed, strong frame is the first essential for successful hog raising. If this is once established, it is an easy matter to finish off with corn, and produce hogs of the heaviest weight in a short time.

Alfalfa, in connection with other deep-rooted Grasses such as the Mammoth Clover, White Clover, Bromus Inermis, Meadows Fescue, Orchard Grass, etc., forms an almost indestructible sod, and also produces an abundance of the most valuable pasturage; all being deep-rooted, they push forth a continuous growth in spite of unfavorable and dry seasons. Sow at the rate of 30 lbs. per acre. Price 20 lbs. $3.60, 50 lbs. $8.75, 100 lbs. $17.00.
LAWN GRASS SEED MIXTURES FOR ALL PURPOSES.

There is nothing that adds more to the appearance and attractiveness and also to the value of a home than a nice, well kept lawn, which can be easily established at a very small expense. A few suggestions in regard to lawn making may be appreciated by the amateur.

Lawn Grass Seed can be sown at any time, even in the spring until fall as the seeds are very hard, but the best time is early in the spring, on well prepared soil. If the ground intended for a lawn has to be graded, the best ground should be procured, and soil that contains obnoxious weeds should be avoided. It is poor policy to sow grass seed on ground that is as solid as a road, for the roots of the young grass cannot penetrate such soil. It should be spaded up first or it should be plowed and well pulverized by means of a harrow or rake. After it is well smoothed and leveled down, the seed can be sown. To obtain as even a stand as possible, we advocate sowing one-half of the seed one way and the other half the other way. By following this method, you shall be sure that your grass seed won't come up in strips. It is well to select a quiet day for sowing seed as some of the lighter seeds would be carried off in case it should be windy. Two and one-third to three bushels of lawn grass seed is required per acre or one pound for every 200 square feet of ground. It is necessary to sow grass seed very thick so as to obtain a close stand. This will also prevent weeds from coming up. After sowing the seed it should be raked in, if the area is large. It should be harrowed to cover the seed. To bring the seed into direct contact with the soil and to cause immediate sprouting, the ground should be tamped down by rolling or planking. During a wet spell, however, this would not only be unnecessary but, on the contrary, might prove detrimental as it would pack the soil too much and form a crust through which the young sprouts could not penetrate.

Nothing is more important than a carefully selected lawn grass mixture, composed of fine leaved and deep rooted grasses, such as will start early in the spring and remain nice and green until late in the fall. Under favorable circumstances, the common grasses may answer the purpose but they will last for one or two seasons only for which reason it is always advisable to sow carefully selected lawn grass mixtures.

On account of making grass growing a specialty and handling such large quantities of fancy grasses, we are in a position to prepare the finest lawn grass mixtures which insure the best results. Write us for special mixtures intended for special purposes.

PARK LAWN GRASS MIXTURE—For lawns of greater dimensions we recommend this as our standard lawn grass mixture. This has been sold by us for years, and has always given the best satisfaction. It has been sown on almost every kind of soil and under most every condition, and we have learned to sown our Park Lawn Grass mixture. The seed is free from weeds and of the best vitality. It will start at once before the weeds. It root deeply, withstanding severe droughts without turning yellow or brown, and will not grow in tufts or clumps. This mixture is unequalled for lawns, parks, temple and croquet grounds. Two and one-half bushels should be sown per acre. Qt. 35c 4 qts. $1.25, postpaid.—Not prepaid, lb. 35c, pk. (5 lbs.) $1.25, bu. (20 lbs.) $4.00, 5 bu. (100 lbs.) $17.50.

GARDEN CITY LAWN GRASS—Where a fine lawn around a private house is wanted, this Lawn Grass Mixture will be found best adapted. The grasses used in its combination will make a luxuriant growth in spring, summer and autumn, not being affected by drought very easily, and are always presenting the same green, velvety appearance. One quart will cover about 250 square feet. Qt. 40c 4 qts. $1.50, postpaid.—Not prepaid, lb. 35c, pk. (5 lbs.) $1.50, bu. (20 lbs.) $5.00.

SHADY NOOK MIXTURE—In many lawns where there are large shady trees, there are shady places where ordinary mixtures thrive but poorly or die out altogether. For such spots we have a special mixture of grasses which will grow in the shade as well as in the sun. If you have shady, barren places in your lawn, try our Shady Nook Mixture. Qt. 45c 4 qts. $1.75, postpaid.—Not prepaid, lb. 40c, pk. $1.60, bu. (20 lbs.) $8.50.

SPECIAL GOLF LINK AND TENNIS COURT MIXTURE—Our special mixture for this purpose is composed of fine hardy Grasses of low and creeping habit that will form a firm and close sod in a very short time, which will withstand any amount of wear upon it without suffering. Nearly all of the selected Grasses being deeply rooted the golf and tennis grounds established can withstand drought and heat without suffering. Qt. 40c 4 qts. $1.50, postpaid.—Not prepaid, lb. 35c, pk. (5 lbs.) $1.50, bu. (20 lbs.) $5.00, 5 bu. (100 lbs.) $24.00.

TERRACE SOD MIXTURE—A special mixture of grasses for sowing on terraces and side hills, producing strong, spreading roots, thus preventing heavy rains from washing out. It will withstand drought and exposure and thrive on shallow soils and at the same time produce a rich green lawn throughout the season. Qt. 45c 4 qts. $1.75, postpaid.—Not prepaid, lb. 40c, pk. $1.60, bu. (20 lbs.) $8.40.
MILLET.

Prices on Millet are subject to market changes. On large quantities please write us for lowest quotations.

Millet seed should always be shipped in good strong grain bags to Insure arrival at destination. Please add 2c extra for each bag. Nothing pays better for a stock raiser or dairy farmer than a few acres of Millet of some kind. It not only yields at least again as much hay per acre as Timothy and Clover, but is also of the greatest feeding value and milk producing quality. The hay is of very fine quality and is greatly relished by all kinds of stock. When spring is so unfavorable that other crops fail to grow, or when the season is so late and wet that corn will not mature any more, then there is always the greatest demand for Millet. It should, however, be sown regularly every year, and not merely as a catch crop.

GERMAN OR GOLDEN MILLET.

This grows very rank and is one of the best varieties for hay on account of being so sweet, nutritious and milk producing. On good, rich soil it will make a growth of 4 to 5 feet, and about the same height may be expected on average soil. It is a much better hay for stock than for milk, but being in full bloom, even the hogs will eat the cured hay quite greedily. A yield of five tons of hay per acre is nothing unusual. Seed three pecks per acre. Price, 3 lbs., 50c, postpaid. Not prepaid, pk. 60c, bu. $2.00, 2½ bu. $4.85. Sacks 22c extra.

COMMON MILLET.

No Millet does better on dry and light soil than this. It grows 2½ to 4 feet high with a bulk of fine stalks and leaves, and is excellent for hay. Of this seed about 3 pecks should be sown per acre. Price, 3 lbs., 50c, postpaid. Not prepaid, pk. 45c, bu. $1.35. 2½ bu. $3.25, grain sacks 22c extra.

HUNGARIAN MILLET.

In the Northwest no other variety is so well known and so much grown for hay as the Hungarian Millet. It is so valuable because it requires such a short season to make a fine crop and its hay is very rich in silage-producing hay. On account the variety is the best catch crop when other crops, already put in, for some reason fail to grow. In many localities where early potatoes are grown for the market, Hungarian is sown for a second crop as soon as the potatoes have been harvested, and this a crop of potatoes and a crop of Millet are harvested in one year from the same piece of ground. Hungarian does not grow as coarse as many other Millet varieties, but still yields quite heavy, three to four tons of hay per acre being an ordinary crop. The hay is quite leafy, of the very best quality, and is greedily eaten by all kinds of stock. For hay 3½ cts. per peck. Price, 3 lbs., 50c, postpaid. Not prepaid, pk. 45c, bu. $1.40, 2½ bu. $3.35, sacks 22c extra.

NEW SIBERIAN MILLET.

A good Millet introduced several years ago from Russia, being an entirely distinct variety, as the seed is of an almost orange color; the heads are, however, of about the same form as the Common Millet. It is the only hardy and the plants being so close together the plants are just covered with blades. This Millet is a heavy yilder, and the hay is of very fine quality. It yields from 50 to 70 bushels of seed per acre. Being introduced from the extreme north, it is very hard and will prosper under conditions where other varieties fail. Price, 3 lbs., 50c, postpaid. Not prepaid, pk. 45c, bu. $1.45, 2½ bu. $3.35, sacks 22c extra.

HOG MILLET.

Also called "Russian Millet," "Broom Corn Millet," etc. The name HOG MILLET has been selected on account of its great value for feeding hogs. It is invaluable for sections where corn cannot be safely grown, and in such localities solves the problem as to the profitable raising of swine. In 50 to 60 days from the time of sowing, it is ready to harvest. The seed ripens while the fodder is yet green, hence it can be used both for hay and seed with the best success. It will produce from 30 to 40 bushels of seed per acre, besides the fodder hay. It is unlike the German, Common and Hungarian Millet in habit of growth, producing a branching head, and the seed is plump and much larger. Price, 3 lbs., 50c, postpaid. Not prepaid, pk. 50c, bu. $1.60. 2½ bu. $3.75, sacks 22c extra.

EARLY FORTUNE MILLET.

A new and entirely distinct variety of Millet. The seed is 2 or 3 times the size of German Millet and is of a beautiful mahogany color. The great advantage this Early Fortune Millet has over other varieties is its extreme earliness, as it heads in 25 to 30 days. It yields very heavy, both seed and fodder. One most valuable feature of this Millet is that the hay can be fed to horses and other stock without any danger of bad results even when cut too late so that seed has formed. Price, 3 lbs., 50c, postpaid. Not prepaid, pk. 50c, bu. $1.75, 2½ bu. $4.20, sacks 22c extra.

JAPANESE BARNYARD MILLET. (Billion Dollar Grass.)

Japanese Barnyard Millet is offered also by some seed dealers as the "Billion Dollar Grass" under somewhat exaggerated descriptions. This variety of Millet was first grown in this country by Professor Brookes, of the Massachusetts Agricultural College, who brought it from Japan. It has proven to be very valuable and is highly recommended for the following reasons: It will grow 6 to 8 feet in height and will yield 15 to 25 tons per acre. This Millet may be sowed, fed green or cured into hay, and its feeding quality is about equal to fodder corn. It is sown at any time from the middle of May to the end of July, either broadcast at the rate of 30 pounds per acre or in drills using 10 pounds of seed per acre. Price, 3 lbs., 60c, postpaid. Not prepaid, 15 lbs., 95c, 50 lbs. $2.25, 100 lbs. $4.25.

KURSK MILLET.

Like so many of our hardest and best varieties of cereals, so has also the Kursk Millet been introduced from Russia. Extensive experiments have been conducted at both the South Dakota trial stations which proved the great merits of this Millet. It ranks very high in productivity and as well as seed. During extremely dry seasons it produces considerable more seed as well as hay than either Hungarian or German Millet, for which reason we recommend it in particular for the dry and arid sections of North and South Dakota and other sections. Price, 3 lbs., 50c, postpaid. Not prepaid, pk. 50c, bu. $1.75, 2½ bu. $4.20, grain sacks 22c each extra.
FORAGE AND FODDER PLANTS.

DWARF ESSEX RAPE.

This is, beyond all question, the most popular and the most profitable of all forage plants, giving the best satisfaction everywhere.

Dwarf Essex Rape can be grown to good advantage on land that has already produced an early maturing crop of some sort, such as oats, rye or winter wheat. Of how great value rape as a pasture or fodder plant has been fully realized by a great many farmers in all sections of the country during seasons of severe drought; and everybody who is acquainted with its high feeding value would not be without it for another year.

Dwarf Essex Rape is a pasture plant for all kinds of live stock—sheep, cows and swine; for fattening sheep it is most valuable. To provide for an early pasture for sheep and swine it should be sown early in spring, and as it is a remarkably fast grower, it will be ready to be pastured in five weeks from the time of sowing. Unlike other plants it can be sown at any time during spring and summer, so that you can have a good pasture whenever you need it.

Nothing will get sheep and hogs and better ready for market than Dwarf Essex Rape as it is so very nourishing. It is an easy matter to bring spring pigs up to 50 pounds in weight when six months old if fed on Rape.

Late in the fall when most pastures are barren Dwarf Essex Rape yields a splendid feed, as from it will not hurt it any, and it is so well relished by all stock—sheep, hogs and cows alike—that as long as there is anything left of the plants they will eat it. Rape can be sown with grain, using 5 pounds per acre, to provide pasture for sheep after harvest. It can also be sown in corn when this is cultivated the late. Good results are generally obtained for late fall pasture when Dwarf Essex Rape is sown after the spring grain has been harvested. When Rape is sown broadcast, 5 to 6 lbs. should be sown per acre. We handle only the genuine Dwarf Essex Rape, which has proven to be the only satisfactory kind, and offer it at a reasonable price.

1 lb. 25c; 3 lbs. 65c; postpaid. Not prepaid; 10 lbs. $1.00; 25 lbs. $2.25; 50 lbs. $3.75; 100 lbs. $7.00.

THOUSAND HEADED KALE.

Will yield a much heavier crop than Dwarf Essex Rape and is now considered much superior to the Rape in some sections. It grows to a height of 3 to 4 feet, and is so covered with small whisps of leaves that the name of Thousand Headed Kale was given to it. The seed can be sown early in April or any time thereafter till midsummer. Now broadcast 3 lbs. per acre, or in drills, using 1 lb. per acre. Drilling is preferable, for if it is drilled in rows 20 to 30 inches apart Kale can be cut down, thus reducing a much quicker growth. Lb. 80c, postpaid. Not prepaid; Lb 40c. 5 lbs. $1.75; 10 lbs. $3.25.

KENNEY'S EARLY AMBER SUGAR CANE.

This is the only variety of Cane that makes a fine syrup, as clear as crystal. Cane Syrup made from our Early Amber Cane grown here in Rice County has become famous, as it took first premiums at the State Fairs in four different States. The syrup has a very delicious flavor, and all that has used it will prefer it to the New Orleans Maboses. There is nothing like a home product on your table, for you know what you are eating. 3 lbs. 75c, postpaid. Not prepaid; 10 lbs. $1.00; 25 lbs. $2.75; 50 lbs. $4.25; 100 lbs. $6.00.

SUGAR CANE OR SORGHUM FOR FODDER.

Notwithstanding its great adaptability as a feed for live stock, the real value of sorghum (or sugar cane) has only recently attracted general attention. Its great merits is now beginning to be appreciated, and the demand is increasing about ten-fold every year. It is profitably grown everywhere, from Maine to Montana, and in every good corn ground, and does not appear to be affected by drought. As a fodder plant it is the most economical plant in existence, and of the very best quality, being sweet, tender, nutritious, and is greedily eaten by cattle, horses and hogs. As much as 80 tons of green fodder have been grown per acre, which is of the highest feeding value, and milch cows will give more and richer milk than if fed other feed. It can be cut several times during the season if not allowed to get too high and cut it to a sweet short hay. Sow 20 to 35 lbs. per acre for best results. It is a profitable crop also to grow for the seed, which is excellent for feeding poultry. 3 lbs. 50c, postpaid. Not prepaid: 25 lbs. $1.50; 50 lbs. $2.50; 100 lbs. $4.50.

KAFFIR CORN.

An excellent fodder plant, yielding two crops of fodder during a season. It grows from four to five feet high making a straight, upright growth. The stem or stalk bears numerous wide leaves. The stalks keep green and are brittle and juicy, not hardening like other varieties of sorghum, and making excellent fodder, either green or dry, which is highly relished by cattle, horses and hogs. The seed corn is also heavy, sometimes yielding sixty bushels to the acre. For the grain, sow in rows three feet apart, three to five pounds of seed to the acre. For fodder, sow 1 to 1 1/2 bushels either broadcast or in drills. 3 lbs. 50c, postpaid. Not prepaid: Pk. 50c, bu. (50 lbs.) $1.75; or more at $1.70.

FETERITA.

This new fodder and forage plant belongs to the class of Non-Saccharine Sorghums and is similar to Kaffir Corn, requiring the same culture. The great advantage Feterita has over Kaffir Corn and all other plants of that class is its extreme earliness and great drought resisting qualities. Feterita is from 20 to 30 days earlier than Kaffir Corn, makes excellent Fodder and produces a large grain crop in some instances. It makes an excellent yield of grain in the south and regions without having received any rain from the time it was planted until it was harvested. Price: 3 lbs. 75c, postpaid. Not prepaid, 10 lbs. $1.25; 50 lbs. $4.85.

JERUSALEM CORN.

Claimed by many to be better than Kaffir Corn, as it is a superior crop in unfavorable seasons. It produces a very rich yield of quality, and a good grain crop at the same time; seed white and nearly flat. Five to six pounds will plant an acre in drills, 40 to 50 lbs. broadcast, 3 lbs. 60c, postpaid. Not prepaid: Pk. 50c; bu. (50 lbs.) $3.50.

BRAZILIAN FLOUR CORN.

Also called Century Wonder Corn. This corn stoops out like winter wheat, producing 6 to 10 stalks from each seed, and several ears grow on each stalk. Of excellent quality for the table, like sweet corn. The kernels are pure white and when ground into flour this is considered equal to the best wheat flour. It will ripen where other Corn does, and is cultivated the same: plant 3 to 4 quarts per acre. Qt. 40c.

Not prepaid: Qt. 25c; 4 quarts 55c, pk. $1.40.

Send me 75 lbs. more of your Northern Grown Grinn Allfals Seed. I have seeded two small pieces of land with your Grinn Allfals, and am cutting at the rate of 10 tons per acre for the season's crop. Have had three cuttings already which totaled 8 1/2 tons per acre and expect a good fourth cutting.

A. C. HINNIE, Alfa, 1s.
CANADA FIELD PEAS, Yellow.

These are very valuable for fattening stock, and may also be ground into meal to a great advantage for sowing purposes. They are of the greatest value for fodder, either when the matured peas are fed as ground meal, or when the pods are cut for hay. Fed in either way they are of the great nutritive value, and no stock or dairy farmer should be without them. They can be sown along with oats; when sown alone it takes about 2 bushels per acre, and if sown with oats 1 bushel of peas and 2 bushels of oats are required. This latter method is the most profitable, as a double crop can be secured at the same time. Threshed together they can be sold at some $2.00 but are more valuable for feeding stock. Price: 3 lbs. 60c, postpaid.—No prepaad, peck 65c, bu. $2.25, sacks 22c each.

COW PEAS, New Era.

The earliest variety of Cow Peas, and therefore the best for the northern states. Cow Peas are considered one of the most profitable crops, as they yield immense hay and are used as green summer feed and also for planting in corn and other crops and plowing under as a fertilizer. Particularly recommended for planting after grain harvest and plowing under in fall. If you sell the grain of this Cow Peas at $2.00 per bus., you will get the same yield as the New Era matures in 60 days and have done well as far north as Minnesota. They can be sown broadcast, or drilled 8 to 10 inches apart using 60 to 80 pounds to the acre; the thicke are sown, the finer the hay will be. They should be soed thickly on rich land, and not so thickly on poor land. Crop very short this year. Write for prices.

COW PEAS, Whip-Poor-Will.

Is highly valuable for fodder but more so for reclaiming poor and wornout soil. Plowed under great the greatest fertilizer and soil improver. Poor, sandy and wornout soils may be brought to full fertility again by plowing under several crops of these Cow Peas. If left to ripen, the pods can be harvested for feed, which makes the beast cattle fatter, and the vines may be plowed under for fertilizing. The Whip-Poor-Will produces more of other varieties, and hence is best adapted for sodding. Crop very short this year. Write for prices.

FIELD BEANS.

IMPROVED NAVY or BOSTON PEA BEAN.—This is the small white bean that is so extensively grown in the Northwest. We offer strictly first class, hand-picked seed. Quart 35c, postpaid.—Quart 50c, prepaad.

SNOWFLAKE BEAN.—Similar in size to above variety. It is claimed that this is the finest bean for baking. Quart 20c; pk. $1.00; bu. $3.65, not prepaad.—Quart 35c, postpaid.

CALIFORNIA TREE BEAN.—This is the heaviest yelding Bean known and on account of its whiteness and small size commands the highest price in all markets. Quart 20c; peck $1.00, bu. $3.50, not pp'd.—Qt. 35c, postpaid.

WHITE BUTTER BEAN.—Very early, productive and of excellent quality, either when green or dry. A splendid shelled bean for home use or for market. Quarterly 15c; peck $1.15; but $4.00, not prepaad. Quart 35c, postpaid.

TEOSINTE.

(REANA LUXURIANS.)

A forage plant that originated in Egypt, and which for a number of years already has been grown successfully in the Southern States. It resembles corn somewhat in appearance, but is much larger and broader and contain sweeter sap. The yield is so abundant that one plant is considered sufficient to feed a family of cattle. Its best feature is that it sucks more water than any other forage plant, generally producing 30 to 50 stalks—often as many as 70 to 80—stubbles from one kernel of seed, and growing to a height of 11 feet. It can be cut when 2 to 3 feet high and used for fodder, after which it will quickly grow up again. It can be cut to 2 to 3 times in one season. The amount of forage to be had in this way is immeasurable. It can be cut with a sickle, but is best cut with a Reaper and fed in the green state, or can be dried and made a magnificent feed for the cattle during the winter months. Excellent results with this plant have been reported as far north as Iowa and southern Minnesota and Wisconsin. 12 lb. 25c, bu. 75c, 3 lbs. (sufficient for one acre) $2.00, by mail postpaid.

I raised over 3,000 lbs. of Golden and Silver Jewel Corn and had 45 acres that brought me over 1,300 lbs. of good sound Corn, and it *still* holds out better than any corn around here, as the cob is a "true cobb" and it *still* corn. Send me your new Catalog or as soon as possible.

O'Brien Co., Ia.

SAND VETCH.

WINTER VETCH OR Hairy Vetch.

Among the various leguminous plants introduced during recent years with such manifest advantage to farmers these is not one of greater value than the Hairy Vetch. As a soil reclaimer and forage crop it has no equal and it is only too regretted that this Vetch is not more universally sown. It is an annual plant, similar in growth to the very slender and slippery pea vine, the vines often reaching 10 to 12 feet in length, and covering the ground with a dense mat of forage 2 feet in depth. Stock of all kinds eat it greedily, both in pasture and when cut for hay. When once this growth starts, it continues through the wet and drought and the quantity of forage made is wonderful. It has made as much as 40,000 pounds of green feed to the acre, and this feed is of the most nutritious character. It is much richer in protein (the muscle and growth producing element) than Red Clover, or any Cow Pea, whilst in fattening producing matter it is nearly the equal of those plants. As a soil improver it is richer in nitrogen, phosphoric acid and potash than any of the Clovers or the Cow Pea. It is intended for pasture or hay, it should be sown in rows 3 to 4 inches apart, or in very sandy soils 6 inches apart, with a bushel of each per acre. When sown in early spring or in August and September, on well prepared land, the Sedge Vetch is the best. 5 lbs. 75c, postpaad.

SAND VETCH or TARES. (Vicia Sativa.)

A very productive and highly nutritious fodder plant, grown very extensively in England, also in Canada. It is used either cut green for sowing, or made into hay; is well liked and greatly relished by cattle. The seed is sown in early spring at the rate of one bushel per acre. Spring Weeds are used for the same purpose and the Sand Vetch but will not thrive on poor soil or withstand extremes of weather so successfully. Sow with oats, using a bushel of each per acre. Price: 3 lbs. 60c, postpaad.—No prepaad. 25 lbs. 1.75; bu. (50 lbs.) $3.00.

SPRING VETCHES or TARES. (Vicia Sativa.)

It is a very productive and highly nutritious fodder plant, grown very extensively in England, also in Canada. It is either cut green for sowing, or made into hay; is well liked and greatly relished by cattle. The seed is sown in early spring at the rate of one bushel per acre. Spring Weeds are used for the same purpose and the Sand Vetch but will not thrive on poor soil or withstand extremes of weather so successfully. Sow with oats, using a bushel of each per acre. Price: 3 lbs. 60c, postpaad.—No prepaad. 25 lbs. 1.75; bu. (50 lbs.) $3.00.

SERADELLA or CULTIVATED BIRDFOOT.

For light, poor or sandy soils Seradella is one of the best fodder plants. We know its great value and have urged it long and persistently upon farmers for several years to give this valuable forage plant more attention. It is sown at the rate of 12 to 15 lbs. per acre, and can be sown either by itself, or in Winter Wheat or Rape in early spring, growing rapidly after the grain has been cut. It is very remarkable for its drought resisting qualities and its close growth, making it an excellent cover crop, which will improve all soils also very desirable as a catch crop. It is not a perennial, but can be cut twice and gives good pasture in one year. 3 lbs. 75c, postpaad.—Not prepaad: 15 lbs. (for one acre) $1.50; 50 lbs. $4.25; 100 lbs. $8.00.

GIANT SPURRY.

Spurry is of great value for light or this ground, and several years of experiment at the Michigan Agricultural College has proven that it is the only plant which can be grown on poor, sandy dry soil, and that will surely return a paying yield. Dr. Manley Stiles, of Lansing, Mich., calls it the crown of sandy soils, yielding 7,500 pounds per acres. It is readily eaten by corn, sheep and cattle. As value as a manure plant on light sandy is pronounced. 3 lbs. 65c, postpaad.—Not pp'd. 10 lbs. (for one acre) $1.00, 50 lbs. $4.00, 100 lbs. $7.75, bags 22c extra.
Buckwheat.

New Silver Hull Buckwheat—This is a very thin-shelled Buckwheat of silver-gray color; the kernels are of medium size and very sound. It is a prolific grower and the heaviest yielder yet introduced, and will make first-class Buckwheat flour. Remaining longer in bloom than common Buckwheat this variety is most excellent for farms. 3 lbs. 50c, postpaid.—Not prepaid: Peck 50c, bu. $1.50, 2 bu. or more at $1.45 per bu., sacks included.

Japanese Buckwheat—A brown or dark variety, which is about a week earlier than the Silver Hull, and yields quite heavily. 3 lbs. 50c, postpaid.—Not prepaid: Peck 50c, bu. $1.60, 2 bu. or more at $1.55 per bu., sacks included.

Flax.

Prices of Flax Seed are subject to the market. Write us for definite prices on larger quantities. Premium or Minnesota No. 25 Flax—Our Minnesota Experiment Station de serve credit for producing such a healthy and vigorous growing strain, for this variety yields at least one-third more per acre than common Flax. Many of our patrons have noted that the “Prim- ose” produced 22 25 per acre, while common Flax yielded only 17-14 on the same field alongside. 3 lbs. 60c, postpaid.—Not prepaid: Peck 40c, bu. $1.35, 5 bu., $6.50; 10 bu. $12.50, sacks included.

Minn. No. 2 Winter Rye—For nearly all sections Winter Rye is one of the most important crops, and owing to its extreme hardiness, freedom from blight and rust, and never being injured by the Hessian Fly, good paying crops can always be depended on. 15 lbs. can be grown on a greater variety of soil than wheat and good crops can be raised even on thin and poor soils without matur ing. For dairy farmers it is of special value, as it will furnish a splendid crop of green fodder early in the spring or a good pasture long before the grass can be turned on the pasture. That is a great advantage. Many dairymen know, for it will live through the winter. It will improve the quality of his butter marvelously. Price, bu. $1.20, 2 bu. and more at $1.10 per bu.

Yellow Lupins.

Best Fodder Plant for poor soils. One of the best plants known for reclaiming poor soil, particularly sandy and old, worn-out land; by plowing under a crop of Lupins such land can be made very valuable. It is so highly valued in Germany that it is called the “Gold of the Desert” or “Desert Kerneler.” When dried for fodder it is very good for sheep. Sow in spring, 75 lbs. per acre. 3 lbs. 60c, postpaid.—Not pp’d. 10 lbs. 85c, 160 lbs. $5.75.

Pumpkins.

We place these among our field seeds as they are excellent for feeding stock, and should be grown in every corn field. Hundreds of heads of pumpkins can be grown without any extra expense, as they need no further attention than is required for the corn.

Connecticut Field—This is widely known as the Yankee Cow Pumpkin and there is no variety that will do as well among the corn. Plant them on your richest land; you will be amply repaid. Lb. 30c, post paid.—Not prepaid, lb. 25c, 5 lbs. $1.15, 10 lbs. $2.40.

Kentucky Field or Sweet Pumpkins—These are the thick meaty sweet kind that are used for pies. They are extra good for stock also. A patch of them should be planted by themselves, and they will prove to be the most profitable crop. Lb. 30c, postpaid.—Not prepaid, lb. 20c; 5 lbs. 90c; 10 lbs. $1.65.

Mixed Pumpkin Seed—We offer a mixture of Pumpkin Seed, consisting of a great many varieties—large Mammoth Pumpkins, the different field sorts and also the choicest pie pumpkins. Price same as Connecticut Field.

Broom Corn.

Broom Corn is one of the most paying crops and is adapted to any soil that will grow corn. It will make a crop with very little rain. One acre will yield 1-1/4 ton of cured brush and up to 40 bushels of seed, which is nearly equal to oats in feeding value. Plant in drills 3½ feet apart, and in rows about 3 inches apart; and cultivate the same as corn. About 3 to 8 lbs. of seed will sow an acre. If planted the first of June, the crop will be ready to cut Sept. 15th.

Standard Evergreen—The best variety for general cultivation on account of color and quality of brush, which is of good length and of great appearance when ripe, never getting red, and has no center stalk, which are remarkable points to broom corn raisers and manufacturers. 3 lbs. 60c, postpaid.—10 lbs. 75c, 25 lbs. $1.50, 50 lbs. $2.75, 100 lbs. $5.00.

New Japanese Broom Corn—The earliest Broom Corn known, maturing in about 75 days, and can therefore sometimes be planted as a catch crop after winter grain. Brush is fine and long, without center stalk. 3 lbs. 60c, postpaid.—10 lbs. 85c, 25 lbs. $1.60, 50 lbs. $2.85, not pp’d.

Mammoth Russian Sunflower.

A more profitable or important crop can hardly be raised, especially by those raising sunflower oil. They are highly valued by farmers and poultry breeders, who have tried it. The heads will furnish oil and lay more eggs than on any other food. Single heads measure from 12 to 22 inches in diameter and contain a lot of seed, which makes it a cheap food for fowls, and can be raised much cheaper than corn. The stalks make good firewood. Four quarts will plant one acre. Lb. 20c, 3 lbs. 55c, postpaid.—Not prepaid, lb. 10c, 3 lbs. 55c, 5 lbs. 75c, $2.00.

Write for our Special Implement Catalog and Premium List.
A Field of our Minnesota 169 Blue Stem Wheat.

Farmers look at their pursuit in agriculture more from a businesslike standpoint than they did in former years, and good judgment, as a general rule, is exercised, not only in their selection of farm animals for breeding purposes, but also in selecting proper Seed Grain. Choice and pure Seed Grain is beyond all question of the greatest importance for every farmer, for "As I know, so have hundreds of years". If poor and run-out Seed Grain, which is weakened by constant culture in the same locality, and which is also affected by smut, rust, and other fungous diseases, is sown again and again, the result will be a constant decrease in yield, which will dwindle down to almost nothing in course of time. That farming under such circumstances must be unprofitable is clear to every thinking farmer. If, on the other hand, good and Hardy Northern grown Seed Grain is procured every few years, a large and well-paying crop of grain can be had even under unfavorable circumstances.

We always have made it a point in our business to introduce new and improved varieties of seed grain, grown to the largest extent here on our own farms from the most carefully selected Seed Stock. The climatic and soil conditions for raising Grain are nowhere better than here in Minnesota, the Banner Wheat and Grain growing state in America, and it is an established fact that such Hardy Northern-Grown Seed Grain is full of vigor and Seed Vitality and unsurpassed in productiveness.

Being Farmers and Seed Growers ourselves, originating new varieties by breeding and crossing different kinds of grain, possessing superior qualities, and also procuring Seed Stock from such reliable sources as the experiment Stations from both at home and abroad, we are certainly in the best position to fill your order for Hardy Northern-Grown Seed Grain to better satisfaction than any other seed dealer.

MINNESOTA 169 BLUE STEM WHEAT.

This is the origin of Professor Hays of our Minnesota Experiment Station, and like the Minnesota 163 Fife Wheat, it is certainly a great credit to him. In originating this variety the Experiment Station not only obtained a pure and true Blue Stem variety, but also one of the heaviest yielders ever offered. On account of developing such strong and vigorous-growing plants, the chaff enclosing the grain is much thicker and firmer than on most other Wheat, for which reason it is not as easily affected by rust and blight as other kinds. It is also free from smut which sometimes does such great damage to common varieties. It has been proven that of all the spring wheat varieties the Minnesota 169 Blue Stem stands at the head, not only in yield, but also in quality. This grain is always nice and plump, flinty and almost transparent. Everybody who has seen a field of this Wheat with ears well developed, has to admit that it is the most perfect and the best of all the Wheat varieties. Price 2 lbs. 30 cents, postpaid.—Not prepaid; Peck, 50c.; bu. $1.60; 2 1/2 bu. $3.85; 10 bu. $15.00; sacks included.

PEDIGREE BLUE STEM WHEAT.

This is a most hardy spring wheat of the Blue Stem class, originated in North Dakota, which is renowned for its production of hard and flinty rolling wheat. It has been found that this is the most reliable, as well as one of the most profitable kinds of wheat to raise in all the spring wheat growing sections. On account of its vigorous, healthy growth and great standing qualities this wheat stores up so much vitality that it very seldom suffers from blight, rust and dry weather, while all common and run-out varieties fail almost entirely. In every locality where this pedigreed Blue Stem Wheat has been grown since recent years it has produced from 7 to 15 bushels more per acre than common wheat. Many of our patrons wrote us last fall that the Pedigreed Blue Stem Wheat ordered from us yielded again as much per acre as a field with their old wheat sown right alongside and that they felt sorry for not ordering more wheat from us, as they would have been hundreds of dollars ahead. Price: 3 lbs. 50c postpaid.—Not prepaid; Peck, 50c.; bu. $1.60; 2 1/2 bu. $3.85; 10 bu. $15.00; and more at $1.50 per bu., sacks included.

As to the Blue Stem Wheat ordered of you last spring, I am certainly pleased with results obtained from same, as it yielded 20 bushels—machine measure—to the acre; while some Early Jaru (home-grown) seed yielded only 9 bushels, both in the same field.

W. F. CONNOLLY. Orsko, Ia.

My Seed Wheat ordered from you just arrived. It is good wheat and cleans am sorry that I did not order more. Next year will buy more from you, as I am a firm believer in good Seeds.

FRANZ WENDLAND. Milbank, S. D.
Marquis Wheat.

The New, Hard Canadian Wheat of Wonderful Productiveness.  

Have you heard about this great Marquis Wheat which has created such a sensation in the Northwest, winning the world's championship two years in succession? Everyday is interested in this wonderful new Wheat and wants to grow some of it this year. It out-yields any other known variety, ripens earlier and withstands unfavorable weather better. For more extended description see page 7.

This Marquis Wheat is the best variety of hard spring Wheat, and was originated by the late Dr. Saunders on the Dominion Experimental Farms, Ottawa, Canada. It is a product of the crossing of Bearded Fife, the hardiest and strongest wheat in the world, with the Red Calcutta; after a careful selection for a number of years to fix the type, it was sent to the different Canadian Experimental Farms where it quickly made a name for itself on account of its earliness—It being about 10 days earlier than our old varieties, and its enormous yield—for it produces at least 10 to 15 bushels more than the Red Fife. Both are held except for a few short awns at the top of the head. The Marquis does not grow quite as tall, which is considered an advantage, especially if the wheat is sown on rich ground where most wheats are inclined to grow too long straw, and lodge. In the threshed grain there is quite a difference, "the Marquis being larger, shorter and bunter; harder and deeper to crack" and of a deeper amber color.

The Marquis won the $100.00 prize at the Land Show two years ago against the whole world, and the following Fall again landed the world's championship at the Dry Farming Congress held at Lethbridge.

This Marquis, a wheat of the very finest quality, is sold to raise a large stock of the very finest quality seed of Marquis Wheat, which was raised on our own farms here, from the true stock obtained direct from Canada, last year. We quote the following low prices: 3 lbs. 60c, postpaid.—Not prepaid, peck 60c; bu. $2.00; 5 bu. $5.90; 10 bu. $18.00. Write for special prices on larger lots.

Macaroni Wheat, Arnautka.

On account of its extreme hardiness and great productiveness this variety should be sown more at least 10 bushels more per acre than other kinds of Spring Wheat, with the exception of the Macaroni Wheat. Its long bearded or spikelets as well as its heavy head provides it from certain diseases such as blight, rust, and smut. It is as hard and flinty as the best Fife Wheat, no matter how unfavorable the circumstances are, the Macaroni Wheat always produces a good yield. On account of its great hardiness and productiveness no grain farmer should fail to sow at least 1/3 or 1/2 of his area intended for Wheat to the Macaroni Wheat. 3 lbs. 50c postpaid.—Not prepaid, peck 50c, bu. $1.60, 1/2 bu. $3.85, 10 bushels and more at $1.50, sacks included.

Velvet Chaff Spring Wheat.

This is an extremely hardy, bearded variety of wonderful productiveness, generally yielding at least 10 bushels more per acre than other kinds of Spring Wheat. It's hard, bearded or spikelets as well as its heavy head provides it from disease such as blight, rust, and smut. It is as hard and flinty as the best Fife Wheat, no matter how unfavorable the circumstances are, the Velvet Chaff Wheat always produces a good yield. On account of its great hardiness and productiveness no grain farmer should fail to sow at least 1/3 or 1/2 of his area intended for Wheat to the Velvet Chaff Wheat. 3 lbs. 50c postpaid.—Not prepaid, peck 50c, bu. $1.60, 1/2 bu. $3.85, 10 bushels and more at $1.50 per bushel, sacks included.

Minnesota No. 163 Fife Spring Wheat.

A variety of hard Fife Wheat originated by our Minnesota Experiment Station. Careful selection, crossing, and thorough preparation of the seed have been the main factors in its improvement. Professor W. M. Hay's and a Boss describe this wheat in a special bulletin, issued by the Experiment Station on Seed Wheat, and give a full history of it. In comparison with old standard varieties of Wheat the Minn. No. 163 Fife is far ahead in every respect, in yield as well as in quality, the berry being larger and containing a much higher percentage of gluten. It is a wheat of greater variability and further variation for the better. It is a wheat which stands as well as the old varieties and can stand a longer time for early varieties, for late varieties it is known that the former wheat are most rust, smut and blight. It grows very strong, straw and stands up well under all circumstances. Thru careful growing and proper selection of our seed stock we have kept this variety as pure as possible. It is the heaviest yielding. 3 lbs. 50c postpaid.—Not prepaid, peck 50c, bu. $1.60, 1/2 bu. $3.85, 10 bushels and more at $1.50 per bushel, sacks included.

Speltz or Emmer.

A valuable grain closely related to wheat; the kernels, however, are tightly enclosed in the hulls or husks, and these adhere to the wheat when it is threshed. Speltz is becoming more popular every year, as it always produces good crops even in adverse circumstances where other grain fails. It withstands more dry weather than any other grain, with the exception of Macaroni Wheat, and produces more food value per acre than any other cereal, while it is a most valuable feed for all kinds of stock. It can be fed to horses the best hay can and, with the bolls on, Speltz can be grown on most any kind of soil, rich or poor, wet or dry, as it will not lodge like other grain on account of the stiff and strong straw, and will always bring the best returns. Sow it to 3 bushels per acre. 3 lbs. 50c, postpaid.—Not prepaid, peck 40c, bu. 100 lbs. $1.20, 1/2 bu. $2.05, 10 bushels and more at $1.15 per bushel, sacks included.

Spring Rye.

Spring Rye is a paying crop in our Northwestern States as well as in many other sections. Will make an excellent crop to sow where winter grain has been killed out. For turning under it is considered a good soil fertilizer. Does not grow as large in straw as Winter Rye, but yields fully as well and the grain is of fine quality. We offer the genuine Minnesota Spring Rye, grown here in Minnesota. Price: 3 lbs. 50c postpaid.—Not prepaid, peck 40c; bu. $1.35; 5 bu. $6.50; 10 bu. $12.50; sacks included.

Bearded Fife Winter Wheat.

That this is the hardest variety for the Northwest has been fully proven during the last 15 years, and is most highly recommended by our Minn. Experiment Station. Like all our best and hardiest varieties of grain, it originated in Russia. Its average yield here in Minnesota is 40 bushels per acre but it has produced as much as 65 bushels under favorable circumstances. In a comparative test at the Iowa Experiment Station it out-yielded all the other kinds, producing 55 bushels per acre.

WINTER RYE.

PETKUS—On account of its great standing qualities and strong root formation this Rye is of the greatest value for pasture and can be sown to good advantage for this purpose in spring.

Minnesota No. 2—For Description See Page 24.

Write for our Fall Price List of Winter Grains, etc.
SEED OATS. Improved Heavy Yielding Varieties.

The New Roosevelt Oats

This is our own production which holds the highest yielding honors of the entire oat family: 180 bus. and 27 lbs. were grown from a single bushel of New Roosevelt Oats by Mr. John T. Wood, of Victor, Mont.—Mr. Wood won $200 as first prize in our Roosevelt Oat growing contest. From the seven prize winners the average production was 79 bushels and 29 pounds from each bushel of oats sown.

The growers represented four different states and the figures were given in sworn statements by reputable farmers. Compare these with the average yield of common oats which is about 30 bushels per acre, and requires 2½ bushels of seed—you will find that our New Roosevelt Oats yielded four times as much as the common oats. What are you waiting for? Just a few more generations of breeding and accurate selection have opened the eyes of hundreds of our farm friends—and the demand for these oats has about doubled each season. There is no need of being contented with a scruffy and unproductive variety of oats. The little extra you put in your soil pays you the best possible dividends which can be accomplished only by sowing the best seed obtainable.

DESCRIPTION AND PRICES OF OUR NEW ROOSEVELT OATS.

Here are the features you must consider in our New Roosevelt Oats which will outclass any known variety of oats now available. They are derived from one of our hardest and most productive American grown oats, infused with the best of foreign varieties. These are grown in Minnesota and have been selected by a品种 for a variety of growing conditions. The fertilizer is heavy, vigorous and stiff-strawed plants of medium height, with a abundance of large, well-branched heads. Growing so vigorously and being well-branching, it is not partial to soil or climate and develops the hardest and most powerful growth, so that it is able to withstand heat and drought, cold and wet, poor soil and neglected cultivation better than any other variety. The heavy berries are enclosed in a tough, firm chaff so that rust, blight, and other trouble are of no account.

The Roosevelt Oats contains a white grain that is the heaviest and meatiest that was ever produced, weighing 6 to 8 lbs. per bushel. These oats have been selected for the largest and best yields of any oats in cultivation. Unlike other grain producing large crops our Roosevelt Oats matures medium early. Price: 3 lbs. 50c, postpaid.—Not prepaid: Bu., $1.15; 2½ bu., $3.00; 10 bu. and more at $1.15 per bu., sacks included.

New Victory Oats.

A new variety which was originated by the Plant Breeding Society of Sweden, an institution maintained by Swedish farmers and subsidized by the government of Sweden; it has for its object the selection from agricultural plants of new and improved varieties of higher productivity and superior quality. Victory is a cluster Oats, with rather short and densely branched heads, the spikelets are small and short, generally containing two grains which are short and broad, of clear white color and beardless. The kernels are always very heavy and plump, weighing 5 to 6 pounds per measured bushel. The straw is of medium height, stronger and stiffer than that of any other oats. Victory ripens early, at about the same time as the well-known Swedish Select Oats. Excellent oat meal will be produced from all oats, is their ability to withstand wind and storms to a remarkable degree, and to grow on rich, well manured land without lodging; their straw seems to be stiffer, more elastic, firmer than that of any other kind we have ever grown. On practically every soil the Victory Oats yields immense crops, outclassing elastic, firmer than that of any other kind we have ever grown. On practically every soil the Victory Oats yields immense crops, outclassing almost all other varieties grown on our own farms, and is therefore best adapted for our northwestern states as well as for other sections. Price: 3 lbs. 50c, postpaid.—Not prepaid: Bu., $1.20; 2½ bu., $2.65; 10 bu. and more at $1.10 per bu., sacks included.

New White Danish Oats.

This is a 'cross breed' of the old type Swedish Select Oats, and yields 25 per cent more than its parent. It was first exhibited at the Minnesota, Iowa and Illinois State Fairs, and at the National Corn Show, in 1907, and is now introduced for general sale, after being approved by public trials at the leading American, Canadian and European Experiment Stations. The New White Danish Oats possesses all the good qualities of the original Swedish or Wis. No. 4 Oats in a still higher degree than its parent, stouter, growing heavier, more vigorously, and its most important feature being that it yields at least one-quarter more than this. It is also a very strong, heavy, white in color. Wherever planted these splendid oats will bring big returns and prove satisfactory in every way. The "Regenerated" Swedish Oats which we once had become famous for producing the largest and best yields of all oats in cultivation. This stock may or may not be as heavy as the English grown seed, but on account of being thoroughly acclimated it will certainly do much better. Price: 3 lbs. 50c.

"Regenerated" Swedish Select Oats.

This is a "cross bred" of the old type Swedish Select Oats, and yields 25 per cent more than its parent. It was first exhibited at the Minnesota, Iowa and Illinois State Fairs, and at the National Corn Show, in 1907, and is now introduced for general sale, after being approved by public trials at the leading American, Canadian and European Experiment Stations. The New White Danish Oats possesses all the good qualities of the original Swedish or Wis. No. 4 Oats in a still higher degree than its parent, stouter, growing heavier, more vigorously, and its most important feature being that it yields at least one-quarter more than this. It is also a very strong, heavy, white in color. Wherever planted these splendid oats will bring big returns and prove satisfactory in every way. The "Regenerated" Swedish Oats which we once had become famous for producing the largest and best yields of all oats in cultivation. This stock may or may not be as heavy as the English grown seed, but on account of being thoroughly acclimated it will certainly do much better. Price: 3 lbs. 50c.

Early Champion Oats.

These oats produced the largest yield per acre in the test at Iowa Agricultural College, and are highly recommended by them. Has comparatively short stem and plump, very thin, and of a superior feeding variety. The seeds are large, and the straw is strong and stands unfavorable weather well. Ripens early and inclined to resist rust. This is a branching variety deserving a place on every farm. Price: 3 lbs. 50c. —Not prepaid: Bu., $1.15; 2½ bu., $2.75; 10 bu. and more at $1.15 per bu., sacks included.

New Market Oats.

A comparatively new variety from England, which has given very good satisfaction here, producing a heavy crop of both straw and grain. The grain is white, heavy, large and plump, very thin-stemmed, and of superior feeding quality. The seeds are large, and the straw is strong and stands unfavorable weather well. Ripens early and inclined to resist rust. This is a branching variety deserving a place on every farm. Price: 3 lbs. 50c. —Not prepaid: Bu., $1.25; 2½ bu., $3.00; 10 bu. and more at $1.15 per bu., sacks included.
Wisconsin No. 4 or Swedish Select Oats.

This splendid oat was introduced to this country by the U.S. Dept. of Agriculture. The Wisconsin Experiment Station secured these oats from Washington, D.C., with several varieties from the leading stations of Europe and Asia. They have been grown on the University fields for years and during all that time have been carefully tested and compared with 30 other varieties. Prof. Moore said: "We have found them the most satisfactory of all varieties tested. On the experimental plots the oats yielded exceptionally well, having a stiff straw, light hull and weighing 30 to 40 pounds per measured bushel. This variety seems especially adapted to high well-drained land, and the best results are secured from clay-loam soils. The great root development is one of the characteristics of the Swedish Oats, which enables the plant to resist drought better than any other sort tested."

We have grown these oats ever since they were originated and although we have had very unfavorable years for the production of oats we can say that the Wisconsin No. 4 always produces at least 37 bushels more than the older and more common varieties, such as the Lincoln, American Silver, etc. Its heads are large and branching, and are loaded with the prettiest, big, plump and thin hulled grain. Price: 3 lbs. 80c, postpaid. Not prepaid: Bu. $1.10, 1/2 bu. $2.50, 10 bu. and more, at 90c per bu., sacks included. On large quantities, please write for prices.

University No. 26 Oats.

As its name indicates, this is an Introduction of our Minnesota Experiment Station, and has produced an average yield of 68.5 bushels per acre during the last fourteen years on the Experiment Station grounds. It is a stiff-strawed variety with spreading panicles. The berry is long and pointed with a very thin hull. Price: 3 lbs. 50c, postpaid. Not prepaid: Bu. $1.15, 1/2 bu. $2.75, 10 bu. and more at 90c per bu., sacks included.

Silver Mine Oats.

This is a very hardy and prolific variety with long stiff straw, and grain of the clearest white color. It will grow and thrive under the most unfavorable conditions of soil and climate, and is always a sure crop. The heads are very large and long, and are borne low down on the stalk, which prevents lodging. The grain is long, plump and heavy and full of meat. Always yields heavy and is unusually exempt from disease. We have grown these oats for the past ten years and have always received close to 75 bushels per acre, year after year. Price: 3 lbs. 80c, postpaid. Not prepaid: Bu. $1.00, 1/2 bu. $2.25, 10 bu. and more at 85c per bu., sacks included.

Improved White Russian Oats.

This well known variety will always be a standard favorite. It has become thoroughly acclimated and matures only a week later than our earliest varieties. These oats are extremely hardy, endure cold wonderfully and are entirely smut and rust-proof. The berries are longer and larger than most other varieties, for which reason it is well adapted for succotash as it can be more easily separated from wheat than other oats. The White Russian matures with the Blue Stem Wheat and the two make the best combination for succotash. Price: 3 lbs. 50c, postpaid. Not prepaid: Bu. $1.10, 1/2 bu. $2.50, 10 bu. and more at 95c per bu.
BARLEY.

Barley is a very profitable crop to grow in our northwestern states. Considering the high prices farmers received for this crop the past few years, barley yields a bigger profit not to grow than wheat or oats. Our Minnesota grown Seed Barley will give highly satisfactory results; we have a splendid stock to offer this year. Sow about 2 bushels per acre, using a grain drill. Barley makes an excellent crop to follow corn that has been grown on clover sod.

University No. 105.

For several years the Minnesota Experiment Station has been breeding and testing many varieties of barley with the object in view of producing an improved sort that would lead all other kinds in productiveness. This undertaking has been crowned with success in the new six-rowed variety offered under the name of University No. 105. In comparative tests, covering a period of several years and made side by side with the best known and most popular varieties, it has proven to be the heaviest yielder, producing on the average 20 bushels per acre during the past three years. It surpasses the Mandscheuri barley not only in productiveness, but also in quality, retaining its nice bright color even better than the latter. This barley is easy, uniform in maturing and produces long ears, well filled with heavy, plump grain. As a malting barley it is simply unexcelled. Price: 3 lbs. 60c. postpaid.—Not prepaid: Bushel $1.35, 2½ bu. $1.25, 10 bu. and more at $1.25 per bu., sacks included.

Oderbrucker or Wisconsin No. 55.

This great barley originated in Germany and was introduced by the Wisconsin Experiment Station, and in that state is considered the best and largest yielding variety. Oderbrucker is a stiff, hard barley of heavy yielding, six-rowed, bearded variety. It is about the same as Mandscheuri in season, manner of growth and general appearance, but has a plumper kernel and is heavier. Prof. Moore says, “stiffness of straw and rust resistance it is superior to any variety on test.” It has a protein content of 15 per cent, or nearly double the amount of protein found in other varieties. This makes it an exceptionally valuable feeding barley, a very important point in it is considered that feeding farmers are appreciating more and more the value of barley as a feed for all kinds of stock, horses as well as cattle. It is also one of the most superior malting barleys. Price: 3 lbs. 50c. postpaid.—Not prepaid: Bu. $1.25, 2½ bu. $2.75, 10 bu. and more at $1.00 per bu., sacks included.

Mandscheuri.

A well known variety, which is, beyond doubt, one of the most valuable barleys ever introduced into this country, greatly out-yielding the once justly renowned Mansionary Barley. It is an early 6-rowed variety, maturing in 60 to 65 days from time of sowing, and is adapted to all kinds of soil and climate; is very hard and plump and yields heavy, well filled heads of plump grain, which possesses malting qualities of the highest order. Another important factor is its nice and bright color, which will not turn dull or yellow when exposed to rainy weather, as most of the other varieties do, and on this account it will always be in good demand. Oderbrucker will command the highest price. Price: 3 lbs. 50c. postpaid.—Not prepaid: Bu. $1.15, 2½ bu. $2.25, 10 bu. and more at $1.00 per bu., sacks included.

Success Beardless.

This is a new 6-rowed barley, and as the name indicates, is almost entirely without beards, which is the most valuable improvement ever made on barley. It is a vigorous grower, producing heavy straw and heavy, well filled heads. Its earliness is one of the most important features, as it can be cut and out of the way of the wheat and oat crop and has produced 20 to 25 bushels per acre in favorable seasons. In regard to soil, it is not particular, a good crop of Beardless Barley can be raised on land too poor to produce a crop of wheat or oats. It is a first-rate malting barley and equally good for feeding stock, therefore always bringing the highest market price. It should not be mistaken for the Husless Barley, which is described below and which is grown for feeding purposes only. Ever since this grand new barley was introduced, there has been a good demand for it that we were always short in supplies of our trade, and we anticipate another great rush for it this year. Price: 3 lbs. 60c. postpaid.—Not prepaid: Peck 50c. bu. $1.50, 2½ bu. $3.60, 10 bu. and more at $1.40 per bushel, sacks included.

White Husless.

Also known as "ideal" and "Giant White Husless," and grows very large, has heavy, well filled heads without beards and in the field resembles the "Beardless Barley" described above; the kernels, however, shell out without the husks, like wheat, and are the prettiest, plump and oval-shaped white grain in cultivation. It is good land and it has produced 20 to 25 bushels per acre in favorable seasons. In regard to soil, it is not particular, a good crop of Husless Barley can be raised on land too poor to produce a crop of wheat or oats. It is a first-rate malting barley and equally good for feeding stock, therefore always bringing the highest market price. It should not be mistaken for the Husless Barley which is described below and which is grown for feeding purposes only. Ever since this grand new barley was introduced, there has been a good demand for it that we were always short in supplies of our trade, and we anticipate another great rush for it this year. Price: 3 lbs. 60c. postpaid.—Not prepaid: Peck 50c. bu. $1.50, 2½ bu. $3.60, 10 bu. and more at $1.40 per bushel, sacks included.

Black Husless.

How to produce the largest amount of grain, best adapted for feeding milch cows and for fattening stock, is the most important question with every farmer and dairyman. The Black Husless barley is best adapted for this purpose, for it is an extra heavy yielder, producing from 70 to 80 bushels to the acre, and is of the greatest feeding value at the same time. No other grain fed as ground feed as a nourishing and milk-producing as Black Husless, and for fattening hogs it is also invaluable. It should be grown on ordinary ground but will also make large crops on thin and poor soil, where other varieties of grain fail entirely. It is not affected by prolonged droughts, and is therefore the best grain for drought-stricken sections. This variety is husless, very plump and heavy. Price: 3 lbs. 60c. postpaid.—Not prepaid: Peck 50c. bu. $1.85. Write for prices on larger quantities.

THE FARMER’S READY REFERENCE BOOK. — FREE.

You cannot afford to be without the Farmer’s Ready Reference Book. Contains 132 pages and every page of vital interest to the farmer, gardener, ranchman, dairyman, etc. Chapters on all departments of farm life, and each chapter written by an expert in his particular line. Government and state experts wrote this book. This book is easily worth $1.00 to any one and it will save you many dollars in the course of a season.

PEDIGREED MINNESOTA GROWN SEED CORN.

Scientific breeding of seed corn requires years of the most exact and painstaking work to accomplish results, and on this point we have spared neither time nor money; thereby giving our patrons absolutely reliable seed corn such as has been bred to suit the conditions of our northwestern climate, the best variety of the best possible type, and produces the largest yields of corn.

We are the largest grower of seed corn in the Northwest; send your orders direct to us—10 headquarters and you can depend on receiving strictly Northera Grown Corn of highest purity and germination.

No crop depends so much on the nature of the seed as does corn: it is not only the germinating power but its vigor, vitality, early maturity and great productiveness, that are its most important qualities which have been produced through years of scientific breeding in a cold northern climate. Ordinary seed corn may be satisfactory as far as the germinating power is concerned; but it produces barren stalks and imperfect ears, which means a low average crop. With good seed corn, however, every kernel produces a stalk, and every stalk a good-sized, well-formed ear that may be accomplished, has been proven beyond a doubt. Upon close examination you will find that many cornfields produced from 20 to 30 per cent of barren stalks, imperfect ears and nubbins; there is no reason for this, for if carefully bred seed corn is planted such a yield could be easily more than doubled. We have furnished customers who have produced from 20 to 45 bushels per acre from seed corn purchased from us, while ordinary home grown seed corn yields much less than 20 bushels per acre. Our experience has been that the best corn is obtained by purchasing the properly prepared seed corn. 

**WE GUARANTEE OUR SEED CORN TO BE STRICTLY MINNESOTA GROWN AND OF HIGHEST GERMINATION.** IF NOT FOUND AS REPRESENTED, SHIPMENT MAY BE RETURNED AT OUR EXPENSE, AND AMOUNT PAID WILL BE REFUNDED.

### GRADES OF CORN WHICH WE SUPPLY

**"FARMER BRAND"** is the Best Quality Shelled Corn, the Ears Selected by Hand, Tipped and Butted and then Graded. Highest Germination Guaranteed.

**"COMMERCIAL GRADE"** is the Grade Usually Supplied; Ears are Not Tipped and Butted. The Corn However, Has Been Well Milled.

**EAR CORN** is Sold Only in One-Bushel Crates. We make Special Ear Corn for Certification.

---

**F. S. & N. Co.'s Golden Jewel Corn.**

The Corn That Made Us Famous.

Golden Jewel is our own production which, thru years of careful breeding, we have developed to the highest possible state of distinction of type, earliness of maturity and wonderful productiveness.

**WARNING:** In order to protect our customers against misrepresentations and fraudulent use of the name Golden Jewel, we have registered the name "Golden Jewel" at the U. S. Patent Office under the above trademark. The genuine thoroughbred stock of Golden Jewel can be obtained only direct from us or from our authorized dealers. To avoid disappointment and loss buy from headquarters under our trademark.

Adapted to any climate or soil, and will give you a big surprise from a financial standpoint. The ears are of uniform type, taper to a point at once and are well filled over the tip, from 8 to 10 inches in length and 16 to 21 rowed. The color of the kernels is a rich golden yellow. The cob is very small for such a large corn. The stalks are of medium height, very leafy and produce a large amount of fine fodder. The ears set about 3/4 feet from the ground. Golden Jewel matures in 90 to 100 days and has a record of 124 bu. per acre highest average yield. It is a very early corn and is very well acclimated, as many may think when they see the handsome large ears completely covered with deep yellow kernels of a rich golden color, but a strictly Minnesota Bred Corn produced by your own most painstaking labor. That this is the corn to produce the best results, has been proven by the wonderful yields obtained by hundreds of our customers in many sections. GOLDEN JEWEL CORN is the acknowledged standard of productiveness and highest type of corn suited for our northern sections. We have claimed much for this corn and the many reports we receive from our customers every year have not only sustained us in every single claim we have made but have caused the Golden Jewel far above our fondest expectations. If you want the best to have in Corn—harvest the biggest crop of the very finest ears—plant our **Golden Jewel.**—If you are progressive and wish to receive the highest possible dividends from your soil and labor—plant Golden Jewel. It is the money maker for the wide-spread farmer, whose success is due to always planting the best seed. You are not only buying a larger crop from each acre, but unless you harvest at least an average of 75 to 100 bushels of good corn; our **Golden Jewel** is the kind of productiveness—the fundamental principle of greatest productiveness is good seed—by planting our **Golden Jewel** you will surely be well repaid by big yields of well matured corn and thereby increase the greatly desired returns. You can increase the value of your land by increasing its productiveness; that is why we recommend the **Golden Jewel** corn. It is the variety best suited to meet the most exacting demands of the critical corn grower in northern Iowa, southern Minnesota, northern Wisconsin, southern Wisconsin, northern South Dakota and northern Nebraska.

**PRICE OF GOLDEN JEWEL CORN**—"FARMER BRAND", 3 lbs. 75c, prepaid—Not prepaid: pk.$1.00, bu.$3.50, 5 bu.$17.00.

**TESTED EAR CORN**, 1 bu. crate, $4.75.

**WHAT THESE FIGURES MEAN TO YOU**—These statements prove that Golden Jewel can be successfully grown in any section of the corn growing belt and that it is not imperative to secure seed stock at home in order to secure the best results.

**BOY GROWS 113 BUSHELS OF CORN ON SINGLE ACRE.**

(From the Minneapolis Journal.)

Fairmont, Minn., Nov. 26. Vernon Adams of Nao Minn., has harvested 113 1/2 bushels of corn on an acre of ground the past season. He planted what is known as "Golden Jewel" corn. Prof. Lewis of the Agricultural department of the Winnebago high school measured the field and made the computations.

I am sending you an order for some seeds. I am enclosing a catalog extract from the Minneapolis Journal in regard to the corn that my son Veronica Adams raised. He should have been credited with 110 1/2 bushels. There was not one row where the corn didn't produce a good corn. I am enclosing a copy of the statement and the analysis of the corn, which was made by the county agent.

W. W. ADAMS Winnebago, Minn. Feb. 27, 1913.
Farmer Seed & Nursery Co.'s

Silver Jewel Corn.

(Reg. U. S. Patent Office.)

THE BEST WHITE DENT CORN FOR THE NORTHWEST.

(See Color Plate on Back Cover.)

Our Silver Jewel Corn is the largest eared, deep kernal, early, pure white dent corn ever offered, maturing in 90 days. It might be called the white sister of our Golden Jewel, as it possesses the same perfection of type and the same characteristics as this. One of the most important features of this corn is its vigor and resistance against cold and moisture from the day it is planted until the last of August, and it bears a good ear and a good sound ear. For this reason it is so well adapted for hard that is naturally cold and well suited for corn elsewhere. Its ears are large, thick, and some, uniform shape, tapering to a point at once, and are closely filled with deep, white, well-formed kernels, seldom leaving the tip exposed. The ears average a foot long in length, and are 10 rows, while the stalks are thick and short, growing about 7 to 8 feet in height. It is a very productive variety and the best white corn for the Northwest. We furnish the very best type of high germinating seed corn of this splendid variety. Send your order direct to us, and you can rely upon receiving the genuine F. S. & N. Co.'s Silver Jewel Corn; our registered trademark protects you.

Price: "FARMER BRAND", 3 lbs. 75¢, prepaid.—Not prepaid, pk. 95¢, bu. $3.25, 5 bu. $15.50.
TESTED EAR CORN: 1 bu. crate, $4.25.

Last spring I ordered one bushel of your Silver Jewel Corn. It is by far the greatest corn ever raised in this part. Do not know the exact yield per acre, but it is the Corn I shall plant hereafter. Have one ear containing 18 rows with 50 kernels per row, or 900. Thanks for the good seed sent me.

J. E. MARTENSON, Yellow Medicine Co., Minn.

P. S. & N. Co.'s Silver Jewel Corn,

We have been using your Seed every year for the longest time and have had a good stand in Corn every year, and we are pleased with it and have recommended it to others near and far.

— P. O. MADSON, Wasea Co., Minn.

NORTHERN DENT CORN.

(See Color Plate on Back Cover.)

The earliest Dent Corn grown and extensively planted in North Dakota and Northern Minnesota and Wisconsin, where other varieties fail to maturing. This is a corn distinct and larger than any other corn. The ears are large, thick, and some, uniform shape, tapering to a point at once, and are closely filled with deep, white, well-formed kernels, seldom leaving the tip exposed. The ears average a foot in length, and are 10 rows, while the stalks are thick and short, growing about 7 to 8 feet in height. It is a very productive variety and the best white corn for the Northwest. We furnish the very best type of high germinating seed corn of this splendid variety. Send your order direct to us, and you can rely upon receiving the genuine F. S. & N. Co.'s Silver Jewel Corn; our registered trademark protects you.

Price: "Farmer Brand" grade, 3 lbs. 75¢, prepaid.—Not prepaid, pk. 85¢, bu. $3.00, 5 bu. $14.25.
Commercial Grade, pk. 75¢, bu. $2.25, 5 bu. $10.00.
TESTED EAR CORN, 1 bu. crate, $3.75.

I bought seed corn last spring of your Northwestern Dent Corn, also Minnesota No. 13. I now have the pleasure to tell you that I took 1st Premium on both kinds and also won a $50.00 Silver Cup. I have more than my money back and farmers here all want to plant these varieties corn.

Minnesota Number Thirteen.

An early variety of Yellow Dent Corn, introduced by Professor W. M. Hayes, well known agriculturist of the Minnesota Experiment Station. Our original seed stock was procured from the originator directly, and we have raised this corn for several years in succession, never failing to secure a large crop of good and solid ears. It is a full Yellow Dent Corn, with kernels packed closely on the cob, and the ears are well filled from tip to tip. The stalks grow to a height of 7 feet and being very leafy, make excellent fodder. This corn ripens in 85 to 90 days, and even in less time if the season is favorable. The Minnesota No. 13 corn is one of the leading varieties in the northern part of Minnesota and other sections of the same zone. Its earliness, enormous productiveness and its ready adaptability to a great variety of soils and adverse climatic conditions commend it to all northern planters. Many varieties of corn fail when subjected to new conditions and changes, the Minnesota No. 13, however, will withstand such changes to a remarkable degree and produce an abundant crop of good sound corn.

Price: "Farmer Brand", 3 lbs. 75¢, prepaid.—Not prepaid, pk. 85¢, bu. $3.00, 5 bu. $14.25.
Commercial Grade, pk. 65¢, bu. $2.25, 5 bu. $10.00.
TESTED EAR CORN, 1 bu. crate, $4.00.

Pride of the North or Queen of the Prairie.

Pride of the North is a valuable and prolific variety for northern sections; it is grown quite extensively by stockmen, to feed from the bundle.

Price: Commercial grade, 3 lbs. 50¢, prepaid.—Not prepaid, pk. 65¢, bu. $2.25, 5 bu. $10.00.
Murdock Golden Dent Corn.

Also called Golden Glow or Wisconsin No. 12.

The Murdock Golden Dent Corn was awarded Sweeney's Prize for the Northern Zone at the Minnesota State Corn Exposition at St. Paul in the year 1918, and was later adopted by the National Corn Exposition at Iowa City. Murdock Golden Dent is an enormous yielding Golden Dent variety, out-yielding most other sorts, having produced over 100 bushels per acre with ordinary cultivation. Altogether this variety is a heavy yielder, it matures early enough to be used for our northern states. Its great vigor enables it to stand dry weather remarkably well and to yield a good crop when other sorts fail on account of drought. The Murdock is known to be very adaptable to different soils and conditions, becoming adapted to different sections of the first season. The ears are about 12 inches in length with from 18 to 24 rows of deep kernels, run as uniform as the they were all made in the same mould. and are as perfect and handsome as if made of wax. It grows a strong and leafy stalk of average size. The Murdock is earlier by several weeks than Iowa Silver Mine, Loyal Tender and Leaminda, maturing but several days later than the Minnesota No. 13. It is a favorite corn in many sections of Minnesota, Wisconsin, Iowa, South Dakota and Michigan. The seed we are offering was grown on our own farms, so you can depend on getting Northern grown Seed of high germination.

Price: "Farmer Brand", 3 lbs. 75c prepaid. - Not prepaid, pk. 85c, bu. $3.00, 5 bu. $14.25. Commercial Grade: peck 65c, bu. $2.25, 5 bu. $10.00, bags included.

Wisconsin No. 8 Yellow Dent.

This is an improved strain of the Minnesota No. 18, which you will find described on another page. This No. 18 has become renowned for earliness and productiveness, but not so much for perfection of type. The latter has now been more permanently established by Prof. Moore, of the Wisconsin Experiment Station. By selecting ears, the kernels of this variety have been materially lengthened and the ears considerably enlarged without sacrificing earliness. The ears are average in length, with good sized kernels; are very uniform in type and color, with well filled tips. It grows a strong and leafy stalk of average size. The Wisconsin No. 8 is a splendid corn for the north west.

Price: Commercial Grade, 3 lbs. 85c, prepaid. - Not prepaid, peck 65c, bu. $2.25, 5 bu. $10.00, bags included.

Wimple Yellow Dent.

The Wimple Yellow Dent is a very large eared corn which has gained much favor with commercial growers. It is a hundred day corn, maturing 56 months north of Sioux Falls, S. D. For the southern portion of Minnesota, South Dakota and Wisconsin, as well as for localities south of this line, it can be very highly recommended. The stalks grow to a height of about 8 feet and ears about four feet from the ground. The ears average 9 inches in length and 15 ounces in weight and have a rough surface. They hold their size almost from boot to tip. The kernel is long, has a thick side and a hard center. It is a heavy yielding corn, very rich in protein and other nutrients and extremely popular. The South Dakota reported yields of from 60 to 75 bushels per acre. The seed corn of Wimplies Yellow Dent, which we are offering, was grown here, on our own farms, you can depend upon receiving best Northern grown stock.

Price: Commercial Grade, 3 lbs. 85c, prepaid. - Not prepaid, peck 75c, bu. $2.50, 5 bu. $11.75.

Silver King or Wisconsin No. 7.

One of the best varieties of white dent corn for the southern half of Minnesota, Southern Wisconsin, Michigan and South Dakota, also for Iowa and Illinois. Prof. R. H. Moore, agriculturist of the Wisconsin College of Agriculture, estimates that one fifth of all the corn in Wisconsin last year was of the Silver King variety. This kind yielded on the Wisconsin Experiment Farm an average of 84 bushels per acre on a field of 32 acres. As its name indicates it is a pure white dent corn, producing large and solid ears which are from 18 to 20 rows, well formed and completely filled out clear to the tips with kernels of good length. It is a strong grower and resists cold weather to a remarkable degree. Most stalks produce 2 good ears, which accounts for its large yield records.

Price: "Farmer Brand", 3 lbs. 75c, prepaid. - Not prepaid, pk. 85c, bu. $2.75, 5 bu. $13.00. Commercial Grade, pk. 65c, bu. $2.25, 5 bu. $10.00, bags included.

Minnesota White Dent.

An extra early White Dent Corn, maturing just as early as the Pride of the North, but yielding almost as much as this on the open prairie and on poor and thin soils. It produces very good sized ears, with long and deep kernels growing very uniformly around the cob. This is the best pure white dent corn adapted for a northern climate, like that of Minnesota, Wisconsin and the Dakotas. We have grown it here in Minnesota for many years, and has always proved itself to be one of the best.

Price: Commercial Grade, 3 lbs. 85c, prepaid. - Not prepaid, peck 60c, bu. $2.00, 5 bu. $9.25.

I purchased quite an amount of Seed from you last spring, including Minnesota No. 13 Corn, N. D. Golden Dent, Flat Corn and Former Brand Allada Seed, all of which gave most satisfaction.

C. M. CONDIT, Botanico Co., N. D.

Rustler White Dent.

This early White Dent Corn originated in Dakota and is well adapted to the Northwest. For early ripening, great yield and compact growth of ears it is one of the best; admirably adapted to a northern climate. Average height of stalk, 8 feet; average distance base of ears from ground, 3 feet 6 inches. The ears are large, closely filled with large, deep kernels. Those wishing a first-class white dent corn will find in the Rustler Dent corn that is hard to beat.

Price: "Farmer Brand", 3 lbs. 75c, prepaid. - Not prepaid, peck 75c, bu. $2.50, 5 bu. $11.75. Commercial Grade, peck 65c, bu. $2.25, 5 bu. $10.00.

The Seeds ordered came in fine condition and we have just finished a test of the Corn. Both varieties the Pride of the North and the Extra Early Minnesota to Ferber Corn gave a perfect test and are fine. You will get more orders from this neighborhood as everyone is pleased with your Seeds.

IRA L. GROVER, E. Folk Co., Minn.

Am sending my order for Seed Corn again this year. Last year I put in a good deal of your Murdock Corn and got a splendid yield of well-rounded Corn, so picked my own Seed from Murdock.

BURL SELLAND, Watonwan Co., Minn.

My shipment of Golden Jewel Seed Corn arrived after a little delay, I am not being notified by agent. I am very much pleased with Seed which tests 100 per cent.

G. A. PETERTON, Blue Earth Co., Minn.

For Corn Planters and other Farm Tools write for our special Implement Catalog & Premium List.
Minnesota Ideal Corn.

This is the best all-around early yellow Dent Corn, on account of its enormous yield of both corns, as well as of fodder—25 to 35 bushels per acre is an ordinary yield, while it produces at least 25 to 30% more fodder than other Dent Corn. Also the stalks grow from 8 to 10 ft. in height, the Corn matures before such varieties as the Minnesota, Sterling, Haw and Leaning; and as soon as ripe, the ears are hard and solid; ears and stalks are 10 inches in length and it is rowed. The stalks are very strong and the ears express earliness; the kernels are of medium depth. It matures within 90 to 100 days. We recommend Minnesota Ideal for the southern border states and other sections in the same latitude. 

Price: "Farmer Brand" 3 lbs. 60c, postpaid. — Not prepaid, pk. 75c, bu. $2.25. Commercial Grade, pk. 60c, bu. $2.00, 5 bu. $9.00. — Tested Ear Corn, 1 bu. crate, $3.50.

Minnesota King.

In appearance the Minnesota King is remarkably distinct. It being a half dent and half flint, a hybrid of the Longleaf and Flint, a variety of the North. That this is a good cross and a good type of corn for the more Northern sections is well evident. From the seeds, the stalks are of the same height, the corn matures before such varieties as the Minnesota, Sterling, Haw and Leaning; and as soon as ripe, the ears are hard and solid; ears and stalks are 10 inches in length and it is rowed. The stalks are very strong and the ears express earliness; the kernels are of medium depth. It matures within 90 to 100 days. We recommend Minnesota Ideal for the southern border states and other sections in the same latitude. 

Price: Commercial Grade, 3 lbs. 50c, postpaid. — Not prepaid, pk. 65c, bu. $2.25, 5 bu. $10.00.

Triple Income or Minnesota No. 23.

An early Dent Corn, ripening in about 85 days. Also it is very early, it is nevertheless such a great variety that it has deserved the name of "Triple Income". The ears of good quality are very large, and are usually 16 rows of kernels which are of white color. It is a heavy yielder of both corn and fodder. The stalks grow from 8 to 10 ft. high, and are strong and very deep rooted. Of greatest value on account of its resistance to unfavorable conditions of weather and soil. Price: Commercial Grade, 3 lbs. 50c, postpaid. — Not prepaid, pk. 65c, bu. $2.25, 5 bu. $10.00.

North Dakota Agricultural College Golden Dent.

This is one of the earliest varieties of Dent Corn produced in the Northwest, and has been grown in North Dakota for several years in succession. The stalks grow from 5 to 7 feet in height, carrying the ears sufficiently high to be cut with the corn binder. Also this corn ripens extremely early. It produces good yields. The ears are golden yellow in color. From 5 to 8 inches long, are usually 16 rows of kernels, and are well filled from butt to tip. It yields a large percentage of grain to the ear.

Price: "Farmer Brand" grade, 3 lbs. 75c, on prepaid. — Not prepaid, pk. 85c, bu. $3.00, 5 bu. $14.00. 

Commercial Grade, pk. 65c, bu. $2.25, 5 bu. $10.00.

Minnesota Yellow Dent.

One of the best early Dent corn varieties for the Northwest, yielding 75 to 80 bushels of good sound corn per acre; even in unfavorable seasons a good average yield can be depended upon. The stalks grow from 8 to 10 feet high and are very leafy, producing a very large quantity of fodder. The ears are large, 8 to 10 inches in length with 16 rows of kernels. One of the best all around varieties to plant for best results year after year. This corn ripens in 90 to 100 days. Price: Commercial grade, 3 lbs. 50c, postpaid. — Not prepaid, pk. 60c, bu. $2.00, 5 bu. $9.00.

Iowa Gold Mine.

A well known second early yellow dent corn largely planted in many sections of Iowa, South Dakota and southern Minnesota. Ears of good quality; the stalks are very strong and of golden yellow color; cob is very small. A heavy yielder of both corn and fodder. The seed we offer is Minnesota grown. Price: Commercial Grade, 3 lbs. 80c, postpaid. — Not prepaid, pk. 60c, bu. $2.00, 5 bu. $9.00.

Brazilian Flour Corn.

Also called Century Wonder Corn. This corn stools out like winter wheat, producing 6 to 10 stalks from each seed, and several ears grow on each stalk. It exerts an excellent habit of growth, and is plantable on the grade, like sweet corn. The kernels are pure white and when ground into flour this is considered equal to the best wheat flour. It will ripen when other Corn does, and is cultivated the same; plant 3 to 4 quarts per acre. Qt. 40c, postpaid. — Not prepaid: Qt. 25c, 4 qts. 85c, pk. $1.40.

Giant Cuzco Corn.

A strange and curious corn from Peru, with kernels of truly mammoth size, each one being as large as 6 to 10 kernels of ordinary corn. It will cause wonder wherever it is seen. It will not mature here but it is a great novelty and attracts attention wherever seen. Pkt. 10c, 1/4 lb. 25c, postpaid.

North Dakota Agricultural College Golden Dent.

The Seeds that I got last year gave good satisfaction. I took first and second prizes on the Mammoth King Pumpkin.

THOMAS T. ERICKSON, Tracy, Minn. R. I.

Had some new Roosevelt Oats last year, and we are very pleased with it, as it was a good the year. MISSAMANDA A. FRITZEL, Washington Co., Minn. R. I.

If interested in the latest labor-saving farm implements write for our special illustrated implement catalog and premium list.
FLINT CORN VARIETIES.

STRICTLY NORTHERN GROWN SEED.

Flint Corn is the earliest to mature of all varieties of corn and for this reason the demand for same is always large, especially in the far northern sections and Canada. Here in the Northwest flint corn is used largely for late planting and as a crop for "new breaking". The different varieties listed here, vary somewhat in earliness, but all of them possess the good point to mature a crop of corn under adverse conditions.

IMPROVED KING PHILIP.

Extra Early Red Flint Corn. This is a very early eight-rowed flint corn, and is one of the most reliable and productive varieties for the Northwest. The ears grow very large, a large percentage of them over 12 inches, with eight straight rows of broad kernels, which are of a shiny red color, shining to gold on the outside edge. Many stalks produce two and sometimes three good large ears. The corn is not near as hard as ordinary flint corn, on which account it is of the greatest value for feeding stock. The stalk grows about 7 feet in height, and is very leafy, therefore being more valuable for fodder than any dent corn. This variety matures in 80 days. Very hardy and one of the best and most reliable early varieties, having been extensively and successfully grown in northern sections for many years. The seed we offer was grown on our own farms here. Price: 3 lbs. 50c, postpaid. — Not prepaid, pk. 60c, bu. $2.25.

SANFORD'S WHITE FLINT.

The handsomest flint corn and especially recommended for Minnesota and South Dakota. The great feature of this variety is the large grain and small cob it produces. If an ear be broken, you wonder that it is possible for so small a cob to hold and nourish so much grain. The ears are 12 to 15 inches long, smooth and symmetrical. Kernels are broad and flinty, and white in color. Sanford's White Flint makes a very sturdy and vigorous growth with a great abundance of broad succulent leaves and is of great value for fodder and silage as well as grubs. We consider this the finest of the flints. Matures in 85 days. Price: 3 lbs. 50c, postpaid. — Not prepaid, peck 75c, bu. $2.50.

COMPTON'S EARLY.

One of the best varieties of corn for northern latitudes, and is undoubtedly the longest eared flint corn grown. Ears measure 12 to 16 inches long, with 8 broad rows of kernels, making a most attractive appearance. The stalks grow to medium size, and many of them bear two to three ears. It is very leafy and a valuable variety for ensilage. Price: 3 lbs. 50c, postpaid. — Not prepaid, peck 75c, bu. $2.50.

CANADA SMUT NOSE.

An extra early flint corn grown more extensively than any other in the north. Altho this corn matures in 80 days it is certainly the most profitable flint corn variety, for it generally averages 75 bushels per acre. The stalks, which average 7 3/4 feet in height, are very leafy and often bear 2 to 3 ears which are 10 to 15 inches long, very compact and of a rich golden yellow color, blazed with red toward the tip end. The ears set about three feet from the ground. As the Smut Nose is not as hard and flinty as most flint varieties it is planted in many sections of Minnesota and Wisconsin with preference to dent corn. The seed we offer for this variety was grown on our own farms here. Price: 3 lbs. 50c, postpaid. — Not prepaid, peck 60c, bu. $2.25.

NORTH DAKOTA WHITE FLINT.

A pure pearly white flint corn, the result of many years' careful selection from the original squash corn, which was grown in the Missouri Valley by the Mandan and Cree Indians for many generations. This corn stands more hardship, such as cold, frost, heat and poor cultivation, than any other variety. It grows about 5 feet high and the average distance the ears are from the ground is 2 feet. For North Dakota, northern Minnesota and Wisconsin this is the best and surest corn to plant. Matures in 75 to 80 days. Price: 3 lbs. 50c, postpaid. — Not prepaid, peck 75c, bu. $2.50.

LONGFELLOW.

This is a yellow variety of flint corn of very handsome, rich and glossy appearance. The ears are 12 to 16 inches long, and are filled with large and broad kernels; it is not at all unusual to find three full sized ears growing on one stalk. It is well known as a heavy producer of fodder as well as ears. The average height of the stalk is 7 1/2 feet, while the ears are set about 3 feet from the ground. Matures in 75 to 80 days. Price: 3 lbs. 50c, postpaid. — Not prepaid, pk. 75c, bu. $2.50.

MRS. CARL GRAFFUNDE, St. James, Minn.
FODDER OR ENLISAGE CORN.

NORTHERN GROWN EARLY FODDER CORN VARIETIES.

A great many dairy farmers and stockmen nowadays plant an early Fodder corn which they can let mature and dry in the field during fall and winter. By so doing they have considerable less hull, such as coarse stalks and a large amount of moisture, and provide a very nourishing and milk producing feed in a more condensed form. That it is an advantage to plant earlier maturing varieties of fodder corn is now generally acknowledged.—Prices quoted are to i. o. b. Faribault.

F. S. & N. CO.'S IDEAL SILO CORN.

The best fodder corn for the northern states. For feeding green, for silo purposes and also for curing in shocks, to be stacked up for feeding in the bundle, it is unexcelled. It is a great yielder of fodder and also makes well-ripened ears in 60 to 70 days, ripening at the same time as the well known Minnesota No. 11 Field Corn. The stalks do not grow as thick and coarse as the southern varieties of fodder corn, and can easily be harvested with the corn binder. The stalks are strong and stiff, withstand wind well, they grow about 8 to 9 ft. and may go deep into the soil, withstanding drought well. The Ideal Silo Corn is especially well adapted to poorer soils, on which most other varieties would make but a small crop, you can depend on the Ideal Silo Corn to bring big returns on such soils. It will make a good stalk of such growth and will mature perfectly in this latitude. For this section and Iowa, as well as for northern Minnesota, Wisconsin and the Dakotas, no better corn for fodder and stack curing has ever been found. The Experimental Stations now advise our farmers of the Northwest to plant early maturing varieties of fodder corn in preference to the coarser Southern kinds. Our Ideal Silo Corn has been especially bred for this particular purpose. The stalks grow tall, yet produce a super-abundance of ears. It can be grown for fodder and as the ears are not too large an advantage for a double yield of fodder, containing 50 per cent and more protein, compared with southern corn. Every dairy farmer should plant more fodder corn because it produces more tons of splendid feed per acre than any other grain or forage plant. In a dry season especially, when grass and pasture land is short, fodder corn will prove a great boon to the farmer. The great feeding value and milk producing qualities of fodder corn are so generally known that it appears needless for us to here state them again. Peck 50c, bu. $1.60, 5 bu. $7.50, 10 bu. and more at $1.40 per bu.

EARLY MINNESOTA YELLOW DENT FODDER CORN.

An early variety for those years in which the customers very good satisfaction for many years. It is a heavy yielder of fodder and may be used for feeding year round from the field, as well as for silo filling and for curing in shocks, to be fed later, in the bundle. Will mature perfectly in this latitude and also north of here. The stalks are strong, about 6 feet high and very heavy, the ears are large and will mature in about 90 days. Price: Pk. 40c, bu. $1.25, 5 bu. $6.00, 10 bu. and more at $1.15 per bu., bags included.

YELLOW JUMBO FODDER CORN.

One of the best varieties of medium early Fodder Corn for the silo as well as for feeding green. It is wonderfully productive, without growing over-large like some of the Southern varieties of Fodder Corn and, as the stalks are strong, will bear abundant ears of furred corn, several of them often growing on a single stalk. The average height of this corn is 8 feet, but the stalks may grow as thick and coarse as the stalks of some of the other varieties for fodder corn and this corn is equally well adapted to the silo. The ears are large and will mature in about 90 days. Price: Pk. 40c, bu. $1.25, 2 bu. for $2.40, 5 bu. and more at $1.15 per bu., not prepaid.

EXTRA EARLY WHEAT DENT FODDER CORN.

Though not absolutely typical as a field corn, this is a good commercial grade of dent corn maturing perfectly as far north as the center of the state. We recommend this variety in particular for cold and moist soils. It produces a heavy yield of excellent fodder and adapts itself more readily to different soils and conditions than any other corn. Price: Pk. 40c, bu. $1.35, 2 bu. for $2.60, 5 bu. and more at $1.25 per bu., not prepaid.

Tall Growing Southern Dent Corn.

RED COB FODDER OR ENLISAGE CORN.

A well known variety of Fodder Corn good either to feed green right from the field, to put up for the silo or to cure and stack away. It is a pure white corn, cropping as high as 45 tons of fodder per acre, which is sweet, tender and juicy, and furnishes great quantities of nourishment. The stalks have short joints, therefore producing an abundance of leaves and growing faster and climbing, but not over-large and coarse as some of the other varieties of this corn. This Fodder Corn is adapted to every section of the country, although it will not ripen in our Northern States. Hundreds of farmers and stock raisers who have grown this corn for many years and never disappointed. Price: As we cannot quote definitely at this early date please write for prices in season.

GIANT FODDER CORN.

This grows very tall and leafy, and yields an immense quantity of good quality fodder. Other varieties of Fodder Corn grow just as tall and often throw out leaves that are just as large, but the great productivity of the Giant Fodder Corn arises from the closeness of the joints, and as leaves are thrown out at every joint, the result is an increased yield of fodder over every other variety. Price: $1.10 per bu., not prepaid.

Flint Fodder Corn.

SWIT NOSE FLINT FODDER CORN—This offers many advantages over the later maturing Dent Corn and should not only be planted by our farmer friends in the extreme Northwest but by every dairy farmer and live stock raiser located here in the country. The stalks are short, tender and very juicy. The leaves, which are very numerous, are large, broad, succulent and freely given by all kinds of stock, being far superior in every respect to the southern corn. The stalks are short, the leaves are large, the ears are strong, and the texture of the fodder is very good quality. Price: peck 40c, $1.20, 2 bu. for $2.40, 5 bu. and more at $1.25 per bu., not prepaid.

WHITE FLINT FODDER CORN—This is one of the tallest and most productive Flint varieties producing an enormous lot of valuable fodder as well as for bedding purposes. The stalks are tall, short jointed and very leafy. This variety is too late in sections far north. Price: Peck 40c, bu. $1.20, not prepaid.

Sweet Fodder Corn.

EVERGREEN—We consider this one of the most valuable fodder plants in existence, and every stock farmer should have some land thrown on. The stalks are short, juicy, rich, tender and very nutritious. The leaves, which are very numerous, are large, broad, succulent and freely given by all kinds of stock, being far superior in every respect to the southern corn. The stalks are short, the leaves are large, the ears are strong, and the texture of the fodder is very good quality. Price: peck 60c, $2.00, 5 bu. and more at $1.90 per bu., not prepaid.

EARLY SWEET FODDER CORN—This is an early variety having the same merits as the above, with the exception that it is not as productive as the Evergreen. The stalks are short, leafy and full of nutrition. Price: peck 60c, bu. $1.90, 5 bu. or more at $1.80 per bu., not prepaid.
MINNESOTA GROWN SEED POTATOES.

WITH hardly any other agricultural product is the change of seed of such great importance as with Seed Potatoes, for these deteriorate so rapidly, especially on soil that is not naturally well adapted for their growing. Seed stock should, however, be procured from a northern section where the conditions of soil and climate are naturally favorable and where the tubers reach their highest state of perfection. Everybody familiar with the soil conditions in this section of the Northwest has admitted that they are the most ideal for the production of clean, healthy and well-formed tubers. On account of the intersection of the Straight and Cannon Rivers, here at Faribault, we have the greatest variety of soil at our disposal—the light, somewhat sandy, yet fertile river bottom, deep rich, black loam, just sandy enough so that it works up well and never packs, and also the naturally rich, loamy hardwood-timber soil abounding in vegetable and humus matter to such an extent that it will produce the largest crops of Potatoes, Corn, Vegetables, etc., for years to come. With all such favorable conditions supplied by nature, together with the most careful selection of our seed stock, we are constantly bringing our Seed Potatoes up to the highest standard of perfection.

We ship our potatoes in the spring, as soon as the danger of freezing is over, so that they will arrive in due time for planting. All orders for potatoes are acknowledged when received, and forwarded as soon as possible. We agree to fill all orders for Seed Potatoes at catalog prices as long as our supply lasts. Should this, however, be sold out and your order reaches us later in the season so that we would be obliged to procure new stock from other potato growers at higher prices, then we reserve the right to send you the money's worth of Seed Potatoes, or we shall write you before we fill your order.

Our customers can select a barrel of any 3 different varieties at the barrel price of each variety, and we will pack them separately in 1 barrel.

Our Barrels Are Full 3 Bushel Size, Which Fact Please Bear In Mind When Comparing Prices.

It is advisable to ship bushel lots of potatoes in baskets to insure safe arrival, without the potatoes being bruised or skinned. We will ship them in baskets at 15c extra per bushel.

EXTRA EARLY OHIO. TRUE RED RIVER STOCK.

This grand old reliable potato is too well known to require a lengthy description. Almost every farmer and potato grower has given it at least a trial, and where the true and genuine stock was secured, it has always given the best satisfaction. No matter how many new early varieties are introduced, the Early Ohio is still the leading market potato. The southern potato growers realize that by planting our extremely northern grown Early Ohio, the crop will be ready for the market at least 10 days to 2 weeks earlier than if their own or more southern grown stock had been planted. Our Northern Grown Early Ohio, being vigorous and healthy, will naturally produce the largest crops and mature almost two weeks earlier than Seed Potatoes produced in a milder climate. Price: 3 lbs. 50c prepaid.—Pk. 50c, bu. $1.65, bbl., $4.50, not prepaid.

EARLY SIX WEEKS.

This is the best seeding of our grand Early Ohio, which is also the parent of several other good early varieties. The Early Six Weeks out-rivals the Early Ohio, not only in extreme earliness as its name already indicates, but also excels it in productiveness. As the illustration shows, the tubers are of a handsome oval form, almost the same in shape and color as the Early Ohio, but are not quite as much inclined to run elongated when conditions of soil and weather are unfavorable. The flesh is of extreme whiteness, both raw and when cooked. The potatoes grow closely to the plant and are therefore easily harvested. Although the Early Six Weeks is such an extremely early variety, it is also a splendid keeper, remaining sound until late in the season without wilting or sprouting. Price: 3 lbs. 50c, prepaid.—Pk. 50c, bu. $1.65, bbl., $4.50, not prepaid.

EARLY MINNESOTA.

Altho this is a very early potato, it is enormously productive and in addition to this possesses great keeping qualities. In productiveness it excels the Early Ohio, and is not at all particular in regard to soil. The tubers are of handsome oblong, somewhat flattened form, very smooth and clean, and of beautiful appearance. The skin is flesh-colored and somewhat netted at the seed end, a sure indication of superb quality. Eyes are few and shallow; flesh pure white and of excellent flavor. The early Minnesota potato is almost unsurpassable as a market and table sort. Price: 3 lbs. 45c, prepaid.—Pk. 45c, bu. $1.50, bbl., $4.50, not prepaid.

EARLY IRISH COBBLER.

In shape the Cobbler is round, with oval cross-section. Skin white, well-netted. Flesh pure, pearly white. Eyes are very few and shallow. Its cooking qualities and flavor are first class. Tubers are of good size, no small ones and very smooth and free from scab. It is one of the most reliable of the early sorts. It ripens very evenly, every hill seeming to ripen at one time. Its strong growth, earliness, productiveness, fine eating quality, and handsome appearance will always cause a good demand for the Irish Cobbler. Price: 3 lbs. 50c, prepaid.—Pk. 50c, bu. $1.75, bbl., $5.25, not prepaid.

Early Six Weeks.
EXTRA EARLY BLISS TRIUMPH.

On account of its extreme earliness, this is a standard market variety in all the South-ern States. It is at least a week or ten days earlier than the Early Rose and the Early Ohio. The tubers are of a very handsome appearance, being almost round and most uniform in shape and size, with slightly depressed eyes, which are mostly on the seed end. The skin is of a pretty, light red color, while the flesh is of the purest white, both raw and when cooked. Its beautiful appearance, wonderful productivity and superior table qualities make this potato a favorite for the early market wherever introduced. It produces at least from 12 to 15 tubers per hill, all of marketable size. It is the standard first early potato in the South for shipping to northern markets early and late. Price: 3 lbs. 50c, prepaid. Peck 45c, bu. $1.50 bbl. $4.50, not prepaid.

OLPE KANS.
The potatoes ordered from you arrived in best condition. We were especially surprised to see such nice, large potatoes. Many thanks to you. P. C. FOE. ER.

PEARL OF CANNON VALLEY.

We have received so many letters of approval from our customers on account of the superior quality of this great potato, that we see our trouble and expense, always connected with originating new varieties, well rewarded. The tubers grow large, run very uniform in size as well as in shape, and are of an attractive oval form, with smooth, somewhat netted skin on the seed end; eyes are few and shallow and the skin is of a creamy white color. The very type of this potato expresses the choicest table quality, the flesh is white, both raw and when cooked, fine grained and of excellent flavor. It is not only remarkable on account of its superior quality, but in great productivity it is also unsurpassed. Yields of 400 to 500 bushels per acre are nothing unusual. The Pearl of Cannon Valley is a medium late variety, maturing with the Burbank No. 1. A splendid market potato of finest quality, which always sells well. Price: 3 lbs. 50c, prepaid. Peck 45c, bushel $1.50, barrel $4.00, not prepaid.

CARMAN NO. 1.
The tubers grow very large, and will produce small ones only under unfavorable circumstances. The Carman is medium late and an enormous producer of handsome and well-shaped tubers which possess the best table qualities. Skin is of a yellowish white color; flesh is white and fine grained; cooks dry and mealy and very even through. One of the best main crop potatoes. Price: 3 lbs. 50c, prepaid. Peck 35c, bushel $1.15, barrel $3.45, not prepaid.

HYBRIDIZED POTATO SEED.

Growing new sorts from the seed-ball seed is a very interesting employment for old and young. There is the widest range of difference in color, shape and general characteristics between the different seedlings. Everyone is more or less unlike all the others. It is from this seed that new varieties are originated. The result is often extremely profitable. Directions for planting, cultivating, etc., on each packet. Price: Packet 10c. 3 for 25c, postpaid.

We received the potatoes and are very pleased with them. Many thanks.

P. C. MOGEE. White Church, Mo.

Received the Plants in good order, and the Potatoes also. Your packets are much larger than I get of other nurseries. The Strawberry plants and Pie Plants have splendid roots.

MRS. EMMA STUART. Hanover, Wis.

NOROTON BEAUTY OR QUICK LUNCH.

It is claimed that this is the earliest potato ever introduced and that the tubers are well matured in 8 weeks from the time of planting. They are about the same shape as the Bliss Triumph, being nearly globular in form, and run more uniform in size, color and quality than any other early potato. The eyes are shallow, with a pinkish cast about them, while the smooth brownish skin is also splashed with rosy crimson, giving these potatoes a most striking appearance. They are quickly pared as the skin peels quite easily. The tubers grow sturdily enough and are closely set with deep green foliage, which is broad and finely spread. It is very hardy against the blight, rot or any other disease and a heavy yielder. Price: 3 lbs. 60c, prepaid. Peck 50c, bu. $1.75, bbl. $5.25, not prepaid.

PAYETTE, IDAHO.
I raised 750 bushels of Potatoes per acre from the Seed Potatoes purchased from you. Certainly a big yield.

W. B. GILMORE.

I am well pleased with the Faribault Mammoth Prize Potatoes which I ordered from you last year.

GUST. PLAUTZ. Random Lake, Wis.

VIOLET QUEEN.

Splendid medium early potato that is bound to please everybody. It is very distinct and handsome, of an oval, slightly flattened form, with a beautiful violet and white mottled, finely netted skin. Below the shallow eyes there are patches of pink, which make the appearance of this potato delightfully striking. Altogether it grows large in size, its choice table quality is unsurpassed; the flesh is of a creamy white, both raw and when cooked, and boils perfectly dry and mealy through. It starts more quickly, and grows more vigorously than any other kind; the vines are strong and healthy, and the tubers are all of large, uniform size, lying close together in the hill. It is neither affected by potato blight nor rot and is one of the most profitable potatoes for home use. Price: 3 lbs. 60c, prepaid. Peck 40c, bushel $1.35, barrel $4.00, not prepaid.

BURBANK SEEDLING.

A seedling of the well known old Burbank potato. This variety embodies all the good qualities of the old variety and adds many new ones. Ripens medium late. The tubers are of good size, fine elongated form, have white flesh, which is very mealy and of fine flavor; the best potato for baking. It is very prolific, well adapted to heavy soils and is a late keeper. Our stock is very fine. Price: 3 lbs. 50c, prepaid. Peck 40c, bu. $2.00, bbl. $6.00, not prepaid.

Burbank Seedling.

$
FARIBAULT
MAMMOTH PRIZE.

We consider this new Potato the most valuable of all our introductions, for it excels in great productivity and in eating quality. It has distinguished itself as a perfect disease-resisting variety, never getting scabby, and on account of being of such a strong and vigorous growth, it is but little affected by the ravages of potato bugs.

The Mammoth Prize is, beyond doubt, the largest choice eating potato in cultivation. It is of an oblong, almost oval form, as shown in the illustration, and is of a yellowish-white color; is perfectly white finished and a grand cooker, retaining its floury whiteness even when cold. The potato is late in maturing and ripens with the Carman. Growers for the market will not find another variety that is as productive and as profitable to grow as the Faribault Mammoth Prize. Price: $1.35, bu.$1.50, bbl.$4.50, not prepaid.

SECONDSIZED SEED POTATOES.

As we have a large fall trade on Seed Potatoes we have only limited quantities of a few varieties left, which we quote as follows:

Please notice that we do not offer the above Second-Sized Seed Potatoes in smaller quantities than 1 bushel. In case the Second-Sized Potatoes are ordered and we should be sold out when we receive your order, we reserve the right to send the money's worth in First-Grade Potatoes of the varieties ordered, unless otherwise specified in your order, or, if early enough in season, we will first write you.

The potatoes received from you last year were certainly extra fine stock and I have the best of success with them. Thanks for good service.

Fred Reeder, Sedalia, Mo.

My children have taken the first, second, and third prize at the County Fair with your Golden Jewel for the last two years, and first prize this year in the State Industrial Contest for Yellow Dent Corn, so the jewel is all right.

W. W. Adams.
Winnebago, Ill.

For Potato Planters and other Farm Tools and Implements write for our illustrated descriptive Implement Catalog and special Premium List.

Sir Walter Raleigh.
These splendid tools have gained wide popularity within a very few years on account of their sterling worth and moderate p. ce at which they sell. All tools are well made of the best material and fully guaranteed. Illustrated catalog free on request.

"Standard" No. 9 Double and Single Wheel Hill and Drill Seeder, Cultivator, Hoe, Plow and Rake.

A splendid tool with all latest improvements. Is easily changed from a double to a single wheel cultivator, and with the hill and drill seeder attachments combines three practical tools in one. The tool will not only deliver seed in drills, but by shifting one part only will drop in hills 6, 8, 12 and 24 inches apart. Seeder is driven with steel chain. Equipment includes four shovels, one pair hoes, one pair diamond, 1 pair rakes and 2 leaf guards. Price: Complete $11.00.

"Standard" No. 20 Single Wheel Cultivator.

With this tool you can get your money's worth in a few hours work, whether you have 5 acres, 1 acre or a garden only. Has a strong steel wheel 24 in. in diameter, making it work easily and carrying the tool in perfect balance. The handles are quickly adjusted to suit the height of the operator or to regulate the depth desired to run attachments. The equipment includes double end shovel mold board, combined sweep and rake (practically five tools). Price: Complete $3.00.

"Standard" No. 4 Single and Double Wheel Cultivator.

This tool is light weight yet strong enough to last a lifetime; can be changed in a minute from a double wheel, for cultivating astride the rows, to a single wheel to cultivate between rows. With wheels 16 in. high and attachments the proper shape, a child can run the tool. When set up either as a single or double wheel, the wheels can be adjusted up or down to gauge the depth of work; the handles are also adjustable for height to suit boy or man. Equipment includes four shovels, one pair hoes, one pair diamonds, one pair rakes and two leaf guards. Price: Complete $6.50. Without rakes and leaf guards, $5.75.

"Standard" No. 11 Hill and Drill Seeder.

This is tool No. 9 set up as a hill and drill seeder only, no other attachments. Price: $8.50.

"Standard" No. 9 Spring Beam Cultivator.

This spring beam, double wheel tool is a great favorite with all who use it, owing to the fact that the attachments when in use are entirely under operator's control. The handles being bolted to the beam, the beam's turnings allow them to be moved to and from the various rows and planted or not, as desired. All cultivating in hills the attachments can be moved in and out between the plants, doing the closest work possible to be done with a wheel hoe. Also clears the ground 1 in., and is adjustable in width from 7 to 11 in. Wheels are 16 in. high, with 1 inch tires. With attachments as shown in illustration: Price: Complete $6.50.

BARKER WEEDER AND MULCHER.

This is the most practical, as well as the most up to date hand cultivator ever offered, doing far better work than any ordinary cultivator with small pointed shoes or hoes. The Barker is made on the principle of a lawn mower, the long, revolving blades working up the surface of the ground thoroughly, cutting the weeds and separating them from the soil, so that they are easily destroyed. There is only a steady forward motion with the Barker and no jerking back and forward, so that operator accomplishes again as much as with an ordinary implement. The work of this machine is also more effective, as no weeds can be missed and a fine mulch is left over the surface of the ground which prevents the evaporation of the moisture. With the Barker you do the work better, quicker and save yourself much extra labor over hand work.

The Barker Weeder is just the tool for the practical market gardener.

The Barker Weeder is just the tool for the practical market gardener.

THE MICHIGAN WHEELBARROW SEEDER.

This seeder has all the good qualities that any other seeder has—yes, it has many superior ones. The wind may blow while you sow, because the seed is carried so low that the wind has no chance to bother it. A little the ground be wet, dry or rough, the gait of the man operating the machine will not affect the feed of the seed, because this is controlled by an improved force-feed roll driven by the wheel. There is no guessing as to whether the ground has been covered, because every spot of ground the seeder passed over is evenly sprinkled, as the seed has to fall but a short distance.

There are no small attachments in the machine to give out; it is built honestly and will last a generation if given the proper care. The wheel is 20 inches in diameter and the tire is 14 inches wide. The Michigan Seeder will sow accurately Flax Seed, Millet, Clover, Timothy and other Grass Seeds. It is an easy matter to sow from 20-40 acres per day with it. Price: 14 ft. machine $6.50, 16 ft. machine $7.50. Weight of seeder 40 lbs.
"PLANET JR." FARM and GARDEN TOOLS.

Space will not permit our showing and describing all of the "PLANET JR." Tools, but we will send a fully Illustrated Catalog free for the asking to any who desire it, and we can supply promptly anything ordered. "PLANET JR." goods are standard machines, the best on the market. In sending your order to us, you can rely on getting bottom prices.

"Planet Jr." No. 4, Combined Hill and Drill Seeder, Single Wheel Hoe, Cultivator, Rake, and Plow.

This admirable tool combines in a single implement a capital hill dropping seeder, a perfect drill seeder, a single wheel hoe, a cultivator and a plow. It holds two quarts, and as a seeder it sows in continuous rows, or drops in hills at different distances. The drill is detached and the tool frame substituted by removing but 1 bolt. It is useful almost every day during the season, at every stage of garden work.

Price: Complete $10.50; as a drill only $8.50.

"Planet Jr." No. 12, Double Wheel Hoe.

This perfect wheel hoe is invaluable for use in all small crops. Its variety of uses for work is almost incredible. Changes and adjustments of the tools are made with the greatest quickness. It has eleven-inch wheels, which can be set at four different distances; the frame is malleable, with ample room for tool adjustments and can be set at three different heights. Complete equipment consists of:

One pair of 6 inch hoes,
Two pairs of hollow steel cultivator teeth.
One pair of plow.
One pair of leaf lifters.

Price: $6.50, with rakes 75c a pair extra.

"Planet Jr." No. 13, Double Wheel Hoe. $4.25.

This tool is the No. 12 with the 6 inch hoes only, these being the tools that are most generally used. Any or all of the other tools may be added at any time.

"Planet Jr." No. 16, Single Wheel Hoe, Cultivator, Rake, and Plow.

This implement has triple teeth, one 3 inch one pair 6 inch hoes, three cultivator and one 4 inch rake, a large garden plow and leaf guard.

Price: Complete $3.35.

"Planet Jr." No. 17, Single Wheel Hoe and Cultivator and Plow.

This tool is the same as No. 16, but has only a pair of 6 inch hoes, a plow and a set of cultivator teeth, an extra, subject to fast work. The other attachments can be added at any time as desired.

Price: $4.50. Set of rakes 75c extra.

"Planet Jr." No. 17½ Single Wheel Hoe and Cultivator, and Plow

Same as above with a pair of hoes and 3 cultivator teeth only, the rakes are also included. Price $4.00.

The arrangement of teeth prevents open furrows and leaves the ground in beautiful shape. For finishing a wide row at one passage it is much superior to any other cultivator. This is a very good tool and at the low price we ask, it is a bargain for anyone.

Fitted with cast wheel, deduct 25c.

Price of 7-tooth attachment only, to fit any other horse cultivator, $1.65.

"Planet Jr." 12-Tooth Harrow, Cultivator & Pulverizer.

This tool has rapidly grown in favor with strawbery growers, market gardeners, truckers and farmers because of the twelve chisel-shaped teeth do such terrific work, and because the tool is so convenient, durable and strong. The teeth and pulverizer leave the ground in the finest condition, and the operator can set the tool exactly to any depth desired. The harrow unit works easily, yet holds the tool thoroly rigid.

Price: Complete (with lever wheel and pulverizer) $5.50, without pulverizer $4.90. Fitted with new steel wheel, add 25c.

"Planet Jr." No. 1, Combined Drill Seeder and Hoe, Cultivator and Plow.

This has long been the most popular combined tool made. From a drill it is changed to its other uses by removing two bolts, when hoes, etc., can be quickly attached. It is an excellent seed sower, and single wheel hoe. It is an every day saving machine and a preventative of getting backache.

Price: $9.00; with rakes 75c extra.

"Planet Jr." No. 3, Hill and Drill Seeder. $10.00.

This seeder is the latest and most perfect development of the hand seed drill. It sows evenly in drills, and also drops in hills. 4, 6, 8 or 12 inches apart. There is no seed lost. It is quickly set to sow different kinds of seeds in the thickness desired. The air diaphragm preventing the air from the drill, which gives a regular stand of plants with the least seed. The drill goes over and over in seed alone, is fitted with 2-inch steel driving wheel. The hopper holds three quarts. The special force feed works equally well whether sowing with or without an ounce or full hopper. We guarantee this drill to be more accurate than any other machine, and to give entire satisfaction.

"Planet Jr." No. 25, Combined Hill and Drill Seeder and Double Wheel Hoe. $13.00.

This new combined machine is intended for a class of gardeners who prefer to have a large enough acreage in crops for a double wheel hoe to be used to good advantage, and yet prefer not to buy a separate wheel hoe. As a drill it is almost identical with No. 4, and as a hoe it is the same as No. 12. The change from drill to wheel hoe takes but a moment, and the entire combination is one we can recommend. Will sow in drills any thickness or drop in hills, 4, 6, 8, or 12 inches apart; it is very accurate in planting all kinds of garden seeds. Two acres a day can easily be worked with this implement. The simplicity of this tool, both as a seeder and as a wheel hoe makes the combination thoroughly practical.

"Planet Jr." No. 14, Double Wheel Disc Hoe, Cultivator and Plow.

This new tool will give excellent satisfaction. There are 3 discs on each side, which may be all used at once, or one or two on a side, as preferred. By using the leaf lifter, the work can be done without danger of injuring the plants. Discs are adjustable for depth and to throw to or from the row. The set of Front Cultivator Teeth will be found invaluable for general cultivation. The plow is used for furrowing and for plowing away and plowing back. A splendid tool. The frame is all steel.

"Planet Jr." No. 8, Horse Hoe and Cultivator.

Equipment: Four inch plates, one 6 inch plate, two side hoes; one 7 inch shovel. This cultivator closes to ten inches and opens to twenty-five inches. The expander combines strength with simplicity. The new steel wheel, having no spokes, will not clog. The Side Standards take either cultivator teeth or hoes and are adjustable sideways. The hoe is reversible, and can either pointed or rounded edge foremost. The wheel lever is of a new pattern and the patent depth regulator is also an important new feature.

Price: Complete with attachments shown, $7.50.

"Planet Jr." No. 9, Horse Hoe and Cultivator.

Equipment: Four inch plates, one 6 inch plate, two side hoes; one 7 inch shovel. This cultivator closes to ten inches and opens to twenty-five inches. The expander combines strength with simplicity. The new steel wheel, having no spokes, will not clog. The Side Standards take either cultivator teeth or hoes and are adjustable sideways. The hoe is reversible, and can either pointed or rounded edge foremost. The wheel lever is of a new pattern and the patent depth regulator is also an important new feature.

Price: Complete with attachments shown, $7.50.

(Fitted with cast wheel, deduct 25c.)
THE NEW ANTI-KLOG SPRAYER.

Guaranteed to Give Entire Satisfaction and Guaranteed for Five Years Against Breakage.

Highly efficient for all spraying purposes. Convenient and practical for use in Orchard, Garden, Conservation, House, Barn and Chicken Yard. It is without question the most successful machine of its kind now on the market, as it is so well constructed and at the same time so simple in construction that you will not experience any trouble with this machine. The Anti-Klog is the one practical and convenient and effective automatic hand sprayer for both general and specific spraying purposes. There are no complicated parts to get out of order or go wrong; it is always ready for use. The Anti-Klog ends all spraying troubles. It excels at all points where difficulties are encountered with spraying devices. The Spray Nozzle makes the difficult noisome, even heavy whitewash, to clear the orifice. The Anti-Klog nozzle construction alone makes it worth many times any spraying machine of its size that is sold—only in the Anti-Klog can you buy this construction.

With the Anti-Klog you have perfect control of the spray. You can use a very fine mist, a very heavy spray or anything between. The pump is powerful and easily operated. The hose is acid proof and guaranteed to stand high pressure. The orifice is a special feature of the Anti-Klog, as the results gained with this spray, it keeps the solution mixed—keeps the effectiveness of your labor.

The Anti-Klog gives continuous high efficiency, hard service. It sprays better—and sprays better longer—represents more downright sprayer value—than any other hand spraying device manufactured. It is a very powerful, easy-to-operate pump, the kind that your money entitles you to. You are protected absolutely when you purchase an Anti-Klog, for each one of our sprayers is sold under an unqualified, live your guarantee as given below.

THE ANTI-KLOG GUARANTEE.—We GUARANTEE all our sprayers to be mechanically perfect. We warrant every one of them to be free from defects of material and workmanship. Any part found to be defective will be replaced without charge. Any part which breaks within reasonable usage, within five years from date of sale, will be replaced without charge—and we will leave it entirely with the user to say whether the part broke under reasonable usage or not. All we ask is that you be sure it is broken. Always write us before returning any part.

The Anti-Klog Sprayers are made of special heavy tool-granulated steel which will withstand the acids used in the various spraying mixtures in a most satisfactory manner. We can also supply brass sprayers, if preferred.

All Anti-Klog Sprayers are furnished with the Anti-Klog Mist Nozzle, two adjustable tips for the Mist Nozzle and three feet of special high pressure, acid proof, three ply hose, with nozzle attached and shoulder straps.

Compressed Air Sprayer.

Very similar to the above machine in construction and in handling for spraying. Well made of heavy brass, holds 3 gallons, works easy and will give best satisfaction. Price: $6.00, not prepaid.

The Mystic Sprayer.

Just the thing for the garden and house plants. These sprayers work to perfection and are sure to give satisfaction. An all brass spray er, and will not rust. The best hand sprayer in the market, applying liquids and insecticides to poultry houses and live stock. Price: brass sprayer 55c. Same sprayer made of tin, 60c, not prepaid.

The "Magic" Hand Weeder and Hoe.

The best garden tool on the market. It does the work with half the labor, saving both time and strength. The blades are formed so as to enter the ground the same as a scythe, but diffusing their cutting edge with loosening and rendering friable, thus sub-serving moist or long, heavy service. It sprays better and sprays better longer—represents more downright sprayer value—than any other hand spraying device manufactured. It is a very powerful, easy-to-operate pump, the kind that your money entitles you to. You are protected absolutely when you purchase an Anti-Klog, for each one of our sprayers is sold under an unqualified, live your guarantee as given below.

Price: 40c each, not prepaid. If wanted postpaid allow postage for one pound according to zone system.

No. 3 Magic Weeder with Long Handle.

Suitable for heavier work in garden and field. Large in form, made of heavy material and having a handle 4 feet long. A mighty handy and efficient tool. Price: 65c each, not prepaid. If wanted by mail allow postage for 2 lbs. according to zone system.

Gorbin’s Dehorning Pencil.

To dehorn calves makes them more gentle, they can be fed in a much smaller space, and it does away with half the room to house them in the winter. They will sell for $1.00 more per head if dehorned. Slaughter horns off of cattle is barbary, and it should be stopped by dehorning them while young. The Gorbin has sold widely when 5 to 20 days of age. This pencil is 5 to 10 preferable. Every pencil is warranted to dehorn calves. It is made to order to directions. It acts without pain or loss of appetite. The manufacturer agrees to forfeit $5.00 for every calf from 5 to 30 days old, if his pencil fails to dehorn. Price: per pencil 85c, 3 for $2.25, postpaid.

For Best Line of Implements and other Farm Tools write for our illustrated and descriptive Implement Catalog and special Premium List.
INSECTICIDES AND FUNGICIDES.

The man who sprays his fruit trees, small fruit plants and potatoes intelligently is the one who will have the bumper yield to send to the market. The large increase in the number of insects and the different kinds of fungi attacking fruit trees and plants as well as potatoes through the country makes it absolutely necessary for the farmer and grower to protect his crop by the proper use of insecticides.

Prices quoted on this page are not prepaid unless expressly stated so.

Lime Sulphur Solution.

This is a universal fungicide and insecticide for destroying San Jose Scale, bitterrot, apple- scale, leaf-spot, cancer worm, bark house and mildew. Spraying should be done according to the nature of the pest before the buds open, when in full bloom, after the fruit has set, and after the leaves have fallen. Lime sulphur to 50 gallons of water. Price: $1.00, 5 lb. bag $5.00, 1 gal. can $2.25, 1/2 barrel $6.50, 1 barrel $20.00, not prepaid.

Can be packed with bulk seeds without extra cost for packing. If to be shipped alone add 30c for boxing on one-half and one gallon cans.

Bordeaux Mixture.

This is the greatest remedy against potato blight which so often destroys our potato crops. As a rule blight affects the potato vines early after a vigorous growth while the leaves are very young. To prevent blight it is vital to keep the leaves from curling and getting yellow which spreads quickly until the entire plant is wilted, before the blight becomes one of the greater threats. This blight can be prevented entirely by spraying with Bordeaux Mixture, using 1 gallon of our condensed mixture to 50 gallons of water. Bordeaux spraying also prevents mildew and other fungus on small fruits.

By adding Arsenate of Lead described below one can spray for potato bugs at the same time. Thin 3 to 4 lbs. of Arsenate of Lead gradually and add this to the Bordeaux Mixture. Stir well, and your spray is ready. A Kent-Klog Sprayer described on page 41 with the Bordeaux Nozzle will do the work to best advantage.

Price: $1.00, 5 lb. bag $5.00, 1 gal. can $4.50 not prepaid. If to be shipped alone add 15c for boxing. Cannot be shipped during extremely cold weather.

Arsenate of Lead.

This is a general insecticide for all leaf-eating insects and is superior to other poisons because it contains the arsenic in exactly the right proportion and the proper chemical combination, thus insuring a material that will not scorch or injure the foliage but is sure death to insects feeding on the leaves. It is extremely inexpensive in water and will combine readily with Lime Sulphur and Bordeaux Mixture. In spraying large trees, it is well to suspend the arsenic in a small proportion of arsenic acid or one to five parts of water. Then a uniformity poisonous spray can be thrown from the finest nozzle. This poison is far more effective than other kinds on account of its adsorptiveness and if used on potatoes it will remain on the vines for quite a length of time in spite of wet weather. On small fruit and shrubs use 5.00 lbs. to every 50 gallons of water. For potatoes 4 to 6 lbs. to 100 gallons of water. Price: 1 lb. jar, 25c, 5 lb. jar, $1.00, 10 lb. keg, $5.65, 20 lb. keg, $27.50, 50 lb. keg, $60.00, not prepaid.

PARIS GREEN—A poisonous insoluble powder, indispensible on the farm or garden, for preventing the ravages of potato beetle, codling moth, and various other pests. Specially applied as a powder on plants it is said it should be mixed with plaster or flour, 10 parts to 1 part of Paris Green; in solution mix 1 to 3 lbs. in 50 gallons of water according to the nature of spraying. We offer high grade pure Paris Green, $1/2 lb. pkg. 25c, 1 lb. 50c, prepaid by mail. 1 lb. 5c, 5 lbs. 25c, not prepaid. This is in nature a fungicide and insecticide and for prices on larger quantities write for quotations.

WHALE OIL SOAP—Makes an excellent wash for trees and plants where insects and eggs affect the bark. Also smeared on trees to prevent worms crawling up. Per lb. 15c, 2 lbs. 25c, 5 lbs. 50c. By mail, add 16c per lb. extra.

SLUG SHOT, HAMMOND'S—A combination of the most potent insecticides and soluble plant foods. It destroys all insects injurious to gardens and lawns. It is composed of arsenate of lead and Paris Green. To 1 lb. of lime 3 oz. of arsenic, 5 to 10 lbs. of Paris Green and 2 lbs. of very fine powdered slag is added. The preparation is then sprinkled around the plant. It is the best and cheapest remedy for slugs, snails and other pests. Per lb. 15c, 10 lb. 1.00, 100 lbs. 6.50 prepaid. For spraying purposes mix 1 oz. to 1 gallon water 1 oz. to 3 gallons. Price: 1 lb. 5c, 5 lbs. 25c, not prepaid. This is the cheapest and best preparation of any kind for garden or farm work.

GRAPE DUST—An excellent insecticide for the prevention and destruction of mealy bug on small fruits and other plants. 1 lb. 10c, 5 lbs. 35c, not prepaid.

SULPHO-TOBACCO SOAP—A cheap, effective and harmless insecticide, quickly exterminating all insect life on plants and flowers. In and out of doors and acts as a valuable fertilizer, reviving plant life. Rids the house of cockroaches, and is a superior wash for all animals. Prevents our poultry lice, 5 oz. quantity, sufficient for 125 gallons prepared solution, 1c. Prepaid, 15c.

HELLEBORE—Powdered—For the destruction of slugs, worms, caterpillars, etc. Less poisonous than Paris Green and safer against current worms, to be used while the plants are not yet dew or rain. Can be used as a powder or dissolved. 1 oz. in 3 gallons of water. Postpaid, lb. 45c. 1 lb. 25c. 5 lbs. $1.00, 10 lbs. $1.75, not prepaid.

FLY-poison OF Sulphur—This is very effective and at the same time a very inexpensive remedy against lice on chickens and other fowl. A little of this mixed in with wood ashes for dust bath will keep chickens free from lice. The fumes of sulphur scattered on a showy leaf of burning coal kills insect life and disease germs. Per lb. 2c, 10 lb. 10c, 100 lb. 1.00 prepaid.

LICE POWDER—The most effective preparation for killing lice, ticks, mites and fleas on poultry, sheep and dogs. It is good to use on setting hens and little chikels. This comes in 1-lb. sprinkler top cans making it very convenient. 15c—1 lb. can, 25c, 1 lb. package, 75c, not prepaid.

SHEEP DIP—A most valuable creosote and coal tar product that leads all others in solubility, purity, strength and uniformity. Used mostly for dipping sheep, hogs and cattle; for killing lice and ticks and to cure mange, scab, etc. It is the most wonderful disinfectant in hospitals, schools, police buildings, school rooms, stables, barns and cellars, and places where a disinfectant or germicide is needed. It is also one of the greatest antiseptics. Price, 1/2 gal. 60c, 1 gal. $1.00, 2 gal. and more at 85c per gal. not prepaid.

TOBACCO DUST—Destroys rose bugs, lice, cutworms, vine bugs, tomato worms, currant worms, cabbage lice and parasites of all descriptions. Should be applied when foliage is wet. Also used as fertilizer for plants and vines, causing a healthy, vigorous growth; will not burn or injure plants. 1 lb. 25c, 5 lb. $1.50, 10 lb. 3.00, 100 lb. 25c. Prepaid.

KEROSENE EMULSION—A safe and sure remedy for all Lice and Flies that Infest plants and trees. It will destroy the Mealy Bug, Squash Bug, (squash insect), and all insects that take their nourishment openly so as to be within reach of actual contact with insecticide. It is put up in concentrated form, and dilutes with water at 10 to 30 times its bulk, according to the amount of insects on the plant.苏used on the San Jose Scale a great deal, but is best in early stages. Apply with a sprayer the same as for Bordeaux Mixture. Per qt. 40c. 1 gal. can 1.00, $1.00, 4.50 not prepaid.

Hammond's

"Cattle Comfort"
The addition of this department to our catalog is but a natural result of the methods pursued in our business of farming and seed growing—for with a farm comes a fowl, and with fowl a care, a place, and a purpose for pre-sowing or pre-rearing, or at a first look of thorobred poultry. The foundation strains of all our flocks are, we consider, the best in the country, both from a fancier's standpoint and also for meat and egg production. In mating and breeding we have not lost sight of a single point and strive to maintain the name of our strain.

“Bread Winners—Bred Winners.”

to the very letter. Our birds are Northern grown, farm raised, vigorous, healthy and sure to please. While we have in our flocks many which would carry off the honors at any poultry show—and we know it—we haven’t time along with an extensive seed business, to exhibit them, nor could we afford to be so more the stock in prices, for the quality of birds we have, is we, if we did show. All orders for stock or eggs must be accompanied by cash. We do not ship eggs before March 15th, as satisfactory fertility from any flock is questionable before that time. Every care is used in collecting and packing eggs for market against chilling or breaking, and we deliver orders in good condition to express company, the customer to pay charges. In the matter of fertility, we will replace all orders at one-half price where there are 5 or more clear eggs in a setting (15 eggs) on the 10th day of incubation.

Crystal White Orpington.

This fine large fowl is in great demand at the present time and is considered to be one of the very best and most extensively bred. They have single comb, white colored legs and skin. The Orpingtons are an excellent general fowl. In fact, they cannot be surpassed. They are next to the non-sitting varieties for layers and produce more winter eggs than any other breed. They are good sitters, yet are not persistently broody. Chicks are hardy, active and easy to raise. They mature early and are splendid for broiler purposes. We have the celebrated “Keller strain”.

Eggs, $2.50 for 15—Eggs from our select breeding pen, $4.00 per 15.

Single Comb Rhode Island Red.

This recognized dual-purpose American fowl is one of our best layers and is raised more for broilers and roasters than any other as they grow fast and are attractive on the market. The Wyandotte hens are fine setters and persist in laying during the cold weather as well as in the morn. They are gentle and close in habits and are therefore fine for the small run or city lot, although there are some better for the farm. Our Wyandottes are white and true in shape and size. The pullets mature early and produce the eggs.

From our correct matings we quote eggs at $1.50 for 15, $2.75 for 2 settings, $4.00 for 50. Eggs from our select breeding pens, $2.75 per setting of 15.

White Wyandotte.

Balanced Ration Poultry Food. “Fine”—For little chicks for the first four weeks. 25 lbs. 75c, 50 lbs. $1.25, 100 lbs. $2.25.

Balanced Ration Poultry Food, “Course.”—For growing chickens and laying hens. 50 lbs. $1.20, 100 lbs. $2.

Balanced Ration Poultry Food, “Coarse.”—For growing chickens and laying hens. 50 lbs. $1.20, 100 lbs. $2.

Balanced Ration Alfalfa Mash. A carefully selected mixture of ground feed, manufactured from the choicest oat, sweet and wholesome grain, contains ingredients in proper portions essential to the health and growth of the fowl, and especially for production of eggs. 50 lbs. $1.15, 100 lbs. $2.00.

Balanced Ration Crushed Oyster Shell. The great bone producer and natural grit. The best shell feed. Acts as a tonic to the egg production power of the hen, as it is almost pure carbonate of lime, the most essential element needed for the formation of eggs. 100 lb. sack 85c.

CRUSHED BONE—Clean and rich. Manufactured from fresh, green bone and thoroughly dried. 50 lbs. $1.65, 100 lbs. $3.00.

CRUSHED CLAMSHELLS—Supply carbonate of lime and grits to increase production of eggs. 100 lb. sack 65c.

CRUSHED CHARCOAL.—Keeps feed in healthy condition, purifies the blood; aids digestion. Two sizes: coarse and fine. 25 lbs. 90c, 50 lbs. $1.40, 100 lbs. $2.40.

POULTRY SUPPLIES.
FARMER SEED & NURSERY CO., FARIBAULT, MINNESOTA.

INCUBATORS AND BROODERS.

The Faribault “Double Wall” Incubator.
Our Faribault Incubators are built of first class, well seasoned, and perfectly dried lumber throughout. They are double walled with a half inch dead-air space between. Both walls are one inch thick, on the inner side of which is placed a heavy layer of 3 ply rose-colored building felt. This brings the total thickness to 3 inches; the dead air acting as an insulator, assists in retaining a uniform temperature in the egg chamber. The top and bottoms are constructed in the same manner with a heavy layer of asbestos additional. Basswood or other odorless wood, only, is used in the inner case construction. The outer case is made of California Redwood, which is filled and varnished, leaving same in a most attractive natural wood finish, resembling the finest rosewood. There are no knotty or otherwise defective boards used in making our incubators. The case is fitted with double glass through which the thermometer can be easily read.

SYSTEM OF HEATING—We furnish combination hot-water and hot-air heaters with our incubators. These have been proven most economical in the consumption of oil, heating the chamber in one-third the usual time, and maintaining a uniform temperature. A large copper hot-water tank is used and the surplus hot-air is utilized by a coil of pipe circling around the top of the machine.

TEMPERATURE IN THE EGG CHAMBER—In no other incubator can the temperature be retained so uniformly as in the “Faribault.” The combination heating system is the only practical one, as it eliminates overheated centers and cold corners. The hot-water boilers and tanks are constructed of heavy cold rolled copper, and will stand years service or more.

Our “Faribault” Incubator.

OUR SAFETY LAMP—The burner is of heavy brass, provided with ventilating tubes extending from oil-chamber to top of shell, and carrying off all gases. The oil fount is of heavy galvanized iron, is extra large, and fitted with a galvanized chimney containing aica window. There is absolutely no danger of explosion or catching fire with our safety lamp. The flame is always in sight without removing lamp or chimney.

THE NURSERY—A nursery for the newly hatched chickens is fitted under the egg trays of our “Faribault” incubators. Here, the chicks can be housed, warm and comfortable for 36 hours before introduction to the brooder.

REGULATION OF TEMPERATURE—We use the compound Hydro-Wafer Regulator on our “Faribault” incubators. Through years of experience, we have found this to be the most reliable regulation. It is easily adjusted and positively regulates the temperature to within a fraction of a degree throughout the entire period of incubation.

CAPACITY—We make two sizes, with 150 and 340 respective, egg capacity. The most practical size to buy is the 120 egg machine, even though you want to hatch but 50 or 100 eggs, it has been proven that the large machines give the better satisfaction, especially in regard to regulating and ventilating. However, both machines are built alike and have the same improvements.

PRICES—You can’t buy a better incubator than the “Faribault” but you can pay a better price for a poorer incubator.

No. 1. Capacity 120-125 eggs, weight crated 100 lbs. $12.50.
No. 2. Capacity 240-250 eggs, weight crated 140 lbs. $15.00.

EXTRAS—We furnish with each “Faribault” Incubator the following extra parts:

Chimney and Swing Lamp-bracket.
Egg trays.
Double wafer automatic regulator and complete directions.

Faribault Junior Incubator.

For those who want a lower priced incubator, we have constructed our “Faribault Junior.” This is in every way a practical machine, and for the price we ask you cannot duplicate it anywhere. It has double walls throughout, extra well made of seasoned wood, and is fitted with a double glass door. The outer wall is of first class dressed lumber, lined with a heavy layer of insulating felt; the inner wall is of a special composition board. The “Faribault Junior” is a hot-water machine, otherwise its system and fixtures are the same as used in our “Faribault” machine. You run no risk with this incubator, we guarantee it to give satisfaction if instructions are followed, or return your money thirty days after making your first hatch.

PRICES.

No. 11, capacity 245 eggs, weight crated 100 pounds $1.00
No. 12, capacity 125 eggs, weight crated 75 pounds $0.95

Hot Water Indoor Brooder.

This brooder is made very much like the hot air indoor style with the exception that it is fitted with a hot water tank and boiler made of heavy cold rolled copper similar to the tank we use in our incubators. The boiler and lamp are on the outside, therefore no smoke or foul air has any chance to get into the brooder. This brooder has two apartments, one is the heater, the other the exercising room.

There is at all times a circulation of the hot water in the boiler and tank; the cooler water goes back into the boiler to be re-heated and then runs through machine again.

REDUCED PRICES OF “FARIBAULT” HOT WATER INDOOR BROODERS.

No. 7, capacity 120 chicks, copper tank, weight crated 60 pounds $6.25
No. 8, capacity 240 chicks, copper tank, weight crated 85 pounds $7.50

All extras, such as safety lamp, burner, thermometer, instructions, are included.

Hot Air Indoor Brooder.

This brooder, although strictly first-class, is sold at a very low price direct from factory to user. The heat is carried through pipes made of galvanized iron run along top of brooder thus giving top heat to the chicks. Through a novel arrangement this fresh air is first warmed before it can enter the brooder, a very important feature. The window is on top of machine and therefore chicks cannot crowd against it, and we also get more light and sunshine right in to the brooder.

The safety lamp has a large oil fountain, provided with the highest grade burner, and same being on the outside is always in sight and easy to attend to. We are positive that this brooder can not be excelled by any other that is heated by hot air, and can highly recommend same, knowing that it will not disappoint you.

REDUCED PRICES OF HOT AIR INDOOR BROODERS.

No. 5, capacity up to 120 chicks, weight crated 50 pounds $4.75
No. 6, capacity up to 240 chicks, weight crated 75 pounds $5.50

The Faribault Outdoor Brooder.

This brooder has three apartments, one for the lamp; no flames or smoke from the lamp can enter the brooder chambers. The brooding chamber is separated by a curtain, into two apartments, one is from 10 to 15 degrees warmer than the other, thus, if it is too warm for the chicks under the lower they come out into the feeding apartment. The heating pipes are overhead, attatched all around near the ceiling of brooder chamber. The heat is, therefore, applied from the top downward which is the natural and only sensible way, the same as the hen applies the heat. There are large glass windows in the feeding apartment, which let in plenty of light and sunshine so much desired.

No. 9, capacity 120 chicks, with galvanized iron roof, weight crated 75 lbs. $6.25
No. 10, capacity 240 chicks, with galvanized iron roof, weight crated 110 lbs. $7.50

All our brooders are shipped complete, with all fixtures, including heater, safety lamp, thermometer, curtain, full directions, etc.

Automatic Poultry Feeder and Drinking Fountain see page 35.

Thermal. Am well pleased with the Brooder received from you, obtained the best results with the machine.

FRED L. FINCH. Dell Rapids, S. D.

Shipment of eggs arrived here in best condition. Also the oyster shells. Thanks for promptness.

C. C. HACKERdt. Anselmo, Neb.
Every year we receive numerous inquiries from our customers for good practical books pertaining to agriculture, gardening, floriculture, horticulture and farming in general. We have this season devoted this page to a selection of the very best books of interest to the farmer, gardener and stock-raiser. Every one of these books may be considered as the best in its class and the price we ask is indeed very reasonable and in most cases far below the bookseller's price. WE PAY POSTAGE.

Books on Agriculture, Horticulture and Kindred Subjects.

- **A B C of Agriculture.** M. C. Weld. 66 pages, cloth cloth. $1.10
- **Covers and How to Obtain Them.** Shaw. The first book published on the cultivation and artificial reproduction of covers, and valuable to all readers of the United States and Canada. Price $1.00
- **Allana.** P. D. Coburn. 28 pages, cloth cloth. $1.00
- **Forage Crops, Their Culture, and How to Harvest and Store Them.** This book is intensely practical and will be of great interest to every farmer. Well illustrated. Price $1.00
- **How to Get and Increase the Profits.** Price $1.50
- **Root Crops for Stock Feeding.** Price $2.00
- **Tobacco Culture.** Full practical details by fourteen experienced growers in different sections of the country. Price $1.00
- **Broom Corn and How to Grow It.** Price $1.50
- **Weeds and How to Eradicate Them.** Thomas Shaw. This book gives the general methods by which weeds may be eradicated and deserves a place of all gardeners who would grow healthful and useful food for their eradication. Price $1.50
- **Dry Farming.** John A. Wildstone. Price $1.00
- **Flax Culture.** Selection of ground, seed, preparations and marketing of crop. Price $1.00
- **Farmers Account Book and Farm Records.** Price $1.00
- **Land Serving the Farmer. A Very Handy Book for Every Farmer.** Price $1.00
- **Lumber and Log Book.** J. L. Schreiber. Quick computation of profits or losses in lumbering, sawmilling, etc. Price $1.00
- **Irrigation for Farm, Garden and Orchard.** Henry Stewart. Methods and management to secure water for critical periods. Price $1.00
- **Tile Drainage.** W. I. Chamberlain. Price $1.00
- **Flax Culture.** Selection of ground, seed, preparations and marketing of crop. Price $1.00
- **Manures, How to Make and How to Use Them.** F. W. Semper. Price $1.00
- **Injurious Insects and the Use of Insecticides.** Frank W. Semper. Price $1.00
- **Land Cruising and Prospecting.** A. P. Wallace. A valuable book for farmers, homesteaders, prospectors, etc. Price $1.00
- **Hunter and Trapper.** H. Thrasher. The best methods of hunting and trapping are fully explained. Price $1.00
- **Hints for Carpenters.** A hand book for every day use. Price $0.50
- **Barn Plans and Outbuildings.** A most valuable work, full of ideas, suggesting plans for construction of barns and outbuildings. 255 pages. Illustrated. Price $2.00
- **How to Paint Ponds.** C. G. Farson. Price $0.50
- **Evergreens and How to Grow Them.** V. D. Harrison. A complete guide to the selection and growth of evergreens for pleasure, and profit. How to raise them from seed, how to plant a nursery, the selection of nursery stock, etc. Price $0.50
- **Farm Wind Breaks and Shelter Belts.** Samuel B. Green. Their formation and care, location and growth, plans for placing, draining, transplanting, pruning, propagation, etc. Price $0.50
- **Feeding and Management of Live Stock.** Thomas Shaw. Important principles governing the feeding of domestic animals, and most practical book for use on the farm. Price $1.00
- **American Dairying.** H. B. Hurley. An exhaustive treatise covering this subject, and containing plans for good, healthy, well-cared for dairy cows. Price $1.00
- **A B C of Butter Making.** J. H. Monrad. Home cheese making, French cream neufchatel and skin milk cheese. Price $0.50
- **The Key to Profitable Stock Feeding.** Herbert Myrick. A colored chart of feeding, showing the best and worst practices in stock feeding, and the most practical book for use on the farm. Price $1.00
- **Farmers Veterinary.** Chas. B. Burkett. A hand book which should be in every farm house. This book abounds in helpful suggestions and practical hints for the best treatment of cattle, horses, hogs, poultry and animals, and disease troubles. Price $1.00
- **Modern Horse Doctor.** G. H. Dadd. Embraces improved and recent methods of diagnosis and treatment of all diseases, injuries and accidents. Profusely illustrated. Price $1.00
- **Winter Care of Horses and Cattle.** T. B. Terry. Price $1.00
- **Modem Sheep Breeds and Management.** W. J. Clark. The best book covering this subject. Price $1.00
- **Questions Answered About Swine.** L. H. Coon. This manual is practically a complete veterinary book for swine breeders. Price $1.00
- **Poultry Houses, Coops and Equipments.** H. A. Nourse. Price $1.00
- **Turkeys, Ducks and Geese.** H. A. Nourse and Geo. H. Pollard. This includes a valuable section on the raising and management of these birds and an appendix containing useful information. Price $1.00
- **Simple Poultry Remedies.** A book which describes the symptoms of each disease and tells how it can be cured and prevented by simple methods without expense. Price $1.00
- **Common Sense Poultry Doctor.** John Robinson. Price $1.00
- **Biggic Orchard Book.** A very practical book covering this subject. Price $1.00
- **The American Apple Orchard.** F. A. Waugh. A practical work by a practical man. Over 40 years of observation. It includes the raising and care of 1200 varieties of apples. Price $1.00
- **Small Fruit Culturist.** Andrew S. Fuller. This book covers the whole ground of propagating small fruits. All the varieties, packing for market, etc. It is finely and thoroughly illustrated. 256 pages. Price $1.00
- **Spraying, Soaping and Lathering.** C. M. Max. Embraces principles and practices in the application of liquids and powders. Price $1.00
- **Strawberry Culturist.** A. S. Fuller. Field, garden forcing and pot culture; hybridizing varieties, etc. Price $1.00
- **Grape Culture.** John A. Wildstone. From Planting to Harvesting, both in the East, West and California. All about making wine. Price $1.00
- **Gardening for Profit.** Peter Henderson. A standard work on market gardening, and gardening for profit. It contains many valuable information, and is profusely illustrated. 256 pages. Price $1.50
- **Fertilizers.** H. F. B. Price $0.50
- **Vegetable Gardening.** Samuel B. Green. A thorough and practical guide to vegetable gardening. This volume contains complete directions for the proper care and management of a farm or market garden. It is a thoroughly practical work, and is the result of the author's many years of practice. Price $1.00
- **How and What to Grow in a Kitchen Garden of One Acre.** Price $0.50
- **The Country Kitchen or Domestic Science.** Tried and tested cook book. Issued by the School and College of Agriculture of Minnesota. This is the practical book that was badly needed. It is the result of years of trying and testing and found good by farmers' wives and daughters who have contributed to it. Price $1.00
- **Asparagus.** F. M. Hexamer. A practical treatise on the best methods of raising, cultivating, harvesting, marketing, forcing and canning asparagus, price $1.00
- **Bean Culture.** Glenn C. Sevett. The only complete, comprehensive and authoritative book published on the subject. Price $1.00
- **Carrots and Mangel.** J. H. Gregory. How to raise, keep and feed them. Price $0.50
- **Celery Culture.** W. H. Fuller. A book for beginners and a standard reference to those already engaged in growing celery. Price $1.00
- **Onions for Profit.** A valuable and interesting book. Price $0.50
- **Practical Floriculture.** Peter Henderson. Suits those who grow flowers for pleasure and those who make them a practice of trade. Price $1.00
- **Window Flower Garden.** J. J. Heinrich. 232 pages. Price $0.50
- **The Beautiful Flower Garden.** F. Schuyler Mathews. Its treatment, with special regard to the picturesque. Price $0.50
- **Horticulture.** C. S. and E. H. Chamberlain. A comprehensive treatise pertaining to the growing of plants, etc., in the house. Price $1.00
- **Practical Industrial Flower Culture.** W. W. Clark. Price $1.00
- **Gold Mine in the Front Yard.** C. S. Harrison. A book explaining how to beautify the home by the use of common perennials. Price $1.00
- **Landscape Gardening.** F. A. Waugh. A treatise on the general principles of landscape gardening. 328 pages. Price $1.00
- **Practical Rose Growing.** Walter P. Wright. Price $1.00
The following list embraces the best standard varieties and such new ones, which after careful tests in our trial grounds, we can recommend to possess special merit.

We grow large quantities of Vegetable Seeds here on our farms, and are in fact the largest growers of Vegetable Seeds in Minnesota. This is one of the most fertile sections of our State, where a great variety of vegetables are grown to perfection, and the seeds produced here excel all others by their vigor and vitality, their hardiness, earliness and productiveness. We make a specialty of raising Onion Seed and our seed can be depended upon to mature good large bulbs during the shortest season. The greatest attention is paid by us to those varieties which are grown for the market in the Northwest, and our strains will be found to be of the finest quality. Our seeds have been the standard of quality for the Northwest and other sections for the past twenty-four years.

Our shipping facilities are better than ever; we can take care of your order promptly and furnish you seeds that will give the best of satisfaction in every particular. We supply best quality only and our prices are very moderate. Owing to the unfavorable growing season the past year there are decided shortages in crops, and therefore prices rule somewhat higher. We advise our customers to order early, as some items will not be procurable at any price later in the season.

MARKET GARDENER'S trade is especially invited; we can please you and all we ask is to give us a trial. Special Wholesale Price List for Market Gardeners is sent free to all who buy bulk seeds in large quantities.

**SPECIAL DISCOUNTS.**

On all orders for seeds in Packets and Ounces amounting to $1.00 we allow 25 cents worth of seeds extra, and if the order amounts to 50 cents we allow 10 cents worth of seeds extra. These Extra Seeds given as premium can be selected only in Packets and Ounces. Seeds put up in quarter pounds, half pints and larger quantities are excluded from this offer, also our Vegetable and Flower Seed Collections.

With every order of $2.00 worth of Vegetable Seeds at catalog prices we give free one year's subscription to the monthly "VEGETABLE GROWER"; the leading gardener's paper for the Northwest, of interest to all who grow vegetables. This excludes the above discount.

**ARTICHoke.**

Seeds may be sown indoors and plants potted same as the Tomato and set out in May, or can be sown in hills outside, and thinned out to one plant in a hill. The plants thrive best in deep, rich soil. Plants are set in rows 3 feet apart and 1 foot apart in the row.

**LARGE GREEN GLOBE**—The well-known French vegetable. The undeveloped flower heads when properly prepared make a most delicious dish. Pkt. 10c, oz. 15c, ¼ lb. 50c, postpaid.

**ASPARAGUS.**

In early spring sow the seed, after soaking it 24 hours in warm water, in drills 1 foot apart, and 1 inch deep. During the summer transplant them to permanent beds where they have been dug the previous fall and have been manured. 1 oz. of seed to 50 feet drill; five pounds to the acre.

**EARLY GIANT ARGENTEAU**—Earliest large green sort. Best for gardeners. Pkt. 5c, oz. 10c, ¼ lb. 60c, lb. $1.00, prepaid.

**CONOVER'S COLOSSAL**—A mammoth green sort of the best quality. Pkt. 5c, oz. 10c, ¼ lb. 75c, lb. 90c, prepaid.

**PALMIETTO**—An early green sort, prolific and very desirable. Is fast becoming the favorite everywhere. Pkt. 5c, oz. 10c, ¼ lb. 25c, ½ lb. 60c, prepaid.

**COLUMBIAN MAHOMO WHITE**—This variety is in great demand because it furnishes white shoots. Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 75c, prepaid.

**BROCCOLI.**

Sow seed in central West early in May; transplant in June. Growth and habit like Cauliflower, but far more hardy. Of special value in the North. One ounce will plant 250 plants.

**LARGE WHITE**—Produces large, white heads. Pkt. 10, oz. 30c, ¼ lb. $1.00, prepaid.

**PURPLE CAPE**—Very fine for use in the extreme North, and quite extensively grown. Pkt. 10c, oz. 30c, ¼ lb. $1.00, prepaid.

**BRUSSELS SPROUTS.**

This is one of the best vegetables for winter use, producing an abundance of sprouts, resembling small cabbages; of excellent, mild flavor. By sowing in April and planting out in July, it may be had in fine condition until December and in southern states may be had from November to March. Pkt. 5c, oz. 10c, ¼ lb. 45c, lb. $1.50, prepaid.

**NOVELTIES AND SPECIALTIES** See Pages 2 and 3.
BUSH BEANS. Wax or Yellow Potted Varieties.

Plant in drills 1½ inches deep and drop the beans 3 inches apart; the rows should be 2 to 3 feet apart. For succession plant every 3 weeks until middle of July. One quart will plant 100 feet of drill: 1½ bushels per acre.

Beans are one of our specialties, we grow a large acreage and supply only best stock while our prices are either moderate.

**FARIBAULT KIDNEY WAX**—Strong, robust plants. Immense pods. Absolutely stringless. Enormous yielder. We consider this bean of greater value to the market gardener than any other wax bean known today.

Some of the best plants are of erect bush habit, reach the height of 18 to 30 inches and are immune from bean diseases, such as blight and rust. The fleshy pods are flattened in form, from 6 to 10 inches in length, ½ inch broad and of lemon yellow color; they are remarkable for their meanness, brittleness, absolute freedom from strings or touch fiber, and fine table quality. The season of bearing is the same as of Wardwell’s Kidney Wax, but this new variety produces nearly twice the number of pods, and pods of much larger size and more handsome in appearance, while it also is greatly superior in quality, which the snapping of the pod will quickly demonstrate. The seed is kidney shaped, white in color with brownish markings around the eye. Pkt. 10c, ½ pt. 30c, pt. 75c, qt. 45c, postpaid.—Qt. 30c, ½ pk. $1.00, pk. $1.80, bu. $6.00, not prepaid.

**NEW STRINGLESS WHITE WAX, HURPEES**—A hardy white seeded wax bean of the finest quality. The bushes are of a sturdy, upright growth and are heavily laden with large hard-shelled pods, which are straight, of a bright lemon yellow color, brittle, meaty and entirely stringless at all stages of growth. The seed is large, pure white and most desirable as shell beans both for summer and winter use. The plants continue to bear for a long period and outyield most other Wax beans. For snap shorts or green shell beans and as a dry bean this new variety has no superior. Pkt. 10c, ½ pt. 20c, pt. 30c, qt. 45c, postpaid.—Qt. 30c, ½ pk. $1.00, pk. $1.80, bu. $6.00, not prepaid.

**PROLIFIC GERMAN BLACK WAX or BUTTER BEAN**—This is no doubt the earliest and one of the most productive of all beans, and is rust proof. Vines medium sized, very vigorous and sturdy. Pods of medium length, borne well up from the ground, cylindrical, fleshy; of a clear, creamy white color and remain a long time in condition for use as a snap bean. A well-known and largely planted sort. Splendid bean for late plantings. Pkt. Sc, ½ pt. 15c, qt. 35c, postpaid.—Qt. 20c, ½ pk. 25c, pt. 75c, pk. $1.35, bu. $5.00, not prepaid.

**BLACK PENCIL POD WAX**—The best quality round pod early wax bean. Of bushy growth, height 15 inches; is extremely productive. Pods are straight, round, 6 to 7 inches long: thin, absolutely stringless, of fine flavor, color medium yellow. The seed is/block. All round high quality sort for the kitchen garden or market gardener. Pkt. Sc, ½ pt. 15c, qt. 35c, postpaid.—Qt. 20c, ½ pk. 75c, pk. $1.35, bu. $5.00, not prepaid.

**IMPROVED GOLDEN WAX**—A well known standard variety and largely planted everywhere. Moderately early, of vigorous, bushy growth, rust proof. A reliable heavy cropper, whether sown in spring, summer or early fall. Pods long, thick and solid, absolutely stringless, of golden yellow color; a splendid sort for both home and market garden use. Pkt. Sc, ½ pt. 15c, qt. 35c, postpaid.—Qt. 20c, ½ pk. 70c, pk. $1.30, bu. $4.75, not prepaid.

**RUSTLESS GOLDEN WAX**—A much used variety, very early, prolific, rust proof; pods long, crisp, seed tender, very desirable. Golden yellow colored; seeds borne in the home garden. Pkt. 5c, ½ pt. 15c, qt. 45c, postpaid.—Qt. 25c, ½ pk. 75c, pk. $1.35, bu. $5.00, not prepaid.

**WARDWELL’S KIDNEY WAX**—This variety, maturing a little later than the Golden Wax, grows a crop of long, flat, nearly straight, broad, creamy white, handsome pods, which are of good quality and always command a ready sale, making this variety one of the best for market gardeners. A well known, largely planted wax bean. Pkt. 5c, ½ pt. 15c, qt. 35c, postpaid.—Qt. 20c, ½ pk. 75c, pk. $1.40, bu. $5.25, not prepaid.

**NEW ROYAL WAX**—A novelty of great merit. The plant is vigorous, large, without runners, spreading, with large leaves. The pods are about 5 inches long, round, of a waxy yellow color; very brittle, entirely stringless, without fibre and unsurpassed in quality. Very early in season, ripening with the German Black Wax Bean, as prolific and as tender as the Crystal Wax. Resists blight well. Pkt. 5c, ½ pt. 15c, qt. 40c, postpaid.—Qt. 25c, ½ pk. 80c, pk. $1.50, bu. $5.75, not prepaid.

**CRYSTAL WHITE WAX or SILVER BEAN**—A very good productive variety. Pods silver white, short, curved, round with crease in the back, very fleshy and brittle. Very desirable for pickling purposes. Pkt. 5c, ½ pt. 15c, qt. 50c, postpaid.—Qt. 35c, ½ pk. $1.25, pk. $2.25, not prepaid.

**LYCHEE BUTTER WAX**—A new variety which is grown extensively by the market gardeners around Chicago and in that market always secures top price. The vine is strong, holding the large pods well up. The pods are of rich bright yellow color, very fleshy, tender and stringless. Early and very prolific. Does well in all sections, and is drought resistant. The seed is yellow. A splendid bean for market and home garden. Pkt. 5c, ½ pt. 15c, qt. 40c, postpaid.—Qt. 25c, ½ pk. 85c, pk. $1.50, bu. $5.25, not prepaid.

Faribault Kidney Wax.

Brittle Wax.
Giant Stringless Green Pod—This early sort produces large, handsome pods, some of which measure fully six inches in length. The plants are very productive, bearing pods which are perfectly round, very large, and tender. It is one of the most desirable pods for the market gardener as well as for the kitchen garden. Pkt. 5c, ½ pt. 15c, qt. 40c, postpaid.—Qt. 25c, ½ lb. 70c, pk. $1.25, bu. $4.50, not prepaid.

Burpee’s Stringless Green Pod—This bean is unequalled for the home garden. It has a combination of features that makes it the best for this purpose being very hardy, early, prolific and absolutely stringless. The pods are of a deep green color, straight and broad, with thick, creamy flesh. For a continued succession, repeated plantings can be made at intervals of 12 to 14 days as late as August. Pkt. 5c, ½ pt. 15c, qt. 40c, postpaid.—Qt. 25c, ½ lb. 70c, pk. $1.25, bu. $4.50, not prepaid.

Harrington’s Stringless Green Pod—This bean is unequalled for the home garden. It has a combination of features that makes it the best for this purpose being very hardy, early, prolific and absolutely stringless. The pods are of a deep green color, straight and broad, with thick, creamy flesh. For a continued succession, repeated plantings can be made at intervals of 12 to 14 days as late as August. Pkt. 5c, ½ pt. 15c, qt. 40c, postpaid.—Qt. 25c, ½ lb. 70c, pk. $1.25, bu. $4.50, not prepaid.

FORDHOOK BUSH LIMA—This new dwarf form of the Potato Lima is a great improvement on the old Drier’s or Kumerle Bush Lima, as it grows stiffly erect, bearing the pods well above the ground. The Fordhook also matures earlier and is much more productive. The pods measure 4 to 5 inches and contain 4 to 5 large beans. The beans are large and well filled with large succulent beans of the same size as the well known large Pole Lima. Postpaid.—Pkt. 5c, ½ pt. 15c, qt. 40c, postpaid.—Pkt. 25c, ½ lb. 70c, pk. $1.25, bu. $4.50, not prepaid.

BUSH LIMA BEANS.

BURPEE’S DWARF LIMA—The plants grow 18 to 20 inches high, and develop into magnificent circular bush A bush is an improvement over the old English Broad or Windsor Bean. The plant is of robust and upright growth, being quite different from any other bean. Pods are large, and filled with 3 to 9 beans of extra large size and of most delicate flavor. The beans are used shellled and are superior in quality to Lima Beans. Can be planted early as the 20c, ¾ lb. 60c, postpaid.—Pkt. 45c, ½ lb. $1.25, pk. $2.25, not prepaid.

LARGE WHITE MARROW—Excellent as a shelled bean for home use and market, the best cooking bean on the market, varying in color from ivory white and twice as large as the Navy. The Large White Marrow Bean is the leading field or market sort in many sections. Pkt. 8c, ½ lb. 10c, qt. 35c, postpaid.—Qt. 25c, ½ lb. 70c, pk. $1.25, bu. $4.25, not prepaid.

Giant Stringless

Green Pod

BUSH BEANS. Green Poded Sorts.

HARRINGTON’S BUSH LIMA—A perfect bush, about 18 inches high, maturing its first beans earlier than the Pole Lima. The beans are of the size of the Sioux or small Pole Lima, and are of delicious flavor. Postpaid.—Pkt. 5c, ½ pt. 15c, qt. 40c, postpaid.—Qt. 25c, ½ lb. 70c, pk. $1.25, bu. $4.25, not prepaid.

FORDHOOK BUSH LIMA—This new dwarf form of the Potato Lima is a great improvement on the old Drier’s or Kumerle Bush Lima, as it grows stiffly erect, bearing the pods well above the ground. The Fordhook also matures earlier and is much more productive. The pods measure 4 to 5 inches and contain 4 to 5 large beans. The beans are large and well filled with large succulent beans of the same size as the well known large Pole Lima. Postpaid.—Pkt. 5c, ½ pt. 15c, qt. 40c, postpaid.—Pkt. 25c, ½ lb. 70c, pk. $1.25, bu. $4.50, not prepaid.

Burpee’s Dwarf Lima—The plants grow 18 to 20 inches high, and develop into magnificent circular bush A bush is an improvement over the old English Broad or Windsor Bean. The plant is of robust and upright growth, being quite different from any other bean. Pods are large, and filled with 3 to 9 beans of extra large size and of most delicate flavor. The beans are used shellled and are superior in quality to Lima Beans. Can be planted early as the 20c, ¾ lb. 60c, postpaid.—Pkt. 45c, ½ lb. $1.25, pk. $2.25, not prepaid.

Large White Marrow—Excellent as a shelled bean for home use and market, the best cooking bean on the market, varying in color from ivory white and twice as large as the Navy. The Large White Marrow Bean is the leading field or market sort in many sections. Pkt. 8c, ½ lb. 10c, qt. 35c, postpaid.—Qt. 25c, ½ lb. 70c, pk. $1.25, bu. $4.25, not prepaid.

Harrington’s Bush Lima—A perfect bush, about 18 inches high, maturing its first beans earlier than the Pole Lima. The beans are of the size of the Sioux or small Pole Lima, and are of delicious flavor. Postpaid.—Pkt. 5c, ½ pt. 15c, qt. 40c, postpaid.—Qt. 25c, ½ lb. 70c, pk. $1.25, bu. $4.25, not prepaid.
These Bush Lima Beans cannot be recommended too highly; no home garden should be without them.

**IMPROVED LARGE WHITE OR GIANT BUSH LIMA**—The best Bush Lima in existence. It is fully 30 to 35 days earlier than any other large Lima, either bush or pole, and is the most prolific variety. The plants are of vigorous growth, 30 inches in height, and the bearing pods will grow above the ground. The seeds which are produced in large clusters of from 5 to 8, measure from 5 to 6 inches in length by 1 to 1 1/8 inches in width, and contain 3 to 5 greenish-white beans of immense size, and of the most luscious flavor. Pkt. 10c, 1/2 lb. 25c, prepaid—Qt. 35c, 1/2 pt. $1.00, pt. $2.25, not prepaid.

**NEW WONDER OR QUARTER CENTURY BUSH LIMA**—This new variety is one of the best of all the large seeded Bush Lemas for general purposes. The plants are bushy, compact, large bearing, and with less tendency to make runners. The pods are large, smooth, and contain 3 to 4 large beans of most excellent flavor. Pkt. 10c, 1/2 pt. 25c; qt. 50c, postpaid—Qt. 35c, 1/2 pt. $1.30, pk. $2.25, not prepaid.

**POLE OR RUNNER BEANS.**

The Beams should be planted the middle of May if the season is suitable. Set poles 4 feet apart each way, and plant 4 to 6 beans, about 1 inch deep around each pole. Thin out to 3 plants to a pole, if the soil is rich, or to 2 plants if the soil is sandy and less fertile. The pods should be picked off the top of the poles, to effect more perfect growth below. One quart will plant about 100 hills.

**BURGER'S STRINGLESS GREEN POD (White Seeded Kentucky Wonder)**—The best of the stringless kind. The pods are produced on large vines that are borne earlier than any of the other varieties. The vines are very productive, and an absolute favorite with market gardeners, a later variety, bearing a long time. Pkt. 5c, 1/2 pt. 15c, qt. 35c, postpaid—Qt. 35c, 1/2 pt. $1.15, pk. $2.00, not prepaid.

**IMPROVED LIME BEANS.**

**EARLY LEVIATHAN LIMA**—Leviathan is about 10 days earlier than any other Pole Lima, making it possible to grow this delicious vegetable in many localities, where on account of the short season the older varieties would not mature. This new variety is an immense cropper. The pods are borne in large clusters and contain 6 to 8 large beans of excellent quality. Especially recommended for the Northwest. Pkt. 5c, 1/2 pt. 15c, qt. 50c, prepaid—Qt. 35c, 1/2 pt. $1.15, pk. $2.00, not prepaid.

**EXTRA EARLY JERSEY LIMA**—A well known variety. Early, very productive, and of finest quality. Pkt. 5c, 1/2 pt. 15c, qt. 45c, postpaid—Qt. 50c, 1/2 pt. $1.00, pt. $2.00, pk. $4.00, bu. $6.00, not prepaid.

**KING OF THE GARDEN LIMA**—Vines very vigorous and productive. Pods very large, filled with large, white beans of the finest quality. Of enormous size, producing its larger pods it is a favorite with market gardeners. A later variety, bearing a long time. Pkt. 5c, 1/2 pt. 15c, qt. 40c, postpaid—Qt. 35c, 1/2 pt. 90c, pk. $1.65, bu. $6.25, not prepaid.

I wish to thank you for the good seeds sent me. Your vegetable seeds are always the best. In spite of the dry season we raised some very fine Red Wethersfield and Frisotaker onions. All other Vegetables were excellent size. JACOB FALL Sr., WEST BEND, Ia.
The soil for Beets should be rather light and well enriched. Sow in drills one foot apart and one inch deep, as early as the ground can be worked, continue for a succession as late as mid-September. They answer well for early spring making when the plants are large enough thin out to stand six inches apart in rows. One ounce to 50 feet of drills; five to six pounds to the acre in drills.

DETOUR DARK RED—Long experience has shown this variety to be one of the best deep red turnip beets, not only for market gardeners, but also for home use. It is also by far the best for canning, making a strikingly handsome product, much superior to that obtained from most other varieties. Its early maturity, and the splendid shape and color of the root make it popular everywhere. On account of its tall upright growing tops the rows may be close together. Leaf stems and veins dark red; blade green; root globular or ovoid and very smooth; color of skin, dark blood red; flesh deep vermilion red, zoned with a darker shade, very crisp, tender and sweet, and remaining so for a long time. The stock which we offer of this variety will produce a crop uniform in shape, color and quality. Pkt. 5c, oz. 15c, lb. $1.00, prepaid.

CROSBY'S IMPROVED EGYPTIAN—This variety is so much more than any other where an extra early beet is wanted for forcing in cold frames, as well as for eating outside. It becomes fit for use sooner than any other kind. The shape is very desirable, not as flat as the Egyptian, nor as round as the Eclipse. The flesh is a bright red with zones of a darker shade, fine quality, sweet and tender. Pkt. 5c, oz. 15c, lb. 25c, lb. 75c, prepaid.

FIREBALL—A splendid new variety of great merit, being suited for forcing under glass and for open-ground culture. It is perfectly globe-shaped and very early. The leaf stalks and single, tight-rooted beets are very desirable. It becomes fit for market and eating outside, becoming very soft in the middle 30c, 1lb. 25c, Prepaid.

EARLY ECLIPSE—Perfectly smooth and round; skin and flesh intense red. This variety is extremely early, in fact, one of the first to be ready for the table. It does not grow to large size, but is desirable for its cutness and sweetness; tender quality. Pkt. 5c, oz. 15c, lb. 25c, lb. 75c, prepaid.

CRIMSON GLOBE—The roots are of medium size, of very handsome globe-shape, and has a remarkably smooth surface, and a very small tap root. Flesh is fine grained, sweet and tender in all stages of growth; both skin and flesh are crisp, rich red. The leaves are small, very dark green, and borne on longer than usual stout growing stems. The fine shape and color of the roots, their tenderness, fine flavor and early maturity render them popular with all who plant them. Pkt. 5c, oz. 15c, lb. 25c, lb. 75c, $1.00, prepaid.

BASTIAN'S EXTRA EARLY BLOOD TURNIP—Roots are of medium size, bright red with lighter zones, good quality, small top. A good beet for market and home garden. Pkt. 5c, oz. 15c, lb. 25c, lb. 75c, prepaid.

CRIMSON GLOBE—The roots are of medium size, of very handsome globe-shape, and has a remarkably smooth surface, and a very small tap root. Flesh is fine grained, sweet and tender in all stages of growth; both skin and flesh are crisp, rich red. The leaves are small, very dark green, and borne on longer than usual stout growing stems. The fine shape and color of the roots, their tenderness, fine flavor and early maturity render them popular with all who plant them. Pkt. 5c, oz. 15c, lb. 25c, lb. 75c, $1.00, prepaid.

OUR SEEDS ARE UNEXCELEEd.

HARVEY, N. D. May 10th, 1913.

The Garden Seed bought of you last year gave the utmost satisfaction in productivity and quality.

CAR L. LOE.

BRIDGERTON, S. D. March 27th, 1913.

The Flowers raised from your Seed are the finest I ever saw for size and brilliancy of color they cannot be surpassed.

MRS. F. SCHWANS.

DETOUR, MICH. Jan. 25th, 1914.

I am sending you another order for Beets which I have no doubt will grow as well as your Lettuce and Radishes and Tomatoes grew last season. I paid only 10 cents for the three packets and before the summer was over I found they were worth $5.00 to me. Assuring you that you will get all orders in full. Thank you.

JOHN D. WELLMAN.
MANGEL-WURZEL.

For Stock Feeding.

The value of Mangel-Wurzels for feeding stock cannot be overestimated. No one who keeps horses, sheep or cattle should be without these roots for fall and winter feeding, as the results from their use are wonderful, being clearly shown in the improved health and condition of the animals, the increase of milk from the cows and the great saving in hay.

Mangels are a superior crop than any other root; they can be raised at a very trifling cost, and yield immense crops per acre. Our trade on Mangels and Sugar-Beets for feeding is one of the largest in the country and is increasing enormously every year, owing to the fact that our stocks are of the highest quality obtainable and our prices always very reasonable. 5 to 6 pounds of seed are required per acre.

Prices for all Mangels and Sugar-Beets except where noted: Os. 5c, ¼ lb. 15c, lb. 40c, postpaid—Lb. 30c, 10 lbs. $2.75, not prepaid.

**IMPROVED MAMMOTH LONG RED**—This is the best Long Red Mangel. It is enormously productive, yielding from 50 to 60 tons per acre and a single root often weighing from 25 to 35 pounds and more. They are of good and massive shape, of very fine texture and good quality, and the growing to immense size, are not coarse. They are easily harvested, as they grow well above the ground. Our strain is the best in the market.

**GIANT RED ECKENDORF**—This is the most popular variety of Mangels in Germany, being planted there more than any other kind, but it has also given the best results in this country wherever planted. The roots are smooth, of cylindrical shape, and weigh from 15 to 35 pounds a piece. The flesh is firm, solid, of white color and highly nutritious value. The Eckendorf Mangels are phenomenal yielders and are easily harvested, the root growing to the largest part above the ground.

**GIANT SLUDSTRUP**—Sludstrup is considered the best and heaviest yielding of all mangels, and holds the world's record for dry matter content. This mangel has been awarded a first-class certificate several times by the Danish Government, the highest honor in Denmark, where mangels are as important as corn is here. Sludstrup is a long reddish-yellow, white flesh root, growing more than half above the ground. Easily harvested, and by actual test far excels any other variety, in both the weight and feeding value of yield. Our seed is from the best Danish growers. Oz. 10c, ¼ lb. 20c, lb. 60c, postpaid.—Not prepaid, 1 lb. 50c, 5 lbs. $2.00.

**MINNESOTA GOLDEN TANKARD**—The Golden Tankard is considered one of the best mangels grown, and our selected strain is unsurpassed in yielding and feeding qualities. The flesh is firm, solid, and of a rich golden yellow color. The roots have small necks, of cylindrical form and grow nice and even in shape, they are easily lifted and are excellent keepers. With no specially selected ground and good average cultivation the yield will be from 40-45 tons per acre, while with extra cultivation it will yield 60-70 tons per acre.

Mammoth
Long Red.

**SUGAR BEETS—For Sugar Making.**

**KLEIN WANZLEBEN**—Probably more widely grown than any other, and undoubtedly the best sort for general cultivation. It is produced from 15 to 18 tons per acre, and contains from 15 to 18% of sugar. The root grows below the surface. Easier grown than any other variety.

**VILMORIN'S IMPROVED**—Almost not quite as large as the Klein Wanzleben, it contains fully as large a percentage of sugar. The root grows below the surface.

**SUGAR BEETS—For Stock Feeding.**

**SUPERIOR TO MANGEL.**

**GIANT HALF SUGAR MANGEL**—A strain of beets, which, while giving as large a yield and being as easily grown and harvested as a crop of mangels, supplies a food which is much sweeter and consequently of very much higher nutritive value. The roots grow partly on the ground and are therefore easily harvested; they are very large, firm, smooth, clean and of oval shape. The color of the skin is light brownish green above and white below the ground; the flesh is white, crisp, sweet and unexcelled in feeding quality; is more succulent than sugar beets and is highly esteemed by all stock. Oz. 5c, ¼ lb. 15c, lb. 35c, postpaid.—Not prepaid, lb. 25c, 10 lbs. $2.25, 100 lbs. $20.00.

**ROYAL GIANT OR HALF SUGAR ROSE**—A beet of highest nutritive value for feeding. Somewhat egg shaped, and an account of growing half out of the ground, it is very easily harvested. Quite similar to Giant Half Sugar except in color of skin, which is bright red above ground, white below. Oz. 5c, ¼ lb. 15c, lb. 40c, postpaid.—Not prepaid, lb. 30c, 10 lbs. $2.75, 100 lbs. $25.00.

**RED SKINNED GIANT HALF SUGAR MANGEL**—A new variety of large size, similar to the above, except that the skin is of bright red color. Oz. 10c, ¼ lb. 20c, lb. 60c, postpaid.—Not prepaid, lb. 50c, 10 lbs. $4.75.

Am well pleased with shipment of Seed Potatoes and the nice Vegetable and Flower Seeds. Many thanks.

S. F. BURNETT, COURTLAND, ARIZ.

I have been buying your Seeds for the last ten years and cannot make a garden without them, they are the best always.

MRS. M. MADISON, EVERLY, IOWA.

The Farmer Seed & Nursery Co., secures patronage, they are a safe and honest place to trade, and they sell direct to the planter at low prices. Their northern grown seeds are sure to be lovely and best in every way.

HAROLD FOSTER, LACEY, IOWA.
CABBAGE. Early Varieties.

**CULTURE.** Seed of the early varieties should be sown ½ or 1 inch deep in a greenhouse, hot-bed, or in boxes in the house, about six weeks before the plants are needed for planting out. As soon as the soil can be worked in the spring the plants should be removed to the open field and set in rows two feet apart each way. Late Cabbage: May be sown in rows one foot apart or broadcast in the garden about the middle of May, and the plants set in the field the last part of June, or it may be planted in hills 10 inches apart in the field where the cabbages are to grow thinning to 1 plant in a hill when the plants are 4 inches high.

**MINNESOTA’S EARLIEST**—The earliest heading Cabbage in cultivation, producing pointed, hard heads of good size fully a week ahead of the Jersey Wakefield. The ideal short-season cabbage of greatest value in northern localities and exposed situations. Pkt. 5c, oz. 20c, ½ lb. 60c, lb. $2.00, prepaid.

**EARLY SPRING or CHARLESTON WAKEFIELD**—A strain of which the plant is larger and a little later than Early Jersey Wakefield, the head being fully as solid, but less pointed, and half again as large. Exceedingly hardy, and on account of its earliness and size of head it is deservedly a very popular sort with market gardeners and shippers to follow Jersey Wakefield. Pkt. 5c, oz. 20c, ½ lb. 65c, lb. $2.25, prepaid.

**EARLY WINNINGSTADT**—The heads are of the same size as the Jersey Wakefield, but move sharply pointed in form and not so early. The leaves are rich dark green, slightly glossy, most tightly folded, the heads the hardest of any early cabbage. By reason of its great solidly it is also a popular variety to plant in the summer for winter use or cutting for kraut. Pkt. 5c, oz. 15c, ½ lb. 45c, lb. $1.50, prepaid.

**EARLY PILFREDRAUT**—A great favorite with the Germans. Forms large conical heads which are very hard and solid, and keep well. Black used for bolts. A well known and excellent variety. Pkt. 5c, oz. 20c, ½ lb. 65c, lb. $2.50, prepaid.

**LARGE WASHINGTON or CHARLESTON WAKEFIELD**—The earliest flat head cabbage. As early as the Jersey Wakefield, stem short, heart very small, making almost entire head fit for use. Quality extremely fine, small veins, no sign of coarseness. It has very few outer leaves, thus allowing close planting, yielding more heads on the same space than any other variety. Plant about 21 inches apart, this will allow about 30 plants per acre. A very valuable variety for extra early market and for home use. Pkt. 5c, oz. 20c, ½ lb. 70c, lb. $2.50, prepaid.

**GLORY of ENKHUSEN**—A very early cabbage, only a little later than Jersey Wakefield, but produces quite large head-shaped heads, double the size of the Jersey Wakefield, which are extremely solid, fine ribbed, exceedingly tender and of the finest flavor; it keeps in fine condition for a long time. The plants are very dwarf and compact, allowing close planting and very well adapted for the home garden. Pkt. 5c, oz. 20c, ½ lb. 60c, lb. $2.00, prepaid.

All Seasons.

*Your seeds are the best. Raised heads of All-Head Cabbage weighing 10 lbs. Flat Dutch 20 lbs. Snowball Cabbageover 15 lbs.*

G. H. BUSHMAN, Skagitford, Wis.

**SECOND EARLY or SUMMER SORTS.**

**THE VOLGA CABBAGE**—One of the very earliest, large flat head varieties, maturing about 10 days later than the Jersey Wakefield, and is especially recommended for Fall, Winter and Spring market, but is not so good for Spring planting. Planted as late as July, it will mature a grand crop of cabbage, with large heads, often measuring a foot in diameter and weighing from 10 to 20 lbs. They are as round as a cannon ball and extremely hard, uniform in size, with very few outer leaves. The quality is very fine, both for cooking and kraut. On account of its compact growth plants can be set together very close. Heads do not crack as much as other sorts, and keep first class till late in Spring. Pkt. 5c, oz. 20c, ½ lb. 65c, lb. $2.25, prepaid.

**ALL-HEAD or SURPRISE**—If a gardener were to plant but one kind of cabbage, he could get none that would answer all purposes as well as the All-Head Early. It is the earliest of the large flat-headed cabbages, at least a week in advance and one-third larger than Henderson’s Early Summer. The deep, flat heads are remarkably uniform in shape, size and color, with finer ribs than other flat kinds; they are very tender and the quality is excellent. It is suitible for growing in any season and early summer, and is also very fine for winter use. The All-Head Early is the only one of all the heads most profitable cabbages to grow, as an account of its compact habit of growth, a close planting can be made. Should be planted 3 by 1½ feet apart, which allows about 500 plants per acre, and is about 1000 heads more than can be grown of any other large cabbage per acre. It is a grand variety for the home garden and is highly recommended for the market. Pkt. 5c, oz. 20c, ½ lb. 75c, lb. $2.50, prepaid.

**HENDERSON’S SUCCESSION**—It is about a week later than Early Summer, but double its size, and remarkably uniform in size and shape. It is certainly a good cabbage, and should be included in every order. Pkt. 5c, oz. 15c, ½ lb. 50c, lb. $1.75, prepaid.

**EARLY DWARF FLAT DUTCH**—An excellent second early variety, producing fine, large heads. Highly valued both for its fine quality and ability to resist heat. Head very solid, broad, round, flattened on top, tender and fine creamed. Pkt. 5c, oz. 15c, ½ lb. 45c, lb. $1.50, prepaid.

**ALL SEASONS**—Heads are very large, round, ovoid, nearly spherical, but usually somewhat flattened; they are very solid and of the best quality, keeping as well as the winter sorts. The plants are very vigorous and are sure to head. Remarkable for its ability to stand the hot sun and dry weather. Our trials have shown that for its heads they were fit for market by July 10th when still saleable September 10th, the only change being increased size and density. One of the very best sorts for general cultivation. Pkt. 5c, oz. 15c, ½ lb. 60c, lb. $2.00, prepaid.

**EARLY SUMMER**—The popular flat-head variety for early market. Heads are of good size, very solid, compact, of excellent quality, sweet and tender, and of very fine appearance. Pkt. 5c, oz. 15c, ½ lb. 80c, lb. $1.75, prepaid.
CABBAGE. LATE or AUTUMN and WINTER SORTS.

HOLLANDER, DANISH BALLHEAD or AMAGER—Select Stock. The most remarkable cabbage yet produced & a great favorite with all who have grown it. The heads, which are round, very solid and compact, are of medium size, averaging about eight pounds in weight; in color they are entirely distinct, being a fine white; they never burst, and keep better than any other sort, being as solid and perfect when taken up in the spring as when put away in the fall. This cabbage is of the finest quality, crisp, tender and sweet in flavor. It grows excellently on almost all soils and under most conditions, standing cold and dry, hot weather and never suffering from the effects of wet seasons. We handle only the tail-stem strain of the Danish Ballhead which keeps better than the more dwarf sorts. Our seed is grown in Denmark by the best growers there and is unsurpassed. Pkt. 10c, oz. 25c, ½ lb. 75c, lb. $2.75, prepaid.

BLACK DIAMOND or NIGGERHEAD—A grand second early variety, with medium large, firm heads, having thin and small leaf-ribs and a black-red color. There are but few outer leaves, permitting close planting. Pkt. 10c, oz. 25c, ½ lb. 75c, lb. $2.50, prepaid.

DIAMOOTH RED ROCK—The largest of the red cabbages and a sure header; the heads are round, very solid, weighing 10 to 12 pounds, and are of an attractive dark red color. Pkt. 5c, oz. 15c, ½ lb. 50c, lb. $1.75, prepaid.

ERFURT EXTRA EARLY—This is the earliest of the red cabbages. The heads are not very large but of excellent quality, very hard and keep well; the color is blood red. The best variety for pickling. Pkt. 5c, oz. 20c, ½ lb. 60c, lb. $2.00, prepaid.

F. S. & N. CO.'S SELECTED PREMIUM LATE FLAT DUTCH—A very fine strain of Late Flat Dutch which we can recommend as a sure heading variety, producing very large, solid heads, weighing 20 to 30 pounds each, of dark green color and excellent flavor; it is a good keeper. We have taken great care in the selecting of heads for our seed and our strain is very pure. Our Selected Premium Flat Dutch is one of the best fall shipping cabbages, and unsurpassed for general table use. Pkt. 5c, oz. 15c, ½ lb. 50c, lb. $1.75, prepaid.

MARBLEHEAD MAHOMOTH—This is the largest kind of the cabbage family in the world; heads have been grown so large that they could not be put into a two bushel basket, having a diameter two inches greater; 30 to 40 pounds is no uncommon weight for the Mahomoth, and in some instances heads have weighed over 50 pounds. Pkt. 5c, oz. 20c, ½ lb. 60c, lb. $2.00, prepaid.

RED CABBAGE.

SAVOY CABBAGE.

The Savoy Cabbages are superior in flavor to the smooth-leaved sorts.

EXTRA EARLY DURUM SAVOY—The earliest and sweetest of the Savoys. The heads are round and solid, with small, thick, fleshy leaves of fine, deep green color and excellent quality. Pkt. 5c, oz. 15c, ½ lb. 50c, lb. $1.75, prepaid.

IMPROVED AMERICAN SAVOY—The best of the large, late Savoy sorts, either for home use or for the market. The plants are very vigorous growers and sure headers; the heads are compact, large and showy, with fine, densely savoyed or crumpled leaves of the finest flavor. Pkt. 5c, oz. 15c, ½ lb. 50c, lb. $1.75, prepaid.

EARLIEST of ALL SAVOY—See Novelities.
FARMER & NURSERY CO., FARIBAULT, MINNESOTA.

CAULIFLOWER.

Sow the seed in a hot-bed in January or February, and when the plants are large enough transplant three inches apart in boxes until time to plant out. If hardened off they are seldom injured by planting out as early as the ground can be properly prepared, 3/4 feet apart each way. Keep well hoed, watering freely in dry weather, and especially when they begin to head. The late varieties mature in the autumn, and are sown and managed similar to winter cabbage. Any soil that will grow cabbage will grow cauliflower, but rich, moist soil is preferred. Cauliflower is one of the most delicious vegetables.

P. S. & N. Co's Selected Extra Early Snowball Cauliflower.

EXTRA EARLY DWARF ERFURT—One of the best varieties of Cauliflower that can be had at any price, and growers will find this a very superior strain. It is of dwarf compact growth, with short stalk. The heads form quickly; measure from eight to ten inches across, are beautiful, white, firm and of fine grain. It gives excellent results both for the home garden and for market use and is similar in all respects to the Snowball except in earliness, being a few days later than that variety. Our strain of Erfurt Cauliflower has given the best satisfaction and can be relied upon to produce true to name, and will be found unsurpassed in earliness, purity of color, dwarf habit, fine grain and solid heads. Pkt. 15c, 1/4 oz., 5c, 1/2 oz., $1.00, oz., $1.75, 1/4 lb., $6.50.

DRY WEATHER OR DANISH GIANT—This valuable cauliflower, introduced a few years ago from Denmark, has been grown with excellent results in this country. The plants have large foliage and form firm and snow-white heads, which are much larger and heavier than those of the Snowball and of equally fine quality, but about a week later. The Dry-Water Cauliflower requires less moisture than the other varieties and is therefore especially adapted for growing in dry localities, where it will produce good sized heads under unfavorable conditions, when other kinds fail entirely. We recommend this variety for the home garden, as well as for the market gardener for forcing and also for growing in the open ground. Pkt. 15c, 1/4 oz., 75c, 1/2 oz., $1.25, oz., $2.00, 1/4 lb., $7.50, prepaid.

AUTUMN GIANT—A distinct and valuable late variety with long stems and widely separable large green leaves. The heads are very large, extremely white, firm and compact and being well protected by foliage, remain a long time fit for use. Plants should be started and transplanted early in the season to insure their full development. Pkt. 5c, 1/2 oz., 25c, oz., 1/4 lb., $1.00, prepaid.

BORECOLE or KALE.

Borecole, Kale and German Greens are the general terms applied to certain cabbage-like plants which do not form heads, but are used in their open growth. The greens are for early Fall, Winter and Spring use. Sow seed about the middle of June, and later transplant to rows from 2 to 3/4 feet apart. The Dwarf can be sown later, and need not be transferred to furnish nice heads. A good frost improves the quality.

DWARF GERMAN GREEN CURLED—The plant is low and compact with large, bright green leaves, curled, cut and crimped so that the whole plant resembles a bunch of moss. It would be well worthy of cultivation simply for its beauty. One of the best sorts and when well grown and cooked is one of the most palatable of vegetables. Immense quantities of this Kale are grown in the South and shipped to the Northern markets for 10c, 1/4 oz., and upwards. Pkt. 5c, 1/2 oz., 25c, oz., 1/4 lb., $1.00, prepaid.

TALL GREEN CURLED SCOTCH—Very hardy plants which are not injured by a moderate frost, and are about 30 inches tall. They are dark green leaves, densely curled, and cut. They stand the winter in the middle states without any protection. Pkt. 5c, 1/2 oz., 25c, oz., 1/4 lb., 70c prepaid.

GERMAN DWARF PURPLE—Like Dwarf German Green Curled, but of rich purple color. This variety is of very fine quality. Pkt. 5c, 1/2 oz., 25c, oz., 1/4 lb., 75c, prepaid.

I bought my seeds from you last year and was well satisfied with them. My Snowball Cauliflower was the finest raised in this neighborhood and sold it for 5c a head.

—Mrs. Peter Christofo, Lawrence Co., Pa.
CARROTS, TABLE VARIETIES.

The Carrot is one of the most nutritious and healthful of roots, and should be more generally used for the table as well as for stock feeding purposes. Will grow in any soil; sandy, deep-loin is best. Sow as early as the ground can be worked, in rows 10 to 12 inches apart, thinning to 3 inches apart, leaving about ½ inch, and the plants should be thinned to 2, 3 or 4 inches per foot. For field culture sow in drills 18 to 21 inches apart, or the rows may be made wide enough apart, say 2 to 2½ feet, to allow cultivation by horse power. One ounce of seed will sow 100 feet of drill, 3 to 4 pounds required per acre.

F. S. & N. CO.'S SUPERIOR MARKET—Reminisces Danvers Half Long, but is of much finer texture; flesh deep orange nearly to the center, leaving hardly any core; very sweet and tender, never becomes stringy or woody. The finest carrot for the market or table use. It is very uniform in size and always yields well. Packet 10c, oz. 20c, ½ lb. 50c, lb. $1.50, prepaid.

DANVERS HALF LONG—This is considered the best variety for general crop, and is a first-class carrot for all kinds of soil. Roots are of a rich, dark orange color, grow to a good large size, tapering uniformly to a blunt point, and are smooth and handsome. They are easily harvested and a good keeper. This carrot is excellent for table use, and owing to its productiveness, is largely grown for feeding purposes. Packet 5c, oz. 10c, ½ lb. 25c, lb. 85c, prepaid.

EARLIEST FRENCH FORCING—The earliest small round variety, very much used for first early forcing. Color reddish orange; it bunches very nicely; used largely for market as well as for the kitchen garden. Quality the best. Packet 5c, oz. 15c, ¼ lb. 40c, lb. $1.25, prepaid.

IMPROVED LONG ORANGE (Pointed-Rooted)—The standard late variety; very handsome and uniform in shape; deep orange color; good flavor; yields very heavy. Requires a deep soil; plants will stand 8 inches apart in 12 inch drills for roots to attain their full size. Packet 5c, oz. 10c, ½ lb. 25c, lb. 75c, prepaid.

GUERRANDE or OXHEART—Top small for the size of the roots, which are constantly shrinking; roots will reach a diameter of five inches, terminating abruptly in a small tap root. Flesh bright orange, fine grained and sweet. This variety is especially

BEST CARROTS FOR STOCK USE.

The value of the Carrot as a food for stock is not appreciated in this country as it should be. They make a wholesome addition to the winter feed for stock and are very valuable when fed to dairy cows, producing a

CHANTEY—A first-class table variety; stump rooted, and a boot 5 to 6 inches long and broad-shouldered. The flesh is of a beautiful, rich orange color and of the finest quality; is medium early with small tops. Unfortunately is one of the best in quality for the market and private garden, while its great productiveness makes it very desirable as a field sort. Packet 5c, oz. 10c, ½ lb. 25c, lb. 85c, prepaid.

LONG RED ALTRINGHAM—A well known standard sort. Roots are smooth, fine grained, of large size, beautiful dark red color and of superior quality. The yield is very large, especially on light deep soil.

Excellent carrot for table use as well as for stock feed and should be grown more extensively. Packet 5c, oz. 10c, ½ lb. 25c, lb. 75c, prepaid.

EARLY ROSE HORN. (Stump Rooted)—Popular for forcing and early garden use. Roots are of medium size; flesh deep orange, fine grained; agreeable flavor; small top. Packet 5c, oz. 10c, ½ lb. 30c, lb. 85c, prepaid.

MADISON—This will give the greatest yield per acre of any carrot grown. The roots are short, and very heavy as the shoulder, consequently they are very easily harvested. The flesh is white, crisp, solid and very sweet in flavor. A yield of 15—20 tons and more per acre is very frequently obtained. They do not stand to break in pullig for storing. Pkt. 5c, oz. 10c, ½ lb. 25c, lb. 75c, prepaid.—Lb. 65c, $1.00, prepaid.

LONG WHITE BELGIAN—A variety with long, slender roots, about one-third of which grows above the surface of the ground, thus making it easy to pull. It is very productive, highly nutritious and a good keeper. Packet 5c, oz. 8c, ¼ lb. 20c, lb. 60c, prepaid.—Lb. 50c, $2.25, not prepaid.

LARGE YELLOW BELGIAN—This sort is very similar to the White Belgian, except in color. Its strong point is its keeping quality, making it of special value for late feeding. Pkt. 5c, oz. 8c, ¼ lb. 20c, lb. 65c, prepaid.—Lb. 55c, $2.25, not prepaid.

RED ST. VALERY or INTERMEDIATE—A large and handsome carrot with very straight roots, broad at the top and 10 to 12 inches long. Yields very heavy crops in rich, light soil. Splendid for stock and good for table use. Pkt. 5c, oz. 10c, ¼ lb. 20c, lb. 65c, prepaid.—Lb. 55c, $2.25, not prepaid.

YOUR SEEDS ARE UNEXCELSSED

Our seeds are guaranteed 100% pure and true to name. We stand behind our guarantee and will replace any mixeed seed at once upon receipt of a return label. Return postage will be paid. If you are not satisfied, return the seed and we will refund your money. If you receive damaged or broken packets, let us know and we will replace them.

FARMER SEED & NURSERY CO., FARIBAULT MINNESOTA.

G. SCHMIDT, FOREST LAKE, MINN.

Superior Market.
CELEBRITY.

One ounce of seed will make about 500 plants. The seed should be started in shallow boxes or hot-bed. Sow thickly and cover lightly, keep well watered and transplant when two inches high, in rows three feet apart and six inches in the row. For home use celery is often grown in double rows, 10 inches apart, without trenching, and harvested for winter storage just where it grows, without lifting.

WHITE PLUME—This is the earliest and most easily blanched celery and very attractive when fit for use; there is quite a demand for it, although it does not compare with the Golden Self-Blanching, neither in flavor and solidity nor does it keep as well when taken from the trenches. The plants grow rapidly and when maturing the inner stems and leaves turn white; they Blanch naturally, but in order to produce close, attractive bunches, the stalks should, when three quarters grown, be drawn together and the soil pressed around the plants, which will then in a short time be fit for use. Our seed is grown in Northern France, where the climate and soil are especially adapted for growing celery, the finest seed being produced there. We purchase stock from the same grower who furnishes our Golden Self-Blanching and who has a world-wide reputation for growing the best celery seed. Our seed will therefore be found to be first-class in every respect and free from green and hollow stalks.

F. S. N. Co.'s GOLDEN SELF-BLANCHING—This is the best celery for early use, in fact the only variety now grown extensively for all markets as an early celery. The plants are of a yellowish green color, but when matured, the outer stems and leaves turn a beautiful golden yellow, which adds much to their attractiveness. It is self-blanching to a remarkable degree, although boards are generally used to hasten the blanching. The handsomely colored, crispness, tenderness, freedom from stringiness and the fine nutty flavor of this variety make it only necessary to be tried in order to establish it as the standard of excellence as an early sort. We handle of this variety only the originator's seed, grown in France, which is the most expensive, yet by far the best in the market. Having a larger trade on this celery, we are able to buy at the lowest figure and can therefore sell at reasonable prices. We guarantee, however, our stock to be fully equal to the best high-priced seed of other seedsmen and to give good results. Price: Pkt. 15c, oz. $1.00, 1/4 lb. $3.50, lb. $13.00, prepaid.

AMERICAN GOLDEN SELF-BLANCHING—Owing to the very short crop season in French grown seed we offer American grown seed of this leading variety. This seed was grown from best selected French stock seed. Pkt. 10c, oz. 30c, 1/4 lb. $1.00, lb. $3.50, prepaid.

GIANT PASCAL—We recommend it as being of the very best quality for fall and early winter use. It blanches to a beautiful yellowish white color, is very solid and crisp, and of a fine nutty flavor. The stalk is very thick, the upper portion nearly round, but broadening and flattening toward the base, blanching very quickly with little bunching up. An admirable keeper. One of the best for the market gardener. Pkt. 5c, oz. 15c, 1/4 lb. 45c, lb. $1.50, prepaid.

White Plume Celery.
FARMER SEED & NURSERY CO., FARIBAULT, MINNESOTA.

SWEET CORN.

A rich warm soil is the best, but excellent sweet corn can be raised on any good, ordinary soil if it is deeply and thoroly worked before planting. Plant in hills, or in rows 4 feet apart, or sow in rows 4 feet apart, placing seeds 2 or 3 inches apart in the rows. First planting may be done as soon as danger from frost is past, for succession planting every 2 weeks until July. Give frequent and thorough shallow cultivation until the tassels appear. One quart will plant about 300 hills; one-third bushel per acre.

Extra Early Varieties.

IMPROVED PEEP O'DAY—The earliest true Sweet Corn. The best extra early variety for the Northwest. Our Improved PEEP O'Day is about 3 to 4 days earlier than PEEP O'Day offered by other seed dealers, if their seed is grown in this state and from 8 to 10 days earlier, if grown in any other state. This variety is very dwarf, from 3 to 4 feet high, each stalk produces from 3 to 5 ears, which are mostly ten-rowed and about 5 inches long. The kernels are smaller than those of the Cory and are deliciously sweet, of great value to the market gardener. The stalks of PEEP O'Day being small, it should be planted close together; say about 8 to 10 inches apart in rows, with the rows just far enough apart to admit cultivation. Our seed is grown on our farms here. Packet 5c, 1/2 pt. 10c, quart 35c, postpaid.—Quart 25c, 5 peck 60c, peck $1.00, bushel $3.50, not prepaed.

GOLDEN BANTAM—The earliest and sweetest yellow grained variety, outstanding the best flavored and sweetest of all early varieties of sweet corn. An extra early sort of extreme hardness, allowing very early planting. The stalks grow about 4 feet high and bear 2 to 3 ears, 5 to 7 inches length, which are completely filled with 8 rows of golden yellow grains, extending to the rounded tip. This is without exception the richest flavored of all sweet corn and should be in every garden. Our seed stock is best quality, Minnesota grown. Packet 5c, 1/2 pt. 10c, quart 35c, postpaid.—Quart 25c, 1/2 pt. 60c, peck $1.00, bushel $3.50, not prepaed.

MALAKOFF—A new very early Russian variety. On account of its hardiness can be planted earlier than any other sweet corn. The stalks are small, therefore this corn may be planted two feet apart. The ears are small, usually two on a stalk, quality good. Packet 5c, 1/2 pint 10c, quart 35c, postpaid.—Quart 25c, 1/2 peck 60c, peck $1.00, bushel $3.50, not prepaed.

FIRST OF ALL—Well known early variety with medium sized ears, which are 8 to 10-rowed. Kernels are broad, white and very sweet. Early strain is especially early and quick to fill the market as well as for the home garden, especially suited for our northern states. Packet 5c, 1/2 pt. 10c, quart 30c, postpaid.—Quart 15c, peck 75c, bush $2.65, not prepaed.

Medium Early Varieties.

EARLY CHAMPION—The most popular and largest of the second early sorts. Season a little later than Mammoth White Cory. The ears are large, very uniform and covered with 12 rows of pure white kernels which are very sweet, tender, full of milk, not too large, but just the right size; cob is thin and white. A good yields, producing usually 3 to 5 ears to the stalk. Excellent for both early and late planting. Our stock of this variety has been bred with much care. Packet 5c, 1/2 pt. 10c, quart 35c, postpaid.—Quart 20c, 1/2 peck 50c, peck 85c, bush $4.00, not prepaed.

KENDEL'S EARLY GIANT—A variety of great merit. The ears are large, measuring 9 to 11 inches long, 10 to 15 rows of fine plump kernels of excellent quality. The ears are about 7 inches length; is largely used for canning. Packet 5c, 1/2 pt. 10c, quart 30c, postpaid.—Quart 20c, 1/2 peck 50c, peck 85c, bush $4.00, not prepaed.

F. S. & N. Co.'s Succession Collection of Sweet Corn.

The following varieties, when planted at the same time will produce a continuous supply of Sweet Corn of finest quality, from early summer until frost.

PEEP O'DAY—The earliest variety known. Packet 5c, 1/2 pt. 10c, quart 35c, postpaid.

MAMMOTH WHITE CORY—Peak 50c, quart 30c, postpaid. The very largest of the early varieties. Packet 5c, 1/2 pt. 10c, quart 30c, postpaid.

ZIG-ZAG—Peak 25c, quart 85c, bush $2.00.

We make the following special prices for the collection:

1 Packet each of the four varieties named, 20c, postpaid.

1/2 Pint 35c.

1 Quart 75c, not prepaed.

1/2 Peck $2.00.
SWEET CORN. Continued. Medium Early Varieties, Cont'd.

OLD COLONY—A remarkably productive, medium early variety, averaging three ears on every stalk. The ears are all large size and well filled out. In quality and uniformity, the ears are equal to the Old Stowell's. This variety is in considerable demand. Pkt. 5c, ½ pt. 10c, qt. 30c, postpaid.

BLACK MEXICAN—This corn, when in condition for the table, cooks remarkably white, but the ripe grain is black or bluish-black. It is unsurpassed in tenderness and fine quality. It is a favorite variety for family use. Pkt. 5c, ½ pt. 10c, qt. 30c, postpaid.

HICKOX—A very prolific corn, every stalk producing two large, fully developed ears. The grain is very white, large, handsome, tender and sweet. This is one of the best varieties for canning. Pkt. 5c, ½ pt. 10c, qt. 30c, postpaid.——Cont'd.

LATE VARIETIES.

NEW WHITE EVERGREEN—Bred from one pure white-grained ear, discovered in the Stowell's Evergreen, it has been developed into a beautiful white, large, hard Evergreen variety, much superior to the Old Stowell's. It has a short, sturdy stalks, broader and more vigorous, deep green foliage, and is earlier by several days in producing ears, suitable for the table than the Stowell's. Ears set low on the stalk and are very large. Grains are pure white, very sugary and are tightly set from butt to tip. The ears remain in edible condition, about all true Evergreens. A most desirable variety for the home garden, and especially for the canner. Pkt. 5c, ½ pt. 10c, qt. 30c, postpaid.——Cont'd.

STOWELL'S EVERGREEN—Recognized everywhere as the standard variety for market and home use. Remains longer in the ground than most other sorts. Very large ears with very large and remarkably sweet grains. Our stock is of the finest quality, grown from selected ears. Pkt. 5c, ½ pt. 10c, qt. 30c, postpaid.——Cont'd.

ZIG-ZAG EVERGREEN—One of the sweetest and most tender varieties ever introduced; it is medium late, maturing about eight days ahead of Stowell's Evergreen. The kernels are large, and are arranged on the cob in a peculiar zig-zag form, from which the corn has its name. A very productive variety, and a most satisfactory sort for the home garden as well as to grow for market. Pkt. 5c, ½ pt. 10c, qt. 30c, postpaid.——Cont'd.

COUNTRY GENTLEMAN—One of the most delicious and sweetest of all sweet corns. It is extremely productive, having large, even-earred three ears and sometimes have as many as five. The small, irregular kernels are very deep and pure white in color. Ears average nine inches in length. Our seed stock has been especially selected for sweetness and productiveness. Pkt. 5c, ½ pt. 10c, qt. 30c, postpaid.——Cont'd.

MAMMOTH SUGAR—The largest late variety, having ears of mammoth size, with 14 to 18 rows. Quality excellent and not exceeded by other kinds. It is a week later than Stowell's Evergreen. The stalks are very large. An exceedingly productive corn which is highly esteemed for the home garden. Pkt. 5c, ½ pt. 10c, qt. 30c, postpaid.——Cont'd.

POP CORN.

Pop Corn is a very profitable crop, yields well even in unfavorable seasons and there is always a good market for it. May be planted quite late in season, which is another advantage. Plant at the rate of 5 to 6 quarts per acre in drills 2 feet apart; dropping the seed 1½ feet apart in the rows. Or plant in hills, 2 to 3 quarts of seed per acre.

WHITE RICE—One of the finest and most prolific Pop Corns grown. The leading market lot and largely planted everywhere in the United States. Pkt. 5c, ½ pt. 10c, qt. 40c, postpaid.——Cont'd.

QUEEN'S GOLDEN—The exceeding tenderness when popped, together with the delicious and delicate taste, make this variety one of the best. Is preferred by many to the white colored King. Pkt. 5c, ½ pt. 10c, qt. 40c, postpaid.——Cont'd.

MUSHROOMS.

PURE CULTURE SPAWN—The process by which this spawn is obtained not only insures mushrooms true to type with extraordinary uniformity and uniformity but the mushrooms raised from this spawn in such wonderful numbers come to maturity much more quickly than in the case with spawn manufactured on any other system. This spawn comes in bricks weighing about 1½ pounds; a brick will spawn a bed of 10 square feet. Mushrooms of the finest quality can be grown with case almost the year round. A shed, cellar or cave may be utilized to advantage for this purpose. We recommend our Pure Culture Spawn for the market gardener and private planter. The pamphlet on mushroom culture free with every order. Brick 35c, postpaid. — 5 bricks $1.20, 10 bricks $2.00, not prepaid.——Cont'd.
CUCUMBERS.

Plant the seed three-fourths of an inch deep in hills 4 to 6 feet apart each way, according to the variety, about corn planting time, allowing 10 seeds to each hill. As soon as the plants commence to run, remove all but 3 or 4 of the most promising ones in each hill. Cultivate as soon as the vines will permit. One ounce of seed for 50 hills, 3 to 3 lbs. per acre.

F. S. & N. CO.'S EARLIEST PICKLING—This variety we believe to be the earliest and best strain of all pickling cucumbers. The vines are of vigorous growth and hardier than the others, therefore permitting early planting. The fruits are of medium size, slim, of superior quality. More prolific than any other cucumber we have ever tried. For the gardener our Earliest Pickling will prove a money maker. Pkt. 10c oz. 15c, 1/4 lb. 45c, lb. $1.25, postage.

EARLY FRAME or EARLY SHORT GREEN—Desirable for pickles of medium size, and of fine quality when sliced for the table. A little later than the Early Cluster; keeps green for long time. Pkt. 5c oz. 10c, 1/4 lb. 25c, lb. 85c, prepaid.

WHALE SPINE VARIETIES.

EARLIEST of ALL—This is the earliest type of White Spine that we know of, and is a most profitable and productive variety, of fine quality and attractive dark green color, changing to white when ripe. This variety is much used by pickle-factories for packing in bottles; the cucumbers being straight, blunt ended and very firm, and vary handsome, showy pickles of the best quality. Pkt. Sc. oz. 10c, 1/4 lb. 30c, lb. $1.00, prepaid.

IMPROVED EXTRA EARLY ARLINGTON—A very long, slim, and straight, fine, bright green color, measuring 10 to 14 inches in length, with white, crisp tender flesh. A fine table variety and an excellent sort to grow under glass. Pkt. Sc oz. 10c, 1/4 lb. 25c, lb. 85c, prepaid.

LEMON CUCUMBER—The fruits are nearly round, with yellow and green markings and smooth skin. The flesh is crisp, with a sweet flavor surprising that of cucumbers. The Lemons have none of that bitter or acid taste so often found in other cucumbers. For slicing or serving whole they are unsurpassed and are best just as they turn yellow. For pickling they can be used either green or ripe. Can also be used for Mangoes like melons. Pkt. 10c oz. 25c, 1/2 lb. 85c, lb. $3.00, prepaid.

GHERKIN or BURR—For pickling only, the very small fruits are roundish long, about 2 inches, very prickly when green. Pkt. 10c oz. 20c, 1/4 lb. 60c, prepaid.

JAPANESE CLIMBING—This sort grows quickly, climbing poles or trellises, thus taking up very little room in the garden. The fruits are of good size and fine flavor, adapted especially for pickling and for making truckers salads. Does best in dry, warm summers. Pkt. Sc oz. 15c, 1/4 lb. 35c, lb. $1.50, prepaid.

GIANT PERA—A most prolific late variety of very large size, measuring from 18 to 22 inches long. Pkt. Sc oz. 15c, 1/4 lb. 45c, lb. $1.50, prepaid.

SERPENT or SNAKE—A great curiosity; the cucumbers grow several feet in length and are usually much twisted. Pkt. Sc oz. 20c, prepaid.

BOSTON or WESTERFIELD PICKLING—Fruits of medium length, somewhat thicker than the Boston and deep green in color, with large, prominent spines; extremely prolific. Pkt. Sc oz. 10c, 1/4 lb. 25c, lb. 90c, prepaid.

GAMER or GREEN PROLIFIC—A distinct and very productive variety. Fruits bright green, medium sized, slender, smooth, symmetrical, crisp and tender. Used almost exclusively by all the pickle factories in the western states. Pkt. Sc oz. 10c, 1/4 lb. 25c, lb. 85c, prepaid.

EARLY GREEN CLUSTER—Fruits of the slim form desirable for small pickles; is very prolific, frequently setting fruits in clusters of two and three. Pkt. Sc oz. 10c, 1/4 lb. 25c, lb. 90c, prepaid.

IMPROVED LONG GREEN—One of the best for slicing and pickles. The vines are very vigorous and productive; of the Improved White Spine, of a rich green color throughout its entire length and very straight and symmetrical. We have improved the old variety by careful selection of the finest specimens for seed stock, and recommend this new variety to the private gardener and to market gardeners. Pkt. Sc oz. 10c, 1/4 lb. 30c, lb. $1.00, prepaid.

CUMBERLAND—The fruits grow 9 to 10 inches in length, are of light green color and are thickly covered with small spines; they are very attractive and of fine quality. Pkt. Sc oz. 10c, 1/4 lb. 30c, lb. 65c, prepaid.

EXTRA EARLY WHITE SPINE—The leading sort grown by Southern truckers to ship to Northern markets; used more than any other for forcing under glass, and one of the best for market gardeners. Pkt. Sc oz. 10c, 1/4 lb. 25c, lb. 85c, prepaid.

Davie'S Perfect.
CHICORY.

LARGE ROOTED—Much used in Europe as a substitute for coffee. In the fall the roots should be taken up and dried, and when required for use should be toasted and ground like coffee. In spring the leaves make a good salad, and are used extensively for this purpose. Pkt. 5c, oz. 15c, ½ lb. 50c, prepaid.

CHIVES.

An onion-like plant which by some is highly esteemed for use as a salad, and the green stems afford a very pleasant onion flavor for soups. The plant also makes an excellent ornamental garden bed edging, which may frequently be cut, a new growth of leaves sprouting soon after each cutting. The seed may be sown in rows in the garden or in boxes and transplanted. After 2 or 3 years the plants may be taken up, divided and reset. Pkt. 10c, ½ oz. 30c, prepaid.

ENDIVE.

WHITE CURLIED—A very beautiful sort of which the leaves are very light colored, even the outer ones being nearly white. They are very crisp and tender. Pkt. 5c, oz. 10c, ½ lb. 30c, lb. $1.00, prepaid.

MOSS CURLIED—One of the best autumn, winter or spring salads. Plants form large, dense clusters of finely divided, green leaves, which, when properly blanched, are exceedingly crisp and tender. Pkt. 5c, oz. 10c, ½ lb. 30c, lb. $1.00, prepaid.

BATAVIAN—Large heads of broad, thick leaves, which can be blanched as salad or used for cooked greens. A very fine variety. Pkt. 5c, oz. 10c, ½ lb. 30c, lb. $1.00, prepaid.

MUSTARD.

Mustard is not only used as a condiment, but the green leaves are used as a salad or cut and boiled like spinach. Sow as early in the spring as the ground will permit, and for succession sow every few weeks until autumn. In the South the seed should be sown in fall and plants used early in spring as a salad and for greens.

WHITE ENGLISH—Leaves are comparatively smooth and deeply cut, color medium dark green. Seed is much used for flavoring in pickles, etc. Pkt. 5c, oz. 8c, ½ lb. 15c, lb. 45c, prepaid.

SOUTHERN GIANT CURLIED—Leaves light green, frilled and much crimped at the edge. Highly esteemed in the South for its vigorous growth and good quality. Pkt. 5c, oz. 5c, ½ lb. 20c, lb. 60c, prepaid.

Do not overlook our 1913 "Sure Crop" Collection of splendid Vegetables on page 4.

EGG PLANT.

NEW YORK IMPROVED LARGE PURPLE SPINELESS—The plants are large, vigorous, spreading, and the fruits are very large, oval, of glossy dark purple color; usually four to eight fruits are produced by a plant. Our stock has been obtained by years of most careful selection and we have today the finest strain of all Mammoth Purple Egg Plants, the plant growing to an immense size, being very early and entirely spineless. Pkt. 5c, oz. 40c, ½ lb. $1.00, lb. $3.00, prepaid.

EARLY LONG PURPLE—A very early variety with long fruits of rich dark purple color and fine quality. Pkt. 5c, oz. 15c, ½ lb. $1.75, prepaid.

BLACK BEAUTY—Earlier than New York Spineless. The fruits are broad, thick, of most attractive form and transplant glory. Their rich, lustrous, purple-black color is very uniform. Pkt. 5c, oz. 30c, ½ lb. $1.00, lb. $3.75, prepaid.

NEW HIGHBUSH or TREE—An excellent tall growing variety, bearing its large fruits well above the ground, thus escaping liability to rot. The fruit is very solid and of best quality. The plant resists drought and bad weather to a remarkable degree. Pkt. 10c, oz. 35c, ½ lb. $1.15, prepaid.

COLLARDS.

GEORGIA SOUTHERN or CREOLE—We offer the true white or green stemmed sort so extensively used in the South, where it furnishes an abundance of food for the table or for stock. Forms a large open head of leaves on a tall stem. Freezing does not injure, but rather improves the quality. Pkt. 5c, oz. 10c, ½ lb. 25c, lb. 75c, prepaid.

CORN SALAD.

LARGE ROUND-LEAVED, LARGE-SEEDED—This is a hardy, quick growing plant; the leaves furnish a good substitute for lettuce during the winter; can also be cooked and used like spinach. The plant will mature in 4 to 6 weeks. It can also be sown early in spring-like lettuce. Pkt. 5c, oz. 10c, ½ lb. 30c, lb. $1.00, prepaid.

GARLIC:

Garlic is much esteemed for flavoring soups, stews, etc. The root or bulb is composed of "cloves," which are planted in the spring. Bulbs ½ lb. 15c, lb. 45c, prepaid.

CRESS.

FINE CURLED or PEPPER GRASS—Quick growing; leaves finely cut and feathery, ornamental, crisp and pungent, very refreshing. Pkt. 5c, oz. 8c, ½ lb. 20c, lb. 60c, prepaid.

WATER CRESS—Highly esteemed as a salad during spring and fall. Also used as a garnish for meats during the winter. Pkt. 5c, oz. 30c, ½ lb. $1.00, prepaid.

KOHLRABI.

Sow the seed early in spring, in rows 18 in. apart. Thins out to 8 to 10 inches.

EARLIEST ERFURT DELICATENESS—The earliest and finest sort for market and the private garden. Flesh is white, of excellent flavor, very tender and juicy. Leaves are short, permitting close planting. Best for forcing. Pkt. 10c, oz. 25c, ½ lb. 75c, lb. $2.25, prepaid.

EARLY WHITE VIENNA—Very handsome, white fruit. Excellent both for forcing and open ground; flesh white and very tender; leaves short. Pkt. 5c, oz. 15c, ½ lb. 30c, lb. $1.85, prepaid.

EARLY PURPLE—Very similar to the above, except in color, which is a bright purple. A desirable variety. Pkt. 5c, oz. 15c, ½ lb. 45c, lb. $1.70, prepaid.

VINE PEACH.

The fruits are about the size of a large peach, oval shaped, and of a bright orange-yellow color, somewhat similar to our Bradford Peach. The flavor is sweet, juicy, and delicious. Pkt. 5c, oz. 8c, ½ lb. 20c, lb. $1.00. For gardening or commercial purposes.

VINE PEACH:

Early White Vienna Kohlrabi
LETTUCE.

Lettuce seed should be sown very early in the spring and at intervals of 15 days for a succession; sow the seed in shallow drills—being careful to firm the soil well over the seed and thin to 4 inches apart in a row. One ounce of seed will sow 75 feet of rows, 4 to 5 pounds seed required per acre.

Curled or Loose Leaved.

GRAND RAPIDS—The best and most profitable sort for forcing, as it stands a great deal of neglect in watering and ventilation; a strong grower; can be planted very close. Almost exclusively grown for market. A splendid shipper, not apt to rot. The plant is upright and forms a loose head or a cluster of light green leaves. One of the very best leaf lettuces for the home garden. Pkt. 5c, oz. 10c, lb. 25c, lb. $1.25, prepaid.

BLACK-SEEDED SIMPSON—One of the best and most largely planted bunching varieties; excellent for forcing as well as for growing outdoors. Distinctly a market gardener's sort, but also very satisfactory for home use, as it is very reliable and easily grown; it succeeds during summer when more delicate sorts are failures. A good shipper, remaining a long time in condition for use. Leaves broad, crumpled and blistered and of light green color and fine quality, sweet and tender. Pkt. 5c, oz. 8c, 1/4 lb. 20c, lb. 75c, prepaid.

SIMPSON’S EARLY CURLED—(Seed White)—Early, erect growing. Leaves broad, often frilled and blistered and turned into a loose head; light green in color; sweet, tender and well flavored. May be sown thickly and cut when plants are very young. Pkt. 5c, oz. 8c, 1/4 lb. 20c, lb. 75c, prepaid.

DENVER MARKET—An early variety of loose headed type, either for forcing or oven ground. Forms good sized heads of light green color, Leaves are handsome marked and blistered similar to a Savoy cabbage. Very crisp and tender. Pkt. 5c, oz. 8c, 1/4 lb. 20c, lb. 75c, prepaid.

PRIZEHEAD—An excellent home variety and planted extensively for family use, probably more so than any other kind; not suited for shipping and not adapted for forcing. The plants consist of a loose cluster of leaves, of bright brown color, varying to bright green; the quality is very fine, sweet in flavor, tender and crisp. Pkt. 5c, oz. 8c, 1/4 lb. 20c, lb. 75c, prepaid.

CABBAGE or HEADING VARIETIES.

MAY KING—The earliest head lettuce. Equally desirable for market and the home garden. Heads medium sized with outer leaves folding close to the head, thus permitting close planting for frame work; color light green, outer leaves tinged slightly brown; heart of a beautiful appetizing yellow; excellent quality, leaves being exceedingly tender. Pkt. 5c, oz. 10c, 1/4 lb. 25c, lb. $1.25, prepaid.

GIANT ICEBERG—An extremely hard heading, large variety. Leaves have small indents and are of a yellowish green color. Good for home and market. The quality is very fine. Pkt. 5c, oz. 10c, 1/4 lb. 30c, lb. $1.00, prepaid.

RICHARD’S FAVORITE—This excellent German lettuce can be highly recommended for the home garden. Forms medium sized heads with broad, crumpled leaves of light yellow color. Very tender, sweet, crisp and buttery. Pkt. 10c, oz. 18c, 1/4 lb. 46c, lb. $1.50, prepaid.

HANSON—The standard summer cabbage-heading variety for either the market or market gardener; largely grown in every part of the country. Very reliable and a sure header. Not suited for growing indoors. A very large, late variety, slow to shoot to seed, forming a very hard head of light green color, and of the best quality. Pkt. 5c, oz. 10c, 1/4 lb. 25c, lb. 85c, prepaid.

CALIFORNIA CREAM BUTTER—Especially recommended to the private gardener but also an excellent sort for the market gardener. Very hardy, succeeds well everywhere, but not suited for indoor culture. A large, large variety, firm, well blanched heart, with outer leaves of rich, glossy green color, spotted with brown, the most buttery flavored variety. Pkt. 5c, oz. 10c, 1/4 lb. 30c, lb. $1.00, prepaid.

WONDERFUL or NEW YORK—A large late variety of very good quality, fine flavor, sweet and crisp and of dull green color, a good shipper. A favorite variety with market gardeners near New York; one of the best for the private garden; suitable for forcing. Excellent for midsummer, withstands heat remarkably well and is slow to run to seed. Pkt. 5c, oz. 8c, 1/4 lb. 25c, lb. 75c, prepaid.

BIG BOSTON—A very popular sort with market gardeners all over the country; succeeds well in late fall and is a favorite for growing at that time of the year, but also a good summer lettuce and fine for forcing. Hardy, reliable, a sure header, and a splendid shipper. The plants form large compact heads, leaves of light dull green color with light brown border. Pkt. 5c, oz. 10c, 1/4 lb. 30c, lb. $1.00, prepaid.

DRUMHEAD or MALTA—A late and very large lettuce with a rather loose head of light green color, and sweet flavor, grown on account of its immense size. Pkt. 5c, oz. 8c, 1/4 lb. 25c, lb. 75c, prepaid.

COS LETTUCE—White Self Folding—Of a distinct upright habit. The heads grow to a large size and are self-heading. Is considered by many to be the highest quality of all lettuces. Very crisp and sweet. Pkt. 5c, oz. 10c, 1/4 lb. 30c, lb. $1.00, prepaid.

I cannot help but praise your Vegetable Seed. Will you give a few accounts? Some heads of Cabbage, All Head or Surprise, 19 lbs, Late Flat Dutch, 20 lbs. Some Calabash, Early Summer ball, 154 lbs. I raised 191 lbs. Eckerd’s Man & Wurzel on 49 sq. rods, some weighing 14 lbs. Raised 87 lbs. Purple Top White Globe Turnips on 149 sq. rods, they average about 8 lbs.avois—GEO H BUSHMAN, Abbotsford, Wis.
MUSK MELON.

Early varieties ready in 50 to 100 days from sowing. General crop requires 115 to 140 days when the ground has become warm and dry, and danger of frost is passed, in hills 6 feet apart each way. In well enriched soil, 15 to 25 seeds in a hill. After all danger of the bugs is over thin out to three plants per hill. One ounce will plant about 200 hills, three pounds to the acre.

Melons thrive best in a light, rich soil. Plant them in rows 15 inches apart. Each plant will produce one to three melons, these averages will be exceeded in favorable seasons. Each melon will average from 2 lbs. to 3 lbs.

New Fordhook

Salmon Fleshea Sorts

NEW FORDHOOK—This new melon is a cross between the Early Golden and the Old Prize Jenny Ann. The vines are strong and vigorous, the fruit is large, ribbed and covered with coarse netting, and is very attractive and good shipping qualities. A good melon for both home and market garden. Pkt. 10c, oz. 25c, lb. $1.25, prepaid.

OSAGE—This new melon is a great improvement on the old popular variety, as it is a few days earlier and much finer in appearance, the skin being of dark green color and covered with thick gray netting. With this new feature the Osage combines all the good qualities of the old variety with a few new ones. The one best melons to grow for the market and for the home garden. Pkt. 10c, oz. 20c, lb. 45c, lb. $1.50, prepaid.

OSAGE—Fruits large, oval, with dark green skin, slightly ribbed and moderately netted. Flesh is deep salmon colored, very thick and of the finest quality. One of the best melons to grow for the home garden also for the market; a good keeper and winer. More extensively grown than any of the other varieties. This melon is unusual in size and will produce melons of the finest type. Pkt. 5c, oz. 10c, lb. 25c, lb. 85c, lb. $4.00, prepaid.

YELLOW MEAT JAPAN—This variety is a splendid shipper and for the private garden no better melon can be found. The fruit is thick, salmon colored, melting and of a rich sweet, delicious flavor. The fruits are of large size, nearly round, slightly ribbed and covered with netting; skin yellowish-white when ripe. A heavy yielder, quite early. Grower can have a fine stand of this melon, oz. 10c, lb. 35c, lb. $1.25, prepaid.

HOODOO—Considered one of the finest orange fleshed Musk Melon for shipping, especially to distant markets, as it never breaks down. The size is just right (about the size of Rocky Ford) so that it may be served cut in halves. The flesh is of deep orange color and extremely thick; there being only a small seed cavity. The netting is ideal, heavy and close; the melon solid and heavy. Wonderful fertility and produces a fine quality melon quite early in the season. Pkt. 5c, oz. 10c, lb. 35c, lb. $1.00, prepaid.

HURRELL'S GEM—A new melon of the Rocky Ford type, with orange-yellow meat of delicious flavor; a fine keeper and good shipper. One of the finest melons grown. Size same as the full-sized Rocky Ford melons (6 inches long, weighing about 6 pounds each); shape elongated; meat very thick, fine grained and spicy. It will sell at the highest prices in markets where GEMS are popular. Select stock seed from the Introducer. Pkt. 5c, oz. 10c, lb. 35c, lb. $1.00, prepaid.

EMERALD GEM—A new melon of the Rocky Ford type, with orange-yellow肉 of delicious flavor; a fine keeper and good shipper. One of the finest melons grown. Size same as the full-sized Rocky Ford melons (6 inches long, weighing about 6 pounds each); shape elongated; meat very thick, fine grained and spicy. It will sell at the highest prices in markets where GEMS are popular. Select stock seed from the Introducer. Pkt. 5c, oz. 10c, lb. 35c, lb. $1.00, prepaid.

SPANISH—This melon attains a length of 18 to 30 inches, is 2 to 4 inches in diameter, and has flesh of orange-yellow color and exquisite flavor. The fruit resembles a banana in appearance and aroma; it is not a mere curiosity, but commands good prices in first-class markets. Matures rather late. A fine melon for the home garden and nearby markets. Packet 5c, oz. 10c, lb. 35c, lb. $1.00, prepaid.

STRAWBERRY—A melon with the delicious flavor of the strawberry. Its smooth, deep flesh is salmon-red. The skin is green, turning yellowish when ripe. The fruits are of desirable size, weighing 6 to 8 pounds. Pkt. 5c, oz. 10c, lb. 35c, lb. $1.00, prepaid.

Green Fleshea Sorts

EXTRA EARLY ROCKYFORD—Popular small or basket melon, which is shipped in large quantities from Colorado and Arizona. The fruit is one of the best varieties for sale in the market, and is very popular. Pkt. 5c, oz. 10c, lb. 35c, lb. $1.00, prepaid.

HACKENSACK or TURK'S CAP—Pkt. 5c, oz. 10c, lb. 35c, lb. $1.00, prepaid.

EXTRA EARLY CITRON—This variety is a large-fruited variety of superior quality. The fruit is nearly round in form, slightly flattened at the ends, with very large, broad, heavy ribs and dark green skin, thickly covered with heavy netting. The flesh is light green, melting and of delicious flavor. The melons are very good for shipping and the home garden. Pkt. 5c, oz. 10c, lb. 35c, lb. $1.00, prepaid.

IMPRESSED LARGE GREEN MELON—This is a fine, large, round, slightly flattened at both ends, ribbed and covered with coarse netting; flesh very thick and of the finest flavor. A very fine melon for the home garden. Pkt. 5c, oz. 10c, lb. 35c, lb. $1.00, prepaid.

MONTREAL—This is a very large-fruited variety of superior quality. The fruit is nearly round in form, slightly flattened at the ends, with very large, broad, heavy ribs and dark green skin, thickly covered with heavy netting. The flesh is light green, melting and of delicious flavor. The melons are very good for shipping and the home garden. Pkt. 5c, oz. 10c, lb. 35c, lb. $1.00, prepaid.

WATER'S SOLID ROCKYFORD—The earliest large melon of Rocky Ford type. The netting is grey, closely covered, covering the entire surface. A rather fine melon for the home garden. Pkt. 5c, oz. 10c, lb. 35c, lb. $1.00, prepaid.

ROCKYFORD—Ripens a day or two later than the Water's strain. This melon is best for the home garden and for the market; a good keeper and winner. More extensively grown than any of the other varieties. This melon is one of the best varieties for sale in the market, and is very popular. Pkt. 5c, oz. 10c, lb. 35c, lb. $1.00, prepaid.

RUST RESISTING ROCKYFORD—Ten days later than the Water's strain. This melon represents the highest development of the Rocky Ford melons as to quality, beauty and rust resisting properties. The fruits are covered over the entire surface with heavy gray netting; their flavor is not excelled by that of any green melon. Pkt. 5c, oz. 10c, lb. 35c, lb. $1.00, prepaid.

THOROBEAD ROCKYFORD—This is a new melon which was raised at Rocky Ford, and which is in the process of being developed by Mr. G. W. Thoro, a well known fruit grower. It is a large-fruited variety, with the best flavor of any variety grown in the Rocky Ford district, and is very popular. Pkt. 5c, oz. 10c, lb. 35c, lb. $1.00, prepaid.

TURK'S CAP—A melon with the delicious flavor of the strawberry. Its smooth, deep flesh is salmon-red. The skin is green, turning yellowish when ripe. The fruits are of desirable size, weighing 6 to 8 pounds. Pkt. 5c, oz. 10c, lb. 35c, lb. $1.00, prepaid.

Pkt. 5c, oz. 10c, lb. 35c, lb. $1.00, prepaid.
WATER MELONS.

The soil for water melons should be light, rich and sandy. When there is no more danger of frost, drop 8 to 10 seeds in hills 8 to 10 feet apart, each way, covering about 1/2 inch deep. As soon as the plants commence to run, thin out to 2 best plants in a hill and cultivate until the vines cover the whole ground. If slow to fruit, pinch off the ends of the growing shoots. One oz. of seed for 30 hills; 1 oz. per acre.

| Prices except where noted: | Pkt. 5c, oz. 8c, 1/4 lb. 15c, lb. 60c, prepaid; 8 lbs. and over 45c per lb., not prepaid. |

COLE'S EXTRA EARLY—The earliest Watermelon grown and a most desirable sort for the Northwest, ripening delicious melons where none could be grown before, but it is also of great value for the Middle and Southern States, as it matures its fruits weeks ahead of other sorts. Altho the melons are not large, they more than make up in number, what they lack in size, bearing continuously during the season. The fruits are oblong shaped and of dark green color, striped with lighter shades. The rind is thin and brittle, on which account the melons are not good for shipping, but they are one of the finest varieties for the family garden. The beautiful red flesh is of delicate texture, crisp, lusciously sweet and refreshing; there is little or no seed cavity and very few seeds. Pkt. 5c, oz. 10c, 1/4 lb. 30c, lb. 75c. prepaid.

HARRIS' EARLIEST—A splendid, large, extra early melon of exceptionally fine quality. The fruits are slightly oval, irregularly mottled dark and light green and weigh from 25 to 40 pounds; the flesh is bright red, tender and sweet. A good shipper and one of the best for planting in the Northwest. Pkt. 5c, oz. 10c, 1/4 lb. 25c, lb. 75c prepaid.

EARLY FORDERHOOK—An extra early melon, nearly round in form and averaging 20 pounds in weight. The rind is of uniform light green color and is quite tough, making it a valuable variety for shipping; seeds are white.

ALABAMA SWEET—Alabama Sweet is a dark green melon with light seeds. It is of good size, very attractive in appearance and most delicious in flavor, making it first class for shipping purposes. Very popular in Texas and other Southern States, where it is grown exclusively for shipping. Pkt. 5c, oz. 10c, 1/4 lb. 25c, lb. 75c, 5 lbs $3.50, prepaid.

HALBERT HONEY—The melons are blunt both at stem and blossom end, generally free from any appearance of neck. They average 15 to 20 inches in length, 6 to 8 inches in diameter. Color: bright, glossy deep green. The flesh is a beautiful crimson, extending to within less than half an inch of the rind. The rind being very tender it will not stand shipping. It is essentially the melon for the home garden and for local markets. Pkt. 5c, oz. 10c, 1/4 lb. 25c, lb. 75c, prepaid.

DIXIE—A popular market sort. Vigorous, large growing and hardy, ripening its fruits earlier than most large sorts; fruit medium size to large about one third longer than this. The melon is of medium size, oblong shaped, growing with a lighter shade; rind thin, but tough; flesh bright scarlet, ripens closely to the rind, and is of the best quality.

KLICKLEY'S SWEET—A large, oblong melon, 50 inches in length, by 10 to 12 inches in diameter, with dark green rind which is only about 3/4 inch in thickness. The scarlet flesh is sweet and sugary and of such texture that it leaves no strings of pulp whatever in eating. This variety is better for home use than for shipping, and we believe it is the best table melon. Pkt. 5c, oz. 10c, 1/4 lb. 25c, lb. 75c, 5 lbs $3.50, prepaid.

MCIVER'S WONDERFUL SUGAR—This widely famous melon is of southern origin. It is of medium size, with striped or variegated exterior. The beautiful red flesh is of perfect quality as to texture and sweetness. It is well adapted for nearly markets, but is rather delicate for long shipments. Pkt. 5c, oz. 10c, 1/4 lb. 25c, lb. 75c, 5 lbs $3.50, prepaid.

SWEETHEART—Our strain is a notably sweet-hearted kind for home and market use, and will hold its own (in the Watermelon patch) for many years to come. Vine vigorous and productive, ripening its fruit early; fruit large, oval, very heavy, uniformly mottled light and dark green; rind thin, but firm; flesh bright red, firm and solid, but very tender, melting and sweet. Excellent for shipping and home use.

TOM WATSON—This splendid melon has become immensely popular. Typical fruits of this variety reach a size of 24 inches in length by 12 inches in diameter. The rind is dark mottled green, thin, but tough enough to endure shipping to very distant markets. Of the oblong shaped melons it is the best shipper. The flesh is deep red and comes very close about 3/4 of an inch to the rind. The exquisite deliciousness of flavor possessed by the flesh of this melon places it in the very front rank of melon excellence. It is crisp and melting, and in all respects just what critical melon lovers would expect. For the home or market garden, or for shipping. It is a money maker for the growers. Our strain of this is not surpassed in the market. Pkt. 5c, oz. 10c, 1/4 lb. 25c, lb. 75c, 5 lbs $3.50 prepaid.

McIver's Sugar.

CITRON: GREEN SEEDED—A round, handsome fruit of small size, used for preserving only. Pkt. 5c, oz. 10c, 1/4 lb. 25c, lb. 75c, prepaid. RED SEEDED—Same as preceding kind, except seed is red. Price same as Green Seeded.
CHOICE AND RELIABLE FARIBAULT-GROWN ONION SEED.

We guarantee our Seeds to grow and produce satisfactory results if soil and season are favorable.

The most essential item in growing onions for the market is **good seed**—seed that will come up, and seed that will produce the variety you want—cheap seed is very poor economy. One ounce of seed is required for 100 feet drill, 4 to 6 lbs. per acre.

We are the largest growers of Onion Seed in the state of Minnesota and our seed is now used by most market-gardeners in the Northwest, having been found superior to that grown elsewhere. Our stock is purer, and produces much larger and better keeping bulbs than any other strain. By many years of most careful selection of bulbs for seed growing we have established strains which are of perfect type and are the highest grade of onions obtainable up to date.

**FARIBAULT RED GLOBE WETHERSFIELD**—Earlier and more productive than the Southport Red Globe. The Onion Seed we offer under this name is a special strain of Red Globe which we have produced by years of careful breeding. The perfect globe type is thoroughly established in this variety, and the onions grown from this Pedigreed Stock are always of the most uniform shape. This variety differs from other kinds of Red Globe Onions not only in purity of stock and perfection of type, but also in earliness, productive nature, beauty of color and great keeping qualities. The bulbs are of dark red color, grow to a larger size than the Southport variety and are of a most attractive appearance. We sell annually very large quantities of our Red Globe Wethersfield onion seed to growers in this state where mostly Red Onions are grown for shipping, and our strain is preferred by all. Pkt. 10c, oz. 20c, ¼ lb. 35c, lb. $1.40, prepaid. — 5 lbs. $8.75, 10 lbs. $17.00, not prepaid.

**LARGE RED GLOBE**—The best strain of Red Globe, western grown seed. Pkt. 5c, oz. 10c, ¼ lb. 30c, lb. $1.30, prepaid. — 5 lbs. $6.25, 10 lbs. $12.00, not prepaid.

**MINNESOTA YELLOW GLOBE**—The most beautiful Yellow Onion of fine globe shape, golden yellow color, large size, mild flavor, a heavy cropper, an excellent keeper and good shipper. Our strain will be found a good deal earlier than the old Southport variety. The best yellow variety to grow for the market. Pkt. 5c, oz. 15c, ¼ lb. 45c, lb. $1.40, prepaid. — 8 lbs. $7.25, 10 lbs. $13.50, not prepaid.

**MINN. WHITE GLOBE**—The handsomest onion grown; it sells at a higher price than all other sorts. Perfectly globe-shaped, thin, delicate skin of snow-white color. The flesh is firm, fine grained and of mild flavor; a tremendous cropper and good keeper. To get fine white onions, greatest care should be exercised in harvesting and curing the crop. Pull as soon as onions are ripe enough to harvest and dry in an airy and shady place. Our strain is the earliest of all White Globe offered. Pkt. 5c, oz. 20c, ¼ lb. 60c, lb. $2.00, prepaid. — 10 lbs. $39.50, 20 lbs. $48.00 not prepaid.

The 3 Best Globe Onions, which we offer on this page we have, by years of untiring efforts in selection, brought to the highest possible standard of perfection. They are the most productive, the earliest, hardest, and best keeping Onions in existence. We offer of the 3 Globe Onions:

- **FARIBAULT RED GLOBE WETHERSFIELD**
- **MINNESOTA YELLOW GLOBE**
- **MINN. WHITE GLOBE**

For each, 15c. prepaid. 1 oz. 45c. ¼ lb. $1.40.
ONIONS. Continued.

LARGE RED WETHERSFIELD—The Wethersfield Onion is the most largely grown red variety, and is a heavy yielder and good keeper. The stock we offer is our own growing, and we know there is no better strain raised anywhere, as far as purity, beautiful form and color are concerned, and in earliness, productiveness and long keeping qualities far exceed all others. The bulbs are of large size, of a round but somewhat flattened shape, deep red skin, flesh purple-white, rather strong flavored. The best variety for poor and dry soil. The flat onions mature earlier than the globes and are therefore better adapted for the northern sections. The Red Wethersfield is the best variety for the home garden and in many sections sells at highest prices in the market. Pkt. 5c, oz. 10c, 1/4 lb. 35c, lb. $1.15, postpaid—5 lbs. $5.25, 10 lbs. $9.75, not prepaid.

EXTRA EARLY RED—This is one of the standard American onions, adapting itself to a great variety of soils and situations, succeeding even in cold, mucky ground where other sorts fail. It matures earlier than the Red Wethersfield and in 5 to 7 days is large, is also somewhat flattened, very similar to that variety. The onion is of a rich, deep red color, mild flavor, fine grained, solid and beefy. It is hardy and reliable and well adapted for the early market. Pkt. 5c, oz. 10c, 1/4 lb. 35c, lb. $1.25, postpaid—5 lbs. $5.75, not prepaid.

BROWN GLOBE—This new variety is one of the best market sorts in existence; it is extremely early, forms good, large bulbs and keeps in good condition longer than any other onion. The color of the skin is a deep rich seal brown; the flesh is white, brittle and of mild flavor. Packet 5c, oz. 15c, 1/4 lb. 35c, lb. $1.25, postpaid—5 lbs. $5.75, not prepaid.

AUSTRIAN BROWN—Extra early, a sure cropper and a long keeper. Medium sized, hard, solid bulbs of round form and a reddish-brown color, maturing about four weeks earlier than the Wethersfield. do not produce scallions and are excellent keepers. Pkt. 5c, oz. 10c, 1/4 lb. 35c, lb. $1.15, postpaid—5 lbs. and more at $1.00 per lb., not prepaid.

EXTRA EARLY GOLDEN GLOBE—The earliest of all globe-shaped onions, an extra long keeper, a sure cropper and a very handsome variety. The bulbs are of beautiful globe form and run very uniform in size and shape. The skin is thin and of golden-yellow color, the flesh solid, pure white, mild and pleasant in flavor. This onion has an extremely small top, generally not larger than 3 to 4 pencil; ripens evenly in all soils. Pkt. 5c, oz. 15c, 1/4 lb. 35c, lb. $1.50, postpaid—5 lbs. $7.25, 10 lbs. $14.00, not prepaid.

WHITE PORTUGAL OR SILGBRSKIN—A medium sized onion of mild flavor and with beautiful, clear white skin. A favorite with many for use when young as a basting or onion, and for pickling; it is also a rich soil variety and fine for fall and early winter use. Used largely for the growing of onion seed. Packet 5c, oz. 10c, 1/4 lb. 35c, lb. $1.00, postpaid—5 lbs. $5.00, 10 lbs. $9.00, not prepaid.

FLAT YELLOW DANVERS—A fine, early and productive variety of medium size; skin coppery-yellow; flesh creamy-white, brittle, mild and well-flavored. Packet 5c, oz. 10c, 1/4 lb. 35c, lb. $1.10, postpaid—5 lbs. $5.00, 10 lbs. $9.00, not prepaid.

LOW DUTCH OR SHARSBURG—One of the oldest sorts. of flat form; flesh white, fine grained, mild and well flavored. It is one of the best to grow for sets and a splendid keeper. Packet 5c, oz. 10c, 1/4 lb. 35c, lb. $1.00, postpaid—5 lbs. $5.00, 10 lbs. $9.00, not prepaid.

IMPORTED VARIETIES.

MAMMOTH SILVER KING—A most strikingly attractive onion. The bulbs are flattened but thick thru and at the average diameter is from 5 to 7 inches; some bulbs weigh from 2 to 3 pounds each. The onions are of a beautiful silvery white color, of a particularly mild and pleasant flavor, so sweet and tender that they can be eaten raw like an apple. They are from the best for exhibition at fairs, as well as for the home table. Pkt. 5c, oz. 15c, 1/4 lb. 35c, lb. $1.75, postpaid.

EXTRA EARLY BARLETTA—The best variety for small pickles. It is the earliest ripening onion in cultivation. The bulbs are pure paper-white, very small, averaging only from 10 to 14 inches in diameter; they are of that shape and very mild flavor. To grow small pickling onions plant the seed thickly in drills, 1 1/2 in. apart, using 10 to 15 lbs. per acre. Pkt. 5c, oz. 15c, 1/4 lb. 40c, lb. $1.40, postpaid.

QUEEN—A very early and very small onion. It has a beautiful waxy-white color; much esteemed by housewives. Of great value for pickling and table use. Pkt. 5c, oz. 15c, 1/4 lb. 40c, lb. $1.40, postpaid.

EARLY WHITE WELSH—For Green Onions. This kind does not form a bulb, but it is one of the best for "green onions". The plants are perennial and will remain in the ground for years. A money maker for the market gardener. Pkt. 5c, oz. 15c, 1/4 lb. 40c, lb. $1.50, postpaid.

Planted 2 acres with your Onion Seed. The seed was very fine and the Onions have made a vigorous growth.

W S BRADDOCK, Mather, Wis.

Your Red Wethersfield and Priesterback Onions were very fine. In spite of the drought I raised big onions, some weighing over 2 pounds each of the Priesterback. J. FALL, Sr., West Bend, Iowa.

Your Onion Seed is the best. I am over 60 years old and never had finer, larger and better keeping onions than I raised from your seed last year. A. C. MOBLE, Northwood, Iowa.
ONION SETS.

Onion sets are planted for Onions for early spring use. A quart or two is sufficient for the family garden. The Bottom Onion Sets produce Onion bulbs much earlier than can be done by sowing the seed and allows the planter the early high market prices and permits the sowing of another crop on the land the same season. For green or bunch Onions the Onion sets produce a crop in half the time it takes to raise these from seed.

YELLOW MULTIPLIERS or SHALLOTS—We prefer these to any other onions on account of their mildness. The latter part of June they are ripe, and can be harvested. They are very productive, 5 to 15 bulbs growing from one small bulb set out. Qt. 20c, pkg. 30c, postpaid. -Qt. 20c, pkg. 90c, bu. $3.25, not prepaid.

WHITE MULTIPLIERS—Color pure silvery white; very productive, frequently producing as many as 20 bulbs in a single cluster from one bulb planted. The Onions are very mild and of excellent quality and size for bunching green, and can be used also for pickling. Very early and lasts a long time. Excellent for green and bunch onions. Pkt. 5c, pkg. $1.25, bu. $4.50, not prepaid.

RED TOP or BUTTON SETS—Earliest of all. These are planted for both, early "Green Onions" and large eating onions. Pkt. 25c, qt. 40c, postpaid. -Pk. $1.80, bu. $6.00, not prepaid.

Parsnip.

Parsnips are highly appreciated for the table, but their great value for stock feeding is but little known. They yield on good soil an immense crop of roots which are rich in carotin and protein. Perfectly hardy and remain in the ground all the time. Qt. 15c, qt. 25c, postpaid.-Qt. 15c, pkg. 60c, bu. $1.75, not prepaid.

Bottom Onion Sets.

Perennials or winter sets—Also called Egyptian or Free Range. Produce the earliest spring onions without winter protection. Perfectly hardy and remain in the ground all the time. Pt. 15c, qt. 25c, postpaid.-Qt. 15c, pkg. 60c, bu. $1.75, not prepaid.

Yellow Bottom Sets—Pt. 15c, qt. 25c, postpaid.-Qt. 15c, pkg. 75c, bu. $2.50, not prepaid.

Red Bottom Sets—Pt. 15c, qt. 25c, postpaid.-Qt. 15c, pkg. 75c, bu. $2.50, not prepaid.

White Bottom Sets—Pt. 20c, pkg. 30c, postpaid. -Qt. 20c, pkg. 85c, bu. $2.85, not prepaid.

Parsnip.

These roots do not grow as long as those of the Hollow Crown, but are of greater diameter and more easily gathered. They are very smooth and have fine grained flesh of most excellent quality. Pkt. 5c, oz. 10c, 1/2 lb. 30c, lb. 85c, postpaid.

Parsnip.

One ounce to 150 feet. Drill. Soak the seeds a few hours in lake warm water and sow early in the spring in drills one foot apart. Thin out to four inches. A few seeds sown in onion rows use no space. Glass frames. Used extensively for garnishing and seasoning. Cucumber Moss Curled. Parsley.

Moss Curled Parsley.

One ounce to 150 feet. Drill. Soak the seeds a few hours in lake warm water and sow early in the spring in drills one foot apart. Thin out to four inches. A few seeds sown in onion rows use no space. Glass frames. Used extensively for garnishing and seasoning. Cucumber Moss Curled. Parsley.

Parsnip.

Sow in bottomed early in April and transplant to the open ground when the weather is favorable, in warm, fertile soil, in rows 18 inches apart. May also be sown in open ground when all danger of frost is past and the soil is warm. One ounce to 1500 plants.

Chinese Giant—This desirable variety, of recent introduction, is undoubtedly the largest sweet pepper yet introduced. The flesh is quite thick, very mild and remarkably sweet. Chinese Giant is certainly a wonder. The plants are of strong, stocky growth, of bushy green habit, growing 18 inches to 2 feet in height, with abundant foliage. The compact plants are very prolific, setting 3 to 4 extra large fruits at the base, and quite early in the season. One of the best for the market. Pkt. 5c, oz. 10c, 1/2 lb. 25c, lb. 75c, postpaid.

Turnip-Rooted or Hamburg—The root is the edible portion of this variety and resembles a small parsnip, both in color and shape. Flesh white, a little dry, having a flavor similar to Celery. Very hardy and should be cultivated like Parsnip. Extensively grown and used for flavoring soups, etc. Foliage same as Plain Parsley. Pkt. 5c, oz. 10c, 1/2 lb. 25c, lb. 85c, postpaid.

Pepper.

Pkt. 5c, oz. 10c, 1/2 lb. 30c, lb. 85c, postpaid.

Improved Long Thick Red—A great improvement of the ordinary Long Red Cayenne, bearing fruits the same length, but much thicker, having two to three times as much meat and averaging

Chinese Giant Pepper.
Northern Grown Hardy Seed Peas

Our northern grown, hardy, vigorous seed peas will always give the best results.

Peas mature earlier in a light, rich soil; for the general crop a moderately heavy soil is best. Commence sowing the early varieties as soon as the ground can be worked, continue for a succession every two weeks until June. It is a good plan to sow the early, second early and late varieties at the same time for succession. One quart for 100 feet of drill, 1 1/2 to 2 1/2 bushels for an acre.

Extra Early Varieties.

New Saxonia—See Novelties, page 128.

Pedigree First and Best—Height 2 to 3 1/2 feet. This is the standard extra Early Pea. It grows very vigorously, is very productive and ripens extremely early. Pods are medium sized, and well filled with peas of good size and fair quality. Our strain of this variety is superior to the stock commonly offered. Pkt. 5c, 1/2 pt. 15c, qt. 40c, postpaid. Qt. 25c, 1/2 pt. 80c, pk. $1.50, not prepaid.

Lightning—Height 2 feet. A pedigreed strain of First & Best and the earliest pea grown; it will produce peas fit for the table in 45 days. This strain has been produced by careful work of many years in selecting and re-selecting seed stock, and excels in all others in earliness, size of pods, uniformity of ripening and vigor of growth. Packet 10c, 1/2 pt. 25c, qt. 50c, postpaid. Qt. 35c, 1/2 pt. $1.25, pk. $2.00, not p’d.

Alaska or Earliest of All—Height 2 feet. An extra early blue pea; vines are very stout, and loaded with large, dark green pods, well filled with smooth, blue peas, which are very sweet. Our stock is grown from carefully selected seeds. A valuable variety for the market gardener, and largely grown by canners on account of its desirable color, which it does not lose when cooked. Pkt. 5c, 1/2 pt. 15c, qt. 40c, postpaid. Qt. 25c, 1/2 pt. 80c, pk. $1.50, not prepaid.

Alaska, Keeney’s Pure—Height 2 feet. This pedigreed strain, which has been developed by pea experts by a most careful selection for many years, is the finest, really pure stock of Alaskas in the market, excelling all others in earliness, uniformity of growth, and productivity. It matures practically the entire crop at one time. Of great value to the market gardener. Pkt. 10c, 1/2 pt. 20c, quart 45c, postpaid. Quart 30c, 1/2 peck $1.00, peck $1.75, not prepaid.

Annie or Large Alaska—Height 2 1/2 feet. A splendid early sort resembling the Alaska in manner of growth, but differing from that variety in the much larger size of its pods, and in the time of ripening, which is a week later; owing to the great productivity, the Annie is now largely planted by market gardeners. Packet 5c, 1/2 pt. 15c, qt. 45c, postpaid. Qt. 30c, 1/2 pt. $1.10, pk. $2.00, not prepaid.

Fillbasket—Height 2 1/2 to 3 feet. The vines are of strong, sturdy growth, decidedly branching and bear an enormous crop of magnificent, large, round pods, each containing 6 to 12 peas of remarkable size and very rich and uniform flavor. It is better known as the "Fillbasket," on account of the extraordinary quality of large pods that it produces. Finest second early pea of market and family garden. Pkt. 5c, 1/2 pt. 15c, qt. 45c, postpaid. Qt. 30c, 1/2 pt. $1.00, pk. $1.75, not p’d.

Extra Early Wrinkled Peas.

Surprise or Eclipse—Height 2 feet. (See illustration at top of page.) The earliest of all sweet wrinkled sorts. This new variety is similar to the Alaska in size and form of the pod and in time of ripening, but has the tender quality and delicate flavor of the best wrinkled sorts, and is most desirable for those who wish an early pea with flavor and quality to please the most fastidious. The Surprise is not very hardy and should, therefore, not be planted as early as the smooth peas. In delicious sweetness good judges claim that it is unsurpassed. A favorite with canners on account of its fine flavor. Pkt. 5c, 1/2 pt. 15c, qt. 45c, postpaid. Qt. 30c, 1/2 pt. $1.10, pk. $2.00, not p’d.

Early Morn—Height about 3 feet. This grand introduction maintains its position as one of the best early marrowfat peas ever raised. Altohso early, the seed should not be sown until the soil is in shape. It is a rapid grower, ripening earlier than either Thomas Laxton or Gradus. The best money making early pea for the market gardener. It is an enormous cropper. The pods are very large and well filled, and are often ready to pick during June. Pkt. 10c, 1/2 pt. 20c, qt. 40c, postpaid. Quart 40c, 1/2 peck $1.35, peck $2.40, not prepaid.

Gradus or Prosperity—Height 3 to 3 1/2 feet. An extra early wrinkled pea, only a few days later than First and Best, but with immense pods larger than those of the Telephone, which contain peas of superb quality, luscious and sweet. The vine is similar in appearance to that of the Telephone, the pods are uniformly well shaped and handsome; the peas are very large and of a beautiful green color, which they retain after cooking. On account of its earliness, large sized pod and splendid quality, one of the best varieties to grow for early market. We have taken great pains to secure true stock which has been well grown, so we are sure that everyone who purchases our seed will be pleased with this variety. Pkt. 10c, 1/2 pt. 20c, quart 50c, postpaid. Quart 35c, 1/2 peck $1.25, peck $2.25, not prepaid.

Thomas Laxton—Height 3 to 3 1/2 feet. An early wrinkled variety of great merit. Vines similar to that of Gradus, but darker in color, harder and more productive. Pods are large, long, with square ends and are similar to, but larger, longer and darker than those of the Champion of England and as uniformly well filled. The peas are very large, fine colored and unsurpassed in quality. We are certain that the earliness and productivity of this pea need only to be known to make it one of the most popular sorts for the market and home garden, as in appearance and quality it is one of the very best varieties yet produced. Packet 5c, 1/2 pt 15c, quart 45c, postpaid. Quart 30c, 1/2 pt. $1.10, pk. $2.00, not prepaid.

F. S. & N. C. Co.'s Succession Collection of Peas.

To comply with the wishes of many of our customers, we offer herewith collections of peas for the home garden, consisting of successively maturing wrinkled varieties which will furnish a continuous supply of delicious peas for the table throughout the summer.

Three Excellent Tall Varieties.

Laxton, early—1 Pkt. of each variety for 15c, prepaid.
Telephone, medium—1 pt. " " 45c.
Champion of England, late—1 qt. " " 80c, not p’d.

Three Excellent Dwarf Varieties.

Sutton's Excessor, early—1 Pkt. of each variety for 25c, prepaid.
Advance, medium—1 pt. " " 85c.
Dwarf Telephone, late—1 qt. " " 95c, not p’d.

3/4 pt. $2.85.
PEAS. Continued.

**Dwarf Extra Early Wrinkled Varieties.**

**LITTLE MARVEL**—Height 15 inches. It is believed by many experts that Little Marvel will soon displace Little Gem and Nott's Excelsior. The vines grow very even and uniform, and produce very abundantly good sized pods, frequently in pairs. Pods are very well filled with delicious, deep green peas and are a valuable favorite with many gardeners. Emergency provision is an excellent variety for market on account of the very dark green pods. Packet 10c, ½ pint 20c, quart 55c, postpaid. —Quart 40c, ½ peck $1.35, peck $2.50, not prepaid.

**Nott's EXCELSIOR**—Height 15 inches. As hardy as the earliest market sorts, but in quality equal to the Little Gem. It out-yields that variety and the American Wonder 20 to 30%, and is as early as the latter. The pods are about 3 inches long and each pod contains from 6 to 8 large peas which are tender and very fine flavored. Pkt. 10c, ½ pt. 20c, quart 45c, postpaid. —Quart 40c, ½ peck $1.00, peck $1.75, not prepaid.

**AMERICAN WONDER**—Height 15 to 18 inches. An old variety, well known and highly prized for its flavor and quality, which are of the very best. Of dwarf, robust habit and bearing in abundance good sized pods. Packet 5c, ½ pint 15c, quart 45c, postpaid. —Quart 30c, ½ peck $1.00, peck $1.50, not prepaid.

**PREMIUM Gem**—Improved Little Gem. Height 15 to 18 inches. A trifle later than American Wonder. A very productive and highly esteemed variety for home gardens. Packet 5c, ½ pint 15c, quart 45c, postpaid. —Quart 30c, ½ peck $1.25, peck $2.25, not prepaid.

**SUTTON'S EXCELSIOR**—Height 18 inches. This pea is a great advance over the extra early, dwarf varieties introduced so far, as it has much larger and broader pods, is more vigorous in growth than any of this class, and is unsurpassed in quality. Very hardy, therefore permitting early planting. The pods mature only a few days later than Nott's Excelsior. Packet 10c, ½ pint 20c, quart 50c, postpaid. —Quart 30c, ½ peck $1.45, peck $2.00, not prepaid.

**Second Early and Main Crop.**

**POTLATCH OR BIGGIN**—This splendid new variety has become very popular in the East and with the Chicago market gardeners. It ripens as early as Premium Gem, but the pods are much larger, usually borne in pairs and in greatest profusion. Strong, vigorous vines of even growth, 18 to 20 inches in height, with luxuriant dark foliage, bearing pods medium green in color, 3½ to 4 inches in length, broad and pointed at the ends. No variety known will produce more pods and no pods could possibly shell out better. They are used on the market for 6 days after planting. Every gardener will find it an invaluable addition to his variety collection. Packet 10c, ¼ pint 20c, quart 85c, postpaid. —Quart 40c, ½ peck $1.25, peck $2.25, not prepaid.

**ADVENTURE**—Height 2 feet. Very extensively grown by market gardeners, and also quite largely by canners. The Adventurer is nearly a week later than the Little Gem, and is of healthy, compact growth, bearing in great abundance good sized pods, completely filled with dark green, large, wrinkled peas, which are exceedingly tender, sweet and finely flavored. Pkt. 5c, ½ pint 15c, quart 45c, postpaid. —Quart 30c, ½ peck $1.00, peck $1.75, not prepaid.

**HORSFORD'S MARKET GARDEN**—Height 2 feet. A very fine, second early, green, wrinkled variety, not only good for family gardens, but also for canners and especially for market gardeners’ purposes. Packet 10c, ½ pint 15c, quart 45c, postpaid. —Quart 30c, ½ peck 85c, peck $1.50, not prepaid.

**EVERBEARING**—Height 2½ feet. Vine stout, bearing an abundance of broad pods. If these are picked as they mature, and the season and soil are favorable, the plant will throw out new branches, bearing pods which maturing in succession, thus prolonging the season. The peas are very large and cook very tender; also excellent as a first crop. Packet 5c, ½ pint 15c, quart 45c, postpaid. —Quart 30c, ½ peck 85c, peck $1.50, not prepaid.

**IMPROVED STRAGLIER**—A very fine Main Crop Dwarf Pea. Height about 20 inches. By many considered the highest quality of all wrinkled peas. Packet 20c, ½ pint 50c, quart 150c, postpaid. —Quart 80c, ½ peck $1.50, peck $2.75, not prepaid.

**DWARF TELEPHONE or DAISY**—Height 18 inches. A fine variety for the second early crop, with immense pods and peas. A magnificent sort. The self-supporting support plants are loaded with large, bright green pods, which are always well filled, each pod containing from 8 to 10 peas of bright green color, tender and of delicious flavor. Packet 10c, ½ pint 20c, quart 50c, postpaid. —Quart 30c, ½ peck $1.20, peck $2.00, not prepaid.

**Edible Potted Sugar Peas.**

**MOOREHEAD'S GIANT SUGAR**—A new variety from Europe and the largest podded and finest flavored of all sugar peas. The pods are truly immense in size, 6 to 7 inches long and very broad. An extremely heavy yielder. In quality it is unequalled. Vine grows about 5 feet high, are hardy and vigorous. Packet 10c, ½ pint 25c, quart 75c, postpaid. —Quart 45c, ½ peck $1.65, peck $3.00, not prepaid.

**TALL MEETING SUGAR**—Very desirable name, for this is unquestionably the best in size of pod, prolific bearing and delicious quality. Pods snap without any string and when cooked are very sweet and tender. Packet 10c, ½ pint 20c, quart 60c, postpaid. —Quart 45c, ½ peck $1.15, peck $2.00, not prepaid.

**HUMMOTH POTTED SUGAR**—A late sugar podded pea. Vine 4 to 5 feet. Quality the best of sugar peas. Pods 5 to 6 inches long, thick and fleshy. Cooked like string beans, they are a delightful dish. Extremely productive. Price same as preceding. Packet 5c, ½ pint 15c, quart 45c, postpaid. —Quart 30c, ½ peck $1.00, peck $1.75, not prepaid.

**FIELD PEAS.**

**CANADA YELLOW FIELD PEAS**—The dry peas are of good size and excellent for cooking. A splendid crop to sow with oats or barley for green feed. Will produce a crop and enrich the soil at the same time. Succeeds well anywhere and is very prolific. Packet 10c, quart 30c, postpaid. For price on larger quantities see Farm Seed Department.
PEAS. Continued.

Tall Varieties For Main Crop.

QUITE CONTENT—Pods longer and larger than those of any other pea in cultivation. No pea of modern times has received so much attention as Quite Content; it is the exhibition pea ever seen and has won more prizes than any other variety. Height 3 to 4 feet. This grand new pea bears pods measuring from 7 to 8 inches in length and containing 10 to 12 large, wrinkled peas which are of the finest table quality. Quite Content is a late variety and has dark green foliage; the pods, also dark green, hang mostly in pairs, and are borne in great profusion. It is a pea with which everybody—the grower on account of its great productiveness and high market value, the consumer on account of its exquisite table qualities—should be 'Quite Content'. Packet 10c, 1/2 pint 20c, quart 55c, postpaid.—Quart 40c, 1/2 peck $1.25, peck $2.25, not prepaid.

COLOSSEUM—A splendid new sweet, wrinkled, mammoth pea of the large podded Telephone type, but the pods are larger and the peas sweeter. The plants are of healthy, vigorous growth, the vines attaining a height of 5 feet; foliage and pods are of a rich dark green color. An excellent sort for market as well as for the home garden. Pkt. 10c, 1/2 pint 20c, quart 55c, postpaid.—Quart 40c, 1/2 peck $1.25, peck $2.25, not prepaid.

ALDERMAN—(Also called Improved Telephone and Admiral Dewey.) Height 4 to 5 feet. The vines are remarkably healthy and vigorous, producing an abundance of pods of immense size, quite often measuring six inches in length, which are well filled with sweet and tender peas of the largest size. Foliage, vines and pods are of a rich dark green color. As a heavy cropper it beats all late varieties. Quite extensively grown by market gardeners. Pkt. 5c, 1/2 pt. 15c, quart 45c, postpaid.—Quart 30c, 1/2 peck $1.00, peck $1.25, not prepaid.

CARTER'S TELEPHONE—Height 4 feet. On account of its beautiful large pods and high quality, one of the leading peas with market gardeners. Vines are vigorous and produce an abundance of very large pods, filled with immense peas, which are tender, sweet and of excellent flavor. It is one of the best sorts for either home or market. Packet 5c, 1/2 pint 15c, quart 40c, postpaid.—Quart 25c, 1/2 peck 85c, peck $1.50, not prepaid.

BOSTON UNRIVALED—Height 5 feet. An improved strain of Carter's Telephone, with light colored leaves and pods like the old variety. The vines are covered with fine large pods, measuring 5 inches in length by 1 1/2 inch in width, and containing from 7 to 8 large peas of the finest flavor. We recommend this variety especially to our market gardener customers as the finest stock of Telephone peas in the market. Pkt. 10c, 1/2 pint 20c, quart 45c, postpaid.—Quart 30c, 1/2 peck $1.00, pk. $1.25, not prepaid.

CHAMPION OF ENGLAND—Height 5 feet. This is one of the tallest of the tall growing late peas; it is universally admitted to be one of the richest and best flavored varieties. The vines are vigorous and produce large pods of luscious peas in the greatest abundance. Pkt. 5c, 1/2 pt. 15c, qt. 40c, postpaid.—Pt. 25c, 1/2 pk. 85c, pk. $1.45, not prepaid.

WHITE MARROWFAT—Height 3 1/2 feet. A very heavy yielding, late variety. Pods large and well filled. Vines hardy, vigorous and robust. The dry peas are of enormous size, large, hard and excellent for cooking. Packet 5c, 1/2 pint 15c, quart 35c, postpaid.—Quart 20c, 1/2 peck 65c, peck $1.10, not prepaid.

IMPROVED SUGAR MARROWFAT—Height 3 1/2 feet. Much better than the old White Marrowfat. Pods larger, well filled with large peas of the true marrow flavor, very sweet and tender. A very fine sort for the home garden. Packet 10c, 1/2 pint 15c, quart 40c, postpaid.—Quart 25c, 1/2 peck 80c, peck $1.40, not prepaid.

MISCELLANEOUS.

ALPINE EVERBEARING STRAWBERRIES.

These grow freely from seed and fruit the first summer. In March or April sow seed under glass, and in May transplant to the open ground. By the first of July they commence blooming, and the first fruit ripens about the 15th of that month. From that time on there is ripe fruit continually until late in October. This is the true everbearing sort, while so many others are merely longseason sorts, berries, while not so large as the garden varieties, are much higher flavored. A few of them will perfume a whole room, so great is their delicious aroma. Perfectly hardy. Can be grown in pots in the house very easily. Packet 10c. 3 for 25c, prepaid.

LENTILS.

Largely used in Europe and oriental countries, where it is one of the principal articles of diet. Sow and cultivate same as peas. Packet 5c, 1/2 lb. 10c, lb. 30c, prepaid.

GARDEN LEMON.

Not as popular as the old variety because it has thinner flesh, and is decidedly more acid, thus dispensing with the sliced lemons which are so important in putting on the Vine Peach. Directions for cooking with each packet. Packet 5c, oz. 15c, 1/4 lb. 45c, postpaid.

SWISS CHARD—See page 50.

TOBACCO.

LARGE HAVANA—Very early, yields well and is of fine quality. Pkt. 5c, oz. 25c, 1/4 lb. 75c, p&p.

CONN. SEED LEAF—Best known and most planted sort. Very hardy. Pkt. 5c, oz. 25c, 1/4 lb. 75c.

WHITE BURLEY—A greatly improved type. The leaves are large, wide, porous and make fine plug filler and wrappers. Packet 10c, oz. 35c, 1/4 lb. $1.00, postpaid.
RADIHS:

One ounce will sow 100 feet of drill, 3 to 10 lbs. per acre. For early crop sow as early in the spring as the ground can be worked, and every two weeks through the season, for succession. A warm, sandy loam, made rich and light by strong manure is the best. Sow in drills 10 to 15 inches apart. The winter varieties should be sown in August.

EARLY SCARLET TURNIP

A round red, turnip-shaped radish, with a small top and of very quick growth. A very early variety, especially adapted for early outdoor planting, as well as forcing. Pkt. 5c, oz. 8c, ½ lb. 15c, lb. 50c. prepaid.

EARLY SCARLET TURNIP, WHITE TIP

A most popular and attractive variety, a great favorite in many large markets. The radish is bright scarlet, with white tip, and of a beautiful shape; flesh white, crisp and finely flavored. Our strain is the finest in the market; it is carefully grown from transplanted roots, and always produces radishes of fine scarlet color with a distinct white tip. Pkt. 5c, oz. 8c, ½ lb. 15c, lb. 50c. prepaid.

ROSY GEM or SCARLET TURNIP WHITE TIP FORCING

A very beautiful variety of deep scarlet color, with a large white tip; earlier than the Scarlet Turnip White Tip; a very popular market sort for forcing as well as outdoor planting. Pkt. 5c, oz. 10c, ½ lb. 20c, lb. 60c. prepaid.

Early Scarlet Turnip, White Tip.

EARLIEST ERFURT—The earliest variety, of excellent quality. The roots are small, nearly round, of bright scarlet color, and with a very small top; the flesh is white, crisp and tender. Fine for outdoor growing and one of the best varieties for forcing, being fit for the table in 16 to 20 days. A very handsome variety. Pkt. 5c, oz. 10c, ½ lb. 20c, lb. 60c. prepaid.

NON-PLUS-ULTRA—A very fine, extra early forcing variety of dark scarlet color. Always crisp and tender. Pkt. 5c, oz. 10c, ½ lb. 20c, lb. 60c. prepaid.

SPARKLER—A selection of the Scarlet Turnip White Tip, which is bound to become very popular on account of its beautiful color, its quick growth and fine table qualities. The color of the Sparkler is bright scarlet with a large white tip, covering fully one-third of the roots; the flesh is very crisp, solid and sweet. This variety has small tops, and is equally as well adapted for forcing in frames as for growing outdoors. A fine sort for the home garden, and one of the best to grow for the market, its attractive appearance always securing for it a high price and ready sale. Pkt. 5c, oz. 10c, ½ lb. 25c, lb. 75c. prepaid.

EARLY WHITE TURNIP ROOTED—An early, pure white radish, a trite later in maturity than Early Scarlet, Turnip Rooted. While generally used for early outdoor planting, its small top makes it suitable for forcing size. Pkt. 5c, oz. 10c, ½ lb. 20c, lb. 60c. prepaid.

TRIUMPH—Small, round, and handsomely striped scarlet and white. Pkt. 5c, oz. 10c, ½ lb. 25c, lb. 75c. prepaid.

IMPROVED EARLY SCARLET GLOBE—The leading variety of radishes with market gardeners; equally as good for forcing in greenhouses and hot-beds as for open garden culture. Almost exclusively grown by market gardeners near the Twin Cities. A very handsome radish of rich bright scarlet color and oval shape, with very small tops; the flesh is delightfully crisp, juicy and tender. An extra early variety, fit to be pulled in about 3 weeks. Our strain was selected with the greatest care as to size, shape, color and earliness, was grown from transplanted roots and is fully equal, if not superior, to any other stock of this variety. Pkt. 5c, oz. 10c, ½ lb. 25c, lb. 75c. prepaid.

EARLY WHITE MAY—A beautiful olive-shaped radish, of clear white color. It is one of the very earliest varieties, ready for the table in about 25 days from sowing. The flesh is white, crisp, tender and of delicious flavor. Pkt. 5c, oz. 10c, ½ lb. 25c, lb. 75c. prepaid.

FRENCH BREAKFAST—A quick growing, medium size radish, oblong in shape; color a beautiful scarlet, except near the tip, where it is pure white. A splendid variety on account of its excellent quality and attractive color. Pkt. 5c, oz. 8c, ½ lb. 15c, lb. 50c. prepaid.

EARLY SCARLET OLIVE-SHAPED—Root olive shaped, skin scarlet, flesh white, tender and crisp. Early, and best adapted for general crop, but may also be used for forcing. Pkt. 5c, oz. 8c, ½ lb. 15c, lb. 50c. prepaid.

CRIMSON GIANT—This radish differs from all other forcing varieties hitherto in cultivation in as much as its roots attain more than double the size without getting pithy or hollow. It is very early not withstanding its size. Color crimson, flesh pure white and of the best quality. Fine for outdoors and forcing. Pkt. 5c, oz. 10c, ½ lb. 20c, lb. 60c. prepaid.

YELLOW SUMMER TURNIP—This variety is of quick growth, affording crisp and tender radishes even in the hottest climate. Root globe shaped, with yellow skin and white flesh. Pkt. 5c, oz. 8c, ½ lb. 15c, lb. 50c. prepaid.

MIXED RADISHES—One sowing will produce a variety of delicious radishes the entire season. Pkt. 5c, oz. 10c, ½ lb. 20c, lb. 60c. prepaid.
RADISHES, Continued.

ICICLE—The finest of the long, pure white varieties. Planted in the spring the radishes are ready for use in 30 to 35 days; their long, slender form and pure paper-white skin make them most attractive. The flesh remains crisp and tender until the roots attain a large size. It is excellently adapted for forcing purposes as well as for successive sowing in the open ground. Pkt. 5c, oz. 10c, $1.00, prepaid.

EARLY LONG SCARLET, SHORT TOP—The long, slender, handsomely colored roots are most attractive in appearance, crisp, brittle and of the best quality. They attain a length of 5 to 6 inches, grow half way out of the ground and are ready for use in about 25 days. Pkt. 5c, oz. 8c, 1/2 lb. 15c, lb. 30c, prepaid.

CINCINNATI MARKET or GLASS RADISH—Very similar to Early Long Scarlet, Short Top, but deeper red in color and remains a little longer in condition for use. Profitable market sort; very crisp and fine flavor. Pkt. 5c, oz. 10c, 1/2 lb. 20c, lb. 60c, prepaid.

CHARTIER—One of the best varieties for growing outdoors. The radishes are in good condition for the table very early and remain hard and crisp until they reach a diameter of about 1/4 in.; thus affording good roots for a long time. The roots are long, cylindrical, gradually tapering to a point, are scarlet rose in color, shading into white at the tip. Pkt. 5c, oz. 8c, 1/2 lb. 20c, lb. 60c, prepaid.

LONG WHITE VIENNA or LADY FINGER—A well known long white summer radish of excellent quality. Very popular for the home garden. Price same as Chartier.

WHITE STRASBURG—Larger in size and thicker than White Vienna. Keeps well and is a good market sort. Excellent for summer planting. Price same as Chartier.

Giant White Stuttgart—A turnip-shaped, large white summer radish. Of fine quality, remaining in edible condition a long time. Price same as Chartier.

Winter Radishes.

Sow the seed the later part of June, up to August 1st. Culture same as for other radishes.

CALIFORNIA WHITE MAMMOTH—Long white, of large size. A good keeper; flesh tender and crisp. Pkt. 5c, oz. 10c, 1/2 lb. 25c, lb. 75c, prepaid.

CHINESE WHITE or CELESTIAL—The largest winter radish. Flesh is crisp and very mild. Grown extensively everywhere. Price same as California White.

WHITE MUNICH—A fine German radish of good size and finest quality, mild and crisp. Of questionable origin. Pkt. 5c, oz. 10c, 1/2 lb. 25c, lb. 75c, prepaid.

ROSE CHINA—Of medium size, largest at the top, tapering abruptly to small top, color deep rose. Flesh is white, firm, crisp and pungent. A fine keeper. Pkt. 5c, oz. 10c, 1/2 lb. 20c, lb. 60c, prepaid.

LONG BLACK SPANISH—Keeps longest of all winter radishes. Skin black; flesh white, crisp, quite pungent. Price same as Rose China.

ROUND BLACK SPANISH—Similar to the Long Black, except in shape. Measures a little earlier. Price same as Rose China.

PUMPKIN.

Pumpkins are frequently planted in connection with a crop of corn, or as a second crop after early peas, etc. Plant in drills 8 to 12 feet apart, 1 oz. of seed for 25 hills; 3 lbs. per acre. If planted with corn, 3 lbs. will plant an acre. The fruits are very susceptible to frost, and should be gathered and stored in a cool, dry place early in the fall.

SWEET or SUGAR PIE—This is the small, sweet pumpkin that has made the New England States famous for their pumpkin pies. "Like grandmother used to make." It is a very fine grained, most deliciously sweet-flavored pumpkin, and also a splendid keeper all thru the winter. The fruits average about 10 inches in diameter, are of a round, flattened shape, deep orange-yellow color, and are very attractive. Also most prolific, succeeding splendidly in any location. Pkt. 5c, oz. 8c, 1/2 lb. 20c, lb. 60c, prepaid.

GOLDEN OBLONG—A very hardy productive variety producing fruits 15 to 20 inches in length and 8 to 10 inches in diameter. The skin is of rich golden-orange color and is thin but tough, making it as a good keeper for winter as the hard-shell squashes. The flesh is light golden-yellow and of very rich, fine quality, excellent for pies. Pkt. 5c, oz. 10c, 1/2 lb. 25c, lb. 75c, prepaid.

JAPANESE CROOKNECK—Skin deep green with dark stripes; seeds are marked with curious indentations resembling the characters of the Chinese alphabet. Of medium size, early, very finest quality. Pkt. 5c, oz. 10c, 1/2 lb. 25c, lb. 85c, prepaid.

QUAKER PIE—A very distinctive variety, oval in shape, and of a creamy white color inside and out; the flesh is fine grained and rich flavored, and makes superb pies. It is an excellent keeper.

CONNECTICUT FIELD—An immensely productive, large, orange-colored field pumpkin, usually grown for stock feeding, but also making good pies. There is no variety that will do as well among the corn. Plant them on your richest land, and you will be simply repaid. 5c, 1/2 lb. 10c, 1 lb. 35c, prepaid. $5 lbs. $1.15, 10 lbs. $2.00, not prepaid.

LARGE CHEESE or KENTUCKY FIELD—Of large size, about 3 feet in diameter, round, flattened, hardy and productive. A fine sort for family and market use. Oz. 5c, 1/2 lb. 10c, 1 lb. 35c, prepaid. 5 lbs. $1.15, 10 lbs. $2.00, not prepaid.

MAMMOTH TOURS—Of immense size, often weighing over 100 pounds; oblong in form, skin green. Good sort for exhibition and for feeding stock in winter. Pkt. 5c, oz. 10c, 1/2 lb. 25c, lb. 85c, prepaid.

RHUBARB or PIE PLANT.

Succeeds best in deep, rich soil. Sow in spring in drills, cover one inch. Thin plants to six inches apart. Transplant to autumn or spring to permanent beds.

LINNAEUS—A very early variety, fine grained and delicious. Pkt. 5c, oz. 10c, 1/2 lb. 30c, lb. $1.00, prepaid.

GIANT VICTORIA—Larger than the above, a good seller in all markets; of excellent quality. Pkt. 5c, oz. 15c, 1/2 lb. 45c, lb. $1.80, prepaid.

FOR RHUBARB ROOTS SEE PAGE 109.
SPINACH.

Succeeds best on rich, well-drained soil. Sow early in spring 1 lb. deep in rows 15 to 18 inches apart. For succession sow every two weeks until June. For early spring sow in August and cover over winter. One ounce of seed for 100 foot row; 12 to 15 pounds per acre, or 30 pounds broadcast.

GIANT FILIBASKET—A fine new variety introduced from Germany. The plants form large bushes with dark, glossy green leaves, very thick in texture. A quick grower, furnishing enormous quantities of tender leaves of finest flavor when cooked. Suitable for early and late plantings. Pkt. 5c, oz. 10c, $1 lb. 25c, lb. 60c, prepaid.—5 lbs. $2.25, not prepaid.

BLOOMSDALE SAVOY LEAVED—The earliest variety and one of the best to plant in autumn for early spring use. Plants of upright growth, with medium sized, dark-green, pointed leaves which are crumpled or bilerked. It is hardy and grows rapidly to a suitable size for use but runs to seed quickly in warm weather. Used extensively by market gardeners. Oz. 5c, $1 lb. 15c, lb. 35c, prepaid.—5 lbs. $1.00, not prepaid.

VICTORIA—The foliage is heavy, the broad, dark green leaves being of the true Savoy appearance, and of the finest quality, but the feature that makes it of special use for market and family gardens is that it is still in prime condition from 2 to 3 weeks after all other varieties have run to seed. Oz. 5c, $1 lb. 15c, lb. 35c, prepaid.—5 lbs. $1.00, not prepaid.

WINTER PRICKLY SEED—Very hardy variety which withstand severe weather with only a slight protection of leaves or straw. It is desirable for fall sowing. The seed is prickly. Oz. 5c, $1 lb. 15c, lb. 35c, prepaid.—5 lbs. $1.00, not prepaid.

MÜNSTERLAND—A novelty of the greatest merit; the only real hardy winter spinach the leaves and stock of fine quality. Pkt. 5c, oz. 10c, lb. 15c, lb. 45s, prepaid.—5 lbs. $1.35, not prepaid.

NEW ZEALAND—(Everlasting Spinach)—This is sown to supply the place of the ordinary spinach during the hottest part of the year, or in dry, arid localities, where the ordinary spinach does badly. The plant is very large, with thick, fleshy leaves of very fine flavor. Pkt. 5c, oz. 10c, lb. 15c, lb. 35c, prepaid.—5 lbs. $1.00, not prepaid.

SALSISS or VEGETABLE OYSTER.

HANNIBAL SANDWICH ISLAND—An improved type of the Long White, producing roots of nearly double the size and weight of those of the old variety, and of very superior quality and delicate flavor. Pkt. 5c, oz. 15c, $1 lb. 40c, lb. $1.25, prepaid.

GIANT BLACK RUSSIAN—A very superior variety of the black skinned sorts. Considered by many to be of better flavor than the white. Flesh is white, very tender and of finest quality. Pkt. 10c, oz. 20c, $1 lb. 60c, lb. $2.25, prepaid.

SQUASH.

Plant seed in extra fertile soil in the spring when danger of frost is past. The various varieties should be planted in hills 8 or 10 feet apart each way, and the bush varieties from 4 to 5 feet. Place 10 seeds in a hill and cover with an inch of soil. When plants are well started thinned out, 1 oz. of seed for 25 hills. For running varieties, 5 to 4 lbs. per acre; bush varieties require 6 lbs. of seed per acre.

SUMMER VARIETIES.

GIANT YELLOW SUMMER CROOKNECK—This strain is equally as early as the common small-fruited variety, while the squashes grow to a much larger size, measuring from 18 inches to 2 feet in length. A great grower, with marketable fruits. Pkt. 5c, oz. 10c, $1 lb. 25c, lb. 65c, prepaid.

EARLY WHITE BUSH SCALLOPED—The plants are of true bush growth, producing fruits early in the summer, which are clear, waxy white; excellent for table use. Pkt. 5c, oz. 8c, lb. 20c, lb. 75c, prepaid.

YELLOW BUSH SCALLOPED—Similar to the White Bush, but of deep orange color. Flesh pale yellow. Pkt. 5c, oz. 8c, lb. 20c, lb. 75c, prepaid.

WINTER VARIETIES.

CHICAGO WARTED HUBBARD—The ideal winter squash for the home or market. This strain of the well known Hubbard was produced by careful selection of large, dark green, very warty specimens of the old variety. Vines have a tendency to sprawl and encrease, with dark green, heavily warty skin and flesh of bright orange-yellow color, fine grained, dry, and of sweet, rich flavor. Our seed is Minnesota grown, and will produce fine, large fruits earlier and of better keeping qualities than seed grown in any other state. Pkt. 5c, oz. 10c, $1 lb. 10c, lb. 45c, prepaid.

HUBBARD—The original Hubbard; is similar to the above but smoother and does not run quite so large. Pkt. 5c, oz. 10c, $1 lb. 30c, lb. $1.00, prepaid.

BOSTON MARROW—Second early, coming in about 10 days after the Bush and Crook-neck sorts. Skin yellowish, very thin; the flesh is dry, fine-grained, and of unsurpassed flavor. Pkt. 5c, oz. 8c, lb. 20c, lb. 75c, prepaid.

HANNIBAL WHALE—This is the "Jumbo" of the squash family and creates great attention wherever grown or placed on exhibition. It is an extremely large-fruited sort, frequently attaining more than 100 pounds in weight. The skin is of a dark olive-green, with stripes of a lighter olive. Flesh firm and solid, beautiful orange-yellow, with a very fine flavor. Pkt. 5c, oz. 10c, lb. 35c, lb. $1.25, prepaid.

MANNISH CHILI—Under special cultivation the fruits attain a very great weight and are of attractive appearance. The skin is smooth, and of a rich orange-yellow; flesh very thick, fine-grained and sweet. Very desirable for stock feeding and exhibition purposes. Pkt. 5c, oz. 10c, $1 lb. 35c, lb. $1.00, prepaid.

PIKE'S PEAK or SIBLEY—One of the sweetest, driest and best of all late Squashes. The form is entirely distinct, being pear shaped. The shell is hard and of a pale green color; the flesh thick, fine-grained, of a rich delicate flavor and brilliant orange color. Pkt. 5c, oz. 10c, lb. 30c, lb. $1.00, prepaid.
Tomatoes succeed best in well manured, light sandy soil. For early plants sow seed in boxes or hotbeds in March. When the plants are about two inches high, transplant to four inches apart each way. Set out of doors as soon as danger of frost is over. Transplant carefully, four feet apart each way, and cultivate freely for the first three weeks. To obtain early fruit pinch off the ends of the branches when the first fruit is set. Our seed stock is of the very best selection. One ounce of seed for 300 plants.

**FARIBAULT DWARF CHAMPION**—A Dwarf Champion with fruits twice the size of the old variety, and of delicious flavor unequaled in any other kind. The best of all Three Tomatoes. See Novelties.

**SCARLET EXTRA EARLY JUNE**—Our Extra Early June is earlier than any other sort without exception, ripening a week earlier than the Earliana. It is exceedingly productive and perfectly smooth throughout the season for an early sort of a deep crimson scarlet color; its flavor is all that can be desired; very meaty, with fewer seeds than any other variety. The table quality is surpassed only by the large late beefsteak sorts. The fruit ripens uniformly all over, the skin ends coloring up perfectly. The vines are vigorous and very hardy, setting fruits close to the main and bearing continuously until frost. For the garden market as well as for the home garden this new tomato cannot be too highly recommended, it will give entire satisfaction. Pkt. 10c., 1/2 oz. 20c., oz. 30c., lb. $1.00, prepaid.

**EARLIANA, SPARKS**—Next to our Extra Early June this is the earliest smooth, bright red tomato of good size. The plants are compact growth with short, close-joint- ed branches, setting fruits very freely. The tomatoes are quite uniform in size and of smooth, regular form, averaging 3 inches in diameter, and from 2 to 3 inches in depth; the rind is luscious, solid, and excellent for shipping purposes. Our strain is very fine. Pkt. 5c., oz. 20c., lb. $2.25, prepaid.

**EARLIANA, LANGDON'S STRAIN**—A very fine strain of the Earliana, which is enjoying great popularity in the East. Is said to be earlier and more productive, with fruits of very great uniformity and smoothness. Pkt. 10c., 1/2 oz. 20c., oz. 35c., lb. $1.00, pp'd.

**ACRE**—A splendid early purple fruiting sort. Vine hardy and productive. Fruit in clusters of four to five round, smooth, and of solid flesh with solid and of excellent flavor. Color reddish purple. Ripens early. There is no better variety for market gardeners who want an early purple fruiting sort. Pkt. 5c., oz. 20c., 1/2 lb. 65c., lb. $2.00, prepaid.

**EARLY PLUM—Superb Early Fruit**—It is the earliest tomato producing good marketable fruits. The fruits are of medium size; bright red in color and smooth; meaty solid, of fine flavor. Hardier than any other variety and succeeds everywhere. Pkt. 5c., oz. 20c., 1/2 lb. 85c., lb. $2.25, prepaid.

**CHALKS EARLY JEWEL**—The largest, smoothest and finest flavored second-early scarlet tomato in cultivation. The plants are of compact growth with dark green leaves and fairly loaded with fruit throughout the season. The large, handsome, bright scarlet fruits are very solid and deep true, being almost round, and ripen right up to the stem without any cracks or green core and have comparatively few seeds. The flesh is thick and sweet, skin thin, but strong, making it a good shipper. Pkt. 5c., oz. 20c., 1/2 lb. 65c., lb. $2.25, prepaid.

**JUNE PINK**—The earliest large pink tomato. Grows very largely as an early sort for markets like St. Paul and Minneapolis, where pink sorts are preferred. Very similar to the Earliana, differing only in color. The fruit is of medium size, uniform, smooth, and attractively shaped, without cracks or an over thick in color; will average 4 inches in diameter, and 2 to 2 1/2 inches in depth. The skin is reasonably tough, so it is excellent for shipping purposes. Very productive, very strong, very fine to bear and ripen fruits until frost. Pkt. 5c., oz. 25c., 1/4 lb. 75c., lb. $2.75, prepaid.

**HEAVY**—The standard large fruit, medium early, pink variety. A hardy, strong, productive cropper, producing large, always smooth fruits of perfect shape, excellent quality, and purplish pink color. The tomatoes grow in clusters of 4 to 6 and retain their splendid size until late in the season. Flesh is very firm; has a tough skin and but few seeds. Sol- dom rots or cracks after rain. A good shipper quite extensively grown in this state for the market. Pkt. 5c., oz. 15c., 1/4 lb. 50c., lb. $1.75, prepaid.
TOMATOES. Continued.

BONNY BEST EARLY—Is fully 10 days earlier thanCharles Darwin Eggplant, and about as early as Earlina. It is a vigorous grower, enormously prolific, setting 12 to 15 smooth, round, globe-shaped fruits in the crown setting, and as a shipping tomato it is one of the very best, as the entire picking will grade in the same crate owing to its remarkable evenness of size. Bonny Best Early in color is an intense, velvet glossy scarlet; ripens up evenly to the stem without crack or black spot. We can highly recommend this tomato as an extra good market and home garden sort. Also good for forcing under glass.

Pkt. 10c, oz. 30c, 1/4 lb. $1.00, lb. $3.50, prepaid.

CRIMSON CUSHION or BEEFSTEAK—The fruits of this very fine appearance, large, round and regular and of bright scarlet color; flesh solid and of the best quality with but few and small seed cells. The plants are very productive. Very similar to Ponderosa differing only in the color of the fruits. Pkt. 5c, oz. 30c, 1/4 lb. $1.00, lb. $3.50, prepaid.

PEERLESS TREE—Grows from 10 to 15 feet in height, and planted early will begin to ripen its luscious fruit by July 1st and continue to bear heavy loads of same until killed by frost. The flesh is firm and solid, almost seedless, fine grained, bright red and of the most delicious flavor ever found in a tomato. The fruits are of the largest size, weighing from 16 to 24 ounces. One well developed plant will produce enough fruit for a small family the entire season, and every owner of a garden should not fail to grow this wonderful tomato. Pkt. 10c, 3 for 25c.

SMALL-FRUITED TOMATOES.

The fruits of these are largely used for making fancy pickles, preserves, etc.

Cherry red.................Pkt. 5c, oz. 20c, 1/4 lb. 60c
Cherry yellow.............Pkt. 5c, oz. 15c, 1/4 lb. 50c
Pear red....................Pkt. 5c, oz. 15c, 1/4 lb. 50c

GARDEN HUCKLEBERRY

This wonderful new berry fruit, which belongs to the tomato family, can very easily be grown from seed the first year, and produces berries about as large as an average sized gooseberry; they are of jet black color, and when cooked as palatable as the real huckleberry. Sow seed in a box or pan in early spring, and when danger of frost is over set out 3 x 3 feet. Cultivate same as tomatoes. The berries do not taste well raw but they make better pies, jelly and sauce than the wild huckleberry. For winter use take up the vines just before frost and store them away.

Pkt. 10c, 3 for 25c, prepaid.

SWEET, POT AND MEDICINAL HERBS.

Anise—Seeds have an agreeable aromatic odor and taste. Used for seasoning. Pkt. 5c, oz. 10c.

Balm—Leaves are used for making a pleasant beverage and for tea. Pkt. 5c, oz. 25c.

Basil—Leaves used in flavoring soups or stews, and highly seasoned dishes. Pkt. 5c, oz. 15c.

Borage—Leaves used for flavoring flowers, furnish bee pasture. Pkt. 5c, oz. 15c, 1/4 lb. 40c.

Chamomile—The dried flowers are much used for tea, and other medicinal purposes. Pkt. 5c.

Caraway—Grown for the seeds, which are used for flavoring. Pkt. 5c, oz. 10c, 1/4 lb. 20c, 1/2 lb. 60c.

Horehound—Leaves are used in the manufacture of cough remedy, also for seasoning. Pkt. 5c, oz. 20c.

Lavand—Highly valued for seasoning and culinary purposes. Pkt. 10c.

Mint, Curled—For mint sauce and juleps. Pkt. 50 seeds 10c, 200 seeds 25c.

Marjoram—The young, tender tops are used green for flavoring, or they may be dried for winter use for flavoring broths, dressings, etc. Pkt. 5c, oz. 15c, 1/4 lb. 45c.

Peppermint—The leaves and stems are used for flavoring and in cool drinks. Seed should be started in boxes in the house. Pkt. 5c, oz. 15c.

Rue—For medicinal purposes—also for flavoring. Pkt. 5c, oz. 20c.

Rosemary—Leaves are used for seasoning. Oil from flowers used in perfumery. Pkt. 5c, oz. 5c.

Saffron—Flowers are used for dyeing, also for flavoring. Pkt. 5c, oz. 10c.

Sage—The leaves and tops are used very extensively for seasoning. Pkt. 5c, oz. 15c, 1/4 lb. 40c.

Summer Savory—For flavoring soups, dressings, etc. Pkt. 5c, oz. 10c, 1/4 lb. 30c.

Sweet Woodruff—For flavoring wine. The well known ingredient of the German "Malzbraun." The shoots are also used for scented clothes. Pkt. 10c.

Tansy—Leaves are used for tea and in dressings. Pkt. 5c, oz. 25c.

Thyme—The young leaves and tops are used for seasoning soups, dressings, etc., and as a tea made from the leaves is a remedy for headache. Pkt. 5c, oz. 30c, 1/4 lb. $1.00.

Wormwood—Used for medicinal purposes. Pkt. 5c, oz. 25c, 1/4 lb. 75c.
One ounce will sow 15 feet of drill. Two lbs. per acre in drills, three lbs. broadcast. Turnips do best in a finely enriched sandy or loam, loamy soil, and in drills of 12 to 15 inches apart, and thin out to 6 or 8 inches in the row. For late or main crop, sow in July and August.

**EXTRA EARLY WHITE MILAN**—The earliest of all turnips, and of excellent quality. The top is very small, upright and compact, so the rows can be planted close together. The roots are clear white, very smooth, flat and symmetrical. The flesh in white, sweet and tender. Pkt. 5c, oz. 10c, ½ lb. 30c, lb. $1.00, prepaid.

**WHITE SIX WEEKS**—The earliest and most perfectly formed round turnip. The roots are very uniform in size and shape. Short top and a single tap root. The flesh is snowy white, crisp and very sweet. Is of quick growth and suitable for early use as well as later sowings. We highly recommend it. Pkt. 5c, oz. 10c, ½ lb. 20c, lb. 60c, prepaid.

**WHITE EGG**—A very popular and early variety, adapted for either spring or fall sowing. It is perfectly smooth, with a clear white skin and flesh, and grows half out of the ground. A very fine kind for table use, being of excellent flavor, mild and sweet. It is very attractive as the roots look like huge white eggs. Early and very productive. 1 oz. will have been raised to the acre as a second crop. Pkt. 5c, oz. 8c, ½ lb. 20c, lb. 60c, prepaid.

**EARLY WHITE FLAT DUTCH STRAP LEAVED**—A most excellent garden turnip, and like Purple Top Strap Lent, a standard flat variety, maturing at the same time. Root medium sized, from 4 to 5 inches in diameter and about 2 inches thick; color white; flesh sweet and tender, and very desirable for table use; a good keeper. Pkt. 5c, oz. 8c, ½ lb. 15c, lb. 45c, prepaid. 5 lbs. $1.50, 10 lbs. $2.75, not prepaid.

**PURPLE TOP WHITE GLOBE**—This is the most popular of all market turnips. Roots are of globular shape, and good size, and in appearance are the best of all varieties. The flesh is firm, fine grained, white, and of most excellent flavor. It is a fine keeper and as desirable for table as for stock. An immense producer. Pkt. 5c, oz. 10c, ½ lb. 20c, lb. 60c, prepaid. 5 lbs. $2.50, 10 lbs. $4.50, not prepaid.

**EARLY PURPLE TOP STRAP LEAVED**—The most extensively used flat variety. Quite early, only about a week later than the Milan or Snowball. Roots flat, medium sized, of purple or dark red color above the ground and white below; flesh white, fine grained and tender; leaves few, upright in growth. Early and very productive. 1 oz. will have been raised to the acre as a second crop.

**WHITE GLOBE STRAP LEAVED**—A large, heavy yielding turnip of globular shape. Fine quality for table use and stock. Pkt. 5c, oz. 8c, ½ lb. 15c, lb. 45c, prepaid. 5 lbs. $1.50, 10 lbs. $2.75, not prepaid.

**NORFOLK LARGE WHITE**—A well known large, flat, round turnip of superior quality. Yields enormous quantities of solid roots that keep longer than any other variety. Good for table use and stock. Extensively grown in many sections, especially in the East. Pkt. 5c, oz. 8c, ½ lb. 15c, lb. 45c, prepaid.

**LONG WHITE COWHORN**—A quick growing variety of excellent quality. Early and best for early and late planting. Pkt. 5c, oz. 10c, ½ lb. 20c, lb. 60c, prepaid.

---

**RUTABAGAS or SWEDES.**

They require the same culture as turnips but a longer season. For table use they are considered of better flavor and keep longer.

Prices except where noted: Packet 5c, ounce 8c, ½ lb. 20c, lb. 50c, prepaid. 5 lbs. $1.75, 10 lbs. $3.25, not prepaid.

**IMPROVED AMERICAN PURPLE TOP**—Our strain is remarkable for its uniformity in size. The roots grow to a large size, have small tops, short necks, and smooth skin; flesh is of beautiful yellow color, fine grained, very sweet, tender and of excellent flavor. Pkt. 5c, oz. 10c, ½ lb. 20c, lb. 60c, prepaid.

**BUDLONG'S IMPROVED**—White, very sweet, of much milder flavor than any other sort; globe shaped, skin cream yellow.

**MONARCH or TANKARD**—This is a yellow fleshed sort, having very large tankard shaped roots with relatively small necks and tops. Color purplish crimson above ground, yellow below; flesh very solid, fine grained and of the best flavor.

**UNIVERSAL or CANADIAN GEM**—Roots nearly round, purple above ground and yellow beneath; very small in top and neck; flesh yellow and of excellent quality. This variety is drought and mildew resistant to a remarkable degree.

---

**VEGETABLE PLANTS.**

We can supply good, healthy plants of all the varieties below, and below, in their proper season. Packing charges are included in the prices given.

COLLECTIONS OF GARDEN AND FLOWER SEEDS.

Although we offer these collections at comparatively lower prices than seeds selected from our regular list, we use only seeds of the highest quality for them. On account of being able, however, to put up these collections at our leisure, before the rush of our busy season begins, we are in a position to offer them at such low prices, but cannot make any changes in the assortment.

The selection of the seed for the different collections is made with the greatest care, and offers to the private planter, not familiar with the different kinds, the advantage of obtaining only such seeds as will bring the best results. All the collections named below being already put up we can fill your order for them promptly.

**Farmer Seed & Nursery Co's Reliable Flower Seeds.**

All Flower Seeds are sent prepaid by mail or express. Cultural directions are given on all packets.

### ACHILLEA

2 **Parnica "The Pearl."** (Doubf White Yarrow). One of the best hardy perennials. Grows about 2 feet high, and is covered from spring till frost with heads of purest white, double flowers. A grand plant for cemetery decoration. Easily grown from seed. Sow early. Pkt. 10c, ½ oz. 85c.

### AGONITUM (Monk's Blood or Wolfbane)

3 **Napellus.** A hardy perennial, growing in any good garden soil and producing showy, long spikes of hood-shaped blue and white flowers. Well adapted for planting among shrubbery or in shady corners of the garden; 3 to 5 ft. high. Pkt. 8c.

**Acroclineum.** (See page 80). **Adlumia.** (See page 80).

### AGERATUM

Next, busby and erect, growing plants, bearing continually clusters of pretty flowers during the whole season. The dwarf blue sorts are some of our very best border plants and are especially fine when used in contrast with Geraniums, Salvia, Canas, etc. They thrive everywhere and are easily grown from seed.

7 **Blue Perfection.** Deep amethyst-blue, the darkest colored of all large-flowering varieties. Height 9 in. Pkt. 8c, oz. 20c.

8 **Little Blue Star.** A charming miniature variety, invaluable for small beds and edgings. The plants are perfectly compact, attain a height of not more than 4 in. and are literally covered with small, bright blue flowers. Pkt. 10c.

### ALYSSUM

Pretty, little, sweet-scented plants very useful for beds, vases and edgings, blooming profusely all summer. They are quite hardy and can be sown very early in the open ground.

10 **Sweet Alyssum (maritimum).** Plants 8 inches high, with clusters of pure white flowers; hardy annual of easiest culture. Pkt. 5c, ½ oz. 15c, 1 oz. 25c.

12 **Little Gem or Carpet of Snow (saxatile).** An improved sort of dwarf, compact habit, about 4 in.

### AMARANTHUS

15 **Annual varieties 2 to 3 ft. high with brilliant foliage; the leaves and stems are of different shades of red, blended with green.** All varieties are useful for borders of tall plants or for the center of beds. Mixed. Pkt. 5c.

### ANCHUSA CAPENSIS

16 **Cape Forget-me-not.** A rare, little known, hardy annual of great beauty, resembling a large forget-me-not of deep blue color. Blooms all summer and thrives in the shade and all such out-of-the-way places, where scarcely anything else will grow. Pkt. 5c, ½ oz. 15c.

### Antirrhinum, or Snapdragon

A charming old-fashioned flower; the large blooming varieties, with their long spikes of brilliantly colored flowers produced during the whole season, are fine bedding plants. Hardy annuals; the tall varieties grow about 2 ft., the dwarf ones about 12 inches high.

20 **Tall Large-Flowering Mixed.** Pkt. 5c, ½ oz. 10c.

21 **Queen of the North,** large white flowers, deliciously sweet; a gem for beds and pot culture of dwarf growth. Pkt. 10c; ½ oz. 15c.

22 **Dwarf Large-Flowering,** finest colors mixed. Pkt. 5c, ½ oz. 15c.

### AQUILEGIA or COLUMBINE

Charming hardy perennial of easy culture, growing 4 ft. high. The plants make a magnificent display of handsome, loose-spurred flowers in early spring and summer.

23 **Finest double mixed**. Pkt. 5c, ½ oz. 15c.

24 **Coerulea,** (Rocky Mountain Blue Columbine). One of the most beautiful of our native flowers. Pkt. 10c, ½ oz. 25c
Asters.

ASTERS are today one of the most popular and most important summer and autumn flowers, as they appear in their fullest beauty when the ordinary summer flowers are beginning to look rusty; their blooms are freely produced, are very effective, and last until spoiled by the frost of autumn.

Asters are classified according to their height, as tall, half dwarf and dwarf. The tall varieties are fine for the center of large beds and for cutting; the dwarfs are particularly fine for borders or masses of one color, as they are compact and bloom very profusely; the semi-dwarfs are good for all purposes and extra fine for pot culture.

Plants from seed sown in the open ground in May will bloom in September and October; if started in the hot bed, pots or boxes in the house, in March or April, flowers can be had in July and August.

Tall Varieties.

American Giant Branching.

The finest of all Asters for the American Climate. The plants are healthy, robust growth, about 2 to 3 feet high, and have a tendency to form numerous branches, which gives the class its name. These asters are wonderfully prolific and continue to bloom from summer until checked by frost; their magnificent blooms measuring 4 to 5 inches across, are of perfect form, exceedingly double to the very center and are borne on strong stems from 15 to 18 in. long. The petals are both long and broad, and are more or less twisted and curled, giving the flowers a chrysanthemum-like appearance.

One packet each of these 4 colors for 30c.

30—Pure white. Pkt. 10c, 1/4 oz. 20c, 1/2 oz. 35c.
31—Crimson. Pkt. 10c.
28—Lavender. Pkt. 10c.
29—Dark blue. Pkt. 10c.

Hohenzollern Asters.

The finest strain of the Giant Comet or Ostrich feather type; the flowers are larger, with petals more curved and twisted than those of the Giant Comet; they are produced in great abundance, and borne on long stems, which makes them excellent for cutting. Height 2 feet, bloom in September and October; for Taylor and commercial purposes; they are, to all intents and purposes, almost a dwarf type, with flowers an inch across, and surpass all others in beauty.

43—All colors mixed. Pkt. 5c, 1/4 oz. 15c, 1/2 oz. 30c.

HERCULES ASTER.

44—Pure White. Pkt. 10c. This new variety is similar in shape to the Hohenzollern type, but is a marvel on account of its huge size, measuring 6 to 12 feet across, and surpasses that of all other asters; the flowers are of most refined shape, graceful form, and of such perfect doubleness that no yellow center shows. Pkt. 15c.

Pkt. 10c, 1/4 oz. 25c.

6 of the Best American Asters.

These asters are of different types, but are all of strong, healthy growth, free-flowering and belong to the finest and most beautiful varieties produced.

62 Daybreak. A beautiful early aster, commencing to bloom in August; the flowers are ball-shaped, very double and of a lovely shell-pink color; excellent for cutting; height 18 in. Pkt. 10c.

78 Lavender Gem. An early ostrich feathered aster, with long, artistically arranged petals of the most charming shade of lavender imaginable. The flowers are large and are borne in profusion on long, wiry stems. Pkt. 10c.

64 Purity Aster. Identical in form and habit with the Daybreak, but the blooms are pure, glistening white. Pkt. 10c.

79 Snowdrift. An early extra ostrich feathered strain which comes into bloom in July; the flowers are large, plump, snow-white and unsurpassed in beauty. Pkt. 10c.

31 Violet King. A new and distinct strain of the late branching class, with very large, perfectly double flowers of a soft violet-like color. Pkt. 10c.

99 Crimson King. A superb strain of the late branching class with extra large densely double flowers of very rich, blood-crimson color, making a brilliant bed or border; very desirable for cutting. Pkt. 10c.

One Packet each of the above varieties for 50c.

SINGLE FLOWERING ASTERS.

60 Original China Aster. These Single China Asters are very effective in beds or borders, and offer a pleasant change to the innumerable double sorts; mixed colors. Pkt. 5c, 1/4 oz. 25c.
ASTERs, Continued.

Half Dwarf Varieties.

GIANT COMET or POODLE ASTERS.

A very beautiful Aster; the immense size of the flowers and the long, wavy, twisted petals produce an effect not unlike that of the finest Japanese Chrysanthemums. Height 15 to 18 inches; blooms in August.

Price: Each, Packet 10c, 3 for 25c; ½ oz. 25c.

CANARY BIRD ASTER.

33—The best yellow variety known: the flowers are of large size, and of the Victoria strain, perfectly double, and of a rich golden color. Its greatest value lies in its rich color, which shows to best advantage when grown with other colors... Pkt. 10c.

WHITE LADY.

61—This beautiful aster has become a great favorite everywhere. It is one of those rare gems that has come to stay; no private garden is complete without it, and for florists use it is simply unsurpassed. The flower is of an exquisite, pure snow-white color and is always full double, showing no tendency to produce single or semi-double blooms. In habit of growth the plant is erect and of medium height. The flowers are borne on large, slender wiry stems... Pkt. 10c.

VICTORIA ASTERS.

Considered by some the most beautiful asters in cultivation. The plants are strong growers, about 2 ft. high, and branch freely into well formed pyramidal bushes, each bearing 15 to 20 magnificent large flowers, measuring 4½ to 5½ inches across. The double petals are curved outward and lie in the fashion, one on top of the other. The Victoria class is perhaps the most showy and massive of all asters and is excellent for both bedding and cutting; blooms during August and September.

Queen of the Market.

Of all the many new varieties of asters, which have been offered in the last years as "just as early or earlier" than the Queen of the Market, none equals this old favorite in evenness of growth and bloom; size and fullness of flower or color; can replace it in general usefulness.

The Queen of the Market is yet to be regarded as the earliest flowering of all first-class varieties. It comes into bloom in July, or fully three weeks in advance of the latest flowering sorts; the plants are of branching habit and bear, on long stems, good sized flowers in great profusion which are excessively free for cutting; height one foot.

Packet. Each 5c, ½ oz. 25c.

Dwarf Varieties.

GLORIA, or BUTTONHOLE ASTER.

62—Height 10 inches; very branching and free blooming, as many as 40 flowers having been counted on one plant. The flowers are 1½ inches in diameter and are pure white, with a beautiful scarlet margin. It is the prettiest aster we know of for buttonhole wear or small vases; worn in the buttonhole, the flowers last a day in the hottest weather. Pkt. 10c, 2 for 25c.

DWARF HOHENZOLLERN.

A new, splendid strain of dwarf asters about 6 to 7 inches in height. The flowers are very large, perfectly double and the petals curved and twisted, similar to those of a good giant Comet Aster. Fine for growing in pots, as well as for beds and borders. There is no other variety of asters, of such dwarf growth, that produces flowers of such perfection and size.

85—White..............Pkt. 10c, ½ oz. 35c.

83—Crimson.............Pkt. 10c, ½ oz. 35c.

84—Azure Blue........Pkt. 10c, ½ oz. 35c.

86—Mixed colors........Pkt. 10c, ½ oz. 35c.

ASPARAGUS.

91 Plamosus Nanus. This graceful climber has finer foliage than the most delicate fern; an excellent house plant.

92 Sprenger (Emerald Feather). Fine for suspended baskets; fronds 4 ft. long... Pkt. 10c.

ASPENUL.

00 Odorosa (Sweet Woodruff). Grown for its fragrant leaves and stems; flowers small, white...

89 Azulas Setosa. Splendid annual of easiest culture, about 9 in. high, covered throughout the summer with light lavender-blue, fragrant flowers... Pkt. 5c; ½ oz. 15c.

BALSAMS, Lady's Slipper.

Balsams deserve their increased popularity and should be extensively grown in beds and borders, as the plants make a splendid show, yielding an abundance of flowering sprays which are also fine for table decorations. A quick-growing, tender annual of the easiest culture; seed should be sown in the open ground in May and the plants thinned out or transplanted in 1½ in. apart. Our seed is of the best quality and produces large, full-double flowers.

153 Double Camellia-flowers mixed, large flowers, perfect and double, like Camellias, produced in wonderful profusion; 2 ft. high...

The Royal Balsams.

The finest of all Balsams, having the largest flowers of the most perfect form and the fullest doubleness. Height 1½ foot.

167 The King, intense scarlet, exquisite.................Pkt. 10c, ½ oz. 25c.

168 The Queen, pure, bright saffron-yellow, a lovely color.................Pkt. 10c, ½ oz. 25c.

182 White Monarch, pure white, extra large.................Pkt. 10c, ½ oz. 25c.

Balloo Vine. (See page 89.) Balsam Apple. (See page 89.)
BEGONIA.
All Begonias are fine pot plants and are also deservedly popular for bedding, thriving equally well in full sunlight as in a shaded position. They have handsome foliage and bear continuously and in great profusion lovely flowers of wax-like texture, in exquisitely soft, delicate shades. Sow seed in the house in Feb. or Mar. and set out plants as soon as the ground is warm.

161 Vernon, an ever-blooming variety with bright orange-carmine flowers and deep red foliage; 6 in. high; extensively used for bedding...Pkt. 10c.
169 Eriodoria, the pink-flowered sort: dark green foliage; 6 in. high...Pkt. 15c.
160 Rex, mixed sorts, the finest ornamental pot plants with beautifully variegated foliage, does not bloom...Pkt. 20c.

BROWALLIA.
166 Speciosa Major. A beautiful large-flowering variety of a bright violet-blue color, relieved by a white throat. Very fine for bedding, hanging baskets and vases, but especially valuable as a pot plant for winter and early spring flowering; height two feet...Pkt. 10c.

Every one is interested in these curious plants, and considering the comparative ease with which the plants can be grown from seed, it is not surprising that there is such a large demand. Start seed in boxes or pots at any time.

170 Cactus. Many important varieties in splendid mixture...Pkt. 10c.

CALCEOLARIA.
An ornamental house plant, producing a mass of beautiful pocket-like flowers early in the spring.

201 Hybrida, grandiflora, large flowering, mixed colors...Pkt. 20c.

CALENDULA, or Pot Marigold.
One of the best and showiest, free-flowering, hardy annuals, continuously in bloom until killed by frost. It grows in any good garden soil, producing a fine effect in beds or mixed borders, valuable also for pot culture. One foot high.

202 Officinalis, large flowering double, mixed colors...Pkt. 5c.

CAMELIA.
Our mixture of Camellias is the finest available and the plants are equal to the best imported kinds. They are of the most even and uniform habit, and are selected from the finest sorts to suit the American climate. They do not require much in the way of culture, as they will grow in almost any soil, and succeed in all climates except the hottest. They make attractive house plants, and are also very valuable for the exposure in March and April, when the outdoor planting of the hardier sorts is not advisable. Sow seed in March, and transplant the young plants before the middle of April. They are equal in beauty to the best imported sorts.

205 Medium single mixed...Pkt. 5c.

206 Medium double mixed...Pkt. 5c.

267 F. S. & N. Co's Improved Mixture; finest mixture of many different varieties and all colors...Pkt. 5c, ½ oz. 10c.

CAMPANULA, CANTERBURY Bells.
Impressive, hardy plants profusely covered with large, bell-shaped flowers which are extremely showy in shrubbery and borders. They are easily grown from seed; will bloom for years, but require protection during the winter. Height 24".

207 Medium single mixed...Pkt. 5c.

CANNAS.
Cannas, with their luxuriant foliage and immense flowers of the most brilliant colors, are grown continuously and abundantly, as easily the most useful and showy garden plants for the American climate. Seeds started in the house in March and April will produce flowering plants by July.

216 Large flowering, finest colors mixed...Pkt. 5c, ½ oz. 15c.

217 Dark-leaved varieties, mixed...Pkt. 5c, ½ oz. 15c.

CARNATION.
Carnations are general favorites on account of their bright colored, deliciously fragrant flowers. The Marguerites and Chabauds are the best for summer blooming; the strains which we offer here are the best and largest flowering and also the very earliest and can be had in bloom four months from sowing.

218 Perpetual Early Flowering, double Chabaud. A very fine, early and large-flowering strain, likely to produce flowers fully equal to the best greenhouse sorts; it contains a great variety of colors and shades, very fine for pot plants. Mixed colors...Pkt. 15c.

219 Hardy German Carnations. The finest assortment of extra double, sweet-scented carnations from the best German Growers. For garden and house culture. Superior mixture...Pkt. 10c.

222 Marguerite, double, large-flowering, mixed. These beautiful, double, frilled flowers make a brilliant display of attractive coloring in beds and borders and are especially prized for table decorations. Our strain produces a very high percentage of doubles. Height 18 inches...Pkt. 5c, ½ oz. 25c.

CINERARIA.
Cape Aster. A favorite, free-flowering greenhouse or window plant, the shades including blue, purple, crimson, maroon, etc. Many varieties produce flowers with a clear white eye. Height 1 foot; flowers 2 inches across, or more.

248 Large-flowering single mixed. Our strain is very fine, producing large, brilliant colored flowers...Pkt. 25c.

COBAEA SCANDENS. (See Climbers, Page 90).

COILY OR JOBS TEARS. (See Ornamental Grasces, Page 99)

GERMAN CARNATION, No. 219.
Centaurea.
Plants of the hardiest nature and simplest culture, yet esteemed as one of the most attractive and graceful of all the old-fashioned flowers. The flowers, with their long, wiry stems are very useful for cutting, and when planted in water increase in size.

Cornflower. (Centaurea Cyanus).
231 Blue Emperor, single, very fine, cut-flower. Pkt. 5c, 1 oz. 10c.
232 Single mixed. Pkt. 5c, 1/2 oz. 25c.
233 Blue Emperor, double. Pkt. 5c, 1/2 oz. 10c.
241 Double mixed. Pkt. 5c, 1/2 oz. 10c.

Giant Sweet Sultans. (Centaurea Imperialis).
The finest class of the Sweet Sultans with beautiful, sweet-scented, artistically-shaped flowers.
246 Mixed, all colors. Pkt. 5c, 1/2 oz. 10c.

White-Leaved Centaureas. (Dusty Miller).
Fine for edgings, vases and hanging baskets.
229 Centaurea, silver-white. Pkt. 5c.
230 Centaurea, silver-gray. Pkt. 5c.

Chrysanthemum.
Annual Sorts.
Showy and effective in the garden, especially when grown in large beds or masses; they are also very desirable for cut-flowers; bushy, compact plants about 18 inches high.
241 Mixed, all colors, double and single. Pkt. 5c, 1/2 oz. 10c.
245 Mixed, all colors, double and single. Pkt. 5c, 1/2 oz. 10c.

Perennial Sorts.
246 Japanese Hybrids. This is the class that produces the large show flowers of late fall. Our mixture contains only the earliest kinds and finest colors. Plant the seed early.....Pkt. 15c.

Cockscomb. (Gelosia).
Annuals of the easiest culture, producing in great masses flowers of the most striking and gayest coloring and of various unique forms. The innumerable small flowers of the cockscomb form a brilliantly colored mass, corrugated and frilled at the edge, like a cock's comb and are fine for edgings and pot plants. The plumosa sorts have large os- trich feather-like plumes; are beautiful in large groups.
225 Cristata Cockscomb, dwarf mixed. Pkt. 5c, 1 oz. 15c.
226 President Thiers, dwarf, luscious, brilliant dark crimson combs. Pkt. 10c, 3 for 25c.
228 Plumosa Thompsonii magnifica, finest mixture of ostrich-feathered sorts, magnificent shades, ranging from clear yellow to the darkest blood-red. Pkt. 5c, 1 oz. 15c.

Coleus.
Tender annual, ornamental foliage plants, with leaves of many shapes and of various shades of rich velvety colors; they are indispensable for borders and bedding and excellent for window garden; easily raised from seed.
256 Mixed, many varieties. Pkt. 5c.
257 Ornatus, the finest strain of Coleus with large leaves, crimped, frilled and irregularly spotted and marbled in the richest combinations of colors. Strikingly handsome plants; height 24 feet......Pkt. 15c, 2 for 25c.

Coreopsis or Galliopsis.
Showy and handsome, free-flowering plants, which beautify our gardens from June until frost. Gold and maroon of the most brilliant hues are the prevailing colors, and nothing is more effective than a bed of these golden flowers; they are also very useful for cutting. Easily raised from seed; they will grow and thrive everywhere.

Annual Sorts or Galliopsis.
261 Tall Mixed. Pkt. 5c, 1/2 oz. 10c.
262 Dwarf Mixed. Pkt. 5c, 1/2 oz. 10c.

Perennial Sorts or Coreopsis.
261 Lanceolata, grandiflora. Golden Glory, a showy, hardy plant. Blooms from seed the first year. To bloom all summer......Pkt. 5c, 1 oz. 15c.

Cosmos.
Strong, tall-growing, half-hardy annuals, with beautiful, feathery green foliage from which arise, on long stems, an abundance of daisy-like flowers in shades of pure white, pink and crimson. The plants bloom in the fall and furnish cut-flowers when other varieties are scarce. They are very effective if grown in masses. The early varieties may be sown in the open ground and will then bloom in July, but the later kinds should be started in the house.
263 Early-flowering varieties mixed. Pkt. 5c, 1/2 oz. 25c.
264 Early Dawn, white, with a tinge of delicate rose at the base of the petals. Pkt. 5c, 1 oz. 20c.
262 Giant-flowering, mixed, magnificent flowers of large size and perfect form; a late strain. Pkt. 5c, 1 oz. 15c.
**CYPRESS VINE.** (See Climbers, Page 90).

**DAHLIA.**

Dahlias plants from seed sown early in the spring will bloom abundantly the first summer, and give a magnificent display of bright colors late in the season. The dahlia is a tender perennial. Roots must be brought into Winter.

- 300 Double Fine Mixed, very large flowering show sorts, all colors. Pkt. 5c, 1/4 oz, 25c.
- 301 Double Cactus Perfection. Seed is saved from an extensive collection of the best varieties selected over a period of years. Pkt. 10c.
- 302 Single Giant Perfection. This strain produces flowers of immense size averaging 6 in. across, of the most bewildering variety of colored, mixed colors. Pkt. 10c, 1/4 oz, 30c.
- 303 Crown, or Fragrant Dahlia. Last year's novelty, single, brilliant scarlet flowers with a honey-like fragrance. Pkt. 15c.

**DATURA Cornucopea.** (Horn of Plenty).

305 Grand trumpet-shaped flowers measuring from 7 to 9 in. in length and nearly 6 in. across, forming two distinct trumpets, growing one within the other. The throat and mouth of the corolla are delicate white, while the outside is marbled with purple. A single plant often bears up to two hundred flowers during the season. Pkt. 5c.

**DELPHINIUM, or Perennial Larkspur.**

The Delphiniums furnish our gardens with flowers of striking beauty in form and color, and are extremely valuable during the early months of summer. They are of the best when groups are dotted here and there in borders and shrubbery.

- 306 Empress, rich dark blue, 3 feet high Pkt. 5c, 1/4 oz, 25c.
- 307 Heddewigli, Giant Japan Pinks, single, mixed colors. Pkt. 5c, 1/4 oz, 15c.
- 310 Heddwwiql, double. Best mixed; large flowers of most brilliant colors, varying from pure white to rich dark crimson, some being beautifully laced or striped. Pkt. 5c, 1/4 oz, 15c.
- 312 Heddewig, Eastern Queen, single, beautifully marked and striped with dark shades of rose upon lighter ground. Pkt. 5c.
- 313 Heddewigl, Fireball, double, a dwarf variety, producing globular flowers of brilliant dark scarlet color, a very beautiful flower, very fine for bedding. Pkt. 5c.
- 317 Heddewigl, Snow Queen, double, very fine large, white flowers, resembling carnations, produced in great abundance. Pkt. 5c.
- 318 Heddewigl laciniatus, Snowdrift, very large, extra double blooms, pure white. Beautifully fringed. A very fine and free flowering variety. Pkt. 10c.
- 320 Heddewigi laciniatus Vesuvius, single nicely fringed flowers of the most intense orange-scarlet, a really dazzling color; it makes a bed or border as showy as if planted with scarlet geraniums, and this at a mere fraction of the cost of geraniums. Pkt. 5c.
- 321 Heddewigl laciniatus, Semperflorens, single and double mixed. These old fashioned Scotch, Spike or Grass Pinks are hardy perennial, about 1 ft. high. Flowers have delicately fringed petals in great diversity of color and possess a spicy-sweet fragrance. Pkt. 5c.
- 323 Lacinatus punctatus, Princess Pinks. The single flowers of this novelty show a most charming display of extremely peculiar markings which are quite independent from the original color, being intensely dotted and lined, rather irregular and tigred upon to yield handsome flowers; mixed colors. Pkt. 5c.

**DIANTHUS or Pinks.**

The numerous species of Dianthus include some of the most popular flowers in nature; their coloring is exceedingly rich and varied, and their beauty scarcely surpassed by any flower of the garden. They grow freely from seed. Flowering the first year, come true in color and remain for months in full beauty; they are quite hardy. The patulaus sorts are perennial all others biennial.

- 311 Chinenisis, China or Indian Pinks, finest mixed large double flowers, beautiful, rich and varied colors. Pkt. 5c, 1/4 oz, 10c.
- 312 Imperialis, double, finest mixture an early, abundant bloomer. Pkt. 5c, 1/4 oz, 10c.
- 316 Heddewigl, Giant Japan Pinks, single, mixed colors. Pkt. 5c, 1/4 oz, 10c.
- 319 Heddewigl, double, best mixed; large flowers of most brilliant colors, varying from pure white to rich dark crimson, some being beautifully laced or striped. Pkt. 5c, 1/4 oz, 15c.
- 322 Dianthus, or Pinks. The best mixed, the new large flowering kind. Pkt. 5c 1/4 oz, 15c.

**DIGITALIS, Foxglove.**

Handsome ornamental hardy plants of stately growth. The seed though small germinates readily and the plants succeed well even in poor soil if given a half shady location. The spikes are often 3 to 5 ft. long and thickly strung with scores of thumb-shaped flowers.

- 320 Grand trumpet-shaped flowers measuring from 7 to 9 in. in length and nearly 6 in. across, forming two distinct trumpets, growing one within the other. The throat and mouth of the corolla are delicate white, while the outside is marbled with purple. A single plant often bears up to two hundred flowers during the season. Pkt. 5c.

**DOUBLE DAISY.**

Daisies are easily raised from spring sown seed and come into flower in a very short time. They thrive best in cool, shady places. They are very pretty and deserve to be grown more universally than they are. Admirably adapted for edgings, especially for borders of pansies and forget-me-nots beds, and also well suited for pot culture.

- 102 Double, large flowering, mixed colors. Pkt. 5c.
- 103 Longfellow, long and stiff flower spikes; large, double, dark pink flowers. Pkt. 10c.
- 104 Snowball, large double, white flowers. Pkt. 10c.
- 105 Deltula. Flowers are extremely double, of a rosy-white color, with a bright, purplish-red center. Very fine for bedding. Pkt. 10c.
- 106 Shasta Daisy, Single, large, double, with white, cream and yellow color; tall are golden centers, large stems; hardy perennials; mixed colors, containing Burbank's best varieties. Pkt. 10c.

**DIMORPHOTHECA AURANTIACA.** (African Orange Daisy).

See Novelties page 6.

**FARMER SEED & NURSERY CO., FARIBAULT, MINNESOTA.**

### Hollyhocks.

We recommend our annual, ever-blooming sorts the easiest to raise and most free-blooming.

#### Perennial Varieties.

Sow from April to June for plants to flower the following year.

- **456 Chater's double mixed, finest strain of double varieties.** Pkt. 10c, 3 oz. 25c.
- **457 Giant Single, mixed colors.** Mammoth flowers of exquisite colors, resembling crushed China silk. Pkt. 5c, 1 oz. 10c.
- **458 Allegheny, mixed colors.** Mammoth flowers of exquisite colors, resembling crushed China silk. Pkt. 10c, 3 oz. 25c.

#### Annual Ever-blooming Sorts.

Bloom early in July and remain until frost. Best for beds, borders, and edgings, or for planting in a permanent border.

- **459 Single mixed, all colors.** Pkt. 5c, 1 oz. 10c.
- **460 Double mixed, all colors.** Pkt. 5c, 1 oz. 10c.

#### HESPERIS. Sweet Rocket.

- **463 A handsome and curious plant for hanging baskets, rock work and vases.** The leaves and stems appear as though covered with icy crystals. Pkt. 5c.

#### HUMULUS. Japanese Hop.

(See Climbers, page 94.)

#### HUNNEMANNA. (Gloss Yellow Tuffly Poppet or Bush Eichscholtzia).

- **464—Should be treated as an annual.** Sow seeds out-of-doors in May and flowers will appear early in July and remain until frost. Foliage is fern-like and not unlike Eichscholtzia. Plants attain a height of 3 ft. Flowers are tall-shaped, pure golden yellow. When cut and put in water they will last a full week. One of the most valuable garden plants we know of. Plant a large bed of these and you will be delighted. Pkt. 5c, 1 oz. 15c.

#### ICE PLANT. (Mesembrianthemum Crystallinum).

- **465—A handsome and curious plant for hanging baskets, rock work and vases.** The leaves and stems appear as though covered with icy crystals. Pkt. 5c.

#### KOCHIA or Summer Cypress. (Kochia Trichoboea).

- **466—A highly ornamental, annual shrub, of unusually rapid growth, forming symmetrical-shaped bushes from 2 to 3 ft. in height, of a cypress-like appearance.** The leaves are slender and of a light pea-green until September, when, however, they change to crimson and blood-red. Its bright autumn coloring has given it two other names: "The Mexican Fire Plant" and "Burning Bush." The flowers are minute, but countless. Pkt. 5c, 1 oz. 15c.

#### Larkspur. (Annual.)

(See Illustration on next page.)

The following varieties are quite hardy; their fine spikes of bloom are exceedingly effective and graceful. The tall variety is suitable for shrubbery and borders; the dwarf kind for beds.

- **309 Tall Emperor, tall spikes of exquisite double flowers in unlimited quantity, 3 ft. high, all colors mixed.** Pkt. 5c, 1 oz. 10c.
- **310 Dwarf Rocket, fine double flowers.** Pkt. 5c, 1 oz. 10c.

#### LATHYRUS. (See Climbers, page 94.)

### LANTANA HYBRIDA.

- **466—Shrubby, half-hardy, perennial plants, with clusters of veronica-like flowers, producing their pink, yellow, orange and white heads in great abundance.** Suitable for outdoor use in summer and for house culture. Pkt. 5c. 1 oz. 15c.

#### LINARIUM Cymes.

(Keathworth Ivory or Colvillan Iveys).

- **470—A widely loved hardy, perennial, trailing plant, with small lavender and purple flowers. For baskets, vases and rockery. A charming little vine.** Pkt. 5c.

#### LINUM GRANDIFLORUM.

(Rubrum. (Scarlet Flat).

- **471—Elegant, free-flowering, hardy annual, with brilliant scarlet flowers.** A splendid bedding plant, making a gorgeous display of light colors; height 1 ft. Pkt. 5c, 1/2 oz. 10c.

#### LOBELIA.

This popular and beautiful flowering plant is most desirable for pot culture, edgings, hanging baskets, etc., blooming profusely from June to November. The blossoms of all sorts are particularly bright in appearance.

- **472 Gracilis, light blue, light green foliage; blooms profusely; trailing; excellent for vases, hanging baskets and window boxes.** Pkt. 5c, 1/2 oz. 10c.

#### SPREADING VARIETY.

- **473 Emperor William, of even and compact habit, each plant is literally covered with very pale blue flowers.** Valuable as an edging for delicate colored bedding plants. Pkt. 5c, 1/2 oz. 10c.
- **474 Crystal Palace, dark blue, dark foliage; the finest dark blue Lobelia for bedding, profusely covered with rich blue flowers.** Pkt. 10c, 1 oz. 25c.
- **475 Mixed, compact varieties, all colors.** Pkt. 5c, 1/2 oz. 10c.

#### COMPACT VARIETIES OF LOBELIA.

Very dwarf and compact varieties, growing about 4 to 6 in. high, each plant forming a dense ball of flowers. These varieties always come true from seed.

- **476 Dwarf Ruby, of even and compact habit, each plant is literally covered with very pale blue flowers.** Valuable as an edging for delicate colored bedding plants. Pkt. 5c, 1/2 oz. 10c.
- **477 Haageana, large heads of showy flowers in shades of white, pink, yellow, red and crimson; plants 18 in. high, blooming from June to September.** Pkt. 10c.
**Marigold.**

No other annual imparts so much brightness to our gardens for such a long time from early summer far into the frosts of autumn, as the Marigold. The tall African varieties, with their large, self-colored, yellow and orange flowers, are so showy when grown in large groups, while the dwarfer French varieties, with their elegantly striped and spotted flowers, are unusually effective in beds, edgings or pots.

**Tall African Varieties.**

701 Eldorado, 2½ feet high; large, perfectly double, quilled, golden yellow flowers. In bloom until cut down by frost. Pkt. 5c, 15c.

702 African, double mixed, 2 to 3 feet high. Pkt. 5c, 15c.

**Dwarf French Varieties.**

704 Dwarf French, double mixed. Pkt. 5c, 10c.

703 Legion of Honor (Little Brownie), beautiful single flowers of clear yellow color, blotted with rich brown, 9 inches high. Pkt. 5c, 10c.

**MATHIOLA, or EVENING SCENTED STOCK.**

710 Also called "Perfume Plant." An old-fashioned, hardy annual which has no beauty to recommend it, the flowers being of a dull purplish-lilac, but which should be grown in every garden for the exquisite perfume exhaled profusely in the evening and after showers. 1 foot high. Pkt. 5c.

**MOMATICIA, or EVENFERCO.**

Well known annual, free flowering plants which are very desirable for bedding purposes, blooming until late fall. Succeed easily in any garden soil. Fine for pot culture.

718 Eximia, Snowball. Dainty, milk-white, fully double, spherical flowers, which form a pretty contrast with Golden Ball. The flowers remain in perfect condition for a long period and are excellent for cutting; 1 foot high. Pkt. 5c.

719 Eximia, Golden Ball. Beautiful, dwarf plants of compact habit suitable for beds or borders, with striking, double, golden yellow flowers; height 1 foot. Pkt. 10c.

**Mignonette.**

The best known and the most popular summer flowering plant: mignonette is the French word for 'little darling,' and no more appropriate a name could be found for this sweet, modest flower, without which no garden is complete. It is quite hardy and for early flowering should be sown in April in the open ground; a second sowing can be made about the first of August, to obtain blooms during the fall months.

713 Odorata, the old-fashioned but very sweet-scented variety. Pkt. 5c, 10c.

719 Goliath, compact plants with immense trusses of brilliantly fragrant, white flowers. Pkt. 10c.

**MIMOSA. Sensitive Plant.**

272 A curious and interesting plant: leaves close and drop when touched or shaken. Flowers pinkish white. Annual, 1 ft. high. Pkt. 5c, 10c.

**MIRABILIS.** (See Four O'clocks, page 79.)

For **Moonflower and Tall Morning Glory**, see Climbers.

**MIMULUS.**

Magnificent, dwarf, half-hardy perennials, which flower profusely, thriving best in moist situations.

721 Tigrinus (Monkey Flower). Fine mixed, spotted and blotched. Pkt. 5c.

720 Moschatus (Mask Plant), grown for its musky odor; fine for hanging baskets, etc.; small yellow flowers. Pkt. 5c.

**MORNING GLORY, Dwarf.**

260 Dwarf, Morning Glory. Convolvulus. This plant should be better known, as it is so easily grown anywhere; is very free flowering and beautiful. Flowers are of rich colors. Fine for border, or in masses, producing an unusually brilliant effect. Blooms all summer. Hardy annual, 1 foot high. Mixed colors. Pkt. 5c, 10c.

**NEMOPHILA.**

500 An attractive, hardy annual with single, cup-shaped flowers of blue and white colors; 6 in. high. Mixed sorts. Pkt. 5c.

**NICOTIANA.**

Handsome, half-hardy annuals of the tobacco family, about 3 ft. high. Flowers salver-shaped, with long, tubular corollas.

801 Annuus. Sweet-Scented Tobacco Plant. Produces an abundance of large, pure white flowers of delicious fragrance. If taken up in the fall and cut back and putted, they will bloom all winter. 2 ft. high. Pkt. 5c, 10c.

802 Sandy mixed. Flowers white, carmine-rose or violet, a little smaller than Annuus. Pkt. 5c.

**NIGELLA.**

803 Miss Jeckyll, a very attractive, hardy annual, giving an abundance of lovely long-stemmed flowers of a clear cornflower-blue, prettily set in slender, elegant, foliage. Pkt. 5c, 10c.

**OENOTHERA, Evening Primrose.**

825 Charming, dwarf-growing plants with flowers of yellow, white and rose color, open at dusk, emitting a delightful perfume. Pkt. 5c, 10c.

**OXALIS.**

829 Small, free-flowering plants, with clover-like leaves, thickly starred with small, bright flowers from June until frost. Sown thinly in drills it makes a fine edging for flower beds. Mixed varieties. Pkt. 5c.

---

Larkspur in background. Matricaria in foreground.
NASTURTIUMS.

NASTURTIUMS are some of our best known and most popular annual flowers; they are of the easiest culture and produce flowers of the most brilliant coloring in great profusion during the whole season until killed by the frost. They bloom on any soil, but exhibit their flowers to the best advantage on poor land.

The Dwarf or Tom Thumb varieties make the most beautiful bedding and border plants, growing about one foot high, while the tall kinds are invaluable for covering unsightly railings, very fine for hanging baskets and vases, and are also equally beautiful if simply grown trailing over the ground. The Nasturtiums have been greatly improved in size and color during the last few years. The following list is made up of the best large-flowering varieties of distinct colors, and includes many of the finest novelties introduced up to date.

Dwarf or Tom Thumb Varieties.

<table>
<thead>
<tr>

Pansies.

PANSIES are too well known to require any description, as they are favorites with all. For spring flowering the seed should be sown in autumn and protected during the winter. For summer blooming sow seed in the spring, if possible, in a cool spot where they will be afforded some shade from the noonday sun. Pansies do best in fresh soil, enriched with thoroughly decomposed manure.

Imperial German Pansies. Admiredly suited for borders or beds, where masses of distinct colors are required. The flowers are not the largest type, but the plants are robust in habit and remarkably free flowering.

TUFTED PANSIES. See Viola.

Giant Prize Pansies.

The flowers of our Giant Prize Pansies are unsurpassed for beauty and variety of coloring, and are all of the largest size, measuring from three and one-half to four inches in diameter. Our collection embraces the latest and finest novelties offered by the best pansy growers of Europe and America.

499 Giant Bridesmaid. Clear white with a hue of delicate rose and well defined, large violet eyes in the three lower petals.

500 Giant Snowflake. Pure satiny white, without any blotches, and with frilled edges.

501 Giant Hydrangea. Of a distinct rose color. Very large and beautiful.

502 Giant Emporor Francis Joseph. White flowers with large, deep violet spots on each of the three lower petals.

503 Giant Rosy Morn. Purplish crimson with clear white edge.

504 Giant Lavender Queen. Of the lightest blue color known. In pansies, with large, deep blue blotches on the three lower petals.

505 Giant Emperor William. Of dark blue color with purple eyes.

506 Giant Mauve Queen. Of delicate mauve color with a large blotch of red on each of the three lower petals.

507 Giant Canary Bird, or President McKinley. The ground color is bright golden yellow, each petal being marked with a large dark blotch.

508 Giant Prince Bismarck. Of a yellowish bronze with large dark brown eyes.

509 Giant Volcano. Beautiful dark red color, each petal is marked with a large black spot.

510 Giant Mercury. The largest pansy, of rare beauty, deep blackish purple in color, without any blotches or spots.

511 Giant Siegfried, or Fire Dragon. Each petal has a large brown spot, which is surrounded by a bright red color, the edge is bright yellow.

529 Orchid Flowered Mixed. The ground color of nearly all the flowers is light, the petals being marked with a large brown or golden yellow blotch which diffuses into rays and veins toward the edge. The upper petals are upright and plaited, resembling orchids.

Packets of the above named varieties, 10 cents each; 3 for 25 cents.

One packet each of above 14 varieties for $1.00.

Gentlemen—

Minneapolis, Minn.

"The pansies I raised from your seeds are the finest I ever saw, for size, color and brilliancy. I have a large bed of them in front of my house which is the admiration of all who visit us and pass our place."

Yours truly,

Mrs. E. S. Boardman

Giant Pansies in Mixtures.

513 Giant Prize Pansy Mixture. Our mixture contains all the above and many others of the most beautiful Giant varieties; finest strain of pansies in cultivation, saved only from the largest and best shaped flowers of the richest colors. 1/2 oz. 75c, Pkt. 10c, 3 for 25c.

514 Giant Masterpiece, or Ruffled Pansies. A remarkable type, each petal being conspicuously frilled or waved, giving the flower a double or globular appearance. The range of color is very extensive, the rich, dark velvety shades predominating. 1/2 oz. 75 c. Pkt. 10c.

527 Giant Mme. Perret. A new and beautiful strain, originated by a French specialist; flowers of largest size, borne very freely in great diversity of colors; especially rich in red and wine shades. The stock we offer comes direct from introducer. 1/4 oz. 75c. Pkt. 10c.

515 Giant Cassier's. Three and five-blotched, large flowering, very showy, rich and varied colors. 1/2 oz. 50c, Pkt. 10c.

516 F. S. & N. Co's Delicate Shades Mixture, of Giant varieties, which includes only pretty tints and combinations of cream, light yellow and pale mauve. 1/2 oz. 75c, Pkt. 10c.

520 Mammoth Butterfly. The flowers are very large, of good form and substance and produce freely. In coloring they are varied, seldom two alike in a hundred plants. They are mottled and spotted, streaked, tinted and splashed, while the colors are mainly those rich wine reds, chocolate, velvety red brown, lavender, violet, and purple shades which are only found in a pansy blossom, making a very beautiful display. 1/2 oz. 75c, Pkt. 10c.
Petunias.

We have no better plants than Petunias for out-door decoration for beds, borders and window boxes, for house culture. They are easily cultivated; when once fairly started, the Petunias will grow 18 to 24 inches, minding neither heat, drought nor rain. They produce their handsome, sweet-scented flowers in delicate and gorgeous colors from early spring until frost. Seed may be sown directly in the garden in a sunny place, as soon as the weather is settled and warm, or the plants may be started indoors for early results.

Concordia, Double Petunias.
The only self-seeding, large-flowering, double Petunia, which produces 70% to 80% of the finest double flowers.
The Concordia Petunias, originated last year by the famous Petunia specialist, Frederick Roemer, in Germany, will create quite a revolution in growing double Petunias. Up to now the large-flowering, double Petunias produced no seed and in order to procure double flowers, it was necessary to artificially pollinate single flowers with the pollen of doubles; naturally, however, the seedlings grown from such seed were mostly singles and no more than a 10% of doubles were ever expected. If a gardener, heretofore, wanted to obtain about 100 double Petunias, he would grow from 400 to 500 plants from seed, and after cultivating and taking care of them for several months, he would then find that most of his plants run to singles and an only a small percentage to doubles. Unlike the other double Petunias, the Concordia varieties develop their seed-pods and produce their own seed of which from 70% to 80% come true doubles and the flowers are of the very best type.

852 Dwarf Inimitable. (Little Gem). Bushy, compact little plants, 6 to 8 inches high, covered with masses of beautifully striped and bicolor flowers.

853 Howard's Star. A beautiful, free-flowering strain; color, crimson maroon with clearly defined five pointed star of bush-white. Fine for bedding, baskets, vases, etc.

855 White Mixture. Deep pink, white, etc.

854 Snowball. Fine compact sort, producing pure satiny-white flowers throughout season.

851 Fine Mixed. An excellent mixture of fine flowers in all colors.

Single, Large Flowering Petunias.

856 Giants of California. Magnificent flowers, of a great variety of colors, with deep yellow throats and exquisitely marked; of large size, often measuring 4 inches across.

858 Phlox Drummondii, mixed. Pkt. 5c, 14 oz. 15c, 50c.

Selected Large Flowering Varieties.

861 Snow-white. Pkt. 10c.

862 Shell-pink. Pkt. 10c.

863 Bright Scarlet. Pkt. 10c.

864 Yellow. Pkt. 10c.

866 Mixed, all colors. Pkt. 10c.

Dwarf Phlox. (Nana compacta).

A very valuable class for beds, edgings and pot cultures of striking colors, compact and dwarf habit, and extremely free flowering. 6 to 8 inches high.

873 Snowball, large, pure white flowers, excellent to plant with Fireball. Pkt. 10c.

872 Fireball, brilliant red; this and the Snowball are the two most effective Phloxes in existence. Pkt. 10c.

871 Dwarf, choicest mixture. Pkt. 10c.

870 Starred and Fringed. Dwarf Phlox; flowers are curiously pointed, fringed and toothed and are produced in colors of every conceivable shade, more than a hundred distinct tints, shades and combinations having been counted; scarcely two are found of the same shade and color. Pkt. 5c, 14 oz. 15c.

867 Double-flowering, double and semi-double flowers in all colors; desirable for cut flowers as they last longer than the single sort. Pkt. 5c.

Parrennial Phlox. (Phlox Drummondii).

878 One of the finest perennials for beds or borders. Finest mixed. Pkt. 10c.

PASSION FLOWER. (See Climbers, page 90).

PLATYCODON. Chinese Bellflower.

One of the best hardy perennials, producing showy flowers during entire season. Plants form large clumps; are excellent for planting in permanent borders or among shrubbery; easily raised from seed. Flowers are large, bell-shaped, and in color blue and white.

877 Marbled, single blue and white mixed, Pkt. 5c.

POLYANTHA ROSE. Fairy or Baby Rose.

952 Blooms from seed the first year. The plants bloom in 3 months after sowing, so if sown in February, in the house, they may be had in bloom in June, in the open ground, where they continue to flower through the season, giving about an equal proportion of single, semi-double and double flowers, some in clusters. The plants are very pretty in solid beds and borders and are hardy. Seed needs soaking in warm water for 24 hours.

852 Petunia. Pkt. 10c.
Poppies.

PROBABLY no class of plants enjoys greater popularity and is more widely grown than the Poppies; their wonderful range of color and their delicate, gracefully borne flowers is well known to all lovers of flowers. The Poppies are quite hardy and can be sown as early in the spring as possible, where the plants are to remain.

Single Annual Varieties.

884 Giant Shirley, Silk or Ghost Poppy. No flower is so exceedingly graceful and decorates our gardens with such brilliancy of color as this poppy. We pay special attention to our strain, which includes an almost endless variety of colors from pure white, pink, salmon to dark crimson and blood-red...

885 Double Double, primrose. Pkt... Pkt. Very...

886 Miss Sherwood. Large flowers, the upper half of which is silken, chamois-colored, the lower portion satiny-white, a combination of rare beauty...

887 Admiral. This single peony-flowered poppy is of surprising beauty. The flowers are large, round, smooth-edged and of a glistening pure white color, with a broad band of brilliant scarlet around the top. Planted in groups it produces a magnificent effect...

Double Annual Varieties.

888 Cardinal, very large, double flowers, beautifully fringed, of vivid scarlet color; height two feet...

889 White Swan. Immense, double, pure white flowers, deeply fringed. An excellent companion to Cardinal...

890 Carnation-flowered, Double Mixed. Very large, double, slightly fringed flowers in brilliant colors...

891 French Peony-flowered. Acty, with large, double flowers, of a white color bordered with scarlet...

892 Peony-flowered, Mixed Colors. Imposing, double, globular flowers, resembling double peonies...

893 Mikado. (Striped Japanese Poppy.) A very distinct and effective double poppy, with deeply lacinated petals, which are white at the base, shading off to pink and rose above...

Mixed Poppies.

904 F. S. & N. Co's. Mixture of Single Annual Poppies, containing all the best known varieties of beautiful, bright colors...

905 F. S. & N. Co's. Mixture of Double Annual Poppies, containing all the above named double varieties and many other fine sorts...

Perennial Poppies.

892 Iceland Poppy. (Narcissus.) Plants are of graceful, neat habit, with fern-like foliage, producing their brilliant, fragrant flowers in endless profusion...

893 Oriental Poppy. Gorgeous, showy flowers, measuring 6-7 in. across, of dazzling brilliant colors, mostly shades of red. These poppies are perfectly hardy, living through our winter with but little protection. Mixed colors...

Portulaca, Rose Moss.

A charming little annual: 6 in. high; sow when weather is warm in spring. It will soon carpet the ground with a mass of succulent foliage, which will bring forth a profusion of the gayest flowers all season. A well known favorite, which grows easily in any soil and situation.

904 Single, large flowering, special mixture...

905 Double. Flowers of the double varieties are very full and resemble tiny roses; increase in size towards close of season. Finest mixed...

Primula, Primrose.

Hardy Perennial Garden Sorts.

These are among the best of early spring blooming plants: with slight protection they will send the winter.

907 Auricula, Old-fashioned Garden Primulas. Very free-flowering and fragrant. Blooms in early spring. Height 6 inches. Mixed colors...

908 Blue Primrose. (Acialis Corymb.) A beautiful blue-flowered type of the old English yellow primrose, extremely hardy; suitable for naturalizing in shady places among shrubs, etc...

909 Cortusoides, charming variety, blooming about Easter: pretty rose-colored flowers, with white eye...

910 Vulg., (English Primrose.) These old-fashioned plants are very welcome in early spring, when they bear in profusion, fragrant yellow blossoms...

911 Yers, Cowslip. The flowers are fragrant, beautiful, hardy perennials, blooming in early spring; mixture contains many beautiful colors, including brown, crimson and yellow...

912 Japanese Primrose. (Japanese Primroses.) The plants are perfectly hardy and are admirable for rock gardens, as well as for naturalizing by the sides of water, where they thrive particularly well and give the prettiest effect; 18 in. high. Mixed colors, varying from white to crimson and maroon...

PRIMULA.

Tender House or Conservatory Varieties.

These primroses are some of our finest and most important winter blooming pot plants. The culture of these lovely flowers is much easier than most people think, and everyone could grow a nice collection of them with little care. Seed should be sown in March, April or May, in light soil, but for final potting a richer soil is necessary, consisting of two parts loam to one each of well decayed manure and leaf mould. The plants should be planted in boxes well ventilated, and well watered.

913 Japanese, single and double, large flowering, fringed, mixed...

914 Chinese, single and double, large flowering, mixed...

915 Forbesi; Baby Primrose, rosy-lilac. Pkt. 10c.

916 Mikado, No. 885.

917 Double Portulacas. No. 895.

918 Primula Auricula. No. 897.
FARMER SEED & NURSERY CO., FARIBAULT, MINNESOTA.

RICINUS. Castor Bean.
Ornamental plants of stately growth and picturesque foliage, with brilliant colored fruit, producing a sub-tropical effect; fine for lawns, massing or center plants for beds.
950 Zaizaberies, mixed. A distinct class, surpassing all other varieties in size and beauty. Ten to twelve feet in height.

SALpiglossis. Velvet Flower.
A highly ornamental, half-hardy annual with lovely, large, funnel-shaped flowers of velvety texture and with deeply scalloped petals, generally penciled and shaded on the most beautiful and richer ground colors. Much prized for cutting; beds or borders of these showy plants, when in full bloom, are one of the most striking features in a garden. Each flowercentral to very long styles.
1000 Large-flowering, all colors mixed.
1001 Emperor. This variety forms only one leading stem, and bears on its summit a veritable bouquet of beautiful flowers, each richly reined with gold. It is the only flower showing a glittering of gold in its coloring. All colors... Pkt. 10c, ½ oz. 15c.

Salvia Silverpoint. No. 1004.
is complete without Scabious, especially where flowers are wanted for cutting. Sow seed out of doors as soon as danger of frost is over.
1012 Improved double, large-flowering. Mixed, all colors.
1013 Caucasian, a highly decorative, hardy perennial variety with beautiful, large, flowers; valuable for cutting; 3 ft. high...

Schizanthus, Butterfly Flower.
"The Poor Man's Orchid." Of easy culture, and in its form and wondercoluring resembling some species of Orchids. Sow seed out of doors as soon as danger of frost is over.
1015 Large-flowering varieties, mixed colors...

Shasta Daisy.
(See Climbers, page 90).

Scabios, or Mourning Bride.
Each plant bears a profusion of beautiful flowers in exquisite shades on long, wiry stems; when cut the flowers will keep in good condition for a long time; 2½ feet high, blooms from April until frost. They make effective borders or beds. No garden should be without the Shasta Daisy. Profuse bloom from seed; blooms from early summer till late fall. About 2½ feet high.
1004 Silverpoint. A charming variety of great effect, having large, intense, bright scarlet flowers, and rich green leaves elegantly spotted with yellow; these neat and compact plants grow about 2½ feet high...
1006 Patens. Blue. A dwarf, profusely blooming variety of brilliant blue flowers; very handsome; borders, requiring a more dwarf variety than the Bonfire...

SOLANUM CAPSICASTRUM.
1010 Jerusalem Cherry. This is a very ornamental pot plant for winter decoration; of dwarf and branching habit with small leaves; bearing profusely bright scarlet berries of the size of a cherry. Grows 1½ in. high...

Stocks.
The Stock is one of the most popular annuals, either for bedding or pot culture; in brilliancy and diversity of color, fragrance, profusion and duration of bloom it is unsurpassed. The flowers appear on long, stiff stalks like small roses. The seed we offer was grown for us by a leading specialist.
1024 White. 1022 Crimson. 1025 Canary-Yellow. 1026 Dark Blue.
1027 Light Blue. Packets at 5c, any 6 for 25c.
1028 German Mixed. Finest large double flowering sorts...
1029 Princess Alice, a very fine branching 10-weeks Stock; producing continuously large spikes of beauty...
1031 Emperor, late, large flowering; producing beautiful double, fragrant flowers; mixed...

Evening Scented Stocks, See Mathiola.

Stokesia, Cyanæa.

Sunflowers.
Cut and Come Again. (Cucurbitus).
These Sunflowers are very popular not only for garden display but also for cut flowers. The plants grow 3 to 4 feet high, bearing a continuous succession of well formed single and double flowers, 3 to 4 inches in diameter.
1033 Double, mixed sorts...
1034 California. Double. Plants about 5 ft. high, bearing large, very beautiful, dark yellow flowers...

German Stocks.
**Sweet Peas.**

**CULTURAL NOTE—**Sow in good, rich ground as soon as it can be worked, except the white-seeded sorts, which should not be sown until the ground is comparatively warm and dry.

**UNRIVALLED MIXTURES.**

600 F. S. & N. Co.'s Giant Flowered Mixed. The best novelties and most of the finest, largest flowering varieties are used in this mixture and in such quantities as to produce the best color effect.

Pkt. 5c, oz. 10c, \( \frac{1}{4} \) lb. 30c, lb. $1.00. 601 Orchid Flowered Mixed. Composed exclusively of Corness of Spencer and Gladys Unwin varieties, the large petalled, wavy types, which represent the highest achievement in Sweet Peas to date. This mixture contains all the orchid flowered varieties given on this page and also mixed seedlings of the same types. Exclusively special mixture.

Pkt. 10c, oz. 15c, \( \frac{1}{4} \) lb. 30c, lb. $1.25. 602 Good Mixed. All colors.

Pkt. 10c, oz. 20c, \( \frac{1}{4} \) lb. 65c. 603 Cupid or Tom Thumb Mixed. Dwarf plants, 6 to 8 inches tall, spreading on the ground like a Verbena; the flowers are of good size. For edging, low beds and rock culture they are unique and pretty. All colors.

Pkt. 25c, oz. 20c, \( \frac{1}{4} \) lb. 65c. 604 Double Flowering Mixed. These are getting more popular every year. The flowers are double and semi-double. All colors mixed.

Pkt. 5c, oz. 10c, \( \frac{1}{4} \) lb. 30c, lb. $1.00.

**THE EARLIEST VARIETIES.**

640 Earliest of All. (Christmas Pink). Pink and white flowers, 10 days earlier than Extra Early Blanche Ferry; good for forcing and Eden culture. Very early bloom.

Pkt. 10c, oz. 20c, \( \frac{1}{4} \) lb. 65c.

---

**Select Giant-Flowered Varieties.**

All Giant Flowered Sorts, pkt. 5c each, any 4 for 15c, any 12 for 40c, oz. 10c each, any 3 oz. for 25c, \( \frac{1}{4} \) lb. 30c, lb. $1.10 prepaid.

---

**Giant-Orchid-Flowered Varieties.**

**Price for the Giant-Orchid-Flowered Sorts except where noted, Pkt. 10c, 3 for 25c, oz. 25c, \( \frac{1}{4} \) lb. 90c prepaid.**

---

**SWEET WILLIAM.**

**Dianthus Barbatus.**

Hardy perennial, widely grown for the showy heads of beautifully colored, sweet scented flowers. Height 1½ ft.; blooms from June until frost. Can easily be raised from seed, will grow in any good garden soil, and the plants produce great masses of lovely, fragrant flowers.

1033 Single, Pink Beauty, large flower-heads of a most pleasing salmon-pink color; strikingly brilliant and beautiful.

Pkt. 10c. 1039 Single, Nigerics, velvety blackish red, large flowering; the richest Sweet William known.

Pkt. 5c. 1040 Single, Pink Beauty, large flower-heads of a most pleasing salmon-pink color; strikingly brilliant and beautiful.

Pkt. 5c. 1041 Single, Scarlet Beauty, differing from the foregoing in the color of the flowers which is an intense scarlet, similar to the Grenadin Carnation. A bed of these produces a vivid effect.

Pkt. 10c. 1038 Single, Pure white, large flowering, but not as fine as Dianthus Barbatus.

Pkt. 10c. 1042 Double, Pure white, very beautiful.

Pkt. 10c, 3 for 25c. 1044 Double, Nigerics, same color as No. 1039. The majority of the flowers will come true double.

Pkt. 10c, 3 for 25c. 1037 Double, mixed. Giant flowering, dwarf.

Pkt. 5c, oz. 15c, \( \frac{1}{4} \) lb. 30c. 1036 Single, mixed. Giant flowering dwarf.

Pkt. 5c, oz. 15c, \( \frac{1}{4} \) lb. 30c.
Verbenas.

Very fine for beds, borders, vases and window boxes. Start seed in the house and plant out in the garden in May. The plants bloom from early summer to late fall without interruption.

1113 New Giant Flowered Mixed. A new class of Verbenas which is of extraordinary beauty, and surpasses all other varieties and strains in existence, in size, perfection of form and richness of colors. Pkt. 20c.

Large-Flowering Verbenas.

1102 White. 1104 Purple. 1111 Scarlet. 1103 Rose. 1105 Large-flowering Mixed. Pkt. each, 10c, any 3 for 25c. 1100 Hybrid Mixed, all colors of the old sorts. Pkt. 5c, 1/4 oz. 20c.

Various Verbenas.

1107 Lemon Verbena, pale green, delightfully scented foliage. Splendid for garden and house culture. Pkt. 10c. 1108 Moss Verbena, moss-like foliage and purplish-brown blossoms. One of the finest and best bedding plants. Pkt. 5c. 1109 Odorata, (Niven), Very hardy; very sweet scented and pure white flowers; in bloom all summer until late fall. Pkt. 5c.

VINCA ROSEA. Periwinkle.

1112 Ornamental, free-blooming, tender perennial plants; one of the most satisfactory bedding plants, with glossy, green foliage and handsome red and white flowers. They flower from seed the first season, continuing until frost; and may be potted before frost and kept in bloom in the house through the winter; a very fine cut flower; about two feet high. Mixed colors. Pkt. 5c, 1/4 oz. 20c.

Violas or Tufted Pansies.

Hardy perennial plants. While the Tufted Pansies do not produce as large flowers as the regular type, yet they bloom more profusely and for a longer time. If sown in April the plants will flower in June, continuing a show of bloom until frost, and soon after the snow is off the ground the following Spring they begin to flower again. Should be more generally used.

1044 Magnificent, rich purple. 1048 Lutea Splendens, deep golden yellow. 1049 Admirals, a magnificent mixture of 5 and 6-blotted hybrids containing all the varied colors of high grade pansies.

Any of the above sorts, Pkt. 10c, any 3 for 25c.

VIOLA ODORATA.

1035 Sweet Violet. The true blue sweet violet. Favorite hardy plants, highly prized for their fragrant flowers; 6 in. high. Seed germinates slowly. Pkt. 10c.

Wallflower.

These deliciously fragrant flowers should be better known. By sowing the perennial varieties in the garden and transplanting them to pots in the autumn, good plants will be secured for winter flowering in the house; or they may be protected in a cold frame during the winter, and planted in the garden in May and will then give plenty of early spring flowers. Wallflowers are easily grown from seed; they are perennial but not hardy in the northern states.

Annual Sorts.

1137 Single, large-flowering, mixed colors. Pkt. 5c. 1138 Double, large-flowering, mixed colors. Pkt. 10c.

Annual Sorts.

1135 Early Parisian, a single annual Wallflower. This variety will flower throughout the summer and fall, from seed sown the same spring. The flowers are Cinnamon colored and very fragrant. Pkt. 5c.

WILD CUCUMBER. (See Climbers, page 94).
EVERLASTINGS or IMMORTELLES.

This class of annuals are of easy culture, growing splendidly in any good garden soil, even in light sandy ground, where most other plants would not thrive. They produce their straw-like flowers abundantly, all summer and fall. Suitable for bouquets and decorations.

4 Acroclinium. Plant grows 15 inches high, bearing lovely white or rose-pink flowers. In bloom from July to October. Pretty in vases or pots. Mixed..........Pkt. 5c, 1/2 oz. 10c

6 Ammiething, or Winged everlasting. New Giant Flowersed. Large, handsome, double white flowers with yellow disk. The plants grow about 3 feet high. Grows in sandy soil and blooms all summer............Pkt. 5c, 1/2 oz. 10c

408 Gomphrena, or Globe Amaranth. Showy plants with brilliant colored, globe-shaped flowers. A first class bedding plant and fine for cut flower work. 1 foot high; mixed. Pkt. 5c, 1/2 oz. 10c

450 Helichrysum. Mammoth flowered. Pretty and effective flowers for beds and borders. One of the showiest. Blooming season July to October. 2 feet high. Mixed colors..Pkt. 5c, 1/2 oz. 10c

383 Rhodanthe. Grows in any soil. Beautiful for the garden, or grown in pots in the house. Flowers are white, rosy or crimson and show a darker disk. 11/2 feet high. Mixed. Pkt. 5c, 1/2 oz. 10c

399 Xeranthemum. Profuse blooming hardy annuals. Flowers very double and long stemmed. White and deep purple. Plants grow to 15 inches high. Bloom from July until September. Mixed.........Pkt. 5c, 1/2 oz. 10c

482 Special Mixed. All the above sorts and many other varieties mixed........Pkt. 10c, 1/2 oz. 20c

ORNAMENTAL GRASSES.

The Ornamental Grasses are indispensable for the mixed flower bed and for the border, making the trees more attractive during the summer, while in the dried state they are valuable for winter bouquets. The following are the most popular varieties.

1170 Briza Maxima. (Raising Grass). In great demand for bouquets, furnishing splendid material to mix in with flowers for decorating. Annual.................Pkt. 5c

1171 Bromus Brizaformis. Very graceful plant, with drooping panicles. Perennial. Pkt. 5c

1172 Coix Lachryma. (Job's Tears). Broad, corn-like leaves and hard, shining pearled seed. Plants grow 3 feet high. Annual...........Pkt. 5c, 1/2 oz. 10c

1173 Eulalia novae-angliae. Slender and graceful grass, beautifully striped. Fine for grounds on the lawn or around the house. Perennial.............Pkt. 5c

Selected Climbing Plants.

5 Adlumia. Allegheny Vine or Mountain Fringe. A graceful, hardy perennial climber. The feathery foliage closely resembles that of the Maiden-hair Fern. The flowers are tube-shaped, flesh-colored, somewhat like the Bleeding Heart, and completely cover the plant. For covering trellises, stumps of trees, etc...Flowers the first year from seed........Pkt. 10c

150 Balloon Vine. A rapid growing annual climber, succeeding best on light soil. Flowers white; seed pods look like small balloons.......Pkt. 5c, 1/2 oz. 10c

255 Balsam Apple and Pear. See illustration on next page. Very rapid, and dense growing annual climbers, with ornamental foliage and pretty fruit, which opens when ripe, showing seed and blood red inside. Splendid vine for trellises, rock work, stumps, etc. Grows 10 ft. high. Apple and Pear mixed........Pkt. 5c, 1/2 oz. 10c

299 Canary Bird Vine. Rapid growing, graceful vine, with clean handsome foliage, and an abundance of bright canary-yellow blossoms. It is also a good rambling and fine for stumps, rockeries, etc. It makes an excellent window vine for winter. Grows well in shady places. Grows 15 feet high. Annual. Pkt. 5c, oz. 15c

254 Cobera Scandens. (See illustration on next page). Cups and Saucers Vine or Cathedral Bells. One of the latest and most beautiful annual climbers, running up to 30 feet in a season. The flowers are bell-shaped and of a purple-like hue when full grown. It is a very prolific bloom, one that makes a show the first year, both in vines and flowers; one that is always clean of insects. In planting places seed edge wise and cover lightly.............Pkt. 5c, 1/2 oz. 20c

323 Dolichos. Hyacinth Bean. Very pretty, bean-like flowers in erect racemes, followed by ornamental seed pods. For covering arbors, trellises, etc., it is a splendid vine. Grows ten feet high. Annual. Pkt. 5c, oz. 15c

469 Lathyrus. 'Everlasting Pea or Hardy Sweet Pea'. Hardy perennial climber with white, pink and crimson pea-shaped flower clusters. Grows 6 feet high, flowering from July to September. Fine for cut flowers. A splendid vine for covering fences, old stumps and trellises. Is deserving of more general planting..............Pkt. 5c, 1/2 oz. 15c

478 Mexican Mina Vine. One of the most beautiful annual climbers; a very profuse and early bloomer. The leaves resemble oak leaves, and the flowers are borne in large clusters, they are of blood red color with yellow throat. Now early in spring. Grows 20 to 25 feet high. Annual. Mixed........Pkt. 5c, 1/2 oz. 20c

489 Persian Cloak Plant. A beautiful vine, with rose-pink flowers, well adapted to ornamental work. Will grow 15 to 15 feet high. BLOoming in October..........................Pkt. 5c, oz. 15c

492 Scarlet. Flowers bright, glowing scarlet........Pkt. 5c, 1/2 oz. 15c, oz. 25c

270 White. Pretty blossoms of clear white color........Pkt. 5c, 1/2 oz. 15c, oz. 25c

268 Mixed. Nice mixture of all kinds, including white........Pkt. 5c, oz. 15c, oz. 25c

CYPRESS VINE.

For trellises the Cypress Vine cannot be excelled. It has a profusion of pretty star-shaped blossoms and its fine feathered foliage is well adapted to ornamental work. Will grow 15 to 15 feet high. Beautifull and hardy..........................Pkt. 5c, oz. 15c

269 Scarlet. Flowers bright, glowing scarlet........Pkt. 5c, oz. 15c, oz. 25c

270 White. Pretty blossoms of clear white color........Pkt. 5c, oz. 15c, oz. 25c

268 Mixed. Nice mixture of all kinds, including white........Pkt. 5c, oz. 15c, oz. 25c

Canary Bird Creeper. No. 209.
Selected Climbing Plants. Cont'd.

461 Humulus, Japanese Hop. Variegated Leaved. Rapid, dense growing, annual climber, 12 to 20 feet high. The leaves are beautifully marbled and splashed with silver white, light and dark green, very effective for screens, arbors, trellises, etc.; very resistant to drought and insects. .......... Pkt. 5c, 1/2 oz. 15c.

483 Moon Flower, Mammamoth White. Will grow to 30 to 40 feet in a single season and be covered with its hundreds of large, white flowers every evening and cloudy day. The hard outer coat of the seed should be cut through with a sharp knife, and the seed planted about 1 in. deep in moist soil in a box or pot and set in a warm place. Transplant outdoors in a sunny situation when danger from frost is past. Annual. .......... Pkt. 10c, 1/2 oz. 25c.

Nasturtium, Tall or Climbing. See page 86.

850 Passion Flower. Tender perennial climber for the summer garden, for window boxes and pot culture. Flowers exceedingly beautiful, white and blue; very large and wax-like. Will grow to a height of 15 to 20 feet. .......... Pkt. 10c.

858 Scarlet Runner Bean. Well known and popular runner vine. Flowers dazzling scarlet and very showy. Blooms a long time. The pods are long and very broad, and of excellent flavor. Can be used same as other beans. .......... Large Pkt. 5c, 1/2 pt. 20c.

1018 Smilax. Tender perennial vine for house culture. Makes a fine pot plant for winter. Lovely glossy green foliage which is greatly prized for bouquets and decorating. .......... Pkt. 5c, 1/2 oz. 25c.

Sweet Peas. See page 91.

1136 Wild Cucumber. The quickest growing annual climber. Will grow 30 ft. in one season. Bears pretty white fragrant flowers, followed by an abundance of ornamental and prickly seed pods. .......... Pkt. 5c, oz. 10c.

Morning Glories. Ipomoea.

Well known annual climbers of rapid growth, with beautiful showy flowers in endless variety of colors. For covering walls, trellises, arbors or stakes where they are inadvisable. They will succeed under almost any circumstances.

259 Giant Japanese Morning Glory. The handsomest of the Morning Glories, with robust vines, growing rapidly to a height of 10 to 20 ft., and with luxuriant foliage of which some is oddly marbled and blotched with white and yellow. The greatest charm, however, of these Morning Glories lies in the entrancing beauty and gigantic size of the flowers, which are produced in limitless markings and colors. Mixture of the finest Japanese sort .......... Pkt. 10c, 1/2 oz. 20c.

258 Tall Morning Glories. The old-fashioned variety; indispensable for covering trellises, verandas, stumps, etc. Mixed colors, very fine. .......... Pkt. 5c, oz. 10c, 1/4 lb. 20c

486 Brazilian Morning Glory. A very quick growing vine, covering an enormous space in a very short time; the leaves are of large size, deeply lobed and the flowers, which are borne in large clusters, are of pleasing rose color. .......... Pkt. 5c, 1/2 oz. 20c.

485 Double Floured Morning Glory. The flowers are double and semi-double and some are fringed, which give an appearance of a double flower. Mixed .......... Pkt. 5c, 1/2 oz. 10c.

Ornamental Gourds

Desirable, pretty climbers for many places where a large amount of vines are wanted quickly. The blossoms of some are quite striking and handsome. Their interesting features are the odd, unique and ornamental gourds, many of which make excellent toys for children. Price for any variety, except Calabash ...... Pkt. 5c, oz. 20c, postpaid.

1180 Apple-Shaped. Fruit is beautifully striped.

1181 Bottle. Curious and handsome fruit.

1182 Corset. Elegant fruit; a rapid climber.

1183 Dipper. Very useful for many purposes, holds about a quart; has a long handle.

1184 Dish Cloth or Sponge. Large fruits; resembling a large flat sponge.

1185 Gooseberry. Small, dark green fruit, resembling a gooseberry; fine climber.

1186 Herencles Club. Fruits are green, 3 to 4 feet long.

1187 Next Egg. Very ornamental and useful as next eggs.

1188 Orange. The well-known mock orange. In size and shape like an orange.

1189 Ornamental Pomegranate, or Queen's Sweet Pocket Melon. Fruit deliciously perfumed and may be carried in the pocket or laid among linens. Makes a very pretty and desirable climbing vine.

1190 Pear-Shaped. Pretty pear-shaped fruits, striped yellow and green.

1191 Powder Horn. The form of a powder horn. Very odd.

1192 Snake. Also classified as a cucumber, and can be used as such, especially for slices. The fruitts grow several feet long and are twisted.

1193 Sugar Trough. They grow large enough so to hold 4 to 10 quarts each; have thick, hard shells; are light but durable.

1194 Turk's Turban. Turban shaped fruit, beautifully striped with red.

1195 Calabash or Pipe Gourd. Odd-shaped fruit which is used to an advantage in making pipes. A native of South Africa .... Pkt. 10c, 1/2 oz. 20c.

1196 Ornamental Gourds Mixed. Many American and foreign varieties in superior mixture. .......... Pkt. 5c, 1/2 oz. 15c, oz. 25c.

NOVELTIES IN FLOWER SEEDS SEE PAGE 6.

Idaho Springs, Colorado. I had some of the finest SWEET PEAS this year from seeds purchased from you that I have ever had. I wish to get some more of this seed and enclosing $1.25 Geo. K. Klineball, Washington, Pa. The Hyacinth bulbs received from you flowered most beautifully, they were beyond all my expectations. Miss Addie Wyland.
**SUMMER FLOWERING BULBS**

The Bulbs which we offer are the most popular summer flowering varieties; they are inexpensive, and it requires no skill and but very little attention to grow them to perfection. Plant the bulbs in the garden in spring, after severe freezing is past, and they will soon be up and will flourish and bloom all summer. In autumn, the bulbs should be lifted and stored in a cellar, away from frost, for planting the following spring.

### Apios Tuberosa.

A valuable, hardy, tuberous-rooted climber, resembling the common Wisaria, having clusters of rich, deep purple flowers, which have a strong, delicious violet fragrance. It grows to a height of 8 to 10 feet, and blooms profusely. Plant two or three bulbs close together to produce a mass of vines and flowers. Each 8c, dozen 45c, prepaid.

### Amaryllis.

**MEXICAN FIRE LILY.** (Furnessiana). Few flowers equal this variety in richness and beauty of color. The flowers are produced before the leaves appear and are of an intensely brilliant, deep velvety crimson color. It is a free bloomer and succeeds well in pots, and also in the open garden, flowering soon after planting. Each 10c, 3 for 25c, prepaid.

**BELладОНА LILY.** The flowers of this Amaryllis appear late in summer on flower stocks 2 feet high and form immense clusters of trumpet-shaped, blooms of shell-pink color and great fragrance. Large Bulbs, each 20c, prepaid.

### Monarch of the East. (Arum Conantum).

The flower sheath sometimes reaches a length of nearly 2 feet, is of a reddish-brown color, tipped with red and yellow, whilst the inner parts of the flower are equally as brilliant. The bulb of this extraordinary plant needs only to be placed on a table or shelf, in a warm room, when, without showing either roots or leaves, the flower makes its appearance. After flowering, the bulb should be planted in the open ground, when an umbrella-shaped leaf will be formed on a stalk spotted with a granite-like color, and sometimes reaching a height of 3 ft. In autumn the bulb should be lifted and placed in a warm room, when the previous year’s display may be repeated. Large bulbs 10c, monster bulbs 25c each, prepaid.

### Tuberous-Rooted Begonias.

The fashionable plant of the day which lastly deserves its honor, as in addition to its handsome foliage it bears the whole summer enormous sized flowers of intense brilliancy in constant profusion. Begonias make beautiful pot plants for the conservatory or window garden, and rival with Geraniums as bedding plants. They delight in a rich, well-drained soil, in a partially shaded position, and should be well watered.

**Single Begonias**, mixed colors; each 8c, doz. 80c, prepaid.

**Double Begonias**, mixed colors; each 10c, doz. 75c, prepaid.

**Double Lafayette.** Brilliant, fiery scarlet. Very fine Begonia for bedding, blooms all summer. Each 20c, doz. 2.00, prepaid.

---

**Mexican Fire Lily**

### Caladium Esculentum.

*(Elephant’s Ear)*

Most showy, ornamental plants, of tropical aspect, which are very effective as single plants or in the garden and also in groups; they produce enormous leaves, often attaining a length of 3 feet by 20 inches wide. 1st size bulbs, 8 to 11 inches in circumference, each 50c, per dozen $2.75; 2nd size, 7 to 8 inches, each 15c, per dozen $1.00, prepaid.

### Fancy-Leaved Caladium.

These Caladiums have grown rapidly into popular favor for the decoration of the conservatory, for window boxes and also for planting out doors, in shady situations, when the weather is warm. The handsome leaves are spotted, veined and variegated with white, yellow, pink and scarlet. Best sorts mixed, each 20c, 3 for 55c, prepaid.

### Calla.

**LITTLE GEM.**—Very neat dwarf Calla, rarely exceeding 12 inches in height, blooms most abundantly; the flowers are not more than half the size of the common white Calla, and are very fine for bouquets. Each 20c, dozen 2.00, prepaid.

**SPOTTED-LEAVED.**—The leaves of this beautiful variety are deep green with numerous white spots, which give this plant a magnificent appearance; the flowers are white with a black center. Fine for open ground and for plots. Each 10c, dozen $1.00, prepaid.

**GIANT YELLOW.**—A vast new Cally of marvelous beauty; the flowers are very large, often measuring 4 to 5 inches across at the mouth, and of a bright golden yellow color; the leaves are dark green, beautifully spotted with white. Large bulbs, 35c each, prepaid.

**BLACK (Sanctum).**—This interesting Calla of the Holy Land produces large flowers over a foot in length and 4 to 6 inches across, which are of dark purplish-black color. The leaves are large and of a rich green color. Large bulbs, 25c each, prepaid.

### Cinnamon Vine.

A pretty vine with neat, glossy-green, heart-shaped leaves, which late in the season bears clusters of tiny, white flowers of a cinnamon-like odor. The roots are thoroughly hardy, remaining in the ground for years, but the vine dies down every winter, shooting up with great rapidity in spring and often running 25 to 40 feet. Large roots, each 6c, dozen 50c, prepaid.

### Ismene Calatina.

A very fine and curious plant. The flowers are of a very large size, like an Amaryllis, novel form and of snowy whiteness, and are also exceedingly fragrant. Bulbs are large and strong, beginning to flower in 2 or 3 weeks after planting. Each 20c, 3 for 50c, dozen $1.75, prepaid.

### Mexican Star Flower. *(Milla Biflora)*

The beautiful flowers are pure waxy-white, 2 inches in diameter, star-shaped and usually in pairs on long slender stems. The blossoms frequently last 2 weeks when placed in water. Each 6c, dozen 50c, prepaid.
**A Bed of Cannas** Notice the Massive, Tropical Effect Obtained with these Plants.

**Large-flowering Cannas.**

**A. BOUVIER**—Brilliant crimson; 6 to 7 feet high.

**BEAUTE POITEVINE**—Crimson with scarlet shading. Splendid bedding variety. Three feet high.

**DUKE OF MARLBOROUGH**—Deep crimson; 4½ feet high.

**Mlle. BERAT**—Large flowers of an exquisite shade of pink; very effective when massed with red and yellow flowers; 4 feet.

**BUTTERCUP**—Deep buttercup-yellow; 3 feet high.

**FLOWENCE VAUGHAN**—Unusually large trusses of golden-yellow flowers, thickly dotted with bright red; 4 feet high.

**SOUVENIR d'A CROY**—Intense scarlet with broad golden border; very showy. 4 feet high.

**Frau Marie Nagel**—Large flowers of a creamy-white color when opening, changing later to pure white; 3½ feet high.

**Prices for dormant roots of above varieties, if not otherwise stated:** Each 15c, 30c $1.00. 60c for $2.25, 100 for $8.50, prepaid.

**MIXED LARGE-FLOWERING VARIETIES**, in all colors, per dozen $1.00. 25 for $1.75, 100 for $6.50, prepaid.

---

**DAHLIAS, Best Varieties.**

**COUNTLESS OF LONSDALE**, Cactus Dahlia—For perfection of blooms, size of stems and abundance of flowers this variety has never been equalled. The color is a rich salmon-pink. A very fine cut-flower.

**FLORA**, Cactus Dahlia—Pure white, very beautiful, large heavy flowers produced on stout, stiff stems valuable for cutting.

**KRIEMHILDE**—Called the Queen of Cactns Dahlias. The flowers are perfect and of brilliant pink color, which gradually shades to white in the center. One of the best cut-flower sorts.

**ROLAND von BERLIN**—Undoubtedly the best scarlet Cactus Dahlia. The flowers are of large size, globular-form, with long, narrow petals of intense vermilion-red with deeper shadings, full of fire.

**UNCLE TOM**, Cactus Dahlia—Maroon with darker shading, almost black.

**VOLKER**, Cactus Dahlia—Long, narrow petals of exquisite golden-yellow color, giving the flowers the appearance of a bright, glowing star.

**GETTYSBURG**, Giant Decorative Dahlia—One of the largest flowers, bright pure scarlet. A strong grower and profuse bloomer.

**GIGANTEA**, Giant Decorative Dahlia—Truly gigantic in size, of creamy-white color, distinct and attractive.

**JACK ROSE**, Show Dahlia—Brilliant crimson-red, rich and glowing, similar in shade to the popular "Jack" Rose. A perfect plant for garden decoration.

**PRESIDENT VIGER**, Collarette Dahlia—Rich dark scarlet; pure white collar.

**QUEEN WILHELMINA**, New Paony Dahlia—Immense, fluffy, beautiful flowers of pure white color, with yellow center. Very free flowering.

**20th CENTURY**, Single Dahlia—A magnificent single variety; the flowers are about 6 inches across, intense rose-crimson, with white tips and white ring around the yellow center.

**Price for best dormant roots of above Dahlias; Each 20c, dozen $2.00, prepaid.**

**DOUBLE MIXED DAHLIAS**—All colors and forms. Each 15c, 12 for $1.25, prepaid. 12 for 75c, 100 for $6.00, not prepaid.
Gladiolus.

The Gladiolus is the most attractive of all summer-flowering bulbs and deserves a place in every garden, as it is sure to flower and do well with little care. Flowers are of almost every desirable color. For best results they should have a sunny position.

Princes.—This magnificent new gladiolus produces spikes often 3 feet long, which carry from 12 to 20 broad-petaled, immense flowers, about six inches across, of perfect, open form and wavy substance. The color is glowing scarlet-crimson, enlivened below the throat by a large, white blaze. 15c each, $1.50 per dozen, prepaid.

America.—The plants are strong, have luxuriant, dark green foliage and erect flower spikes two to three feet long, bearing a great number of large, blossoms, showing a most beautiful shade of soft lavender-pink, almost a-tinted white; there is no other Gladiolus of such a color and none so beautiful. 10c each, $1.00 per dozen, prepaid. $8.50 per 100, not prepaid.

Augusta.—The flowers are paper-white with a slight pink shade on the lower half of the petals. 5c each, 50c per dozen, prepaid. $3.50 per 100, not prepaid.

Blanche.—This is the finest white of the Gaint type. Immense flowers of pure white, lighted marked with rose on a stem, 10c each, $1.00 per dozen, prepaid. $8.50 per 100, not prepaid.

Blue Jay.—The only real blue Gladiolus yet introduced; the color is a rich, deep violet blue. 10c each, $1.00 per dozen, prepaid. $8.50 per 100, not prepaid.

Bromleyana.—An old standard sort, and one of the best for bedding; color fiery scarlet. 4c each, 40c per dozen, prepaid. $2.50 per 100, not prepaid.

Ceres.—White, flanked with purplish rose. Good sized flowers of lasting quality. 5c each, 45c per dozen, prepaid. $3.00 per 100, not prepaid.

Eugene Scriba.—Very fine large, open flowers of a tender rose color, blazed with carmine. 10c each, 90c per dozen, prepaid. $6.50 per 100, not prepaid.

Isaac Buchanan.—Fine yellow. 10c each, 90c per dozen, prepaid. $6.50 per 100, not prepaid.

May.—A lovely pure white flowers finely flanked with a bright, rosy crimson. 6c each, 6c per dozen, prepaid. $4.50 per 100, not prepaid.

Octoroon.—Clear salmon pink, large flowers. 10c each, $1.00 per dozen, p’p’d. $7.50 per 100, not p’p’d.

GOLD MEDAL MIXTURE.

By far the finest mixture of Gladiolus ever offered, containing a splendid variety. The flowers are all extra large, of perfect form, splendid substance and of so great a diversity of color that very seldom two are alike. 7c each, 60c per dozen, prepaid. $4.00 per 100, not prepaid.

GOOD MIXED.

A splendid mixture, composed of fine sorts only, in all colors; first size bulbs. Dozen 35c. prepaid. 100 for $1.75, not prepaid.

Hyacinthus Candicans.

(Summer Hyacinth.)

Perfectly hardy plants of vigorous growth which throw up flower spikes 4 feet high, with pure white, bell-shaped and pendant flowers. They are very useful along walls and fences, and if planted in groups of a dozen or more, will produce a grand effect, but a few bulbs planted in the center of beds of other flowers, like verbenas or petunias, will also make a beautiful display; for cemetery decoration they are beautiful and appropriate. Each 5c, doz., 50c, p’p’d.

Madeira Vine.

A very beautiful and popular vine, which succeeds everywhere and is of rapid growth, covering a large space in a short time. The leaves are fleshy, heart-shaped and of a light green color; late in the season numerous scarlet flowers appear, which are of powerful and delicious fragrance. The roots should be protected with straw or litter during the winter. Each 5c, 3 for 10c, prepaid.

Tuberose.

One of the best known and most beautiful summer bulbs. Easily recognized by its exquisite fragrance and its creamy-white, waxy blooms, borne on long, massive spikes. Plant in the open ground as soon as the weather is settled and warm, giving the plants rich soil in full sun. Excelsior Double Pearl—Dwarf plants with extremely double large flowers. Large bulbs, 5c each, doz., 45c, prepaid. $1.00 for 200, not prepaid.

Zephyranthes or Fairy Lilies.

The Zephyranthes are gems of rare beauty, producing very beautiful, lily-like flowers in great profusion during the summer. They grow about 8 inches high and are very effective in masses or borders and also suitable for pot culture. 4 to 6 bulbs planted six inches apart will make a fine display. We can supply the following colors:

Pure White—each 4c, dozen 40c. — Rose—each 5c, dozen 50c, prepaid.

WINTER BLOOMING BULBS.

For fall planting, either for house culture or early spring blooming in the garden, we offer a large assortment of choice Holland Bulbs. Write for price list this fall.

Lily Auratum.

Our nursery stock is sold direct to the planters. We employ no agents; our catalogues are our only salesman.

Ever since we have been engaged in the seed growing business in Minnesota we have received inquiries for hardy nursery stock, and to meet the wishes of our customers, we started some years ago, to grow on a small scale different varieties of small fruits, apples, shrubs, etc. The business increased from year to year and now we are able to offer an almost complete list of nursery stock, all our own growth. This year we have added against many valuable varieties. All our trees and plants are properly and carefully grown. Nature furnished our soil, our very severe climate produces extra hardy, vigorous stock. Soil, climate and all other conditions are the most favorable to the growing of nursery stock, producing solid healthy growth, a splendid root system with a great abundance of fibrous roots, so necessary to the successful transplanting and future value of the trees. Trees and plants from our nurseries can withstand the cold, rigorous winters of the North as well as the hot dry summers of the West, and will grow quickly and splendidly in milder climates. We grow and supply the best grade of Nursery Stock the market affords, our stock can be depended upon to produce maximum results even under unfavorable conditions. Notwithstanding the high quality of everything we send out, you will find our prices very reasonable.

The high quality, our constant endeavor to please, and our minimum prices should merit your patronage.

NOTICE.—We have purposely eliminated from our list many varieties we do not consider reliable and hardy, as we realize that satisfied customers are our best and most valuable advertising agents.

ORDER EARLY.—It is always a good policy to order as early as possible; stock will then be reserved and shipped at the proper time for planting.

OUR GUARANTEE.—Safe arrival is guaranteed. Orders lost or damaged in transit will be refilled without charge. We do not substitute unless permitted by our customers to do so, and we guarantee that all our stock is in perfect condition when shipped, as illustrated in our Catalog and labelled true to name. If, however, through some error the stock is not as represented, we will, if notified within 10 days after receipt of stock, refund the order or refund the money.

NURSERY STOCK BY MAIL.—Many of our customers live far from railway stations, or do not wish to buy the larger and more expensive trees, and we are therefore offering a smaller size which we can ship by mail, postage paid. This stock is well rooted, strong and healthy, and with proper care will give equal as good results as the larger sizes offered.

WE PAY ALL FREIGHT CHARGES (excluding steamship and stage charges) on orders for trees and plants of $10 or more, no matter whether one person orders alone or a number order together. For parties that wish to get their trees by express instead of freight, we will pay as much towards the express charges as the freight would amount to, balance to be paid by purchaser. This applies to trees and plants only, not to seeds. With smaller orders we generally add a few plants to help pay the freight or express charges, and we shall be glad if customers will mention what they prefer. Packages of thirty pounds or less generally go just as cheap by express as by freight. Strawberry plants must be shipped by express to insure delivery in good condition, therefore the above offer does not include Strawberry plants.

OUR NURSERY is thoroughly inspected and a certificate of the State Entomologist will be attached to all shipments.

DO NOT BUY FROM AGENTS.—In the first place, agents naturally must receive a large commission in order to pay expenses, which unduly increases the cost of stock, and furthermore, most of them have no knowledge of the goods they sell (they may claim to), and their advice cannot be depended upon. When you buy from us, you buy first-hand, which means a saving for you of 90 to per cent. Just give us a trial order.

FILLING ORDERS is done by experienced men in the most careful manner, so that our stock always reaches its destination in a good, fresh condition no matter what the distance is.

SEEDS and NURSERY STOCK are not shipped together. While seeds can be shipped almost any time, nursery stock must be shipped when danger of heavy frost is over to insure success.

OUR SHIPPING and PACKING FACILITIES are excellent. Our large cellars and packing sheds enable us to pack early regardless of the weather, so that we can always ship to our Southern customers at the proper time for planting.

QUESTIONS regarding the handling, planting and taking care of nursery stock will be cheerfully answered, and any information from our friends about their success with our stock will always be highly appreciated.

CARE OF STOCK ON ARRIVAL.—As soon as trees or plants arrive they should be unpacked and planted; if it is impossible to do so at once, they should be heeled in moist earth in some sheltered location.

PLANTING.—A hole should be dug sufficiently large to put the tree in without cramping the roots, and always deep enough so that 2 or 3 shovels full of good surface soil can be thrown in the bottom. When the tree is set, some good pulverized loam should be filled in around the roots, shaken thoroughly between them and then packed or tramped down. When the hole is about three-fourths filled and the soil well packed, about one-half ball of water may be poured in the hole (this is especially beneficial for evergreens), but no more earth should be put in until the water has thoroughly soaked in. In any ordinary seasons this is the only watering required. Never fail to keep the roots of all trees thoroughly protected from sun and wind while planting.

MULCHING.—When the tree is planted throw around it as far as the roots extend, and a foot beyond, five or six inches deep of rough manure or litter. This is particularly necessary in dry ground, and is highly advantageous everywhere both in spring and fall planting. It prevents the ground from baking or craking, and maintains an equal temperature about the roots.

AFTER-CULTURE.—The grass should not be allowed to grow around your trees after being planted, always dig the growth. The ground should be kept clean and loose around them until, at least, they are of bearing size.
APPLE TREES.

Our apple trees are propagated by grafts on hardy crab-apple roots. Our method differs from others inasmuch as we use a longer scion, and by planting the root-grafts deep, the scion, too, will take root, so that we may say we grow apple trees on their own roots. The trees grown by our method are the hardest obtainable and the only kind that will thrive and bear everywhere; besides they are provided with the best root system, have a mass of fibrous roots, and will be found the most dependable, the healthiest, most vigorous grown anywhere, and our varieties have proven the best adapted and most valuable for the Northwest. By planting the right varieties, fine luscious apples may be had during nearly the entire year.

A word about our 4 to 5 ft Apple Trees.—Our method of growing low branched trees is well known thru the Central and Northwestern States, and for the benefit of our customers the following information will be of value.

Our 4 to 5 ft Select are trees measuring 3/4 inch in caliper. Our 4 to 5 ft Extra Select are trees measuring 1 inch in caliper; this means that the stems of our 4 to 5 ft Extra Select trees are really heavier than any 5 to 7 ft trees offered by others. Such low branched trees with heavy stocky stems are naturally better adapted for the Central and Northwestern States than the taller slim stemmed trees; hence we claim our trees are the best, the most productive, and bring the largest, as well as the quickest returns.

Regarding our 4 to 4 ft Apple Trees.—For large commercial plantations this size is now used extensively, and we, in common with experienced orchardists and the experimental stations, recommend the planting of the smaller size. The smaller trees transplant easily and make a splendid growth right from the start, inasmuch as they retain their splendid fibrous root system, because in taking up such trees from the nursery none of the fibrous roots or “seeders” are destroyed, while in digging up the larger trees this fine root system is more or less damaged on account of the roots being branched out so far. Our 4 to 4 ft trees generally measure 3/4 to 1 inch in caliper.

In some localities in the West we sell large quantities of this size, especially of such varieties as Patten’s Greening, Longfield, Hibernal, Wealthy, Malinda and Northwestern Greening. We invite larger planters to write for the root-grafts of each of the above varieties. For extreme Northern sections we recommend the Duchess, Hibernal and Wealthy. The Hibernal is the hardiest of all known apples.

SUMMER APPLES.

DUCHESS OF OLDENBURG—Season August. This well known Russian variety is the hardest of the old list and is a young and abundant bearer. Trees of this variety may be obtained as scion-grafts on own roots by all apple growers. A beautiful apple. Well adapted for all latitudes, and the most beautiful and longest standing apple variety known. Very early. Succeeds well in the East, also far North. Does well on light soils.

yellow Transparent—Season August. One of the hardiest varieties; tree is a young and abundant bearer. Fruit similar to the Duchess but of finer color and a better keeper. Flesh white, tender, juicy, somewhat acid.

CHARLOM—Season August to September. Origin Russia, very hardy. Tree is spreading, vigorous and very productive. Fruit large, oblong, light yellow, carmed with dark crimson splashes, and overlaid with a heavy blue bloom; flesh white, fine grained, pleasant acid; a fine dessert and cooking apple.

LIVELY—Season August to September. A valuable Russian variety with medium to large fruit of a beautiful clear waxen-white color, marked crimson; flesh stained with red, extra good flavor, tender, juicy and sub-acid. Tree extremely hardy and succeeds well everywhere.

AUTUMN APPLES.

FAITHFUL, or SNOWAPPLE—Season November to January. Originated in Canada, but not considered hardy in latitudes north of the Twin Cities. Fruit medium, greenish yellow, striped red; flesh snow-white, very aromatic, tender, juicy and delicious. A very beautiful apple. A fancy table variety and valuable for market.

IOWA BEAUTY—Season October to December. Tree a strong, vigorous, upright grower, very hardy. Fruit very large, roundish, of golden yellow color, striped and splashed with dark red. One of the handsomest large fruits on our list and a favorite wherever known. Flesh rich yellow, firm, juicy, acid, and of excellent quality.

LONGFIELD—Season Sept to Dec. Origin Russia. A strong spreading grower, with grayish woolly leaves and shoots. Very hardy. An early, annual and heavy bearer, inclined to overbear; fruit medium sized, roundish conical; skin smooth, polished, clear waxen yellow with a lively red blush. Flesh white, subacid, tender, juicy and of excellent aromatic flavor.

MAHON WHITE—Season October to December. A very strong, spreading grower, very hardy and a good bearer. Fruit very large, roundish conical and of a light yellow color, with delicate blush, becoming almost clear white when fully ripe; a beautiful fruit. Flesh white, crisp, juicy, sprightly sub-acid. A fine table fruit and extra good for cooking. Does well here and tree bears very young.
APPLE TREES. Cont’d.

AUTUMN APPLES, Cont’d.

OKABENA—Season Sept. to Oct. Originated in Minnesota and is one of the best apples for the Northwest. Tree very hardy and productive, bears young, and is free from blight. Fruit medium to large, slightly flattened, yellow, striped and splashed with red. Flesh yellow, firm and juicy, richly flavored, crisp and juicy, unexcelled in quality. Valuable for all purposes, fine market sort.

PETER—Season Oct. to March. Originated in Minnesota. Resembles Wealthy in size and color of fruit, but tree is considered hardier, less affected by blight and more productive.

WEALTHY—Season Oct. to Feb. Originated by the late Peter M. Gibson. A vigorous, spreading grower, very productive and hardy. Fruit above medium to large, oblate, very regular, smooth, light yellow, almost wholly cov- ered with bright red splashes and stripes. A beautiful fruit. Flesh white, often tinged with red, tender, very juicy, sprightly subacid, very good for table use and cooking. A splendid and profitable market sort.

WOLF RIVER—Season Oct. to Dec. Originated near Wolf River Wis.; very hardy, succeeds well North and South. A great show apple, being the largest apple known and a beautiful, bright red color. Quality fair.

WINTER APPLES.

ANISIM—Season Nov. to Jan. The trees are of fine form, upright, but spreading with age, have exceedingly strong shoulders and are very hardy and strong growers. They commence to bear when very young and bear regularly enormous crops of beautiful fruit. The apples are of medium size, roundish conical, and of a dark red color overlaid with a blue bloom, and starred with minute white dots. The flesh is white with green streaks, fine, grained, juicy, and pleasant subacid. One of the best and most profitable for the Northwest.

BEN DAVIS—Season Jan. to April. A well known and very profitable commercial variety. It hardy here and should be planted extensively in Southern Minnesota and farther south. Tree is a free grower and early bearer. Fruit large, handsome, brightly striped and splashed with red; flesh white, tender, quality medium.

BIRCHER—Season Nov. to Dec. Originated in Russia. Very valuable in the extreme North; it will succeed in localities where no other apple will live. Tree vigorous, very productive. Fruit large, irregular, oblate, greenish yellow with a tall red blush splashed red on sunny side and a large patch of russet radia- ting out irregularly over nearly the entire base. This is a marked characteristic by which it is easily distinguished from similar varieties. Flesh firm, sweet, green, medium size, fine, sour, juicy and excellent for cooking, also fine for table use when fully ripe.

JEWEL’S WINTER—Season Jan. to March. Tree very hardy, of vigorous growth and an early bearer. Fruit large, yellow, with some russet bloom blush; flesh tender, and cvy. mild subacid. One of the finest and best late-keeping apples. Fruit hangs to tree well, withstanding strong winds.

Scott’s Hardy Winter.

Northwestern Greening.
APPLE TREES. Cont'd.

WINTER APPLES. Cont'd.

UNIVERSITY—Season Nov. to Dec. Tree very hardy, a vigorous grower and very productive. Fruit large, very regular, clear yellow with abundant white bloom; flesh firm, juicy, fine quality. Should be planted everywhere. This variety should really be classed as a late autumn sort, but owing to its commercial value as a market sort, we consider it fully as valuable as most winter apples.

WALBRIDGE—Season Jan. to April. Perfectly hardy as far north as Southern Wisconsin and Minnesota. Tree is a heavy bearer. Fruit is medium size, yellowish green, striped and sparsely with red; flesh fine grained, tender, subacid, fine quality.

YAHNKE or WINTER KING—Season February to April. Originated in Minnesota. One of the hardest winter apples for the Northwest. Tree is of spreading growth, annual and heavy bearer, tree from bright. Fruit large, very handsome yellow, almost covered with glossy bright red; flesh line grained, slightly melting, excellent quality. Extra good for dessert and canning and a profitable market sort.

CRAB & HYBRID APPLES.

Prices and Sizes same as Apples, see Page 99.

Crab apples are every year becoming more esteemed and cultivated. They are both useful and ornamental, and combine the qualities of extreme hardiness and productivity, being capable of enduring an extremely cold climate, and bearing annually large crops of highly colored and beautiful fruit, of which some varieties are excellent for the dessert, while others are valuable for drying, cooking, and preserving, jellies, cider, etc.

BEACH'S SWEET—Season Sept. to Oct. Extremely hardy tree of handsome shape and quick growth, a very heavy bearer. Fruit is large, of bright red color with pleasant sun blushed and ripened in the sun. The flesh is very juicy, crisp and firm, uneccelled in quality. Without doubt the best of the sweet crab apples. Very fine for dessert and canning. In full fruit it is one of the most ornamental trees grown. Considering its extreme hardiness, early productivity, beauty of fruit and value for culinary purposes, this splendid variety should have a place in every garden.

SWEET-PEACH (Crab)—Season Sept. to Oct. A vigorous, hardy tree of handsome shape and quick growth. Fruit large, yellow ground covered with rich red stripes; flesh yellow, medium fine grained, subacid. A fine and valuable variety for all purposes.

CRAB & HYBRID APPLES.

Prices and Sizes same as Apples, see Page 99.

CRAZY—Season Aug. to Sept. Tree hardy, spreading, very productive and the earliest of all to bear fruit. The fruits are of medium size, greenish yellow with crimson stripes and sparsely covered with a whitish bloom. Flesh is white, crisp, subacid, almost sweet and very fine for eating; good for sweet pickles.

FLORENCE (Crab)—Season Aug. to Sept. Hardy Minnesota variety. Tree of dwarf habit, wonderfully productive. Fruit medium size, of rich carmine red when ripe; excellent for cooking, for cider and good market sort.

HAWKEYE TREE PROTECTOR.

The trunk and lower branches of a tree are very liable to be injured by sunscald which burns the bark over the affected portion and is due to the alternate freezing and thawing of the sap in winter. To protect the tree against sunscald use the Hawkeye Tree Protector, which is also a sure protection against rabbits, mice and other vermin. This tree protector is made of the best quality rock elm veneer, is 30 inches long, 12 inches wide; it is clean, neat and easily applied. These are put up in crates of 100 to each crate; weighing about 50 lbs. each. Must be shipped by express or freight, purchaser to pay charges, 100 for $1.00, 1000 for $6.00, 50 at 100 rates, not prepaid.

HAWKEYE TREE PROTECTOR.

The trunk and lower branches of a tree are very liable to be injured by sunscald which burns the bark over the affected portion and is due to the alternate freezing and thawing of the sap in winter. To protect the tree against sunscald use the Hawkeye Tree Protector, which is also a sure protection against rabbits, mice and other vermin. This tree protector is made of the best quality rock elm veneer, is 30 inches long, 12 inches wide; it is clean, neat and easily applied. These are put up in crates of 100 to each crate; weighing about 50 lbs. each. Must be shipped by express or freight, purchaser to pay charges, 100 for $1.00, 1000 for $6.00, 50 at 100 rates, not prepaid.

HAWKEYE TREE PROTECTOR.

The trunk and lower branches of a tree are very liable to be injured by sunscald which burns the bark over the affected portion and is due to the alternate freezing and thawing of the sap in winter. To protect the tree against sunscald use the Hawkeye Tree Protector, which is also a sure protection against rabbits, mice and other vermin. This tree protector is made of the best quality rock elm veneer, is 30 inches long, 12 inches wide; it is clean, neat and easily applied. These are put up in crates of 100 to each crate; weighing about 50 lbs. each. Must be shipped by express or freight, purchaser to pay charges, 100 for $1.00, 1000 for $6.00, 50 at 100 rates, not prepaid.
CHERRIES. HARDY VARIETIES.

Price of all varieties (except Compass and Rocky Mountain), extra select trees, 4 to 5 feet high, 12 for $3.50; 25 for $6.50; 100 for $24.00.

EARLY RICHMOND (English Pie Cherry)—A well known old standard variety. Tree is hardy, healthy, a tree grower, very productive and regular in bearing. Fruit bright red, firm, with a fine, acid, rich and overscent flavor. One of the best for canning and for pies. The most popular of the true Kentish Cherries. Ripens in June.

HOMER—Very hardy and productive bearing variety. Fruit of medium size with very small pit, dark red; flesh juicy, rich, of excellent quality, similar to Early Richmond. An all-around good variety for the Northwest, and should be extensively planted. The Homer Cherry has attracted much attention of late among the Minn. growers on account of its extreme hardiness. Ripens in July.

MONTMORENCY—A beautiful, large, red cherry, larger and finer than Early Richmond, but fully 10 days later. Being extraordinary productive and very hardy, it can be highly recommended. Valuable for canning and preserving. One of the best and most popular varieties.

WRAGG—Originated in Iowa. Tree very hardy, dwarf, not subject to disease, a regular bearer. Fruit large, dark red, nearly black; flesh tender, juicy, rich, slightly acid. The hardest and longest lived of the Morello type cherries. Splendid market sort. Ripens in July.

COMPASS CHERRY-PLUM—The hardiest variety in cultivation. Will withstand a winter temperature of 60 degrees below freezing and bear an abundant crop of fruit the following summer. This cherry originated at Springfield, Minn., and is absolutely hardy everywhere. Fruit is about an inch in diameter, of bright red color, sweet, juicy and of very fine flavor. The tree is a regular and heavy bearer, and produces fruit the next year after setting out. For exposed situations and for the far North and West it is "the cherry." (See Illustration on page 103.)

SPECIAL OFFER:—For the benefit of those of our customers who live far from railway stations, we offer small, well rooted cherry trees of the following varieties: Early Richmond, Homer and Rocky Mountain Cherry, by mail postpaid for 25c each, 12 for $2.50.

Do not fail to try a few of these quick bearing trees, they will surely prove you.

PLUMS. HARDY AMERICAN VARIETIES.

Plum Trees will bring the best results and produce the most perfect fruit when two or more varieties are planted together.

Price of the following varieties, extra select trees, 4 to 5 feet high, 12 for $3.50; 25 for $6.75; 100 for $25.00.

CHERRY—A very hardy and early variety, introduced by Mr. Marie of La Crosse, Wis. Tree is a strong, vigorous, upright grower and an excellent bearer. Fruit oval, medium to large, dark red, with slight yellow bloom; flesh yellow, fine grained and firm. Valuable for market on account of its earliness. One of the best and hardest of the early early plums. The Tree is very ornamental when in bloom on account of its large flowers. Will he found of great value in every orchard, as there are few sorts of its season.

DE SOTO—Probably the most grown of the American sorts. Fruit of medium size, oval, overspread with bright red; flesh yellow and firm, of fine flavor and good quality. It is a profitable market variety and excellent for all home uses. Tree very hardy and productive, inclined to overbear. Does well in the Dakotas and Minnesota. Season September.

OCHEDA—One of the finest American plums. Introduced by H. J. Lodlow, the originator of the famous Okahema apple. A valuable home and market variety. Fruit of medium size, mottled red; flesh rich yellow, sweet and of finest quality. Tree vigorous, productive and a reliable fruiter. This variety can be highly recommended. Season medium late.

STODDARD—Fruit large, oval, color pinkish red over yellow, with very small white dots and dull bloom over all; skin thick and therefore a good shipper; flesh yellow; fairly juicy and of good quality.

SURPRISE—This variety originated at Sleepy Eye MInn., and is one of the best plums of Minnesota origin. A fine symmetrical grower with beautiful foliage and a good bearer. Fruit red, dotted with many minute light spots, very large and meaty; flesh pale yellow and of fine flavor; a good keeper and splendid for canning and market. Medium early.

TERRY OR FREE SILVER—Splendid new sort with very large fruit of bright red color and fine quality. One of the largest and most handsome hardy plums yet produced, which deserves extensive planting. Ripens early.

WOLF—One of the most popular and widely planted of all our hardy plums. A very rapid grower, and ripens very early in the season. Tree is hardy, productive and of fine quality. Season August 25th to September 1st. One of the best market varieties in the Northwest; an early, prime, of finest flavor, and of excellent size, and regular in bearing as far north as Manitoba, Canada.

WYANT—A very hardy and productive variety and a remarkably early and consistant bearer. The fruit attains a fair size, even with a heavy crop, and is of a beautiful, deep purplish-red color, slightly oblong in form; flesh rich yellow, of good quality. Tree is of spreading growth. A splendid plum for both home use and market. Ripens about Sept. lst.

SPECIAL.

Of De Soto, Wolf and Wyant we also offer 3 to 4 feet trees at: 25c each; $2.50 per doz.

Of Forest Garden, Stoddard and Surprise we have a limited number of extra strong 5 to 7 feet trees at: 50¢ each; $5.00 per doz.

Prof. Hansen's New Hardy Plums—Best for the Northwest.—See under Novelties, Page 124.
Pears.

Price, 4 to 5 ft. extra select trees, 35c each, 12 for $3.50.

These are not considered hardy here, but should be planted for trial in sheltered and favorable locations as far north as Southern Minnesota. The following three varieties are the hardest and most reliable.

**Flemish Beauty**—Fruit large, beautiful, very sweet, rich and melting, pale yellow, almost covered with light russet, turning reddish brown when ripe. Tree very vigorous and fruitful. Succeeds well in most parts of the country, especially recommended for the North and for Montana. Season September to October.

**Kieffer**—Very profitable market sort on account of its good shipping and keeping qualities. A favorite for canning and preserving. Fruit large, rich golden yellow. Tree is a vigorous grower, an early and prolific bearer, resisting blight to a very large degree. Most planted of any variety in the Northwest; does well in Kansas, Oklahoma, and Texas. Season October to November.

**Vermont Beauty**—A most desirable pear. The fruit is of medium size, very handsome, being yellow with a bright carmine cheek; the flesh is rich, juicy, aromatic, of the best quality. Tree hardy and a vigorous grower. Season September to October.

**Special Offer**—We will furnish one tree of each variety for 90c.

Peaches.

Price for 1 yr. old budded trees, 4 to 5 ft. high, each 30c. 12 for $3.00.

While we are not able to grow peach trees to bearing size in Minnesota, our climate is especially favorable during growing season to produce stocky and healthy trees. We list the three hardest varieties.

**Rokara No. 3**—Raised from seed received from Holara, Asia. The hardiest peach known. Has been in bearing for several years in Central Iowa, and produced fruit after 25 degrees below zero. Fruit measures over 7 inches in circumference. Yellow with red cheek; skin tough, flesh of good quality, perfect freestone. Ripens September 1st to 10th.

**Crosby**—Medium size, roundish, with a distinct seam on blossom end; skin light greenish yellow and very downy; flesh bright yellow and rather firm; tree of rather dwarfish habit. Has won especial favor on account of great hardiness. Freestone. Ripens in September.

**Crawford's Early**—This beautiful yellow peach is highly esteemed for market purposes. Fruit very large, oblong; skin yellow with fine red cheek; flesh yellow, juicy, sweet and excellent, preserving; freestone. Ripens in August.

**Special Offer**—We will furnish one tree of each variety for 75c.

Buffalo Berry.

The fruit of the Buffalo Berry resembles small currants, is round, smooth and glossy, of a beautiful red color. The berries ripen in July and literally cover the twigs and branches, and will hang on the bush until nearly freezing, and are excellent for preserving preserves, jellies, and butter, and are also much used for pies and tarts, and for making wine. The tree is hardy and will stand severe weather and is well worth cultivating for ornamental purposes alone. Plant the Buffalo Berry for a winter berry, as they bear a most delicious fruit from Dec. to Jan. Price: Extra strong transplanted trees 2 to 3 feet high, 25c each, 12 for $2.50, 25 for $4.50, 100 for $15.00. Mailing size plants, each 15c, 12 for $1.50, postpaid.

High Bush Cranberry.

Hardy in the North and Sun Proof in the South.

A very hardy and attractive shrub with beautiful, rich dark green foliage and large clusters of pure white flowers in early summer; these are followed by large berries which turn a rich deep scarlet in autumn. The berries are not only very showy and ornamental but are also of great value for making jelly and preserves, the flavor being somewhat similar to that of the common cranberry. This variety thrives anywhere and should be planted extensively.

Price: Strong, well branched, transplanted plants, 8 to 24 inches high, 20c each: 12 for $2.50; 25 for $4.00; 100 for $14.00. To 3 feet, each 30c—3 to 4 feet, each 45c not prepaid. Mailing size, 15c each; 12 for $1.50, postpaid.

A Splendid and Valuable Small Fruits Collection.

Our Price only $6.00. Well suited for the home garden on the farm or city lot.

2. *Black Diamond Blackberries*.
4. *Austin Dewberries*.
6. *Improved Russian Mulberries*, 3-4 ft.
8. *St. Regis Everbearing Raspberries*.
10. *Aroma Strawberry Plants*.

These are all leading varieties, we will send only best quality stock and guarantee safe arrival. We pay all freight charges when this collection is ordered in connection with other trees or plants, the entire order amounting to $10.00 or over.

We pay all freight charges on $10.00 orders for Trees and Plants.

Compass Cherry. (See Page 102.)

Hardy Improved Russian Mulberry.

The tree is very hardy, stood 40 degrees below zero and bore a crop of berries the next season, an annual and abundant bearer. The fruit is from white to pink and some black in color, and from very sweet to quite tart in taste. Canned with gooseberries or rubarb they make a good sauce, relished by most everybody. Poultry raisers should plant largely of this tree near the poultry house or yard as they will soon make a nice shady place for the chickens, and the berries are much relished by the fowls and are very healthful. The wood is very valuable for fence posts, lasting for 20 years in the ground. They also make a pretty hedge if planted about ten inches to one foot apart, and kept well pruned for first few years. Owing to the favorable growing weather for Mulberries the past season, our seedlings are exceptionally strong and stocky plants. Price as follows:

- 8-12 in. 1 yr. seedlings, 100—50c; 1000—$3.50.
- 12-18 in. 1 yr. seedlings, 100—65c; 1000—$5.00.

**Price Prepaid by Mail:**

- 8-12 in. 1 year seedlings, 100 for 65c.
- 12-18 in. 1 year seedlings, 100 for 90c.

**Extra Strong, Well Branched Trees:**

- 2 ft., each 8c, 12 for 75c, 100 for $4.75.
- 3-4 ft., each 10c, 12 for $1.00, 100 for $6.50.
- 3-5 ft., each 20c, 12 for $2.00, 100 for $12.00.
- 5-6 ft., each 25c, 12 for $2.50, 100 for $16.00.
- 6-7 ft., each 35c, 12 for $3.50.

Received shipment April 30, and are very well pleased with the trees, the box opened up in line shape, everything moist and damp, and well packed.

J. C. Kongsback, West Bend, Iowa.

Russian Mulberry
HARDY GRAPE VINES.

The varieties listed are the hardest and most reliable in cultivation. Our grape vines are carefully grown stock with splendid roots. A grape vine plantation is easily taken care of and in a commercial way no fruit crop shows greater returns on the investment.

The grape is one of the best healthless fruits we have. Grown in almost any kind of soil that is not wet, any side hill will do for a vineyard. Those who have only a lot or two or a small garden, can plant them alongside a building or fence. They will take up very little room, and if properly taken care of will bear an abundance of fruit almost every year. They make a splendid screen for unsightly buildings, or can be trained over walls and fences, repaying many times over, with healthful and refreshing fruit, their small cost and care. If the vines are put down on the ground in the fall and covered with a few shovelfuls of earth they will stand a severe climate.

Price of all varieties except Beta, extra strong, well rooted 2 yr. old plants, each 12c, 12 for $1.20, 25 for $2.10, 100 for $9.00.
By Mail Postpaid we will send strong 1 year old plants at above prices. We pay all freight charges on $10.00 orders for trees and plants.

BETA—The hardiest of all grapes, will stand our northern winters without protection. See Novelties, Page 124.

WORDEN—Black. Bunch large, sometimes shouldered, compact; berries very large, skin thin. Superior to the Concord in the following points: it is better in quality, has a larger berry, a more compact and handsome cluster and ripens five to ten days earlier. It fully equals Concord in vigor, health, and productiveness. In berry it is about the size of Moore's Early, but of better quality, more vigorous and productive, and ripens but little later. We recommend it strongly. It is perhaps not quite so good a shipper as Concord, but nevertheless a very good market sort.

CAMPBELL'S EARLY—Black. A new variety that cannot be too highly recommended. Of strong, vigorous growth, very hardy, foliage perfectly healthy, very early and abundant bearer. The berries are large, nearly round, dark blue, skin thick and tough, making it a good shipper; flesh sweet, with slight aroma. The bunches are always large and beautiful. Will keep on or off the vine several weeks, after fully ripened. An excellent dessert grape and one of the best early market varieties.

CONCORD—Black. The well known fine old market sort, which is so largely planted in all sections, being decidedly the most popular grape in America. Large, handsome bunches of large juicy berries, covered with a rich bloom. Skin tender but firm, making it a good shipper; flesh juicy, sweet and tender. Vine a strong, healthy grower, very hardy and productive. For general cultivation the most reliable and profitable variety, succeeding well over a great extent of our country.

DELAWARE—Red. Holds its own as one of the finest grapes. Bunches small, compact, shouldered. Berries rather small, round. Skin thin, light red. Flesh very juicy, without any hard pulp, with an exceedingly sweet, spicy flavor. Vines moderately vigorous, very hardy and productive. The Delaware is regarded by many as the best American grape, all things considered. It should be planted in every garden and vineyard. Ripes early and is a good keeper.

MOORE'S EARLY—Black, with heavy blue bloom. Bunches of medium size, rarely shouldered. Berries large, round, of excellent quality. Desirable for market on account of its earliness. Berries larger than Concord, very much like it in flavor, and of the same good quality. Vine a moderate grower, very healthy and hardy; foliage thick and leathery. Ripens so early as to be nearly out of market before Concord is ripe. Well suited to Canada and northern portions of the United States by its hardiness. Succeeds admirably in the South also. Ripens early and bears well.

MOORE'S DIAMOND—White. A seedling of the Concord, partaking of all its good qualities. Of a beautiful greenish-white color, without any of the yellow spots so common with white grapes. Berries are large, sweet, and of as good quality as some of the more delicate varieties. It is as hardy as the Concord, a profuse bearer, and in all of the best of the newer sorts. Ripens early, a few days before Concord. Very hardy.

NIAGARA—White. Home and market growers seem to agree that this is the most valuable of all the white grapes. Its clusters are large and handsome, compactly filled with large berries having thin but tough skin. When fully ripe they are a fine pale yellow, with a thin white bloom. The flesh is slightly pulp, tender, sweet and delisflful, with a flavor and aroma peculiarly its own, and agreeable to most tastes. Vine is remarkably vigorous and productive. Foliage thick and leathery. Succeeds well both North and South and is very largely planted by vineyardists and for home use. Ripens with Concord.

BRIGHTON—Red. Bunches and berries large, dark red color, fine rich flavor, juicy and sugary. Almost seedless pulp, quality very fine. Extremely hardy, bears abundantly and stands the heat of summer well. Ripens extra early.

SPECIAL OFFER—We will send one of each of the above named varieties, including Beta, among 2 year old plants, not prepaid for $1.00; or we will send strong 1 year old plants of above nine varieties by mail postpaid for $1.00.
RASPBERRIES.

Raspberries are easily cared for, the fruit is always in demand and brings higher prices than most any other crop. Will do well in any good soil. Plant in rows 5 to 6 feet apart and about 3 feet apart in the row. Cultivate well and keep weeds out.

We plant every year a block of Raspberries on new soil, this enables us to keep our plants clean, healthy and free from insects and fungal diseases. For the extreme North we recommend Herbert, Sunbeam and Miller.

VARIETIES OF SPECIAL MERIT.

EVERBEARING RASPBERRIES—See under Novelties and Specialties.

**HERBERT**—The hardy Canadian Raspberry. A very large, red raspberry, extremely hardy and enormously productive. A chance seeding, originating at Ottawa, Canada. The fruits are of the largest size, oblong and conical, bright to rather deep red, firm, sweet and subacid, sprightly juicy and of fine flavor. Herbert will bear twice the crop of either Cuthbert or Loudon under the same conditions, has a much larger berry and is more hardy. Does especially well on heavy soil.

**Price:** Each 10c, 12 for $1.08, 25 for $1.75, 100 for $6.50, not prepaid.

**Price by mail:** Each 15c, 5 for 60c, 12 for $1.25, 25 for $2.75, postpaid.

**SUNBEAM**—A valuable variety for the Northwest. Originated by Prof. Han-son of South Dakota. The plant is very hardy and productive. Fruit medium size, bright red, and of excellent quality. Long bearing season. This berry should be planted extensively in the Prairie States.

**Price:** Each 8c, 12 for 80c, 25 for $1.50, 100 for $5.00, not prepaid.

**Price by mail:** Each 10c, 3 for 30c, 12 for $1.00, 25 for $1.75, postpaid.

**GOLDEN QUEEN**—This berry is a seedling of the Cuthbert and has about the same habit of growth and foliage but is quite hardy. The fruit is medium to large and of a rich golden yellow color when ripe. Its beauty, flavor and productive- ness make it an excellent variety for the home garden. Price same as for Sunbeam.

RELIABLE STANDARD RED VARIETIES.

**Price of the following 7 varieties:** Each 5c, 12 for 50c, 25 for 85c, 100 for $2.25, 500 for $9.00, 1000 for $16.00, not prepaid.

**Price by mail:** Each 8c, 3 for 20c, 12 for 65c, 25 for $1.00, postpaid.

**LODON**—A strong, compact grower, very hardy, and one of the best berry yielders. Fruits very large, of a rich dark crimson color, juicy and of fine flavor, firm and one of the best shipping varieties.

**Price:** Each 10c, 12 for $1.00, 25 for $1.75, postpaid.

**Price by mail:** Each 10c, 3 for 30c, 12 for $1.00, 25 for $1.75, postpaid.

**MILLER**—A thoroughly reliable variety, very hardy, thrifty and productive; an early, firm and bright red berry that is a favorite in many sections as a commercial sort. Will often produce a heavy crop on light soil, where other varieties fail.

**Price:** Each 10c, 12 for $1.00, 25 for $1.75, postpaid.

**WORTHY**—Reliable variety for the northern states; a vigorous grower and very productive. The berries are medium large, deep red in color, firm and of excellent flavor.

**Price of the following six varieties, strong, transplanted plants:** Each 10c, 12 for 65c, 25 for $1.10, 100 for $4.00, 500 for $17.50, 1000 for $30.00, not prepaid. —-price by mail: Each 10c, 12 for $1.00, 25 for $1.75, postpaid.

**COLUMBIA**—Widely known as a very hardy and productive variety. The fruit is purple, very large, firm, juicy and of delicious flavor. The fruiting season extends from July 10th to August 10th.

**CUMBERLAND**—A very valuable, mid-season variety, entirely hardy, very vigorous, healthy and enormously productive. Fruits are the largest of any black varieties, firm and of splendid quality.

**GREGG**—The leading late black variety, a popular market sort, hardy, a vigorous grower and a great yielder. Berries large and of fine quality. An enormous yielder under good cultivation.

**KANSAS**—One of the best early sorts, withstanding extreme drought and cold, bearing immense crops; handsome, firm berries of excellent quality.

**OLDER**—Extra hardy and reliable sort of recent introduction, which attracts considerable attention in the Northwest. Ripens medium early. Fruit large, with small seed, glossy black, fine quality. One of the best sorts for the home garden, but a little soft for shipping.

**PLUM FARMER**—This is the largest, most productive and most desirable blackcap in cultivation. The plants are stout stocky growers, very clean and healthy. The berries are very large, sometimes an inch in diameter, of excellent flavor, firm, thick and meaty. Good for home use, canning or shipping. Ripes very early and even, the entire crop can be picked within a week. Has proven absolutely hardy here. It is one of the most profitable market sorts.
BLACKBERRIES.

The cultivation of blackberries is a very profitable and remunerative occupation. All our blackberry plants are large, transplanted, and should not be confused with sucker plants which generally have very poor roots; the latter can naturally be sold for about half of the price of transplanted stock. We will be pleased to quote special low prices on sucker plants in large quantities, to fruit growers who have some experience in handling this class of stock.

Price, extra strong selected plants, 12 for $4.00; 25 for $7.50; 100 for $25.00; 500 for $100, 1000 for $180, not prepaid.

We furnish 6 plants at one survey; 25 at 100 rate.

Price by mail, postpaid: Each 10c; 3 for 25c; 6 for 45c; 12 for 75c.

ANCIENT BRITON—A reliable market variety of medium size and of best quality. One of the hardiest. Berries large and sweet. Sells well on the market and is a very profitable variety. It is one of the best known and most planted varieties in the North Central States.

BLACK DIAMOND—Canes are vigorous and hardy. The fruit is very large sometimes 10 inches in length, glossy black, sweet, rich and without hard core. An excellent variety for the market as well as for home use. An annual and heavy bearer.

ELDORADO—A newer introduction of vigorous growth and hardy in most localities. The berries are large, coal black, flavor sweet and melting and have no hard core. Very firm and therefore an excellent market variety. Ripens early and is a heavy bearer.

SNYDER—This is one of the best blackberries for market in the North and very hardy. The canes are vigorous and annually productive. The berries are medium in size, very sweet, juicy and of fine flavor. It also lacks the hard core found in many of the other varieties.

STONE'S HARDY—For the northern sections of Minnesota and similar latitudes this variety is particularly adapted. The canes are upright, very vigorous and exceptionally hardy. The berries are of medium size, very sweet and of fine flavor and good quality. This variety should receive good cultivation or heavy mulch and be thoroughly pruned, as it sets more fruit than that which can mature properly under ordinary cultivation.

DEWBERRIES.

A variety of blackberry that trails on the ground. In size and quality the fruit excels the blackberry; very profuse bearer and reasonably hardy. Vibes should be covered with straw or earth over winter in cold climates. The fruit of the dewberry is highly prized as a market fruit, owing to its large size and fine quality.

Price, strong selected plants, 12 for $4.00; 25 for $7.50; 50 for $12.50; 100 for $25, 1000 for $100.

Price by mail, each 10c; 3 for 25c; 6 for 45c; 12 for 75c, postpaid.

LUCRETIA—One of the most widely planted of the dewberries. It is a strong grower and exceedingly productive. The fruit is large, luscious and handsome. Glossy, shining black, and ripens from the first to the middle of July, according to locality.

AUSTIN—A new variety, but has been thoroughly tested and is giving good results. The fruit is larger than that of the Lucreta and a week earlier. The foliage is robust and healthy, not inclined to sun-burn. A very valuable novelty and well worthy a trial in your garden.

We pay all freight charges on $10.00 orders for Trees and Plants.

DWARF JUNEBERRY, Large Fruited.

The berry for the extreme North and South. Very hardy, enduring the coldest winters as well as the hottest summers without injury. It forms dense bushes and begins bearing fruit when quite young, often producing several quarts of fruit from one bush. The fruit is very sweet, of excellent flavor, and of a reddish purple color, changing to bright black when fully ripe. Every garden should contain at least a dozen of this remarkable Juneberry.

Price, extra strong transplanted plants, 2 to 3 feet high, each 20c; 12 for $1.75; 25 for $3.25; 100 for $12.00.

Price by mail, smaller plants, each 15c; 3 for 40c; 12 for $1.50; 25 for $2.75; 100 for $10.00, postpaid.

ELDER BERRY, Large Fruited.

These berries are highly esteemed for cooking and in the making of cordials. In many parts of Europe they are grown for the purpose of making wine, and are said to be of great value for medicinal purposes in case of stomach disorders. The bush is quite ornamental, and deserving a place in every yard. Absolutely hardy everywhere.

Price, 2 to 3 ft. high, each 15c; 12 for $1.50.

Smaller plants, by mail, each 15c; 12 for $1.50, postpaid.

STRAWBERRY-RASPBERRY.

This wonderful berry does well in most localities. It prefers a rather moist soil, and produces an abundance of fruit on the young shoots, which grow 12 to 18 inches high. The plant is very prolific and will generally produce nearly a full crop the first season. The fruit is very beautiful, of large size and a rich crimson scarlet color, resembling a strawberry in some points and a raspberry in others. It makes delicious jellies, jams and tarts. Should not be picked until thoroughly ripe.

Price: By mail, each 10c; 3 for 25c; 6 for 45c; 12 for 80c, postpaid.

DWARF BLUEBERRY.

A hardy native dwarf shrub with shiny leaves and bluish-black berries of good size, which are highly esteemed for pressed, candy, etc. This plant grows so well under cultivation and we have many calls for them. 12 for 40c; 100 for $2.50, not prepaid.

For 50c; 12 for 50c, postpaid.
**STRAWBERRIES.**

The Strawberry is the favorite fruit of every home and may be successfully grown in any soil adapted to the growth of ordinary field or garden crops. For field culture plant in rows 3 feet apart, 1 foot in line apart in the row; for garden culture 18 inches apart each way, leaving a pathway every third row. After the ground is frozen in fall cover lightly with leaves or straw. Remove covering early in spring when plants begin to grow. Before the fruit begins to ripen, mulch the ground around the plants with short hay or straw. This will not only keep the fruit clean, but will prevent the ground from drying and blowing about, thus lengthening the fruiting season.

As soon as the plants arrive, cut the bunches open and place them in some receptacle with water, so that the roots only will become wet. Care should be taken to set the plants the right depth and not too deep or too shallow. Set plants so the crown is at the surface.

*We ship Strawberry Plants by Express and Mail only, and we pay the express charges or postage, and guarantee safe arrival.*

The varieties marked "P" have perfect flowers and will produce fruit abundantly without being cross-pollinated by other varieties. Varieties marked "imp" have imperfect flowers and cannot produce much fruit unless properly mixed with a perfect variety. Some imperfect varieties will often produce enormous crops of magnificent berries if planted alongside a perfect variety.

**Price for all varieties, except Pride of Minnesota and Autumn, 25 for 50c; 50 for 85c; 100 for $1.25; 500 for $4.75; 1000 for $7.00. Not less than 25 plants furnished of any variety.**

---

ARONA—P—Late. (See cut above.) One of the best late ripening varieties. It is planted extensively in the North as well as the South, and seems to be suited to all localities. The berries of this variety are very large and bright red. The flavor of the fruit is rich and deliciously aromatic; the flesh solid and smooth. As a pollinator for late imperfect sorts it is unexcelled.

BEDERWOOD—P—Early A popular variety among market growers; the berries are medium sized, of delicate crimson color, and delicious flavor. A firm berry which makes an ideal shipper. As a pollinator for late imperfect sorts it is unexcelled.

LOVETT—P—Early. Berries of large size, conical in shape and of deep crimson color; the flesh is dark rich red, very juicy and of excellent flavor. Very productive.

MICHEL'S EARLY—P—Extm early. A well known, standard sort. Berry medium to large in size, red and bright crimson in color. This is a deep lasting variety, solid and of good quality. A valuable variety on account of its earliness and productiveness.

SENIOR DUNLAP—Medium early. The berries are deep red, most attractive, of great size, and of fine quality. Splendid market sort and one of the best for home use. Has no superior as a canning berry. Hardy, yields a strong fruit and one of the best all-round and most dependable berries.

NICK OHNER—P—Medium early. On account of its unusually rich flavor this variety has justly become one of the most popular strawberries. The berries are large, cone-shaped, and of rich crimson color. Plants are strong and thrifty growers.

BRANDYWINE—P—Late. A fancy market variety with deep red, rich crimson color and red all thru; flavor very delicious. The plant roots deep, enabling it to endure more dry weather than most varieties. Productiveness above the average; thrives in any soil.

CARDINAL—P—Late. Splendid new variety which has given the best results wherever tried. The berries grow in great clusters, are very large, and of deep cardinal color; their flesh is rich dark red and of a most delicious flavor. It is one of the best shippers. Plant Cardinal together with the Cardiia for pollinating.

CHAMPION—P—Late. The champion among the late varieties; it is most productive and bears very large, deep red berries of the finest quality. It is a deep rooter, has smooth, dark green foliage and the fruit well up from the ground, making it easy to pick. Resistant to disease.

CRESCENT—Imp—Early. The standard of productiveness all over the country, succeeds everywhere, stands neglect best of any; plant small, berries fair size, bright and attractive. Makes a very large and the most profitable berry for market.

GANDY—P—Late. One of the best long-keeping and shipping varieties. The berry is of a rich, bright red color and delicious flavor. Ripens extremely late, being full of fruit when other late bearers have finished their season and its berries always bring the full price of the season. Gives its best yields on heavy clay soil. Plant with Aroma for best results.

ENORMOUS—Imp—Late. Fine large fruit of splendid dark red color, of excellent flavor, rich and aromatic, enormous yielder. Runners produced in great numbers.

**Everbearing or Fall Bearing Varieties.**

Pride of Minnesota.——The New Everbearing Strawberry. The hardest and most productive of this new class of berries. The fruit is large, round, red, of perfect shape, deep red in color, glossy, attractive and smooth, and possesses that highly desired rich aromatic flavor. The plants are of good size, strong growers and winter better than any other kind we have tested. For best results plant in hills and cut the runners. Under ordinary conditions the plants will bear fruit from June until hard freezing weather. If wanted for fall bearing the first blossoms should be picked off, until within 3 to 4 weeks of the time the crop is wanted for market. In this way berries may be had in quantity from August to October in this latitude. Of great merit and highly recommended for market and home garden. The supply of plants is limited. Price: 6 for 50c, 12 for 75c, 100 for $5.00, prepaid.

THE IOWA—P—This gives very good results here in the Northwest, but apparently not so well adapted for the East. Plant is a very stately and strong grower and succeeds best on clay soils. Extremely productive, berries nearly round, of medium size and rich dark red color, the flavor is very good. We have fruited this variety here and marketed excellent quality berries during the months of September and October. Price: 12 for 60c, 100 for $3.75, prepaid.
CURRANTS.

Currants are very hardy, easily cultivated, do well most anywhere and in any soil, and will stand more neglect than any other fruit. They ripen just before the Raspberries and are very profitable for the market. One experienced fruit grower writes: ‘I make more money from an acre of currants than from any small fruit I grow.’ When currants are grown on a larger scale for market, set the plants 4 feet apart, cultivate well, keep free from weeds and mulch every Fall, to secure best results. We furnish 6 plants at dozen rate, 50 at 100 rates.

NORWAY—Originated in the parish of Vardal near Gjovik, Norway. It is a vigorous grower and an extremely heavy bearer. The bush looks much like the Long Bush Holland, but the fruit is much larger than that of any American sort, is of a bright, translucent red color, and has a pleasing, succulent flavor. This is the hardest currant we know of, and will prove of very great value for planting in the extreme north where the ordinary varieties fail to make pollen and set fruit. As it also withstands drought extremely well, this splendid currant is well suited for the western states.

Price for extra strong, selected 2 yr. old plants, not prepaid, each 25c; 12 for $3.00; 25 for $4.50.
Price for strong 1 yr. old plants, by mail each 20c, 12 for $2.00, prepaid.

PERFECTION—This grand new variety was originated by Cha's O. Hooker, of Rochester, by crossing the Fay's Prolific with the White Grape currant, with the view of combining the large size and color of the Fay with the good quality and productiveness of the White Grape. The color is a bright red; size as large or larger than Fay, the clusters averaging larger. The perfection has a long stem, making it easy to pick without crushing any of the berries. It is a great bearer. The berries are of rich, mild flavor, subacid, plenty of pulp with a few seeds. Less acid and of better quality than any other large currant in cultivation.

Price for extra strong, selected 2 yr. old plants, not prepaid, each 20c; 12 for $2.00; 25 for $3.75; 100 for $13.50.
Price for strong 1 yr. old plants, by mail each 20c; 12 for $2.00.

12 HARDY, RELIABLE and PROFITABLE VARIETIES.

Price of the following 12 Currants: Strong 2 yr. old No. 1 plants, not prepaid, each 15c; 12 for $1.50; 25 for $2.75; 100 for $8.75; 500 for $35.00; 1000 for $60.00. Price for strong 1 yr. old plants, by mail, each 15c; 12 for $1.50; 25 for $2.75, prepaid.

Red Varieties.

CHERRY—Berries very large, sometimes measuring one-half inch in diameter. A strong grower, and must have good culture to do well.

FAY'S PROLIFIC—Has been widely planted, and has given general satisfaction; fruit very large, bright red, and of excellent flavor, less acid than Cherry. It has a long stem, which admits rapid picking, and is enormously productive. Bears early. One of the best market sorts, and equally valuable for home use.

LONDON MARKET—Very popular variety in the Michigan fruit sections. The fruit is of good size, dark red in color, with sprightly acid flavor. Bush is vigorous, upright, very strong grower. It begins ripening at an early age and is enormously productive. Valuable for the home garden and commercial purposes.

LONG BUNCH HOLLAND—The best of the late red sorts, ripens after others are gone. Vigorous and productive; the clusters are long and the berries of large size.

NORTH STAR—Very hardy and vigorous. The bunches average four inches in length. Berries large, less acid than most currants and of extra good quality. A great producer.

PRINCE ALBERT—Bush is of vigorous, upright growth. Clusters medium, berries very large, bright red, juicy and of very fine flavor. Immensely productive, highly valued at canneries and for jelly. Ripens late.

RED CROSS—A fine red currant, with long clusters and berries of large size and mild, pleasant flavor; a vigorous grower and very productive.

VICTORIA—Bushes long, berries large, of a bright red color and excellent quality. Bush is a good grower, extremely hardy.

Black Varieties.

BLACK CHAMPION—Very productive, large bunch and berry, excellent quality; strong grower.

LEE'S PROLIFIC—An old and always popular English variety. The bush is short, robust and enormously productive; berries are large, acid, and of a good quality for cooking; one of the hardest.

White Varieties.

WHITE DUTCH—Well known white variety of excellent quality. This is an old standard sort that has given very good satisfaction everywhere.

WHITE GRAPE—The best white currant. Bunches are large and full, berries large, sweet, of a beautiful translucent white; mild, superior quality; fine for table. Bush grows quite vigorous and produces large crops.

ASPARAGUS ROOTS.

A bed of asparagus in the garden properly attended to, will for many years furnish an abundance of the finest vegetables in the early spring. See that the ground is kept clean and well manured every Fall. Plant about 5 to 10 inches apart in rows, and the rows 3 to 4 feet apart. Plant deep enough to permit the crowns to be covered about 3 to 4 inches with good, rich, mellow soil. We recommend the 1 yr. old roots for planting new beds, they generally give best results. Where old beds are to be filled out plant 2 yr. old roots.

Price: Strong, selected 1 yr. old roots, 12 for $1.50; 25 for $3.00; 50 for $5.00; 100 for $8.50, not prepaid.
Price: Strong, 2 yr. old roots, 12 for $2.50; 25 for $4.50; 100 for $25.00.

COLUMBIA MAMMOTH WHITE—A distinct variety with pure white shoots which remain white as long as it is for use.

CONOVER'S COLOSSAL—A well tried, standard variety of large size, quick growth and excellent quality.

EARLY GIANT ARGENTINE—This variety deserves the attention of market gardeners and private planters, for it is a mammoth sort and the earliest variety in existence.
New and Valuable Varieties.

**CARRIE**—Considered the hardest, healthiest, most productive and best all around gooseberry grown. The plant is a very strong grower, the branches being almost thornless, and this advantage alone should bring the Carrie Gooseberry into popular favor. The fruit is of medium size and is produced in clusters, which accounts for the fabulous yields that this variety is credited with. The berries are light red in color, of fine flavor and excellent quality. The best and most productive variety for the North. Price, strong 2 year old plants, each 30c., 12 for $2.50, 25 for $5.00, 100 for $15.00, 500 for $70.00, not prepaid. Price by mail, strong 1 year old plants, each 20c., 3 for $5.00, 12 for $2.00, prepaid.

**JOSELYN or RED JACKET**—A large, beautiful, bright red berry of most delicious flavor. A vigorous grower, clean, healthy and mildew proof. Has proven everywhere thoroughly hardy and enormous in production and can be highly recommended. It is considered the best red-furred Gooseberry in cultivation. Price, by mail, 1 year old plants, each 25c., 12 for $3.00, prepaid.

**KEEPSAKE**—An English variety of unusual merit, growing in tree form, of dwarf habit and very productive. The fruits are very large, straw colored, of excellent flavor and unequalled for shipping. Price, 1 year old plants, 10c., 3 for 30c., prepaid.

**WINHAM or INDUSTRY**—A strong, upright, immensely productive variety. Fruit very large, dark red, hairy, with a rich agreeable flavor. One of the best sorts for market, either green or ripe. This and the Keepsake are English varieties and only do well in certain parts of the Northwest, but they are well worth a trial everywhere, as the fruit is very large and of the best quality. Price, 1 year old plants, 10c., 3 for 30c., prepaid.

**PEAK**—A very prolific and vigorous variety, free from mildew. The fruit is large, pale green and of the best quality. This variety deserves a place in every garden on account of its healthfulness, quick growth, freedom from mildew and its great productiveness. Valuable for home use and for market. It is the most prolific Gooseberry known, one bush produced 2500 berries.

Standard Varieties.

**CHAMPION**—Bush is a vigorous grower, free from mildew and rust. The fruit ripens early, is round, smooth, greenish white, with a thin, transparent, skin quality excellent.

**DOWNING**—An excellent variety for both home and market use; bush is a vigorous grower, very prolific and free from mildew; fruit medium-sized, of pale green color and fine quality; splendid for dessert and cooking.

**Houghton**—The fruit is medium sized, roundish oval, pale red, sweet and tender. The plants are of spreading habit, slender, enormously productive, very hardy and reliable.

**Horse Radish Roots.**

This popular condiment is very easily produced in the home garden and anyone who has compared the freshly dug article with that sold over counters, can appreciate the value of good home grown horse radish. A half dozen roots will provide the ordinary family for a season and as it spreads quite rapidly, the source of supply is easily maintained. We furnish strong roots, not pieces.

Price: By mail, each 20c., 3 for 50c., 5 for 90c, postpaid. Extra large roots, 12 for 35c., 25 for $1.25, 100 for $5.00, not prepaid.

**Rhubarb or Pie Plant.**

Also called Wine Plant. This plant affords the earliest material in the spring for pies and tarts. Invaluable for canning and wine. Can be set out either in spring or fall. Will grow in any good garden soil. Plant in rows four feet apart, and the plants three feet apart. Set the roots so that the crowns are about an inch below the surface.

**Linnæus**—The standard variety. Early and tender.

**Victoria Giant**—Stalks very large, of excellent quality.

Price: By mail, each 15c., 3 for 35c., 12 for $1.00, postpaid. Extra strong 2 year old plants, each 10c., 12 for 80c, not prepaid.

**Red Wine or Delicacy**—On account of the beautiful bright crimson color of the flesh and the sauce made from it, this variety is highly recommended.

Price: By mail, each 15c., 3 for 35c., 12 for $1.00, postpaid. Extra strong 2 year old plants, each 10c., 12 for 80c, not prepaid.

**How to Make Your Home Attractive**—If you have built a new house or wish to improve the old homestead let us write you how to make the surroundings attractive. Draw a rough sketch of the ground that is to be improved, giving the size and marking where the buildings are located and send it to us; we will give our ideas and select the shrubs and trees so that your home will be among the finest in your vicinity.

Pearl Gooseberry.
ORNAMENTAL and SHADE TREES.

Our list of trees contains only hardy varieties, which are adapted for the Northwest, and all have been raised in our nursery near Faribault; they are well pruned, have good bodes and tops all have been transplanted and have good fibrous roots.

For Tree Seedlings see page 113.

Prices for All Trees are F. O. B. Faribault, freight or express to be paid by purchaser. 6 at dozen rates, 80 at 100 rates.

We pay freight charges on $10.00 orders of Nursery Stock.

ASH, AMERICAN WHITE. (Fraxinus Americana)—Valuable hardy native trees of rapid growth, forming straight trunks, broad and oval shaped heads. Desirable for ornamental purposes and also for timber planting. A splendid tree for the Northwest, of very quick growth while young, and resists drought and severe cold well. 2 to 3 feet, 12 for $1.00, 100 for $7.00, to 5 feet, each 15c, 12 for $2.50, 100 for $20.00.

BIRCH, EUROPEAN WHITE. (Betula Alba)—A graceful tree, with silvery bark and slender branches. Quite erect when young, but after 4 to 5 years' growth assumes an elegant drooping habit, rendering the tree very effective in landscapes. Very hardy and will grow on the poorest kind of soil; between rocks and in gravel, in fact almost anywhere. 3 to 4 feet, each 20c. 12 for $2.00, to 6 feet, each $3.50, 10 to 10 feet, each 70c, 12 for $7.00.

BOX ELDER. Ash Leaf or Manitoba Maple. (Acer Negundo)—A durable tree, growing rapidly and producing considerable shade in a very short time; mostly used in the West and Northwest, as it withstands both drought and extreme cold. 2 to 3 feet, each 40c, 100 for $5.00, to 4 feet, each 10c, 12 for $1.00, 100 for $8.00, to 5 feet, each 15c, 12 for $1.50, 100 for $12.00, to 7 feet, each 25c, 12 for $2.50, 100 for $20.00.

COTTONWOOD. (Populus deltoides)—Has a large, clean, heart shaped, the flowers, appearing in June, in large panicles, are white, sweet scented, very conspicuous and pretty; they are followed by flat to 12 inches long, slender pods, which are of brownish color and hang on the tree all winter. 2 to 3 feet, each 50c, 100 for $3.75, to 4 feet, each 15c, 12 for $1.50, 100 for $10.00, to 5 feet, each 25c, 12 for $2.50, 100 for $20.00, to 6 feet, each 40c, 12 for $5.00, 100 for $30.00. We have a few hundred extra fine, large transplanted trees, 10 to 15 feet high, with fine shaped and well branched tops, each $10.00, 12 for $19.00, 100 for $73.00.

EUIT. AMERICAN. (Ulmus)—The Elm has always been the favorite shade tree in the Northern States, and is the best street and park tree for general planting in this section. It is also one of the hardiest trees for prairie planting and will withstand a greater extent of temperature than any other of our shade trees. 2 to 3 feet, each 50c, 100 for $3.50, to 4 feet, each 15c, 12 for $1.50, 100 for $10.00, to 5 feet, each 25c, 12 for $2.00, 100 for $20.00, to 6 feet, each 40c, 12 for $5.00.

MAPLE, SILVER or SOFT. (Acer Saccharum)—A North American species of rapid growth, large size and irregular, rounded form; foliage is bright green above and silvery white beneath. Tree very hardy and easily transplanted. Where immediate shade is required, it is one of the most useful; also a favorite street and park tree. 2 to 3 feet, each 50c, 100 for $3.00, to 4 feet, each 15c, 12 for $1.50, 100 for $12.00, to 5 feet, each 25c, 12 for $2.50, 100 for $20.00, to 8 to 10 feet, each 35c, 12 for $3.50, 100 for $32.50. We have a few hundred very fine transplanted trees, nicely shaped and branched, just the thing for lawn and street planting for immediate effect. 10 to 12 feet, each $1.00, 12 for $10.00.

MULBERRY, RUSSIAN. (Morus)—See page 103.
**ORNAMENTAL & SHADE TREES, Cont’d.**

**MAPLE, SCHWEDERLIUM.** (Hardy Purple Leaf Maple)—Beautiful variety, with the young shoots and leaves of a bright purplish or crimson color, which changes to purplish green in the older leaves. Very hardy and choice ornamental tree. Of especially fine appearance in the fall when the foliage is of a deep crimson color and the foliage of other trees. In autumn the foliage turns golden yellow. 6 to 8 feet, each $1.00, 12 for $10.00.—5 to 10 feet, each $1.50.

**ORNAMENTAL CRABAPPLE,** (Sourdart)—A large fruited wild crab apple. Tree is hardy, a quick, spreading grower with odd foliage and beautiful flowers. A desirable ornamental. 2 to 3 feet, each 25c.

**ORNAMENTAL CRABAPPLE.**

**SCHWEDERLIUM.**—A purple leaf variety. 2 to 3 feet, each 25c.

**POLAR, BALSAM, BALD OF GIELD.** (Populus Balsamifera)—A luxuriant and rapid growing tree with large glossy heart-shaped foliage, and upright and symmetrical in habit. The buds exude an agreeable odor. The dull whiteness of the underside of the leaves affords a pleasant contrast in its foliage. The Balm of Gilead makes a good street tree and it is probably the best of the Polars for shade. 3 to 4 feet, each 15c, 12 for $1.50, 100 for $10.00.—4 to 5 feet, each 25c, 12 for $2.50.—7 feet, each 35c, 12 for $8.50.—8 to 10 feet, each 75c.

**POLAR, CAROLINA.** (Populus Carolinens)—One of the most rapid growing trees. With large, handsome, glossy, deep green leaves. Succeeds everywhere; especially adapted to cities, where it makes unusually fast growth and resists smoke and gas. Pyramidal in form, making a spreading head and dense shade when properly trimmed; makes a splendid windbreak or screen. The Carolina Polar is yearly planted in great numbers. Prices same as for Norway.

**POLAR, LOMBARDA.** (Populus Fastigiata)—Attains a height of from 100 to 150 feet. Well known and remarkable for its erect, rapid growth, and tall, spirey form. Indispensable for landscape gardening, to break the ordinary and monotonous outlines of most other trees. Will grow in any soil. 4 to 5 feet, each 25c, 12 for $2.50.—6 to 7 feet each 35c, 12 for $3.50.—7 to 8 feet, each 50c, 12 for $5.00.—10 to 12 feet, each 75c, 12 for $7.50.—10 to 12 feet, each $1.00, 12 for $10.00.

**POLAR CUTTINGS.** We have a surplus of cuttings, such as we plant ourselves. Price as long as supply lasts.

**WILLOWS, GOLDEN RUSSIAN.**—A very hardy and beautiful variety, growing very rapidly and making a fine, medium sized, round topped tree conspicuous at all seasons but particularly in winter time on account of its magnificent winter effect, as a lawn tree or for variety in ornamental planting. Willows continued on page 112.
Ornamental and Shade Trees, Cont’d.

WILLOWS, Continued.

WILLOW, SIBERIAN—Similar to the above; more suitable for very exposed situations.

WILLOW, DIAMOND—Very hardy variety largely planted for post timber and wind-breaks.

Prices for Golden Russian, Siberian, and Diamond Willows: 2 to 3 feet $2.00 per 100, $16.00 per 1000.—Well branched trees, 3 to 4 feet, $3.50 per 100, $30.00 per 1000.—4 to 6 feet, each 15c, 12 for $1.50, 100 for $9.00,—8 to 10 feet, each 25c, 12 for $3.50.

WILLOW, LAUREL LEAF—A hardy, rapid grower with beautiful, large, dark green glossy leaves and light green bark. Can be clipped to any desired form like a box tree and looks just as well. Valuable for windbreaks, hedges and as ornamentals. Thrives equally well on high or low ground. An especially desirable variety to plant near the water. This variety and the Golden Willow are without question the most popular trees for starting a windbreak. Price, 2 to 3 feet, $3.00 per 100, $32.00 per 1000.—Well branched trees, 3 to 4 feet, $6.00 per 100, $50.00 per 1000.—4 to 5 feet, each 20c, 12 for $2.00, 100 for $15.00,—8 to 10 feet exceptionally fine trees for lawn and street planting, each 30c, 12 for $3.00.

WILLOW CUTTINGS.

We can supply good cuttings of the following varieties: Golden Russian, Siberian and Laurel Leaf Willows, 111 cuttings, each 5 in. long, 40c. per 100, $3.00 per 1000. If ordered by mail, add 10c per 100 for postage. We do not sell less than 100 of any variety.

Hardy Weeping Trees.

These trees form objects of great beauty when planted as single specimens on lawns, in the front yard, and especially when used for cemetery decorations. Also valuable for covering banks.

BIRCH, CUT LEAF WEEPING—This fine tree is not only the most handsome, but by far the hardiest Birch. The tall slender yet vigorous growth, graceful drooping branches, silvery-white bark, and delicately cut foliage, present a combination of attractive characteristics, rarely met with in a single tree. 3 to 4 feet, each 40c.—4 to 5 feet, each 60c,—5 to 7 feet, each 80c,—8 to 10 feet, extra fine trees, each $1.00.

ELI, CAMPERDOWN WEEPING—Its vigorous branches, which have a uniform habit, overlap so regularly that a compact, roof-like head is formed. Leaves are large, glossy dark green. A strong, vigorous grower. It can be trained to form an arbor if desired. Very fine trees with strong 2 year old heads, each $1.00.

MAPLE, WIER'S CUT-LEAVED WEEPING—One of the most remarkable and beautiful trees, with cut or dissected foliage. Its growth is rapid, shoots slender and drooping giving it a habit almost as graceful as the cut-leaved Birch. The foliage is abundant, silvery underneath. 6 to 8 feet, each 75c.—8 to 10 feet, each $1.00.

MOUNTAIN ASH, WEEPING—A beautiful hardy tree of rapid growth and with pendant branches twined and twisted in all directions, in a few years forming an immense head with branches resting on the ground. Very attractive when covered with its large clusters of fragrant, feathery flowers and later with red berries. 8 to 10 feet, each 75c.

MULBERRY, TEA'S WEEPING—A very hardy, graceful and vigorous growing tree, which forms a perfect umbrella-shaped head with long, slender branches, drooping to the ground parallel to the stem. The foliage is a glossy green. Splendid for cemetery planting. Fine trees with 2 year old heads, each $1.00.

WILLOW, GOLDEN NIOBE WEEPING—Very beautiful tree of weeping habit, with long slender golden yellow branches. Forms a large tree of very graceful habit. Its fresh, bright, tint and long, wavy branches make it very attractive. Very hardy and of quick, robust growth. Adapted to a great variety of soils. Excellent for parks, long avenues, etc. 3 to 4 feet, each 50c.—5 to 6 feet, each 75c.

WILLOW, WISCONSIN WEEPING—Handsome, rapid growing, hardy variety, especially well adapted to our northern states. Desirable for somewhat moist locations. 4 to 5 feet, each 40c.

NUT BEARING TREES.

BLACK WALNUT—The tree is of large size and majestic form, with beautiful foliage. The most valuable of all trees for its timber, which brings the very highest prices in the market, oil nuts are of fine flavor and always marketable at a fair price. As Black Walnut lumber is becoming scarcer annually walnut groves are being established for the timber crop, in many sections. 2 to 3 feet, each 20c, 12 for $2.00,—4 to 5 feet, each 30c, 12 for $3.00,—8 to 10 feet, each 40c, 12 for $4.00.

NOTICE—We have a large quantity of very fine, stocky seedlings of Black Walnut and Butternut. For prices see page 115.

BUTTERNUT OR WHITE WALNUT—The nuts are large, long, oily and nutritious. This lofty spreading tree is one of our finest natives, valued for its tropical appearance and beautiful wood, as well as for its nuts. Hardy everywhere. A very rapid grower and early bearer. Price same as for Black Walnut.

ENGLISH FILBERT OR HAZEL—Oldest culture, growing six to eight feet high, entirely hardy, and one of the most profitable and satisfactory nuts to grow. Succeeds in almost all soils, bearing early and abundantly; nuts nearly round, rich and of excellent flavor. The variety we offer produces larger nuts than those commonly found in our wild woods. An excellent ornamental shrub on account of its rich foliage and compact habit of growth. 12 to 18 in., each 25c, 12 for $2.50.

Mailing size, each 15c, 12 for $1.50, postpaid.

ASHLEY, MINN., JAN. 17, 1913.

Was well pleased with the trees I bought from you last year. Every tree lived and made a good growth.

C. J. CLAUSON.
HARDY FOREST TREE SEEDLINGS.

For Descriptions See Ornamental and Shade Trees, pages 110 to 112.

All our seedlings are Nursery Grown, hardy, healthy and stocky plants with splendid root system. They give the very best satisfaction everywhere, especially here in the Northwest. To successfully meet the severe climatic conditions of our northern states only hardy, acclimated, northern grown stock should be planted, as southern grown seedlings will usually prove failure. Our seedlings are carefully grown here in our cold and changeable Minnesota climate, they are far superior to the southern grown stock and we charge no higher price for them than the inferior southern grown seedlings can be bought for.

EVERGREEN SEEDLINGS.

For full description of varieties see page 114.

We offer well rooted, 2 and 3 year old seedlings of the following varieties, which we grow in large quantities. These seedlings are Nursery grown, healthy and well rooted stock and will give best results. We are the largest growers of Evergreens in the Northwest and invite our customers to call and inspect our extensive Evergreen Arbors. Note our very low prices. We recommend these seedlings especially to customers who plant large quantities of Evergreens for windbreaks or hedges as with a little care and cultivation they will often outgrow the larger sizes and cost a good deal less. We do not sell less than 25 of any one variety.

ARBOR VITAIE. (White Cedar).—Very hardy. Extensively used for hedges and windbreaks, 2 to 6 in. 25 for $5.00, 100 for $1.25, 1000 for $10.00, 1 year, 8 to 12 in, 25 for $7.50, 100 for $2.00, 1000 for $12.00, not prepaid. By mail, 3 to 6 in, 25 for 65c, 100 for $1.50, 8 to 12 in, 25 for $1.00, 100 for $2.50, prepaid.

BALSAM PINE.—The hardest of all Evergreen Pines. Rapid grower, valuable for windbreaks or on dry soils and exposed locations. 2 year, 6 to 8 in, price same as Arbor Vitae 2 year seedlings, 3 year, 12 to 24 in, price same as Arbor Vitae 3 year seedlings.

SCOTCH PINE.—Very hardy and of quick growth. Used extensively for windbreaks, 2 to 6 in, 25 for $5.00, 100 for $1.25, 1000 for $10.00, 1 year, 8 to 12 in, 25 for $7.50, 100 for $2.00, 1000 for $12.00, not prepaid. By mail, 3 to 6 in, 25 for 65c, 100 for $1.50, 8 to 12 in, 25 for $1.00, 100 for $2.50, prepaid.

PONDERSOSA PINE. (Bull Pine or Yellow Pine)—Well suited for windbreaks and shelter-belts in exposed locations. Rapid grower, thrives everywhere, extremely drought resisting. 3 year, 6 to 12 in, price same as Arbor Vitae 3 year seedlings.

WHITE PINE.—The most ornamental of our native pines. Will grow on the poorest soils, not so well adapted for windbreaks, 3 yr., 4-8 in, price same as Arbor Vitae 3 yr. seedlings.

COLORADO BLUE SPRUCE.—Well known and generally planted everywhere. Very hardy and a splendid ornamental for the lawn and cemetery. 2 year, 4 to 8 in, price same as Arbor Vitae 2 year seedlings.

EASTERN SPRUCE.—One of the best evergreens for hedges, more extensively planted for windbreaks and shelter-belts than any other evergreen. The fastest grower of the spruces. Very hardy. 3 year, 8 to 16 in, price same as Arbor Vitae 3 year seedlings.

WHITE PINE.—Much used for ornamental planting and for shelter-belts. Hardy and thrives well most everywhere. 2 year, 6 to 10 in, 25 for $.75, 100 for $2.50, 1000 for $15.00, not prepaid. By mail 25 for $1.00, 100 for $2.50, prepaid.

EUROPEAN LARCH.—A deciduous conifer, losing its needles in fall. A very handsome, pyramidal tree. Perfectly hardy and thrives in nearly all situations. 2 year, 6 to 8 in, 25 for $.75, 100 for $1.50, 1000 for $10.00. 3 year, 12 to 24 in, 25 for $1.25, 100 for $4.00, not prepaid.
Evergreens are stately and majestic trees and wonderfully effective in beautifying the home surroundings; they are the most valuable trees for windbreaks as well as for screening objectionable places and should be planted much more extensively. All our Evergreens are nursery grown, have been transplanted several times, and when shipped, the roots are wrapped up in compact balls with damp moss and burlap.

Prices for all Evergreens are f.o.b. Faribault, freight or express charges to be paid by the purchaser. We furnish 6 at the dozen rate.

**ARBOR VITAE.** (Thuja)—Commonly known as White Cedar, grows wild in the northern part of Minnesota. Much used for telephone and telegraph poles; very popular for evergreen hedges, forming a close compact top when clipped. Stands well on good retentive land and makes a splendid windbreak on lawn or farm. Will do best where land is too moist and cold for other evergreens.

8 to 12 inches, each 10c, $1.00; 12 to 18 inches, each 20c, $2.00. — 18 to 24 inches, each 30c, $3.25. — 2 to 3 feet, each 45c, $4.75. — 3 to 4 feet, 60c, $6.50.

**BALSAM FIR.** (Abies Balsamea)—Forms a slender, spiral and very symmetrical pyramidal tree. It is one of the most rapid growing trees in the conifer group, and is extremely hardy. Foliage very dark green, needles soft short, and have a pleasant aromatic fragrance. For lawn planting, either in groups, or as a specimen, it lends itself to a variety of uses. One of the choicest evergreens for general planting, especially on heavy, retentive soils, 12 to 18 inches, each 25c, $2.75. — 18 to 24 in., each 35c, $3.75. — 2 to 3 ft., each 50c, $5.50.

**DOUGLAS FIR.** (Abies Douglassi)—A very handsome tree of symmetrical and pyramidal habit, with regular branches and dark brown bark. The needles are long and of a green or bluish green color. A very distinct evergreen and valuable for ornamental effects. 12 to 18 inches, each 30c, $3.00. — 18 to 24 inches, each 50c, $5.00. — 24 to 30 inches, each 75c. — 30 and over, each $1.00.

**DWARF MOUNTAIN PINE.** (Pinus Mugho)—Also called Dwarf Swiss Pine. A low spreading tree and very useful in lawn planting. In foliage it is a true Pine with stout, dark green needles of medium length. Valuable for planting on rocky ground and hillside. Hardy everywhere. 12 to 18 inches, each 30c, $3.25. — 24 to 30 inches, each 50c, $5.00.

**JACK PINE.** (Pinus Banksiana)—One of the handsomest of all American Pines. Very hardy, a rapid grower, resisting drought and severe cold extremely well. Especially valuable for windbreaks on dry, loose soils or exposed location. 12 to 18 inches, each 25c, $2.75. — 18 to 24 inches, each 35c, $3.75.

**PONDEROSA PINE.** (Pinus Ponderosa)—Also called Bull Pine or Yellow Pine. It forms a stout spreading tree with branches often pendulous. A rapid grower, its branches heavy and rough coated with bark. Foliage is dark and extremely stiff and hard. Very hardy, well suited for windbreaks and shelter belts in exposed locations. Does well everywhere. 12 to 18 inches, each 20c, $2.00. — 18 to 24 inches, each 40c, $4.00. — 24 to 30 inches, each 75c. — 30 and over, each $1.00.

**SCOTCH PINE.** (Pinus Sylvestris)—The Scotch Pine is one of the hardest and most rugged of all American Pines. Very hardy, a rapid grower, of very rapid growth when young, and reaches its maturity in about twenty years, after which it becomes rather open in habit. It has been planted more largely for windbreaks on our prairies than any other evergreen. Does well everywhere. 12 to 18 inches, each 20c, $2.50. — 18 to 24 inches, each 30c, $3.50. — 24 to 30 inches, each 50c, $4.75. — 30 and over, each $5.00.

**WHITE PINE.** (Pinus Strobus)—The most ornamental of all our native Pines. A tall and very beautiful tree with regular whorls of horizontal branches, forming a pyramidal crown. Foliage light, glaucous silvery green. Will grow in the poorest of sandy soils; a long lived tree and rapid grower. Not very well adapted for windbreaks. 12 to 18 inches, each 25c, $2.75. — 18 to 24 inches, each 30c, $3.25. — 24 to 30 inches, each 40c, $4.50. — 30 and over, each $5.00.

**COLORADO BLUE SPRUCE.** (Picea Pungens)—Needles about one inch long, rather broad, rigid and sharp pointed, branchlets smooth and shiny; a large tree of strictly conical growth and spreading branches, color bright glaucous, sometimes varying to dark green. It is a noble and handsome tree, and very popular with tree planters in the northern states. Very hardy and splendid for the lawn and cemetery. 12 to 18 inches, each 30c, $3.25. — 18 to 24 inches, select trees, each 60c, $6.50.

**KOSTER'S BLUE SPRUCE.** Koster's Genuine Silvery Blue Spruce. This is the choicest and hardiest of all our evergreen in existence. Foliage rich silvery-blue. This tree is very hardy and will thrive everywhere in any ordinary soil. It will always be an expensive tree, for in order to retain the rich blue color it is grafted on other seedlings, and it requires considerable care, labor and time to get these trees started, but after they have reached a height of 10 to 12 inches, they often grow faster than many other varieties. Average height 18 inches, each 25c, $3.75. — 24 to $6.25. — Average height 21 inches, each $3.00, $5.00. — 24 to 30 inches, each $4.00. — 30 and over, each $4.75.

**HEMLOCK SPRUCE.** (Tsuga Canadensis)—A remarkably graceful and beautiful native tree, with drooping branches and delicate dark foliage, distinct from all other trees. It is a handsome lawn tree and makes a highly ornamental hedge of open growth, yet dense when pruned and can be trimmed to any desired size. Its dark green growth is retained throughout winter. 18 to 24 inches, each 50c, $3.00. — 2 to 3 feet, each 75c.

**NORWAY SPRUCE.** (Picea Excelsa)—Lofty tree of pyramidal form, foliage rich deep green. A fine ornamental tree for the lawn or yard. Often extensively planted for windbreaks and shelter belts than any other evergreen. It is the fastest grower of the spruce family, making a fine large conical tree with stout and generally pendulous branches. One of the best for windbreaks. 12 to 18 inches, each 35c, $1.00. — 18 to 24 inches, each 50c, $1.75. — 24 to 30 inches, each 75c. — 30 and over, each $1.00.

**WHITE SPRUCE.** (Picea Albicola)—Needles are slender, one half inch long, varying in color from light glaucous to dark green. A graceful tree of pyramidal habit and horizontal branches, sometimes attaining a height of over 100 feet, with a diameter of two feet. It develops to its greatest perfection when growing in moist soil, but will also stand a drier location than any other spruce. Much used for ornamental plantings. A row of these trees should be in all shelter belts. A favorite for all purposes, very hardy and succeeds well generally. 12 to 18 inches, each 30c, $3.25. — 18 to 24 inches, each 40c, $4.50. — 24 to 30 inches, each 60c, $5.00.

**RED CEDAR.** (Juniperus Virginiana)—The Red Cedar is indigenous through the entire Northwest. The tree is of conical form and quite regular, densely branched, the foliage being thin and of a rich deep green. In the north the branches are thickly hung with pretty, little blue berries. Hardy and the easiest to transplant of all evergreens. Makes a fine low shelter belt and may be trimmed into any form. 12 to 18 inches, each 20c, $2.25. — 18 to 24 inches, each 30c, $3.25. — 24 to 3 feet, each 40c, $4.25.

**EVERGREEN SEEDLINGS.**—We grow them in enormous quantities. See page 115.
HEDGE PLANTS.

To make a perfect hedge, it is necessary to take into consideration the hardy, evergreen, and also the perennials. A shrub hedge is first. We sell rather dwarf, dense hedges are desired to be planted at small plants. They are 15 to 18 inches high, while if the hedge is to serve as a screen or windbreak it is best to plant 2 to 3 or 4 ft. from each other.

All our Hedge Plants are transplanted, and well grown.

ARBOR VITAE—One of the best evergreens as screens, being hardy and easily transplanted. It grows rapidly and with little care, and soon forms a beautiful hedge, very dense, and perfectly deciduous to the sight. Widely planted throughout the United States. 8 to 12 in. seedlings, 100 for $1.00, 1000 for $7.50. 18 to 24 in., 12 for $1.50, 25 for $2.75, 100 for $10.00. 18 to 24 in., transplanted, 12 for $2.50, 25 for $4.75, 100 for $17.50.

BARBERY, THUNBERGII. Japanese Barberry—Well adapted for ornamental hedges, plants of dwarf, sticky growth with small, light green foliage changing to coppery red in autumn; orange colored flowers succeeded by red fruits. Very showy and splendid for a low hedge in the yard or garden. Also fine for grounds and specimen plants. 12 to 18 in., 12 for $1.25, 25 for $2.00, 100 for $7.00. 18 to 24 in., 12 for $1.50, 100 for $10.00.

BARBERY, PURPLE LEAVED—Grows 4 to 5 feet high; leaves rich bronze-purple. Fine for ornamental hedges. A showy and effective shrub, 12 to 18 in., 12 for $1.25, 25 for $2.25, 100 for $7.50.

BARBERY, VULGARIS—A strong, upright growing sort with rich, dark green foliage. Where a good substantial and shapely hedge is wanted, this is undoubtedly the best, and is much harder than the Osage Orange. 18 to 24 in., 12 for $1.00, 25 for $1.75, 100 for $5.00. 2 to 3 ft., 12 for $1.50, 100 for $8.00.

PRIVET, CALIFORNIA—Well known hedge plant, largely planted and popular. Grows to 8 ft. tall, and adapts itself to almost any soil or situation. 12 to 18 in., 12 for $1.25, 25 for $2.50, 100 for $8.50.

PRIVET, ENGLISH.—Common Privet—A hardy, evergreen, hedge plant. Grows to 8 ft. tall, and adapts itself to almost any soil or situation. 12 to 18 in., 12 for $1.25, 25 for $2.50, 100 for $8.50.

CARAGANA, Siberian Pea Tree—A shrub-like tree, perfectly hardy, even in Canada, and especially adapted for an ornamental hedge. It stands severe winters and grows very dense, never looks coarse and on account of its hardness and resistance to drought can be planted anywhere. 12 to 18 in., 2 yr., 12 for $4.00, 1000 for $35.00. 1-1/2 to 2 ft., 12 for $1.00, 100 for $7.50.

CORIUS, SIBIRICA. (Dogwood)—Red Branched Osier. Introduced from Siberia. Very hardy anywhere and forms a perfect hedge. For winter effect it will be one of the most beautiful hedges we have, as the height of the twigs turns a rich scarlet red in autumn. 12 to 18 in., 12 for $1.25, 25 for $2.50, 100 for $8.00. 2 to 3 ft., 12 for $2.25, 25 for $4.25, 100 for $15.00.

HONEY-SUCKLE, TARTARIAN—Best hedge plant for small windbreaks and screens; also furnishing an abundance of fragrant red, white and pink flowers. Very hardy; will stand the most severe winter. We recommend it for the open prairie as well as for sheltered locations. 12 to 18 in., 12 for $1.25, 25 for $2.50, 100 for $8.00. 18 to 24 in., 12 for $2.00, 25 for $3.75, 100 for $12.50.

LILAC, PURPLE—This well known hardy shrub makes a very attractive ornamental hedge or screen. Large fragrant flower heads appear in May. 12 to 18 in., 12 for $1.25, 25 for $2.50, 100 for $8.00.

PRIVET, AMURENSIS. Hardy Amour River Privet—This is the hardest variety of all the Privets, and will do well in locations where the California Privet is not hardy. Forms beautiful, compact, dense hedges, if clipped back once or twice during growing season. Foliage is glossy green and holds its color well almost the entire year. 12 to 18 in., 12 for $1.25, 25 for $2.50, 100 for $8.00.

PRIVET, VEPICIUS. (Honeysuckle Privet)—A hardy, spreading, fast growing, evergreen, hedge plant adapts itself to almost any soil. 12 to 18 in., 12 for $1.25, 25 for $2.50, 100 for $8.00.

PRIVET, ALBIDUS. (Narrow-Leaf Privet)—A hardy, spreading, fast growing, evergreen, hedge plant adapts itself to almost any soil. 12 to 18 in., 12 for $1.25, 25 for $2.50, 100 for $8.00.

PRIVET, OSIACUS. (Golden Privet)—A hardy, spreading, fast growing, evergreen, hedge plant adapts itself to almost any soil. 12 to 18 in., 12 for $1.25, 25 for $2.50, 100 for $8.00.

Japanese Barberry, Showing Single Plants and Hedge.
FLOWERING AND ORNAMENTAL SHRUBS

A Fine Group of Spreads, Barberries and other Shrubs.

In laying out new grounds or remodeling old places, nothing will so quickly beautify the home surroundings for so little money, as a few selected flowering shrubs. The larger sizes which we offer "not prepaid" are very strong field grown, transplanted plants, well branched and rooted, we are sure they will give the best satisfaction.

BARBERRY, PURPLE—Perfectly hardy here, but requires a little protection north of St. Paul. Grows 4 to 5 feet high. The foliage is a deep rich purple, forming a striking contrast with green shrubs. 1 1/2 to 2 ft. 25c each, not prepaid. Mail size 15c each, prepaid.

BRIDAL WREATH—This well known and popular shrub produces an abundance of double, pure white flowers in early summer. Grows 4 to 6 feet high, very hardy. 2 to 3 feet. 25c each, not prepaid. Mail size, 15c each, prepaid.

CALYCANTHUS, Sweet—An old-fashioned shrub of strong, upright habit. Chocolate colored flowers of delightful fragrance hide themselves among the broad, lustrous foliage. Thrives in open or shaded places. A very choice shrub. 1 1/2 to 2 feet, 25c each, not prepaid. Full size, 15c each, prepaid.

CARAGANA, Siberian Pea Shrubs—A large shrub with bright green feathery foliage. Flowers yellow, produced in numerous small clusters in late spring. Very hardy. 15 to 24 in. 25c each, 3 to 4 feet plants, 35c each, not prepaid. Mail size, 15c each, prepaid.

CORNUS, Siberica—The true Siberian Osier—Tall, spreading shrub, extensively planted, single or in groups on the lawn, as well as for hedges. The rich bright red branches make it one of the most beautiful shrubs for winter effect. Very hardy in all localities, and easily grown. 2 to 3 feet plants, 25c each, 3 to 4 feet, 35c each, not prepaid. Mail size, 15c each, prepaid.

CORNUS, VARIEGATA—The leaves of this variety are variegated white and green. A beautiful shrub to plant with green foliage shrubs for con rast. 2 to 3 ft., each 25c, 3 to 4 ft. each 50c, not prepaid.
Hardy Flowering Shrubs. Cont'd.

**PHILODENDRON, Mock Orange or Syringa.**—The prettiest golden leaved shrub for the Northwest, retaining its color all summer. It is of rather dwarf habit, grows very bushy, and makes a very showy shrub for the lawn or borders. 2 to 3 ft., each 35c., not prepaid.—Mail size, each 15c., prepaid.

**PHILODENDRON, Aurea.**—A beautiful golden leafed Syringa which attains a height of 8 to 10 ft. Flowers are large, creamy white, deliciously fragrant, and appear in greatest perfection in May and June. Splendid for border plantings, hardy everywhere, and as a valued shrub, with its drooping and fragrant flowers, a great attraction. A very hardy shrub, excellent for the Northwest, where its bright red flowers can be seen to advantage. 15c., each 25c., prepaid.—Mail size, each 15c., prepaid.

**PHILODENDRON, Grandiflora ALBA.**—Similar to above variety, very large, pure white, deliciously fragrant. 15c., each 20c., not prepaid.—Mail size, each 15c., prepaid.

**PHILODENDRON, HUNGARIAN.**—See Novelties.
HARDBY CLIMBING PLANTS.

The wonderful grace and beauty of well placed vines can add greatly to the comfort and enjoyment of any home. A porch without vines is like a house without carpets. Outbuildings, fences and trunks of old trees can also be made very attractive by the use of these hardy vines. We grow a fine assortment of these plants for covering arbors, arches, walls etc.

The large size plants, which we offer "not prepaid" are extra strong, transplanted field grown plants two and three years old.

The mailing size plants are strong, well rooted, one-year old field plants, and should not be confused with greenhouse grown stock.

**AKEBIA QUINATA**—One of the best and most graceful of our hardy climbers with deep purple, sulfur-like foliage and numerous clusters of violet-brown flowers, which have a pleasant cinnamon odor. Begins to bloom in early spring and continues for many weeks. Does best in sunny locations, on rich, well drained soil where it will grow 20 to 40 feet high. Strong 2-year old plants, 25c each, not prepaid. Mail size, each 15c, prepaid.

**AMPELOPSIS QUINQUEFOLIA**—Virginia Creeper—This is the true Woodbine, the flat flowered, finger shaped Ivy, with large handsome leaves deeply cut into 5 lobes. Its blue berries contrast with the richness of its Autumn coloring when the leaves turn a gorgeous crimson. Excellent for arbors, trellises, climbing up trees and stumps and for planting along walls. Will thrive in almost any soil and location, perfectly hardy far north and resists drought well. Strong 3-year old plants, each 25c, not prepaid. Mail size, 15c each, prepaid.

**AMPELOPSIS ENGELMANNII**—(American Ivy)—A new variety of woodbine which has long been desired. It is better equipped with tendrils by which it will climb walls of stone or brick as closely as the Boston Ivy. This variety has proved itself perfectly hardy in Minnesota, and we have no doubt but that it will occupy the same place in the North and West that the Boston Ivy does in the East. Will grow in any soil and withstand drought and heat well. Strong 2-year old plants, 25c each, not prepaid. Mail size, 15c each, prepaid.

**BITTERSWEET**—(Celastrus)—A very hardy and self twining vine, with rich green leafage and crimson berries in the fall. Blooms freely in clusters of rich orange scarlet berries, which remain on the vine till late in winter. Very ornamental and entirely free from insect pests. Strong 3-year old plants, 25c each, not prepaid. Mail size, 15c each, prepaid.

**CLEMATIS**—The Clematis should be grown more commonly than they are at present, because there is no other flowering vine which can equal them in their long lasting qualities. If given rich, deep soil and planted 3 inches beneath the surface of the soil, they will grow luxuriously.

We offer only strong 3-year old Clematis plants, as the smaller plants require considerable care and often fail to grow.

LARGE FLOWERING CLEMATIS.

**JACKMANI, PURPLE**—The well known large flowering purple clematis. The beautiful flowers, when fully expanded measure 8 inches in diameter, intense violet-purple with a rich violet appearance, distinctly veined. It blooms abundantly.

**HENRYI**—This is the finest of all large flowering white clematis, and should find a place in every garden. It is not only a vigorous grower, but a remarkably free and continuous bloomer.

**MADAME EDOUARD ANDRE**—Has been called the Crimson Jackmanni. The plant is a strong, vigorous grower, and very free in bloom. Flowers large of bright crimson-red color.

**ROMONA**—Very large, deep sky-blue flowers. A desirable new sort, being a strong, rampant grower, and a perennial bloomer.

Price of above four varieties: Strong three-year old plants, $4.50 each, not prepaid. By mail, 55c each prepaid.

SMALL FLOWERING CLEMATIS.

**COCCinea**—Scarlet Bell-Flower Clematis. A beautiful and graceful climber, with broad green leaves and very pretty flowers of intense scarlet color. Blooms freely in June and July, and continues in masses of flowers of the most pleasing fragrance. Will grow in almost any soil, and is entirely free from blight and insects. One of the finest hardy climbing plants that bloom, for the North-west. Perfectly hardy in Minnesota. Strong 3-year old plants, 35c each, not prepaid. Each 45c, prepaid.

**Paniculata**—The small flowering clematis, sweet scented Japan clematis. One of most vigorous and beautiful of all climbers. In late summer it produces dense sheets of medium sized, pure white flowers, of the most pleasing fragrance. Will grow in almost any soil, and is entirely free from blight and insects. One of the finest hardy climbing plants that bloom, for the North-west. Perfectly hardy in Minnesota. Strong 3-year old plants, 35c each, not prepaid. Each 45c, prepaid.

**SPECIAL OFFER**—The set of above 6 Clematis, strong three-year old plants, for $2.15 not prepaid. $2.75 prepaid.

HONEYSUCKLE, LONICERA.

**Golden Leaved** (Aurea reticulata).—A very desirable variety with beautifully motlighted yellow and green foliage. Flowers creamy white, very fragrant. Is also used extensively for hanging baskets on porches and verandas.

**Hall's Japan**—A vigorous growing climber, almost evergreen, as it keeps its leaves till January; it is covered from July to Dec, with fragrant flowers which are white changing to yellow.

**Scarlet Trumpet**—The hardest variety; rapid grower, producing scarlet flowers.

Price above 3 varieties: Strong 2-year old plants, 25c each, not prepaid. Mail size 15c each prepaid.

**Matthiory vine** (Lycium).—A well known, hardy, fast growing vine, handsome when covered with its small, purple flowers and later with its scarlet fruit; useful for covering screens, etc., in the shortest time.

**Strong 2-year old plants, 25c each, not prepaid. Mail size 15c each prepaid.**

**Trumpet vine** (Bignonia).—A robust, woody vine, climbing high and twining tightly with numerous roots along its stems. Great leathery, trumpet-shaped flowers of orange-scarlet color, in bloom nearly all summer. Wherever a showy flowering vine is desired it will be found most useful and pretty. Strong 2-year old plants, each 25c, not prepaid. Mail size, 15c each prepaid.

WISTARIA.

Free flowering, ornamental vines, with handsome showy flowers. They are classed among our best and hardest climbers for training on porches, arbors or trellises. We offer two varieties.

**Chinese purple Wistaria**—Bears in great profusion large drooping clusters of purplish pea-shaped flowers, somewhat resembling a bunch of grapes in size and form. Foliage is pretty.

**Wistaria Alba**—A form of the above, but flowers are pure white.

Price for either variety: Strong 3-year old plants, 35c each, prepaid. Mail size, 15c each, prepaid.

THE BETA GRAPE.

We have some very nice 1-year and 2-year old vines of this rapid growing, very hardy grape, which is so well suited for covering arbors, porches, etc. As hardy as the wild grape, requires no covering in the North. Yields an abundance of fine fruits. Strong 2-year old plants, 25c each, not prepaid Mail size, 15c each prepaid.

HARDY CLIMBING ROSES—Minnesota grown. See pages 122 and 123.
SELECT HARDY PERENNIAL PLANTS

These old-fashioned hardy garden flowers are coming more into pubic favor every year; there is no class of plants which will give better or more pleasing results for the money invested, than these hardy varieties, which require very little care and attention and yet yield a rich harvest of bloom, and add considerably in value to your property.

**HARDINESS**—The varieties not marked are perfectly hardy here without any protection, but those marked * require some covering during winter; however, even the most hardy varieties are greatly benefited by being covered with leaves or some coarse manure, which not only serves as protection, but also enriches the soil, and this in very desirable.

Our prices on Perennials are for strong field grown roots, including postage; if ordered by express at purchaser’s expense, extra large plants will be sent, or some extras put in to help pay charges.

**Price, unless otherwise noted**, each 10c, 6 for $5.00, 12 for $1.00, postpaid.

### ACHILLEA
- The Pearl—Flowers of the purest white; borne in the greatest profusion the entire summer on strong, erect stems. 2 ft. high; blooms from June till frost as a cut flower it is of great value. The finest of all plants for cemetery planting.

### AQUILEGIA (Columbine)
- Coerulea—This handsome Columbine from the Rocky Mountains is a most striking and showy kind with blue and white flowers; 2 feet high; blooms from June to August.

### AQUILEGIA, CHRYSANTHA
- The Golden Columbine—Flowers very numerous, 2 to 3 inches across, bright yellow, in bloom all summer. Height 3 to 4 feet. Easily grown in any good garden soil.

### AQUILEGIA, CANADENSE
- The native Columbine of our woods. Flowers are red and yellow. Produces its lovely flowers in great quantities. Very hardy plant suitable for shady situations.

### ASTILBE
- Japonica—A fine hardy plant forming large bushes 1 to 2 feet high. In June the white flowers appear in large feathery plumes. Valuable for moist and shady situations. Also used extensively for forcing. Each 15c, 3 for 40c.

### ASTEROIDES
- Starwort—Tall, bushy plants, producing an abundance of aster-like white flowers from July till September. Excellent for cut flowers and produces grand effects when planted in masses. The plants grow 3 to 5 feet high. One of the best late blooming perennials, of easiest culture. Each 15c, 3 for 40c, postpaid.

### BOLTONIA
- ASTEROIDES—One of the most for hardy plants. The flowers are a rich golden yellow, of graceful form and invaluable for cutting; the main crop comes during the latter part of June, but it continues in bloom the entire summer and autumn; it succeeds everywhere.

### DELPHINIUM (Hardy Larkspur)
- Formosum—The old favorite variety with grand spikes of flowers which are intense dark blue with white center; perhaps the most popular blue flower in flowers. The plant is of vigorous growth, 3 to 4 feet high, very free flowering. Blooms from July to October.

### DELPHINIUM, CHINENSIS
- Blue Chinese Larkspur—Large spikes of beautiful flowers of a lovely light blue shade. Plants grow 3 ft. high. In bloom June to August.

### DIANTHUS
- Barbatus Chinensis—A very pretty variety of recent introduction. It is a cross between the Sweet Scented Garden Pink and the large-flowering Sweet William, and it combines the good qualities of both. The plant is very hardy, of easiest culture, and truly everblooming. The flowers are single, semi-double and double; fragrant, and show a combination of the richest colors known in floriculture. For old fashioned gardens, for edging beds, bordering walks, and for naturalizing. It is splendid. No garden is complete without some of these flowers. Each 15c, 3 for 40c, 12 for $1.00, postpaid.

### Dianthus Barbatus Chinensis
- Dianthus

### ANTHEMIS
- Kelwayi, Hardy Golden Marguerite—(See Illustration at top of this page.) The most beautiful of all hardy Marguerites. The plant forms compact, dense bushes, and produces enormous quantities of large, golden yellow flowers from early spring until frost; the pretty foliage makes the plant a favorite for cutting. A delightful flower for the front of the border or at the base of a shrub. Each 15c, 3 for 40c, prepared.

### ASTER, NOVAE-ANGLIAE
- New England Aster, Purple—One of the finest hardy Asters, with showy, hardy stems, 3 to 5 ft. high. The beautiful violet-purple flower heads are borne in large clusters in September and October. Very valuable on account of its late blooming season, at a time when all other plants are done flowering. Each 25c, 3 for 50c, postpaid.

### CAMPAANULA GLOMERATA
- Clustered Bell Flower—Dense clusters of funnel-shaped violet-blue flowers; plants grow about 18 in. high and are loaded with flowers from June to August. Very pretty and easy of culture.

### CHRYSANTHEMUM MAXIMUM
- The Shasta Daisy of the Northwest. Flowers like the common white daisy, but twice as large, with good stems for cutting. A fine plant for cemetery planting, and easily grown in most any situation.

### COREOPSIS LANCEOLATA
- Early Grandiflora—One of the most popular hardy plants. The flowers are a rich golden yellow, of graceful form and invaluable for cutting; the main crop comes during the latter part of June, but it continues in bloom the entire summer and autumn; it succeeds everywhere.

### DELPHINIUM (Hardy Larkspur)
- Formosum—The old favorite variety with grand spikes of flowers which are intense dark blue with white center; perhaps the most popular blue flower in flowers. The plant is of vigorous growth, 3 to 4 feet high, very free flowering. Blooms from July to October.

### DELPHINIUM, CHINENSIS
- Blue Chinese Larkspur—Large spikes of beautiful flowers of a lovely light blue shade. Plants grow 3 ft. high. In bloom June to August.

### DIANTHUS
- Barbatus Chinensis—A very pretty variety of recent introduction. It is a cross between the Sweet Scented Garden Pink and the large-flowering Sweet William, and it combines the good qualities of both. The plant is very hardy, of easiest culture, and truly everblooming. The flowers are single, semi-double and double; fragrant, and show a combination of the richest colors known in floriculture. For old fashioned gardens, for edging beds, bordering walks, and for naturalizing. It is splendid. No garden is complete without some of these flowers. Each 15c, 3 for 40c, 12 for $1.00, postpaid.

### Dianthus Barbatus Chinensis
- Dianthus

### ANTHEMIS
- Kelwayi, Hardy Golden Marguerite—(See Illustration at top of this page.) The most beautiful of all hardy Marguerites. The plant forms compact, dense bushes, and produces enormous quantities of large, golden yellow flowers from early spring until frost; the pretty foliage makes the plant a favorite for cutting. A delightful flower for the front of the border or at the base of a shrub. Each 15c, 3 for 40c, prepared.
RANUNCULUS. Buttercup Flower.— Splendid hardy plant of prostrate growth bearing in midsummer large quantities of double golden yellow flowers. The foliage is also very pretty and distinct. An old-fashioned plant which is a favorite in every old-country garden.

RUDBECKIA. "Golden Glow"—A fine hardy plant that should find a place in every garden. It will be found excellent for cut flower purposes. The plant attains a height of 4 or 6 feet and will produce hundreds of large double flowers of brilliant, golden yellow color from July to September.

SCABIOSA. Japanica—A beautiful Perennia from Japan. The large lilac-blue flowers are borne on long stems from early summer until late fall. A splendid cut flower; the flowers will keep a long time. In full bloom late in fall, when most flowers have succumbed to frost. The plant grows 2 to 3 feet high. Each 15c, 3 for 40c.

SEDUM, SPECIFICANS. Brilliant Stone Crop—One of the most showy Sedums under cultivation. Grows 12 to 15 inches high and withstands our northern winters without injury. It is one of our finest late blooming border plants, producing bright, showy heads of rose colored flowers. The rich, glaucous leaves make the plant effective even when not in bloom.

SWEET WILLIAM. Dianthus Barbatus—These charming old-fashioned hardy plants are great favorites in every garden. Stems grow 12 to 18 inches high. Flowers are borne in greatest profusion, in large round-topped clusters. We offer three different varieties: White, Dark Velvety Crimson, and Variegated. Each 15c, 3 for 40c.

LYCIA. Adam's Needle—A very fine ornamental foliage and flowering plant. Its broad, sword-like foliage, and tall, branched spikes of large, fragrant, drooping, creamy-white flowers borne during June and July make it an effective plant for all positions. A fine plant for the lawn or for cemetery. 20c each, 5 for 80c, prepaid.

GERMAN IRIS. IRIS GERMANICA.

The German Iris is one of the most desirable early spring flowering plants. The flowers are very large, rich and beautiful in color and of graceful orchid-like form; a well-established plant produces from 50 to 100 spikes of bloom which are very fragrant and fine for cutting. Time of flowering, May and June.

Florentina—Creamy white, fragrant and early.
Fladam Chereau—Pure white, daintily edged with light blue.
Neglecta—Standard fine blue, falls deep blue, large flowers.
Pearl—Standard light lavendar, falls deep lavendar.
Queen of the Gypsies—Dusky light bronze, falls purplish red.
Souvenir—Standard bright yellow, falls with yellow, buff and purple.

PRICE: Any of the above Iris, each 15c, dozen $1.40, prepaid.
The set of the above 6 kinds, 1 each, for 75c, prepaid.
BEAUTIFUL HARDY PHLOX.

One of the most hardy and finest of our perennial plants. Phlox are of easy culture, vigorous habit and produce from July until late in the autumn flowers of fine form and substance and of bright and varied colors. If the first flower spikes are cut off as soon as they bloom, and the plants are given a dry soaking, the second crop of flowers will be much finer and last longer. They succeed in any good garden soil and may be planted out in the spring or in autumn. The plants should be set about eighteen inches apart.

The best effects are had with Phlox are produced by planting masses of each color, not less than six and even as many as two dozen or more plants of one color.

TWELVE OF THE BEST HARDY VARIETIES.

COQUELICOT—Large, brilliant orange-scarlet flowers; large and compact truss. Tall; midseason. One of the best of the new introductions.

CROSS OF HONOR—Rose-ilmue, bordered white in form of a cross. Very unique.

ECLAIREUR—Large, brilliant rose-carmine, with large, lighter halo. Tall; late.

JAMES GARLAND—Pure white with large crimson center. Tall; late.

MISS LINGARD—Waxy white, faint lilac eye. Loudest flower spikes of any Phlox. The earliest of all, blooms all summer; good for cut flowers.

NRS. K. ANDRIST—Mottled white and purple. An odd and striking color.

NIQUE—The darkest, richest colored Phlox, velvety violet-red with crimson base. Large and compact truss. A mass planting of this produces a gorgeous display.

PLUTON—Deep wine-red, very showy, large flowers. A rich colored Phlox.

PROF. SCHLIEEMANN—Clear bright rose with red eye. Very fine, a free bloomer.

VON HOCHEBERG—The ideal crimson-purple, very striking and rich color.

Price of the above named varieties of Best Hardy Phlox: Mail size, each 25c, 3 for 65c, 6 for $1.00, 12 for $1.75, prepaid.

Strong, field grown, vigorous Roots, each 30c, 3 for $1.00, 6 for $2.25, not prepaid.

GORGEOUS PAEOINES.

The Paeony is a noble flower, almost rivaling the rose in coloring and perfection of bloom, and producing during its flowering season a gorgeous effect, not surpassed by any other flower. It is perfectly hardy, requiring no protection whatever; is not troubled with insect pests or diseases of any kind, and once planted takes care of itself, increasing in size and beauty each year. No other flower is so well adapted for large showy bouquets. The Paeony may be planted either singly on the lawn or in the border, where the lawn is extensive, a large bed makes a grand show. Blooms in June. The roots should be planted so that the crowns are covered with not more than two inches of soil.

TWELVE OF THE BEST PAEOINES.

AGNES MARY KELWAY—Large flower, deep rose, with cream flowers and crimson flecks. Mid-season. Fine new variety.

ALBA SULPHUREA—White with light yellow, large fall flower.

ELEGANS—Beautiful lilac white, flecked crimson. Fine full flower.

FELIX GROUSE—Brilliant, dazzling dark red, enormous ball-shaped flowers, quite fragrant. Free mid-season bloomer. The finest red Paeony. Be sure to include this in your order.

FESTIVA MAXIMA—Largest and finest white, with few crimson markings in the center. Fragrant. Splendid cut flower.

L’ESPERANCE—Large, loose, flat flower, bright pink. Medium early, free bloomer, fragrant. One of the favorite sorts.

Prices for the above named varieties:

Mail size, each 25c, 3 for 65c, 12 for $2.25, prepaid. Strong roots, each 35c, 3 for 90c, 12 for $3.25, not prepaid.

PAEOINES IN MIXTURE.

We have a few thousand mixed Paeonies of the best and finest double kinds, of all shades and colors, including many fine varieties. This is an extra good mixture, and at the low price we ask, everyone should plant a dozen or more of these lovely Paeonies, which we offer:

Mail size, each 15c, 3 for 40c, 12 for $1.40, prepaid. Strong roots, each 20c, 3 for 55c, 12 for $1.75, 100 for $12.00, not prepaid.

NEW PEA．NY, "PRINCESS BEATRICE".

Exquisitely beautiful, large flower. Light pink, collar cream white, flecked with crimson, fringed and ruffled. Strong and vigorous grower, free bloomer, medium height, fragrant. Early mid-season. Considered one of the finest new Paeonies introduced in late years. Mail size, each 35c, 3 for 90c, prepaid. Strong roots, each 50c, 3 for $1.35, not prepaid.

FOUR LARGE FLOWERING JAPANESE IRIS.

Perfectly hardy plants of easy culture, blooming profusely during June and July.

GEGKA-NO-MAI. (Waves under Moonlight)—Glistening pure white, large flowers with six petals. Early and free bloomer. The finest white sort.

HANNA-NO-NISHIKI. (Flower Embroidery)—Very double blooms with fine arrangement. Color or a distinct claret-pink, with fine white veins.

MAHOGANY—Large double flowers, purple mahogany red. The latest to bloom. Extra fine.

PURPLE AND GOLD—Enormous double flowers, often ten inches across, early and free blooming; one of the very best varieties. Color rich violet-purple with white petals, tipped violet.

Price of above Iris: Each 25c, 3 for 65c, 12 for $2.35, prepaid.

Paeony, Louis Van Houtte.
These roses combine hardiness, vigor of growth and size of flower with great variety. They are very popular and the most useful of all roses for cutting. The varieties listed are those which will be sent out in the spring and bloom in the same year.

**Baby Rambler Roses.**

_Crimson Baby Rambler._—One of the best hardy bedding roses in existence. The plants are very vigorous and grow 18 to 24 in. high. The flowers are borne in clusters of 9, 10 or more to the cluster. It is perfectly hardy and blooms all the time indoors and from May to November outdoors. Splendid for making a border. **White Baby Rambler._—A beautiful little bedding rose, especially desirable for a border around beds of the Crimson Baby Rambler roses.** Blooms all summer through with amazing freedom. Flowers creamy white passing to snow white.

Price for above Baby Rambler Roses: Extra strong 2 year old field plants, each 35¢; 6 for $1.75; 12 for $3.25; one of each, 60¢, not prepaid.

Select field grown mowing size plants, each 25¢; 3 for 65¢ postpaid. One of each for 45¢ postpaid.

**Hardy Climbing Roses.**

As an ornamental plant for covering porches, side walls, pillars, fences, etc., they are unequalled, calling forth more admiration than anything else that can be similarly used. They are very hardy.

_Baltimore Belle._—Beautiful soft blush, turning pure white when fully open. Very hardy and of rapid growth.

_Queen of the Prairie._—Bright rosy-red flowers. Very hardy.

_Seven Sisters._—An old and very popular rose, producing splendid crimson flowers which turn almost pure white, often showing crimson, red, pink and white flowers at the same time. One of the hardiest.

_Russell’s Cottage._—Beautiful flowers of rich deep pink color; they are large, perfectly double and very fragrant.

Price for large 2 year old field plants, each 30¢; the set of 4 for $1.05, not prepaid.

Select field grown mowing size plants, each 25¢; the set of 4 for 85¢ postpaid.

**Hardy Rambler Roses.**

_No class of roses has come into popular favor so rapidly as these. Of hardy, sturdy nature, a vigorous and quick grower, producing the lovely flowers in truly wonderful profusion. The flowers are borne in immense clusters, each one forming a nice bouquet in itself. Hardy everywhere. All our Rambler Roses are grown on their own roots, making them far more satisfactory than budded or grafted plants.**

_Crimson Rambler._—Bright crimson, semi-double flowers.

_White Rambler._—Small, pure white flowers, very fragrant.

_Yellow Rambler._—Lovely flowers of bright yellow color; very fine.

_Duchess Perpetual._—Very double flowers, sweetly-scented, of a beautiful shell pink color.

Price for strong 2 year old field plants, each 30¢: the set of 4 for $1.05, not prepaid.

Select field grown mowing size plants, each 25¢; the set of 4 for 85¢ postpaid.

**The 4 Hardesty Moss Roses.**

These fine Moss Roses deserve a place in every garden. In the far North as well as in the South. The moss rose is strong and vigorous, perfectly hardy and very desirable for outdoor culture. The flowers and pads are very large and handsome; remain in bloom a long time and are highly prized on account of the beautiful moss covering.

_Blanche Moreau._—Pure white flowers of perfect form.

_Cristata._—A fragrant, deep pink colored moss rose.

_Luxembourg._—Flowers of rich, glowing crimson, beautifully mossed. **Princess Adelaide._—Beautiful reddish burst, large flowers.**

Price for large 2 year old field plants on their own roots, each 30¢; the set of 4 for $1.05, not prepaid.

Select field grown mowing size plants, each 25¢; the set of 4 for 85¢ postpaid.
NOVELTIES & SPECIALTIES.

HARLEY HYDRANGEAS.

THE BEST FLOWERING SHRUBS FOR THE NORTHWEST.

HYDRANGEA, PANICULATA GRANDIFLORA. Large flowered Hydrangea — (See illustration on page 110.)—The flowers, which are borne in great profusion in June, July, August and September, are a foot long, during August and September, as a rule, when few shrubs are in flower, are white when they first open, gradually changing to rose color, and remain in good condition for weeks. They dry like everlasting flowers and can be kept indoors all winter. The plants are hardy as the oak, grow 4 to 6 feet high and bloom the same season they are planted. Unsuspected for specimen plants or groups on the lawn, in parks or cemeteries. Strong plants, 1½ to 2 feet high, each 25c., 2 to 3 feet, each 35c., prepaid. - Mail size, each 15c., prepaid.

TREE HYDRANGEA—The above described large flowered variety. These fine trees are 4 to 6 feet high with good stems and splendid crowns. They are very effective for the lawn or park; or planted along the sidewalk or driveway, about ten feet apart, they make a most beautiful sight when in full bloom. Perfectly Hardy. Plant one or more of these beautiful trees and you can show your friends something extra nice and not commonly seen. Price each 75c., 3 for $2.00, 12 for $7.00, not prepaid.

HYDRANGEA, ARBORESCENS. Everblooming or Snowball Hydrangea—This magnificent Hydrangea shrub is one of the most valuable and beautiful shrubs for the American garden, coming into bloom just after the passing of all the early spring shrubs and continuous bloom from June thru August. The form of the flower is more like that of the Snowball than that of the Hydrangea, hence the name; the blooms are of the very largest size and pure snow white color. Thrives well in the North. 1½ to 2 feet, each 35c., not prepaid. - Mail size, each 15c., prepaid.

DOUBLE FLOWERING CRAB APPLE.

The most beautiful of all the flowering Crab Apples and one of the finest of all hardy ornamental shrubs. Forms a low bushy tree, which is covered in early spring with masses of large, very fragrant, beautiful, double flowers of delicate pink color. At a distance the tree appears to be covered with dainty little roses. This is the ideal tree for a small yard and for cemetery planting. Price: 3 to 4 feet, each 75c. not prepaid.

HUNGARIAN LILAC.

A really valuable acquisition to the many new varieties of this well known and highly prized class of shrubs. Of vigorous, upright growth, 6 to 8 feet high, with stout branches. Leaves broad, shining dark green. The beautiful violet-purple flowers appear generally in large panicles. It blooms late, generally after all other Lilacs are in bloom, thus prolonging the flowering season. It hardiness, richness and freedom of bloom, handsome foliage and easy culture recommend this variety for general planting. Price: 2 to 3 feet, each 50c., 12 for $5.00, not prepaid.

Hardy Flowering Bulbs.

For fall planting we offer a very complete line of the very best quality Dutch Bulbs, such as Tulips, Hyacinths, Narcissus, Lilacs, Crocus, Snowdrops, Blue Bells, etc. Write for price list.

DOUBLE FLOWERING PLUM.

A very hardy small tree of the Plum family, one of the finest, hardy, spring-blooming shrubs in cultivation. Of vigorous, healthy and quick growth, forming broad, spreading tops, with broad, three-toothed leaves. One of the finest hardy spring blooming shrubs for our northern climate. Early in the spring before its leaves appear, the whole tree is decked in a fleecy cloud of very double, light pink blossoms, which completely cover the branches. Can be grown in bush form if desired. As a single plant for the lawn it is very effective. It makes a good shrub to plant in groups with other shrubs. Price: 3 to 4 feet, each 50c., not prepaid.

TWO NEW HARDY CLIMBING ROSES.

THOUSAND BEAUTIES or "TAUSENDSCHEN"—A sensational new climbing Rose from Germany, producing on the same bush so many different colored flowers that it is impossible to describe the variations; hence the very fitting name "Thousand Beauties". Blooming profusely from the beginning of June until the last of July, the double flowers appear in large clusters. The colors run from delicate balsam or tender rose thru the intermediate shades of bright rose and carmine, with white and yellow tints showing. There is no other rose in cultivation like it. It is a strong grower, with but few thorns, and magnificent foliage, impervious against mildew; absolutely hardy in the open ground everywhere. It has created a very general sensation, and has been awarded numerous medals. The most remarkable Rose of its kind in the world. Minnesota grown, 2 year old field plants, each 40c., not prepaid. - By mail, each 30c., prepaid.

THE BLUE ROSE "WEILCHENBLAU"—The most sensational introduction of the 20th Century is the Wonderful Blue Rose, and already it has attained such widespread popularity that it will be hard to supply the enormous demand for it. The flowers are produced in clusters, similar to Crimson Rambler, are semi-double in form, of medium size, and are borne profusely; the color is steel blue. Very similar to that seen in the delicate blue of the flower of Clematis Jackmanii. It is a strong, vigorous climber, and as a porch cover, or grown on a pergola, the plant is much superior to the Rambler, as it is absolutely free from attacks of mildew or insects and is decidedly ornamental from early spring to late in the fall. Not the least of its merits is its great hardiness and vigor, as it will thrive and bloom marvelously in the coldest parts of the country. Minnesota grown, 2 year old field plants, each 40c., not prepaid. - By mail, each 30c., prepaid.

FOR OTHER HARDY MINNESOTA GROWN ROSES SEE PAGE 122.
NEW HARDY GRAPE—Dakota.

This splendid new variety is hardy in our northwestern states without winter protection. The Dakota is a strong grower, but not as rampant as the Beta. The bunches are quite large, compact, with shoulders. The berries are large, nearly as large as the Concord, of black color, and flavor it is the sweetest of all hardy grapes. The Dakota flowers perfect and sets fruit well, bears early and red berries every year. A superior grape for jelly, makes excellent red wine and unfermented grape juice, is also quite good for a table grape. The vine makes the finest regular growth on a trellis and is well suited for covering arbors, porches, etc. We can offer only one year old plants. Price: Strong, field grown plants, each 60c, 3 for $1.65, 12 for $6.00, prepaid.

THE HARDY GRAPE—Beta.

This splendid variety was introduced by the Minnesota Experiment Station, and is the hardest of all grapes, withstanding our severe winters without protection. The plant is a strong, vigorous grower and bears fruit abundantly. The bunches are long, with small shoulder; berries of medium size, jet black, of peculiar aromatic flavor. Splendid for wine, jellies, etc. Price: 1 yr. plants, by mail, each 25c, 3 for 65c, 12 for $2.25, prepaid.

NEW GOOSEBERRY—Carrie.

Considered the hardiest, healthiest, most productive and best all around gooseberry grown. The plant is a very strong grower, the branches being almost thornless. The fruit is of medium size and is produced in clusters, which accounts for the fabulous yields that this variety is credited with. The berries are large, rich in color, of good quality. The best and most profitable variety for the North. Price: Strong, 2 year old plants, each 30c, 12 for $3.00, 25 for $5.50, 100 for $20.00, not prepaid. By mail, 1 year old plants, each 25c, 12 for $2.50, prepaid.

$600.00 IN CASH PRIZES!

For BEST APPEL ORCHARD of 1 ACRE

OFFERED BY THE MINNESOTA STATE HORTICULTURAL SOCIETY.

Take advantage of this great offer and start your orchard this spring. The society requires that trees be planted 25 by 30 feet apart, shape of orchard to be rectangular. Only one variety to be planted in a row. Four-eighths of the trees must be the Wealthy. The one other variety to be selected by each competitor. Only 56 trees are required to plant one acre and we recommend the following varieties for best results and largest returns:

48 Wealthy, -- 8 Northwestern Greening.

To help with this splendid work our State Horticultural Society is doing, we offer the lot of 86 trees at the following low rates:

3 to 4 feet, 2 year old trees, the lot of 56 trees for only $5.45, not prepaid.
4 to 8 feet, select 2 year old trees, the lot of 86 trees for $8.25, not prepaid.
8 to 12 feet, extra fine 3 year old trees, the lot of 56 trees for $15.53, not prepaid.

And to show you we mean business, we agree to pay all freight charges on your order for Nursery Stock if same amounts to $10.00 or over.

The above varieties are hardy and well suited for our northern climate. Some of the trees may be top-grafted if other varieties are desired later. You may select any one other variety if preferred. In place of the N. W. Greening we mention beside the Wealthy, in this special offer. The 5 to 7 feet stand best chance in competition for these prizes. Do not overlook this opportunity to secure some of this Prize Fruit. Get busy and get started right by sending your order to us now. We guarantee best quality stock and varieties true to name. For further information write us for free circular.
NOVELTIES AND SPECIALTIES. Continued.

TREE GOOSEBERRY.

These Gooseberries in standard or tree form are budded on very hardy stems, about four to five feet high, of the Ribes family, to which the Currant and Gooseberry belong; they are just as hardy as the bush form and will do well anywhere where the Gooseberry and Currant are hardy. In Europe they have been propagated for years and can be found in almost every garden. You will find the berries on these trees much larger and sweeter, and so much easier to pick than raised in bush form. Besides the little trees are very ornamental on the lawn, along walks or in the garden. The trees we offer are all budded on the very best varieties, have strong branches with two year tops. They are easily transplanted and bear the next year. Well adapted to our northwestern territory and perfectly hardy. The accompanying illustration shows one of our Gooseberry Trees, photographed at our Nursery Grounds. Price: each 90c, 12 for $10.00, not prepaid.

TREE CURRANT.

The trees we offer are of the best improved varieties and the largest fruited kinds. A Tree Currant makes an attractive lawn tree and a row of them in the garden is well worth having. Our description of the Tree Currant applies to the Tree Currant. Price: each 90c, 12 for $10.00, not prepaid.

KLONDIKE CURRANT.

A splendid variety of northern origin, very hardy and especially adapted to our northwestern climate. Berries are large, bright red, borne on big, dense clusters on long stems, which makes picking easy. Flesh meaty, with plenty of pulp when eaten raw or when cooked. Flavor rich sub-acid, with no musky flavor when fresh—but when eaten with sugar and granulated the berries taste like sweet cherries. The berries cook up splendidly and make the very best preserves, jelly or jam. As the flesh of the berries is firm, the skin tough, and preservingqualities the best, Klondike Currants ship well. The bush is a healthy, sturdy grower, and gets quite large in a very short time. It will mature nearly all the fruit the branches can hold up, but if fruit is thinned out, the berries will be larger and finer. No seasons are skipped—croons come every year. The bush seems to thrive well in most any soil and produces good crops.

Price for strong 2 year old plants, each 30c, 12 for $3.00, not prepaid.

By mail, 1 year old plants, each 25c, 12 for $2.50, prepaid.

SALMON BERRY.

An odd and curious berry plant of very strong growth, forming nice ornamental bushes, 2 to 3 feet high. The fruits are very large, salmon-red, edible, but the plant is cultivated mainly for its fine ornamental appearance. The leaves are large, broad, closely resembling a grape leaf. The many clusters of the large flat flowers are very attractive. Price: Large 3 year old plants, each 35c, 3 for $1.00, not prepaid.

BALTIMORE, MD., SEPT. 15th, 1913.

Enclosed an order for St. Regis Everbearing Raspberry plants. The Pride of Minnesota Fall Bearing Strawberry plants you sent me this spring are doing fine and NOW bearing.

G. FALKENBerg.

FARIBAULT, MINNESOTA.

THE “IDAHO” — The Idaho is one of the hardiest of all Red Raspberries, having withstand a temperature of 30 degrees below zero. We consider it the best of the Everbearing varieties suitable for culture in the Northwest. The plant is a strong grower, making stocky, upright canes, rarely growing over 3 to 4 feet high. The fruit is very large, some berries attaining over one inch in diameter, of a deep rich color, very attractive. It is very fine flavored. The plants are continuously productive, fruiting thru the longest season of any red Raspberries. For home use and near markets no better Raspberry could be found. Price: Each 15c, 12 for $1.50, 100 for $7.50, not prepaid. — By mail, each 20c, 12 for $2.50, not prepaid.

THE ST. REGIS — Also called “Early till Late.” The only Raspberry known that will yield a crop of fruit the first season planted. The fruit is medium large, of a beautiful rich crimson color when ripe, rich in sugar, and will stand shipping better than any other variety. It is the earliest Raspberry to ripen, and gives a crop of berries all summer and autumn. It succeeds well upon all soils, and the canes are absolutely hardy. For home garden especially, the St. Regis Everbearing Raspberry is very attractive. Price: Each 15c, 12 for $1.50, 100 for $7.00, not prepaid. — By mail, each 15c, 12 for $1.25, prepaid.

“SUNBEAM” RASPBERRY.

The new hardy Red Raspberry—best for the Northwest. This valuable new variety, originated by Prof. Hanson of South Dakota. The plant is very hardy and productive. Fruit medium size, bright red, and of excellent quality. Bears well for a longer time than any other Red Raspberry, excepting only the Everbearing varieties. For our northern territory it is of inestimable value on account of its extreme hardiness. Price: Each 5c, 12 for 60c, 25 for $1.50, 100 for $5.00, not prepaid. — By mail, each 10c, 12 for $1.00, 25 for $1.75, prepaid.

FARMER SEED & NURSERY CO., FARIBAULT, MINNESOTA.
NEW PREMIUMS AND SPECIALTIES.

GIVEN FREE TO OUR CUSTOMERS.

We have added several new premiums this year which we feel sure will be appreciated by young and old. With a little effort on your part it will be an easy matter to secure one or more of these premiums. Should your individual order prove insufficient to secure the desired article call on your friends and neighbors and get their orders. You will be well repaid for your efforts by the high grade premiums we are offering.

HOW TO CLASSIFY YOUR ORDER.

CLASS 1—consists of vegetable seeds or flower seeds in packets, ounces, half-pints and one-quarter pounds. (All collections are excluded).

CLASS 2—means an order for our Clover Grass Mixtures as listed on pages 13, 14 and 15.

CLASS 3—will include seed prains, seed corn, seed potatoes and bulk garden or flower seeds not classified above.

NOTE—Alfalfa, Timothy and Clovers are not included in the above classes and no premiums can be allowed on these seeds.

PRINCESS ORNAMENTAL CLOCK.

This is one of the most handsome and useful premiums we have ever offered. It is finely made with one of the best American movements. Sells at 10 inches high and 6 inches wide. Finished in either gold or bronze, and guaranteed as a correct time-piece for three years. Any home would be proud to own one of our Princess Clocks. Price. $1.50.

AS A PREMIUM—We offer this clock with a $12.00 order of Class 1, or a $20.00 order of Class 2, or a $25.00 order of Class 3.

U.S. 24-lb. Scale

The most practical scale for all purposes. Capacity 60 pounds by 2 ounces. Finished in black enamel, with aluminum dial, which will not tarnish. The springs used are tempered in oil making them tough and durable so they will not weaken. On account of the durable spring the scale will weigh exactly the same for years. Has extra heavy post and top and will hold anything that can be weighed on a scale of this capacity. We guarantee this scale absolutely correct at all weights. Height 10 inches. Shipping weight 15 pounds. Price $2.00.

U.S. 60-lb. SCALE.

AS A PREMIUM

We offer this Scale with a $15.00 order of Class 1, $25.00 order of Class 2, $35.00 order of Class 3, at catalog prices.

U.S. 24-lb. FAMILY SCALE.

Made of steel with white enameled dial. Finished in black enamel. Is light, and weighs 21 lbs. by ounces. Regulated by turning the brass screw on top. Every scale is examined and warranted correct before leaving the factory. Weight 6 lbs. Price $1.15.

AS A PREMIUM

We offer this scale with a $10.00 order of Class 1, $15.00 order of Class 2, $20.00 order of Class 3, at catalog prices.

MESH BAGS.

Free with a $15.00 order of Class 1, $25.00 order of Class 2, $30.00 order of Class 3.

As premium on same terms as above and 50c additional cash.

ALL PREMIUMS ARE F.O.B.
he Best Apples for the Northwest.

SEE COLOR PLATE ON SECOND COVER PAGE.

ANTISDL—Season November to January. The most valuable of all the hardy Russian Apples. The trees are of fine form, upright, but spreading with age, and are very hardy and strong growers. They commence to bear when very young and bear regularly enormous crops of beautiful fruit. The apples are of medium size, roundish conical, and of dark red color, overlaid with a blue bloom, and starred with minute white dots. A beautiful fruit when well ripened. The flesh is white with green streaks, fine grained, juicy, pleasant subacid. Splendid for market and for table use. A good keeper. Equal with Wealthy in hardiness and succeeds splendidly here in the Northwest.

HIBERNAL—Season November to December. The hardest of all apples. Very valuable in the extreme North; it will succeed in localities where no other apple will live. Tree vigorous, very productive. Fruit large, irregular, oblate, greenish-yellow with a dull bronze-red on sunny side and a large patch of russet radiating out irregularly over nearly the entire base. Flesh yellowish green, medium fine, juicy and excellent for cooking, also fine for table use when fully ripe. Tree bears early and regularly. It is the best tree to plant for top-working with more tender varieties.

WEALTHY—Season Oct. to Feb. A vigorous, spreading grower, very productive and hardy. An early and abundant bearer. Fruit above medium to large, oblate, very regular, smooth, light yellow, as First. The skin is wholly covered with bright red splashes and stripes. A beautiful fruit. Flesh white, often stained with red, tender, very juicy, splendidly subacid, very good for table use and cooking. Profitable market sort. The most popular apple grown in our state and in the Northwest generally. The Minnesota State Horticultural Society recently awarded this variety to all apple orchards in our state be planted four-fifths to Wealthy.

SPECIAL OFFER—Three Wealthy, Three Northwestern Greening, Two Hibernal, Two Anisim and Two Beach’s Sweet. Extra fine 5 to 7 feet trees for $4.00, not prepaid. Select four peck $1.00, or $2.00 prepaid for same collection in 5 to 4 feet trees for $1.50, not prepaid. For prices on larger quantities at Apple Trees see page 99.

Our “Sure Crop” Vegetable Collection.

SEE COLOR PLATE ON THIRD COVER PAGE.

BEET—Black Queen.—One of the very finest beets for home use and market. A distinct, new variety of round-shaped form, and medium size, with a very smooth surface. The flesh is very fine grained, crisp, tender and sweet, and never wooly or stringy; its color is the darkest of all beets, a rich, deep blood crimson. In quality this beet is surpassed by none. The leaves are small, borne on slender stems. Season December to March. Originated in Waupaca County, Wisconsin. A strong, vigorous tree, very hardy, bears young and yields big crops of fine apples. Fruits large to very large, oblong, transparent yellowish green. Flesh firm, juicy. It is claimed this tree has withstand a temperature of 50 degrees below zero without damage. Should be given plenty of space in the orchard to secure large, even fruits.

CARROT—F. S. & N. Co.’s Superior Market.—This splendid variety resembles the Danvers Half Long in shape, but is of much finer texture; flesh deep orange and tender, and never wooly. Packet 10c, ounce 20c, 1/4 pound 50c, pound $1.50, postpaid.

ONION—Faribault Red Globe Wethersfield.—Earlier and more productive than the Southport Red Globe, and a superior variety for home use. The perfect globe type is thoroly established in this variety, and the onions are always of the uniform shape. This variety differs from other kinds of Red Globe Onions not only in purity of stock and perfection of type, but also in earliness, productivity, beauty of color, and keeping qualities. This is a splendid variety for home use. The flavor is rich, crisp and tender, matured in 80 days, and makes a good storage onion. Packet 10c, oz. 20c, 1/4 lb. 50c, lb. $1.05, postpaid. — Not prepaid, 8 lbs. $5.75, 10 lbs. $7.00.

RADISH—First Crop.—A very superior strain of extra early radish, somewhat resembling the well known French Breakfast, but a bit larger and sweeter to the taste. The white tunic is well developed and gives this novelty a most attractive appearance. The roots mature very quickly, have a short top, and the flavor is all that can be desired. The flesh is pure white, mild, crisp and tender, remaining solid a long time. Can be highly recommended for market as well as for the home garden. Packet 10c, oz. 15c, 1/4 lb. 45c, lb. $1.25, postpaid.

EXTRA EARLY PEA—Saxonia.—First early round seed, white pea with main crop characteristics and large sized pods. It is fully as early as Harmony and Best but much larger podded. It furnishes as big crops as the best main crop varieties and the quality is splendid for all purposes. Of great hardness and vigorous growth, attaining a height of 2 feet. The pods are 20 to 4 inches long and about twice as large as the best strains of First and Best, they appear mostly in pairs and in great quantities. The crop is matured practically all at once, a decided advantage for the market man. The quality is first class in every respect. We have thoroughly tested this grand new variety and can highly recommend it to our market gardeners. Packet 10c, 1/2 pt. 20c, quart $1.25, postpaid. — Not prepaid, quarter bushel sack $1.25, peck $2.25, bushel $5.50.
